Service Weight - Pennsylvania		23.4%	31.3%	21.2%	4.4%	2.5%	82.9%	17.1%	100.0%

Notes:

[1] Represents core utilization only, exclusive of demographic change impacts; includes expected impact of changes in business day content.

[2] Represents expected changes in intensity of services provided.

[3] Represents core unit pricing increases, exclusive of service mix / intenisty of services impact;

[4] Impact of member cost-share leveraging on net claims cost trend.

[5] Represents trend impact of age and gender changes; No provision included for Small Group business (age/gender community rating variable).

[6] Pricing models do not distinguish between Primary and Specialty medical care; same trends shown for both.

July 20th, 2020

Ms. Cherri Sanders-Jones
Pennsylvania Insurance Department

Re: Small Employer Rate Filing for United HealthCare Insurance Company (UHIC)
Pennsylvania SERFF ID# UHLC-132374424

Dear Ms. Sanders-Jones,

The purpose of this letter and attached supporting documents is to respond to your Objection Letter submitted 7/7/2020.

- In response to question #1, a post submission update has been submitted in SERFF.
- In response to question #7, Table 10 of PA Actuarial Memorandum Exhibits have been updated. Column L has been updated using the PID required formula as part of the calculation. Detailed development of Column K and Column L in Table 10 can be found in Exhibit 11 "11 – AVCS Calc" in the Rate Exhibits. Rates Exhibits in Excel is uploaded to SERFF.
- In response to question #9 and 10, the 2019 experience period risk adjustment amount in Table 2 of PA Actuarial Memorandum Exhibits has been updated to reflect the department calculated revised risk adjustment transfer amount sent on June 30th, 2020. With this change, Actuarial Memorandums, URRT, Rate Exhibits, Plan Design Summary, Federal Actuarial Memorandum and Federal Rates Templates are also updated accordingly.
- In response to question #12, we are putting a factor of 1.000 for COVID in our filing.
- In response to Note to Filer received on July 20th, a consumer friendly justification, PDS and Rate Exhibits in Excel are uploaded to SERFF.

Should you have any questions or need any additional information, please contact me at [redacted] or [redacted].

Sincerely,

[redacted]

Introduction:

July 7, 2020

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided by July 16, 2020. If you have any questions or difficulties in providing the information within this time frame, please call me.

Please note, each response to a Department data call must contain a cover letter that details the changes made to the Actuarial Memorandums and PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

1. In response to question 1, you updated Table 10 which changed the Proposed Rate Change in cell AC 15. Please provide a post submission update to modify the Rate/Rule Schedule tab rate change information.

A post submission update has been submitted.

2. As a follow-up to question 12, please provide by service category the emerging data and resulting trend for the 2020 calendar year y-t-d as of end of May. The information previously provided was for years 2018 and 2019.

Please see objection response excel workbook tab 2.

3. As a follow-up to question 16, please provide support for using a trend rate of 9.13% in the development of the base rate while the trend information in the PA Rate Template is 8.06%.

The trend information in the PA Rate Template does not include leveraging trend. The difference between 9.13% and 8.06% is due to leveraging trend, which is 1.0%.

4. As a follow-up to question 17, please provide quantitative and qualitative support for the items causing a need for the “Balancing Item” adjustment in row 27 of the response exhibit file.

There are no items included in the Balancing Item. The Balancing Item is used to match the discrepancy between URRT development and our final pricing. The Part I Unified Rate Review Template does not demonstrate the process used to develop our rates. Rather, it represents information required by federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges, and for certification that the index rate is developed in accordance with federal regulation and used consistently and only adjusted by the allowable modifiers. The Balancing Item adjustment is needed to produce rates that are consistent with our rating system.

5. As a follow-up to question 18, please provide quantitative support for the development of the full credibility amount of 360,000 member months.

The credibility threshold of 360,000 member months, or 30,000 members, was developed from an internal national study of Allowed PMPM claim costs.

This study used resampling (also known as bootstrapping or Monte Carlo simulation) to understand the underlying distribution of data. Resampling refers to the use of the observed data to produce new hypothetical samples, the results of which can then be analyzed. This credibility study uses resampling as its method to evaluate confidence intervals (CIs) around a particular cohort's Allowed PMPM (the normalized weighted average / mean).

The simulation involved the following steps:

1. Pull random groups – this creates a subset of the block of business
2. Sum member months until reaching the threshold level
3. Calculating statistics / CIs, then
4. Repeat 1,000 times

The company decided that full credibility would be at 95% confidence interval. This study indicated 360,000 member months would be full credibility.

6. The following questions pertain to the response to question 19:

a. Please provide support for not applying any adjustment (e.g., statewide premium trend) to the calculated 2019 risk transfer amount in developing the 2021 risk transfer amount

The 2021 projected risk transfer amount assumes same transfer percentage as 2019 but is applied to projected index rate which is trended.

b. Please provide support for applying a percent of premium value (row 20 of the "14 – Risk Adj" tab in the support file) to an allowed claim amount (row 21 of the same tab) in the development of the risk transfer amount

Please see objection response excel workbook tab 6.

c. Please provide support for applying the projected paid-to-allowed ratio of 0.797 to the projected risk transfer amount, which already reflects a paid amount and should be input on tab II of the PA Rate Template as a paid amount

The risk adjustment payment in URRT Worksheet 2 starts with the index rate and is on an allowed basis. Paid to allowed ratio is not used in calculating the risk adjustment payment of -$36.15 PMPM. CMS URR Instructions (pages 15-18) state that "the amount used to calculate the Market Adjusted Index rate should be grossed up by the paid to allowed factor". Therefore, the projected paid to allowed ratio of 0.797 is applied to the projected risk transfer amount in tab II of the PA Rate Template as a paid amount.

7. The following questions pertain to the response to question 27:

a. The prior response did not provide qualitative or quantitative support for the "Pricing AV" values found in column K of Table 10 of the PA Rate Template and a wide range of values within a metal level still remains (i.e., 0.648 to 0.791 for Silver plans). Please provide the necessary support for these factors and how only the cost-sharing design of the plans are accounted for in these factors.

Column K and Column L of Table 10 of the PA Rate Template have been updated accordingly. As a result, wide range of values within a metal level no longer remains. Please see Exhibit 11 "11 – AVCS Calc" in the filing exhibits for development of column K in Table 10.

b. The Pennsylvania Insurance Department specified that the following induced demand formula should be used for all plans: AV ^ 2 – AV + 1.24. The information in column L of Table 10 of the PA Rate Template still does not reflect the specified formula. As an example, the first plan shown below has a lower pricing AV but higher induced demand factor than the second plan, which should not occur of the specified formula is used. Please update the filing to reflect the specified formula.

HIOS ID Pricing AV Normalized Induced Demand

23489PA0130003 0.863 1.060

23489PA0130005 0.890 0.995

The information in column L of Table 10 of the PA Rate Template has been updated to reflect the induced demand formula AV ^ 2 – AV + 1.24. Also, there are no longer any instances where a plan has lower pricing AV but higher induced demand factor than another plan. Please see Exhibit 11 "11 – AVCS Calc" in the filing exhibits for development of columns K and L in Table 10.

8. As a follow-up to question 34, please provide the quantitative development of the "HCE Area Factors 201901 – 201912" and the "UCRT Adjustment" columns.

Please see objection response excel workbook tab 8.

9. Please update the 2019 experience period risk adjustment amount in Table 2 to reflect the department calculated revised risk adjustment transfer amount sent to your company on June 30th 2020 or the final CMS transfer amount published on or before July 16th, if it differs from the Department calculation.

The 2019 experience period risk adjustment amount in Table 2 has been updated to reflect the department calculated revised risk adjustment transfer amount sent on June 30th. All other rate filing documents have been updated accordingly.

10. If the projected risk adjustment transfer amount in Table 5 will be modified, due to the final CMS transfer amount published on or before July 16th, please provide narrative and detailed supporting data to justify the proposed changes.

We are using the risk adjustment information sent from the Department on June 30th.

11. As updates are made to the PAAM exhibits and the URRT, please ensure consistency between these workbooks as required.

Confirming consistency between workbooks as required.

12. On July 13th, the Department will communicate our guidance based upon updated survey information from the issuers on their best estimate of the Covid 19 impact on 2021 rates. Responses to the round two questions are due on July 16th. Please be sure that all documents in SERFF after that date reflect the impact of Covid 19 and are consistent with Department's July 13 guidance.

Our COVID factor in the filing is 1.000.

13. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables and Federal Rates Template are identical.

Confirming that we have tested to ensure the rates in workbooks above are identical.

14. Please ensure that the 7/16/20 versions of the following items are posted in SERFF with your July 16th response to this data call:

• Cover letter identifying all changes made and the reason for the change. Also show the revised rate change.

• PA Actuarial Memorandum

• PA Actuarial Memorandum Exhibits

• Departments Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no "NA")

• URRT

• Federal rates template

• Part III actuarial memorandum

• Updated Rate Change Request Summary (Attachment 1)

• Public filing pdf with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits subsequent to the initial submission, in addition to all of the above items).

Please be advised that there may be additional questions based on the responses to the above. However, it is our hope to avoid 3rd round data calls. Towards this end, please provide complete detailed and thorough responses including supporting data and narrative.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas.

Should you have any questions regarding this correspondence, please contact me at (717) 787-5172 or email me at csandersjo@pa.gov.

Sincerely,

Cherri Sanders-Jones

Conclusion:

Sincerely,

Cherri Sanders-Jones

June 23, 2020

Ms. Cherri Sanders-Jones
Pennsylvania Insurance Department

Re: Small Employer Rate Filing for United HealthCare Insurance Company (UHIC)
Pennsylvania SERFF ID# UHLC-132374424

Dear Ms. Sanders-Jones,

The purpose of this letter and attached supporting documents is to respond to your Objection Letter submitted 6/23/2020.

- In response to question #1, #24, #25, #27, #28, we have updated Table 10 of PAAM.
- In response to question #7, #8, we have updated Table 2 of PAAM.
- In response to question #8, #19, #33, #38, we have updated PAAM, URRT, Plan Design Summary, PA actuarial memo, federal actuarial memo, and federal rates template.
- In response to question #23, the risk adjustment user fee is updated to be $0.25 PMPM.

All filing documents were impacted by these changes and were updated accordingly.

Should you have any questions or need any additional information, please contact me at [redacted] or [redacted]

Sincerely,

[redacted]

Objection Letter for UHLC-132374424

Dear Daniel Akier,

Introduction:
June 16, 2020

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within 7 days of the date of this letter. If you have any questions or difficulties in providing the information within this time frame, please contact me.

Please note, each response to a Department data call must contain a cover letter that details the changes made to the Actuarial Memorandums and PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

1. The updated guidance was intended to make our small group rate increase calculation consistent with the federal URRT. For this filing year only, there will be a slight disconnect, in that, the input entered in Table 10 column Z for the 2020 calibrated plan index rate for each plan (column AA from the approved 2020 filing) will need to be adjusted by the "Q1 2020 Trend factor by Quarter" shown in Table 5A cell J35 to calculate the Q1 plan rate. Please update all documents and worksheets as necessary.

Updates have been made for this change.

2. Section 4.3 of the 2021 URR Instructions requires issuers to discuss the reason for rate increase(s): Issuers must provide the quantitative impact and a narrative description of all significant factors driving the proposed rate increase. As an example, these factors could include:
• Single risk pool experience which is more adverse than that assumed in the current rates
• Medical inflation
• Increased utilization
• Prospective changes to benefits covered by the product or successor products
• New taxes and fees imposed on the issuer
• Anticipated changes in the average morbidity of the covered population that is market-wide, as opposed to issuer specific morbidity that is reflected in risk adjustment

In our objection response Excel workbook tab 2 we have included detail on factors going into proposed rate increase. The factors contributing to YOY change from 1/1/20 to 1/1/21 are changes in benefit plan design, base rate changes (approved 7/1/20 change and filed 1/1/21 change), one year of 2020 annual approved trend at 9.7%, removal of health insurer PPACA fee and revenue neutral change to account for changes in our updated 2021 pricing model vs 2020 pricing model.

For purposes of the URRT the proposed rate change is 0% due to needing to create new products due to Uniform Modification.

3. If the requested rate increase is not the same across all products and plans, provide an explanation as to why the rate changes vary by product or plan given they are based on the same single risk pool of experience for the market. Explain how the impact of morbidity was removed from impacting the variance in rate changes across products or plans.

The rate changes vary by product and plan due to plan design changes and pricing in an updated model for 2021 plan designs. The revenue neutral adjustment in total accounts for the changes in pricing accounted for in updated pricing model.

For the impact of morbidity please note the following:
Like HHS' induced demand factors, UHC's SG slope method excludes differences due to health status in the plan slope adjustments. The ACA prohibits health status rating therefore cost differences attributed to morbidity are normalized and removed from UHC's slope adjustments using the HHS risk model and risk formula. Removing the effect of risk selection from UHC's SG pricing slope should yield plan relationships that integrate an induced demand utilization component

4. Please confirm that the data in 'I Data' tab represents UnitedHealthcare Insurance Company only.

Confirmed that 'I Data' tab represents UnitedHealthcare Insurance Company only.

5. Please reconcile the current enrollment in Table 1 cell D18 with the current enrollment in Worksheet 2 of the URRT cell D34.

The current enrollment in Worksheet 2 of the URRT is as of December-2019 and the current enrollment in Table 1 is as of February-2020.

6. In Table 2, you include a capitation amount in cell J36. Please provide a list of all capitated services and their corresponding pmpms for the rating period, the current period, and the experience period.

Please see objection response Excel workbook tab 6 for the PMPMs. We have provided list of capitated services that total up to PMPM in Table 2. Below is further detail on the PMPMs.

We were unable to provide current period data as Finance has not communicated the 2020 rates. The projection period we took the experience period (2019) and trended forward two years at our filed 8.7% experience trend.

The major components of the Cap are:
UBH = $9.08 and
Chiro = $1.51

The other STAT adjustments are a series of GL items that are allowed under the SHCE definition.

The major components are:

- Other Medical - $1.90 pmpm – which is mostly composed of items such as Provider items (settlements, Provider Bonus and Gain share – and Contract inducement) and state specific Assessment and surcharges. (NYCHRA is the best know example of that)
- KEFR/EBR – $.93 pmpm. KEFR and EBR are Known Environmental Factor Reserve and Extended Benefit Reserve.
- CHIRO Risk Transfer – (-$.72 pmpm). Chiro Claims flow into our FFS claims so we back out those claims flagged in a GL account that are ceded back to Optum.
- Beacon - $.35. This represents the Lab arrangement for FL members irrespective of where the policy is sitused. The largest portion of this cap is clearly in the FL market – however there are members all over. This arrangement sunsetted at the end of September. So we adjusted the $13.05 cap for 3 months reduction at $.35 to get to $12.96. This was applied to the INS piece only. Even if I had been able to measure the HMO impact the fact that members have to be local for the HMO means the adjustment should only be for INS.

Those total up to $13.05 and the $-.09 adjustment for Beacon on Insurance business.

7. The Department notes that the Table 2 estimated cost sharing in cell F36 is consistent with Worksheet 2 cell D28 of the URRT but inconsistent with the annual cost sharing amount in Table 4 cell I97. Please explain.

Table 4 cell I97 is updated to reflect Table 2 F36. This was an input mistake in the initial filing.

8. In Table 2, please update the risk adjustment amount to reflect the risk adjustment transfer of -$8,901,929 shared by the Department on May 23, 2020 from Jim Laverty.

Risk adjustment amount in Table 2 is updated to reflect the risk adjustment transfer of -$8,901,929.

9. Please reconcile the earned premium pmpm generated from the Department's Table 2 data with Worksheet 2 of the URRT cell D35.

The earned premium in Department's Table 2 is for the experience period of calendar year 2019. The earned premium total in Table 2 matches the amount in cell D32 of URRT Worksheet 2. The earned premium PMPM in Worksheet 2 of the URRT cell D35 is current premium PMPM which is based on December-2019.

10. Please provide detailed quantitative support for the cost and utilization trend assumptions included in Tables 3 and 3b of the PA Rate Template.

Please see objection response Excel workbook tab 10.

11. Please discuss the service category weights in Table 3 relative to the projected weights in the 2020 rate submission.

Our reporting system underwent some minor changes that shifted some charges into different categories vs 2020.

12. Please provide by service category the emerging data and resulting trend for the calendar year y-t-d as of end of May.

Please see objection response Excel workbook tab 12.

13. Please provide your data, assumptions, and analysis that supports your proposed trends of 8.06% and 8.70%. If large claims were removed, please discuss.

Please see objection response Excel workbook tab 10 for the support of our proposed claims trend of 8.06%.

Please see objection Excel workbook tab 13 for the support of our proposed 8.7% forward pricing trend.

Please reference Word document titled "PAsgTrendNarrative20200618" for narrative on our trend setting process.

Large claims were not removed. The experience base we're working is large enough that unexpected large claims levels have minimal impact on the ultimate results.

14. Regarding Trend:
a. Was the data in Table 4 or 4b utilized in developing the proposed trend?

Data in Table 4 and 4b is utilized in developing the proposed trend, but PA experience on its own is not considered credible on its own to set trend. Please reference Word document titled "PAsgTrendNarrative20200618" for further narrative on our trend setting process.

b. Is the data in Table 4 or 4b raw unadjusted data or has it been normalized or otherwise adjusted? If the data has been adjusted, please provide an exhibit that quantitatively shows the unadjusted allowed monthly data for the 48 months. Also include the following monthly data:

i. The average age factor;

ii. The average geographic factor;

iii. The average tobacco factor;

iv. The average benefit factor; and

The data in Table 4 or 4b is raw unadjusted data.

15. In Table 4, please explain why the completion factor in May is lower than the factors in June through October.

The data we used is paid through February-2020. We believe there are more claim amounts than normal that are incurred in May-2019 but have not been paid as of February. We are still working on confirming this.

16. Please demonstrate how the base rate on tab "1 – Base Rates & Factors" of the supporting Excel file was developed. Please show the complete build up starting with the experience period allowed or paid PMPM. Please clearly show and describe how each adjustment was developed and its purpose. Additionally, please demonstrate that pharmacy rebates were removed in the base rate development.

Please see objection response Excel workbook tab 16

17. Please provide a quantitative development of the following adjustments, for both the manual and experience data, included in Table 5 of the PA Rate Template, for both the experience and manual rate. Quantitative development should be provided for every item included in each of the below adjustments.

a. Change in Demographics

b. Change in Benefits

c. Change in Other

Please see objection response Excel workbook tab 17.

i. Please provide a detailed quantitative exhibit and explanation of the various components used in developing the "Catastrophic Claim Adjustment" adjustment. This should include the detail used in developing the information provided on tab "9 – Single Risk Pool Adj Fctrs" of the support Excel file.

Please see objection response Excel workbook tab 17.

ii. Please provide a detailed quantitative exhibit and explanation of the various components used in developing the "Balancing Item" adjustment.

There are no items included in the Balancing Item. The Balancing Item is used to match the discrepancy between URRT development and our final pricing. The Part I Unified Rate Review Template does not demonstrate the process used to develop our rates. Rather, it represents information required by federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges, and for certification that the index rate is developed in accordance with federal regulation and used consistently and only adjusted by the allowable modifiers. The Balancing Item adjustment is needed to produce rates that are consistent with our rating system.

18. Please provide support for not applying full credibility to the actual experience, which is over 330,000 member months.

We consider full credibility to be at 360,000 member months. The following formula is our standard formula for credibility:

$$Credibility = Min(1.000, 0.0044007 \times MemberMonths^{0.4240924})$$

Using this formula the credibility for UHIC would be 96.9% at 334,455 member months in the experience period. Since this is not fully credible we decided to blend experience with our UHCPA block. Calendar year 2019 was the first year of experience for the UHCPA block. Since UHIC is an established block of experience I decided to place a little more credibility weight on the UHIC business by using the simple method of member weighting the UHIC and UHCPA member counts as their credibility percentages. UHCPA had a total member month count of 8,497. The total member months for experience period are 342,952 which produce a credibility of 97.52% for UHIC and 2.48% for UHCPA.

19. Please provide sources used, and quantitative support for any adjustments made to those sources, in the development of the projected incurred risk adjustment PMPM included in Table 5 of the PA Rate Template.

The risk adjustment transfer amount has been updated to reflect the estimated amounts provided by the Pennsylvania Insurance Department based on the RATEE submissions of all insurers. In URRT Worksheet 1 Section II, Risk Adjustment payment/charge PMPM is -$32.21, which is developed from projected index rate and risk adjustment transfer payment provided by PID. We applied an adjustment for the paid-to-allowed ratio. The resulting PMPM is -$25.67 = -$32.21*0.797. See Exhibit "14 - Risk Adj" showing the development of the risk adjustment PMPM.

20. The actuarial memorandum indicates that cell C28 in Table 5 is overwritten to reflect the projected member distribution used to develop the paid-to-allowed ratio of 0.7970. However, it appears that the same data is used to develop both the current and projected average paid-to-allowed ratio in Table 10. Thus, the resulting average paid-to-allowed factor of 0.7960 is the same whether using the current distribution or projected distribution. Please review and update or explain.

We are using projected lives in Column W in table 10 in determining paid to allowed ratio. However, the formula in Table 5 is overwritten as the existing formula does not account for benefit richness. Both pricing AV (column K in Table 10) and benefit richness factor (column L in Table 10) come into play in developing the paid to allowed ratio. Although weighted average of benefit richness (cell L16) is 1.000, benefit richness by plan can vary and this will impact the weighted average of paid to allowed ratio.

Please reference filing exhibit tab [17 - Paid to Allowed Ratio] for detailed development of paid to allowed ratio in two different approaches. The first approach shows how paid to allowed ratio is developed using experience paid to allowed ratio with adjustments from legal entity and credibility manual. The second approach shows the development of paid to allowed ratio with column K and L in Table 10.

21. In support of the average paid to allowed factor of 0.7970 in Table 5 you provided Exhibit 10 in the supporting Excel workbook. What is the basis for the projected allowed and projected paid claims in columns D and E given that the plans to be offered in 2021 are all new and have no prior experience?

We removed Exh 10 from the exhibits as this was a past requirement and we missed revision to guidance to use HHS factors for induced demand factors.

22. Regarding Table 6:

a. Please provide the proposed commission schedules for 2021.

Please see objection response Excel workbook tab 22a for the proposed commission schedules for 2021.

b. Using the proposed commission schedules, quantitatively show the development of the percent and pmpm amounts in cells C51 and D51.

Please see objection response Excel workbook tab 22b for the development of the percent and pmpm amounts in table 6.

c. Using the 2019 SHCE in the Annual Statement, please quantitatively show the development of the Quality Improvement Initiatives percent and pmpm amount.

In the 2019 SHCE the ratio of line item 6.6 ($1,338,441.16) to line item 1.1 ($167,305,144.74) is 0.8%.

The PMPM amount is ratio of line item 6.6 ($1,338,441.16) to member months (352,660) which is $3.80.

23. Please update the Risk Adjustment User Fee to be $0.25 PMPM as noted in the Final Notice of Benefit and Payment Parameters for 2021.

Risk adjustment user fee has been updated to be $0.25 PMPM.

24. Please reconcile the Projected Required Revenue PMPM in Table 6 cell C64 with the URRT Worksheet 2 cell D82.

The projected required revenue PMPM in Table 6 now ties with URRT worksheet cell D82.

25. Please review and correct the number of Projected Lives in column W of Table 10 as you show member months when projected lives is requested. Since all of the existing plans are being discontinued and mapped, please show the expected membership distribution by new plan design.

We have updated the projected membership data in column W to be in 2021 plans.

26. Section 1.E of the PA actuarial memorandum indicates that use of the new federal AV Calculator led to some benefit plans falling outside the allowed AV metal ranges. The Department notes that United has seemingly discontinued all 2020 plans and mapped existing members to new plans. Is this correct? Please explain.

Yes we had to discontinue both products from 2020 due to uniform modification (UM) reasons which discontinued all the plans and mapped existing members to new plans. Both products have plans where the Rx cost sharing structure changed in Tiers 3 and 4 from the 2020 plans to 2021 plans. This violates UM and causes a discontinuance of the product.

a. Discuss whether or not this constitutes a market withdrawal.

This does not constitute a market withdrawal as there is no intention on our part to withdraw. The change in Rx cost share structure was the reason due to Uniform Modification where we had to discontinue the product codes from 2020 and create new product codes for 2021. The plan designs within the products are very similar from 2020 to 2021.

b. Also discuss how members were mapped to new plans. Confirm that the crosswalk hierarchy is met.

Terminated plans are mapped to similar plans based on cost sharing provisions such as deductibles, copays, out of pocket maximums, etc. The exercise is only for purposes of completing the URRT. Since plan mapping happens later in the year, closer to the time of a group's renewal, this is our best estimate, but our final mapping will be complaint with CMS's crosswalking hierarchy.

27. The following questions pertain to the plan factors provided in Table 10 of the PA Rate Template:
a. Please provide quantitative and qualitative support for the "Pricing AV" values found in column K. This support should include the justification for the wide range of values within a metal level (i.e., new 2021 Silver plans range from 0.658, which is lower than some Bronze plans, to 0.804, which is higher than some Platinum plans) and provide sufficient detail on the various factors included in the values (i.e., if it not just plan benefits).

In our revised filing, induced demand factors have been updated to reflect HSS factors. In updated table 10, the "Pricing AV" values found in column K do not have as wide of a range of values within a metal level as initial filing. For example, silver plans do not have values lower than Bronze plans, nor have values higher than Platinum plans. The range for silver plans is now from 0.648 to 0.791.

b. The Pennsylvania Insurance Department specified that the following induced demand formula should be used for all plans: AV ^ 2 – AV + 1.24. The normalized induced demand factors, such that the weighted average equals 1.000, should be input into column L. Please update the filing to reflect the specified formula.

We have updated column L in Table 10 to reflect the specified formula.

28. Exhibit 11-AVC of the supporting Excel workbook shows that the induced demand factors are not consistent with the IDF factors utilized in the risk adjustment transfer formula. Please correct.

Exhibit 11 has been updated with the IDF factors utilized in the risk adjustment transfer formula.

29. Please provide an exhibit that shows, by HIOS Plan ID, summary benefit and cost sharing changes for 2021 relative to the 2020 design for all plans to be offered in 2021. Include Pricing AV columns for 2020 and 2021. Please show the approved 2020 Pricing AVs for all plans in the 2020 column and the proposed 2021 Pricing AVs in the 2021 column. Also provide a supporting worksheet that shows the quantitative development of the proposed factors.

Please see objection response Excel workbook tab 29.

30. Please provide detailed explanation demonstrating the various components (e.g., claims trend, underlying experience, etc.) driving the 8.7% rate increase requested in Section 3 of the actuarial memorandum.

The 8.7% noted in section 3 of the Part III actuarial memorandum is the proposed annual pricing trend for 2021. The support for the proposed pricing trend is contained in objection response Excel workbook tab 13.

31. Please provide by service category the emerging claims data for this policy for the calendar year year-to-date as of end of May and discuss how this data may impact the resulting trend.

Please see objection response Excel workbook tab 31 for the YTD claims PMPM by service category. At this time it is to soon in our opinion to use all the data YTD through May for the resulting trend. In addition, as noted in the Trend narrative Word document, PA experience on its own is not considered credible on its own in the trend setting process.

32. Please provide an Excel exhibit that shows the year over year (Q1 2021/Q1 2020, Q2 2021/Q2 2020, etc.) rate change renewing insureds will receive if insureds renew in the new crosswalked plans.

Please see objection response Excel workbook tab 32.

33. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, Federal Rates Template and the binder are identical.

The rates between the Plan Design Summary Rate Tables (PDSR) and Federal Rates Template (RTT) are identical for all plans. When compared to PAAM approximately 3/4 of plans exactly match to PDSR/RTT and remaining plans are off by $0.01 due to rounding. For the binder filing we will provide the updated rates to our regulatory filer responsible for binder filing.

34. In support of Table 13, you provided Exhibit 18 in the supporting Excel workbook. You show the indicated factors relative to the current approved factors but provide no supporting data, narrative or analysis. Please provide quantitative and qualitative support for the development of the rating region factors.

a. Additionally, please discuss how the data was adjusted to ensure that health status was removed.

The process of developing Rating Area Factors starts by analyzing normalized cost metrics within each rating area. Allowed claims were first gathered by rating area and then normalized for the risk profile in each rating area. This normalizes the impact of health status between rating areas to gain a true view of unit cost differentials between rating area.

b. Please show the historical and current data that supports the approved factors and the data that supports the proposed factors.

We are using our Healthcare Economic (HCE) data for calendar year 2019. The data represents Unit Costs by geographic split; we select the data at the County level. The data from HCE is normalized for utilization levels and service mix - resulting in one rate per county that is intended to reflect relative charge levels only. As shown in Column G "UCRT Adjusted HCE Area Factors 201901 – 201912", we weight this number by 80% and add in a flat 20% (1.00 x 20%) to represent Rx costs, resulting in a relative cost index for each county. The data is then aggregated at the state level and compared to current pricing factors. This compares the emerging experience to the current pricing factors to possibly recalibrate the area factors.

c. Discuss the primary reasons for the change in the proposed factors.

Our area cost analysis indicated that many of our current area factors were not aligned with our expected costs by area. It was decided by our PA Health Plan to align our area factors to our expected costs but to make the change revenue neutral in total which is indicated in the Exhibit and support we have provided.

35. For the expanded Bronze plans, please demonstrate that the copay is less than or equal to 50% coinsurance for that category.

Our two expanded bronze plans on the UHIC license are both HSA plans and qualify as a High Deductible Health Plan.

36. Please provide an exhibit that quantitatively shows a comparison of the actual to projected claim cost pmpms for calendar years 2015 – 2019, as applicable.

Since we have actual claim costs PMPM for 2015 – 2019 we don't have any projections. Please see exhibit 36 in the objection response workbook for actual ACA only claim costs.

37. Please provide an exhibit showing the financial gains and losses for calendar years 2014 – 2019 for the following categories: member months, total administrative expenses, total incurred claims, total premium, total actual paid taxes and fees, profit, annual underwriting gain/loss and underwriting gain/loss pmpy.

Please see objection response Excel workbook tab 37.

38. You have indicated that the benefit design for HIOS plan IDs CD-3B -23489PA0130017 and CD-3D - 23489PA0140013 were based on erroneous information and require updates. Please provide the necessary documentation and justification. If there are policy form implications, please notify Elizabeth Hart at elhart@pa.gov.

These two plans had benefits that were mistakenly entered incorrectly into the plan girds provided to our actuarial team to price. The intention was to have the same coinsurance cost share benefit for Specialist Designated / Non-Designated as the PCP Designated / Non-Designated benefit which is 70% coinsurance. These were the only two plans with this type of plan design where the specialist coinsurance percentages weren't the same as the PCP, and the intention was for all plans to have PCP = Specialist. This was discovered by the area responsible for building our plan grids after we had already submitted the initial filing. The plan factor relativities and AVs have slight changes from the initial filing which are in table below:

Plan Name	Filed Plan Relativity	Updated Plan Relativity	Filed AV	Updated AV
CD-3B	0.4518	0.4512	70.6%	70.4%
CD-3D	0.4591	0.4585	70.6%	70.4%

39. The Department will contact the company shortly with information regarding the opportunity and parameters for the company to provide and support an updated Covid-19 impact assessment, if desired.

Noted

Please be advised that there may be additional questions based on the responses to the above.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas.

Should you have any questions regarding this correspondence, please contact me at csandersjo@pa.gov.

Sincerely,

Cherri Sanders-Jones

Conclusion:

Sincerely,
Cherri Sanders-Jones

Additional Extended OEP and Covid-19 Requests

IMPORTANT: In addition to providing the estimated impact of the Extended OEP and Covid-19 in the Estimate Tab, please address the following questions in a separate document.

1) Provide a detailed description of how the proposed Extended OEP and Covid-19 adjustment factors were calculated for each market, if the expectation is that it will vary by market.
2) If the proposed Extended OEP and Covid-19 adjustment factors were developed based on recent claims experience or membership distributions, describe how credibility was taken into account.
3) If the proposed Extended OEP and Covid-19 adjustment factor varies by area, provide an explanation describing why this is the case.

1) [redacted]

2) [redacted]

3) [redacted]

PENNSYLVANIA INSURANCE DEPARTMENT
ACA Extended OEP and Covid-19 ASSUMPTIONS
MARKET

N	Description of Factor	Factor
1	Covid-19	
2	Extended OEP	

The Exchange Authority has indicated that the open enrollment period will be extended to 1/15/21. If the company anticipates that this extended open enrollment period will cause added adverse selection, relative to the Federal OEP of 11/1/2020 - 12/15/2020, please provide details regarding the estimated impact as well as support for the magnitude of the factor adjustment.

Please insert a factor that represents the morbidity impact associated with the "Description of Factor" in Column C. If there is no impact, then the "Factor" field should be set equal to 1.000

State of Pennsylvania Rate Review

Scope and Range of the Rate Increase

The requested rate change for small group health benefit plans sold in the state of Pennsylvania will be effective January 1, 2021 and impact 27,442 covered lives. The rate change experienced by members will vary depending on plan selection and geographic area. Additional premium changes may occur upon renewal due to changes in member age, changes in plan selection, and changes in geographic location.

Financial Experience of the Product

The benefit care ratio for these products (23489PA013 & 23489PA014) during the 2019 calendar year is 76.3%. This ratio is the portion of premium that is needed to pay medical claims. The complement of the benefit care ratio is the portion of premium needed for taxes and fees, administrative expenses, and margin.

Changes in Medical Service Costs

There are many different healthcare cost trends that contribute to increases in the overall U.S. healthcare spending each year. These trend factors affect health insurance premiums, which can mean a premium rate increase to cover costs. Some of the key healthcare cost trends that have affected this year's rate actions include:

- Increasing cost of medical services: Annual increases in reimbursement rates to healthcare providers, such as hospitals, doctors, and pharmaceutical companies.
- Increased utilization: The number of office visits and other services continues to grow. In addition, total healthcare spending will vary by the intensity of care and use of different types of health services. The price of care can be affected by the use of expensive procedures such as surgery versus simply monitoring or providing medications.
- Higher costs from deductible leveraging: Healthcare costs continue to rise every year. If deductibles and copayments remain the same, a higher percentage of healthcare costs need to be covered by health insurance premiums each year.
- Cost shifting from the public to the private sector: Reimbursements from the Centers for Medicare and Medicaid Services (CMS) to hospitals do not generally cover the cost of providing care to these patients. Hospitals typically make up this reimbursement shortfall by charging private health plans more.
- Impact of new technology: Improvements to medical technology and clinical practice often result in the use of more expensive services, leading to increased healthcare spending and utilization.

Changes in Benefits

Changes in covered benefits impact costs and therefore affect premium changes. Benefit plans are typically changed for one of three reasons: to comply with the requirements of the Affordable Care Act or state law, to respond to consumer feedback, or to address a particular medical cost issue to provide greater long-term affordability of the product.

Administrative Costs and Anticipated Margins

UnitedHealthcare Insurance Company works to directly control administrative expenses by adopting better processes and technology and developing programs and innovations that make healthcare more affordable. We have led the marketplace by introducing key innovations that make healthcare services more accessible and affordable for customers, improve the quality and coordination of healthcare services, and help individuals and their physicians make more informed healthcare decisions. Taxes and fees imposed by the State and Federal government are significant factors that impact healthcare spending and have to be included in the administrative costs associated with the plans. These fees include Affordable Care Act taxes and fees which impact health insurance costs and need to be reflected in premium. Another component of premium is margin, which is set to address expected volatility and risk in the market.

The requested rate change is anticipated to be sufficient to cover the projected benefit and administrative costs for the 2021 plan year.

Current Part III Actuarial Memorandum Language UHIC

Section 17: Terminated Plans and Products

The following products are being terminated: 23489PA001 & 23489PA006

We have a product discontinuance for both of these products this year due to Uniform Modification reasons. Both of these products had change in prescription cost share structures in Tiers 3 and 4 which violates Uniform Modification and caused product discontinuance. Due to this all of our 2020 plans have been terminated and new plans have been created for 2021. The new product codes for 2021 are 23489PA013 and 23489PA014.

> Terminated plans will be mapped to another plan in the projection period for purposes of completing the URRT.

Proposed Part III Actuarial Memorandum Language UHIC

Section 17: Terminated Plans and Products

The following products are being terminated: 23489PA001 & 23489PA006

Pursuant to 45 CFR §147.106(d)(3)(ii), the table below identifies the discontinued products that correspond to the new products that will be offered beginning January 1, 2021:

Terminated Product ID	Replacement Product ID
23489PA001	23489PA014
23489PA006	23489PA013

Both of these products are being discontinued due to changes to the prescription cost shares. The changes go beyond what are allowed as Uniform Modifications. From the URR instructions on page 11 it states following as one of the criteria to be considered uniform modification of coverage:

> Within the product, each plan has the same cost-sharing structure as before the modification, except for any variation in cost sharing solely related to changes in cost and utilization of medical care, or to maintain the same metal tier level.

Both of our products had changes in prescription cost share structures in Tiers 3 and 4 which go beyond what are allowed for Uniform Modifications and caused product discontinuance. Due to this, all of our 2020 plans have been terminated and new plans have been created for 2021. We are still offering the same products of EPO and PPO in 2021 that were offered in 2020. Current membership will be mapped to the new and similar product in 2021. For example, 23489PA001 is a PPO product in 2020 and plans from that product will be mapped to PPO product 23489PA014 in 2021.

The following is noted on page 12 of the URR instructions and we interpret that we have satisfied this criteria for no market withdrawal.

An issuer's identification of which new product replaces which discontinued product will be considered reasonable if it reflects the issuer's expectations regarding significant transfer of enrollment from one product to the other (for example, because the products have been cross-walked for that purpose). Issuers should identify which new product replaces which discontinued product in the actuarial memorandum. This provides a way for issuers to completely revise their product portfolio offerings without triggering a 5-year ban, provided they are not revising all of their products simply to avoid rate review.

Terminated plans will be mapped to another plan in the projection period for purposes of completing the URRT.

Below is a mapping of our 2020 plans.

Proposed Part III Actuarial Memorandum Language UHCPA

Section 17: Terminated Plans and Products

The following product is being terminated: 24872PA002

Pursuant to 45 CFR §147.106(d)(3)(ii), the table below identifies the discontinued product that corresponds to the new product that will be offered beginning January 1, 2021:

Terminated Product ID	Replacement Product ID
24872PA002	24872PA003

This product is being discontinued due to changes to the prescription cost shares. The changes go beyond what are allowed as Uniform Modifications. From the URR instructions on page 11 it states following as one of the criteria to be considered uniform modification of coverage:

> Within the product, each plan has the same cost-sharing structure as before the modification, except for any variation in cost sharing solely related to changes in cost and utilization of medical care, or to maintain the same metal tier level.

This product had changes in prescription cost share structures in Tiers 3 and 4 which go beyond what are allowed for Uniform Modifications and caused product discontinuance. Due to this, all of our 2020 plans have been terminated and new plans have been created for 2021. We are still offering the same product of HMO in 2021 that was offered in 2020. Current membership will be mapped to the new and similar product in 2021. For example, 24872PA002 is a HMO product in 2020 and plans from that product will be mapped to HMO product 24872PA003 in 2021.

The following is noted on page 12 of the URR instructions and we interpret that we have satisfied this criteria for no market withdrawal.

An issuer's identification of which new product replaces which discontinued product will be considered reasonable if it reflects the issuer's expectations regarding significant transfer of enrollment from one product to the other (for example, because the products have been cross-walked for that purpose). Issuers should identify which new product replaces which discontinued product in the actuarial memorandum. This provides a way for issuers to completely revise their product portfolio offerings without triggering a 5-year ban, provided they are not revising all of their products simply to avoid rate review.

Terminated plans will be mapped to another plan in the projection period for purposes of completing the URRT.

2021 Rates Table Template v10.0	*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*			
	If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.			
	If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.			
	If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
	To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.			
HIOS Issuer ID*	23489			
Rate Effective Date*	10/1/2021			
Rate Expiration Date*	12/31/2021			
Rating Method*	Age-Based Rates			

Plan ID*	Rating Area ID*	Tobacco*	Age*	Individual Rate*
Required: Enter the 14-character Plan ID	**Required:** Select the Rating Area ID	**Required:** Select if Tobacco use of subscriber is used to determine if a person is eligible for a rate from a plan	**Required:** Select the age of a subscriber eligible for the rate	**Required:** Enter the rate of an Individual Non-Tobacco or No Preference enrollee on a plan
