We estimated projected membership by annualizing our February-2020 membership.

E. Benefit Changes

Changes to member cost sharing were required for certain benefit plans. Use of the new federal Actuarial Value (AV) Calculator led to some benefit plans falling outside the allowed AV metal ranges. Benefit plan changes were made to move these plans back into the allowed AV ranges. The benefit changes for these plans are listed in Exhibit 2.

We refined the medical and pharmacy plan price relativities to reflect the most recent pricing methodology and pricing models. The methodology is based on UnitedHealthcare nationwide experience data, which contains utilization frequencies and unit costs by service category, in addition to claim distributions and adjustment factors for a large number of plan design variables. Benefit design parameters such as deductibles, coinsurance, copays, out-of-pocket maximums, etc.

were input for each plan. The expected paid-to-allowed relativities and expected utilization differences due to differences in cost sharing for each plan are then used to develop the plan factors for each benefit plan. All benefit plans are priced consistently with each other, with the rates differing by the estimated value of the benefits and the expected utilization differences due to differences in cost sharing. The utilization differences do not reflect differences due to health status.

All the changes are revenue neutral and the Plan Relativity Factors are listed in Exhibit 3a and 3b. Also, the revenue neutrality factor development is shown in Exhibit 13.

F. Experience Period Claims and Premium

Premiums (net of MLR Rebate) in Experience Period
Earned premium for our small group market business in Pennsylvania for January 2019 thru December 2019 was approximately $169,613,494. There were no MLR rebates for 2019 calendar year.

Paid Through Date
The experience period is January 1, 2019 to December 31, 2019, with claims paid through February 29, 2020.

Support for estimate of incurred but not paid claims
The UnitedHealthcare Reserving process utilizes the Reserve Production System (RPS) to record reserves into the PeopleSoft general ledger. Fee for service and paid claim data is loaded into RPS and becomes the basis for the monthly reserve calculations at the various business unit, location, and line of business levels. The assignment of the paid claims into RPS packages is based on the mapping rules maintained by the Corporate Actuarial department. RPS calculates a preliminary best estimate Incurred But Not Reported (IBNR) for each reserving model (package) primarily using standard completion factors based on historical claim experience. The Claims Reserving Team adjusts the preliminary IBNR based on specific knowledge of the entity (i.e. catastrophic claims, pended claims, etc.) to calculate the final IBNR. In months where adjudicated claims experience is not complete enough for an estimate using completion factors, a seasonally adjusted PMPM is used to estimate incurred claims.

A description of the Sarbanes Oxley controls, audited by Deloitte & Touche, in place regarding the reserving process includes:

1) Market Paid claim Tie-outs: To verify completeness and accuracy of financial data in RPS, paid claim data is tied out between source system (RPS) and PeopleSoft general ledger.
2) Market Expense Tie-outs: RPS reserve changes on the income statement are tied to the PeopleSoft general ledger to ensure that information is accurate subsequent to computing the reserve.

Allowed claims by benefit category were obtained from UnitedHealthcare claim paying system reports. The same completion factors are applied to both incurred and allowed claims amounts.

Non-EHB benefits and the experience period cost
The non-EHB claims account for 0.14% of the total claims in the experience period. The non-EHB services are exclusively for physician and outpatient claims. We expect the same benefits to be covered during the rating period.

Capitation
Capitation includes all services provided under one or more capitated agreements and it is applied uniformly across all membership during the experience period. For this experience period, the capitated amount is $12.94 PMPM.

Pharmacy Rebates

The prescription drug cost is net of rebates received from drug manufacturers. For this experience period the average pharmacy rebate is -$28.08 PMPM.

Risk Adjustment

The estimated risk adjustment transfer payment is $10,093,662. Risk adjustment percentage applied to the experience period premium is -5.95%.

Reinsurance

Since this is a small group filing and the state of Pennsylvania chose not to combine its individual and small group markets, reinsurance recoveries are not applicable to this rate filing. As such, no adjustments were made to the experience.

G. Credibility of Data

We are using United Healthcare small group UHIC ACA experience and United Healthcare Pennsylvania Inc small group UHCPA ACA experience with credibility applied. UHIC ACA experience has 97.52% credibility assigned and UHCPA ACA experience has 2.48% credibility assigned. The assigned credibility is determined by membership weighting in experience period. As ASOP 25, section 3.4 states: "Professional Judgment - The actuary should use professional judgment when selecting, developing, or using a credibility procedure. The use of credibility procedures is not always a precise mathematical process."

H. Trend Identification

Two years of annual trend were applied to the experience to project it to the rating period. The table below details the components of each trend factor.

Table 3. Trend Components

Service Category	Cost*	Utilization*	Induced Demand*	Composite Trend	Weight*
Inpatient Hospital	4.80%	1.48%	0.00%	6.35%	23.43%
Outpatient Hospital	4.47%	5.37%	0.00%	10.08%	31.33%
Professional	2.30%	3.54%	0.00%	5.92%	21.21%
Other Medical	2.61%	0.42%	0.00%	3.04%	4.44%
Capitation				1.29%	2.50%
Prescription Drugs	4.80%	6.35%	0.00%	11.45%	17.09%
Total Annual Trend				8.06%	100.00%
Months of Trend				24	
Total Applied Trend Projection Factor				1.168	

See the definition in the Historical Experience section.

Weight is based on the ratio of experience period index rate PMPM of different service categories over total PMPM, shown in URRT Worksheet 1 Section II Projections.

Please see Exhibit "16 - Claims Trend Summary" included in this filing for details on the trend components.

We are proposing the annual pricing trend to be at 8.7% applied quarterly, the quarterly trend is 2.1%.

The details of the proposed 8.7% trend are in Exhibit "6 – Pricing Trend" included in this filing.

The 8.7% pricing trend included in the input in Table 5A represents future quarterly pricing trends that will be used to increase 1/1/2021 premium rates to determine 4/1/2021, 7/1/2021, and 10/1/2021 premium rates.

Our trend setting process is outlined by the following narrative and exhibits. In general, recent/emerging claims experience is reviewed at the market level for several broad medical expense categories (inpatient, professional, pharmacy, etc.), with utilization, unit cost, benefit leveraging, and business mix identified for each category. Depending on the amount of underlying experience, additional markets may be added together to limit the variability of small blocks of experience. Historical patterns will produce highly variable results with limited credibility. National utilization/mix assumptions along with local contract assessment will be used to produce a more stable and reliable trend estimate.

I. Historical Experience

Table 4 below describes the most recent 48 months of experience data with 2 month of runout for the experience period which includes ACA business for legal entity UHIC, with 97.52% credibility assigned.

Table 4b below describes the most recent 48 months of experience data with 2 month of runout for the credibility manual which includes ACA business for legal entity UHCPA, with 2.48% credibility assigned.

UnitedHealthcare develops forward-looking medical expense estimates based on a number of considerations. In general, recent/emerging claims experience is reviewed at the market level for several broad medical expense categories (inpatient, professional, pharmacy, etc.), with utilization, unit cost, and benefit leveraging identified for each category. Future trends are developed based on a projection of each component.

Utilization rates by category are measured and projected. Forward looking utilization levels are developed based on emerging market level data, supplemented by regional and/or national level utilization data. Macro-economic data is often used to develop assumptions regarding directional changes in national health care consumption rates. UnitedHealthcare uses same store analysis to reflect utilization.

Market-level unit cost projections are developed based on evaluations of current and anticipated provider contract economics, as well as consideration to both current and expected changes in non-contracted provider cost exposure. Unit cost projections also consider the estimated cost impact of new technologies, service availability/mandates, or other factors that might influence mix of procedures. Unit cost is based on our contractual changes with providers.

In addition, market-level healthcare affordability activities that are expected to impact forward-looking medical costs are recognized. Depending on the nature of individual initiatives, the impact may be recognized in one or more of the component cost items discussed above. Only incremental activities are recognized for this purpose in the expected trend impact for any particular period.

This rate filing proposes quarterly rates.

The Index Rate in the projection period represents 99.86% of allowed claims due to the benefits in excess of EHBs.

The Index rate calculation is demonstrated in Table 5A below:

Actuarial Value and Cost Sharing Adjustment

UnitedHealthcare has a proprietary pricing model that was used in developing the actuarial value and cost sharing adjustment for each plan. The model calculates plan relativity factors for medical and pharmacy

benefits. Also included under the actuarial value and cost sharing adjustment are adjustments for leveraging and the difference between the average plan relativity factor and the projected paid to allowed ratio. Historical affiliated carrier experience was used to develop the actuarial value and cost sharing adjustment for each plan as well as the distribution and administrative costs adjustment.

Provider network, deliver system and utilization management adjustment
Any adjustments for these items are included in the plan relativity factors.

Benefits in Addition to EHBs
Benefit Extra EHB is the percentage of claims that are covered and are not included in EHB. The projected non- EHB impact is 0.14%.

Distribution and Administrative Costs
Distribution and Administrative Costs include premium tax, SG&A, quality improvements, federal income tax, and after-tax income. These items are discussed in the section Non-Benefit Expenses and Profit of this memorandum. Risk adjustment transfers and user fees and exchange fees are excluded because they are accounted for in the market adjusted index rate.

Tobacco Factors
Tobacco factors are not used in rating. As such, no adjustment is made for costs that are expected to be recouped through the tobacco surcharge.

Index Rate Calibration
Plan Adjusted Index Rates need to be calibrated to apply the allowable rating factors of age and geography in order to calculate the Consumer Adjusted Premium Rates. Calibration factors are applied uniformly to all plans.

Age Calibration
The calculated age curve calibration is 1.416, which equals the average age factor of the expected member distribution by age in the ACA enrollment. This corresponds with an approximate age of 44 years. The age factors used in this calculation are the HHS-specified age curve. Exhibit “7 - Age Calibration” shows the Average Age calibration factor development.

Geographic Calibration
The geographic factor calibration is 0.878, which equals the expected average area factor. A table of the geographic rating factors is below.

Table 13. Geographic Factors

Geographic Area Factors			
Area	**Counties**	**Current Factor**	**Proposed Factor**

Exhibit “8 - Geographic Calibration” shows the Average Area calibration factor development.

The proposed area factor changes are revenue neutral in total as indicated in Exhibit “18 Area Factors Change”.

Population morbidity by area was not considered when determining geographic area factors changes.

Calibrating the plan adjusted index rate to the age curve and geographic distribution results in the calibrated premium rate for each plan. The calibrated premium rate represents the preliminary premium rate charged to an individual before applying the consumer specific rating adjustments for age, area, and tobacco status.

<u>Consumer Adjusted Premium Rate Development</u>
The consumer adjusted premium rate is the final premium rate that is charged to an individual. It is developed by calibrating the plan adjusted index rate by the average age and geographic rating factors, and applying the consumer specific age, geographic, and tobacco status rating factors. The calculation is provided below.

	Plan Adjusted Index Rate
/	Age Calibration Factor
/	Geographic Calibration Factor
x	Consumer Specific Age Rating Factor
x	Consumer Specific Geographic Rating Factor
x	Tobacco Status Factor
x	Small Group Trend Adjustment
=	Consumer Adjusted Premium Rate

Small Group Trend Adjustment
Since this is a small group filing that includes rates with schedule trend increases by quarter, the Index Rate, Market Adjusted Index Rate and Plan Adjusted Index Rate reflect the member weighted average premium over the calendar year. As such, the Consumer Adjusted Premium Rate includes the trend adjustments in calculated quarterly rates.

B. Retention Items

Administrative Expense Load
The administrative expense load is a long-term estimate of administrative expenses, including selling expenses and general administrative expenses. This load varies by plan. These assumptions are based on the general ledger actual results for 2019 with known adjustments. Known adjustments include, but are not limited to, pay increases/raises for employees and administrative expenses as a result of Healthcare Reform and compliance requirements.

The administrative expense allocation methodology used in pricing is appropriate because it is consistent with how UnitedHealthcare runs its business and how it allocates administrative costs for Statutory Filings and the Healthcare Reform Exhibits.

For this filing, this is calculated at 11.4%.

	1/1/2021 Filing	
Administrative Expenses Allocation	**Estimated % of Premium**	**Estimated PMPM**
Selling Expenses (Commissions, Broker Bonus)	3.3%	$18.76
General Admin Expenses	8.1%	$46.24
Total	**11.4%**	**$65.00**

Profit and Risk Margin
The Profit and Risk Margin is 2%. This target does not vary by product or plan.

Taxes and Fees
Taxes and fees are expected to be 2.68% and include premium tax, ACA fees, and federal income tax. The following is a breakdown of the taxes and fees.

Premium Taxes and Fees Allocation	1/1/2021 Filing Estimated % of Premium	Estimated PMPM

  - In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102),
  - Developed in compliance with the applicable Actuarial Standards of Practice,
  - Reasonable in relation to the benefits provided and population anticipated to be covered,
  - Neither excessive, deficient, nor unfairly discriminatory.
- The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CRF 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106. For 2021 we have a full product discontinuance for both of our current products due to Uniform Modification reasons. Both of these products had change in prescription cost share structures in Tiers 3 and 4 which violates Uniform Modification and caused the product discontinuances. Due to this all of our 2020 plans have been terminated and new plans have been created for 2021. The new product codes for 2021 are 23489PA013 and 23489PA014.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2021 Rate Filing Justification
- The AV calculator was used to determine the AV metal values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Some of our plan designs are not directly compatible with the AV calculator. The values were developed in accordance with generally accepted actuarial principles and methodologies. The unique plan design actuarial certification required by 45 CFR Part 156.135 has been separately attached.
- The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop their rates. Rather, it represents information required by federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges, and for certification that the index rate is developed in accordance with federal regulation and used consistently and only adjusted by the allowable modifiers.
- All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.

I certify that the anticipated loss ratio meets the minimum requirement, the rates are reasonable in relation to benefits, the filing complies with the laws and regulations of PA and all applicable Actuarial Standards of Practice, including ASOP No. 8 and the rates are not unfairly discriminatory.
