Pennsylvania Insurance Department
1311 Strawberry Square | Harrisburg, PA 17120

Re: Small Employer Rate Filing for United HealthCare Insurance Company (UHC)
Pennsylvania

Dear Mrs. Gray,

This rate filing presents proposed premium rates effective January 1, 2019 through December 31, 2019 for medical and Rx benefit plans to be sold by the UnitedHealthcare Insurance Company to small group employers. The benefit plans and rates are for non-grandfathered employers. As requested, in this submission we have reduced the profit to 2% and the taxes and fees component of the rate development to 2.35% to reflect the reduction in profit. No other changes were made to the previously submitted rate filing.

1. Company Name: UnitedHealthcare Insurance Company NAIC Company Code **79413**
2. Market: Small group, employers with 50 or fewer eligible employees
3. On or Off Exchange: Off Exchange Only
4. Effective date of coverage: 1/1/2019
5. Average rate change requested: +8.1%
6. Range of rate change requested: Rate changes may range from -8.1% to 15.7% depending on the specific plan
7. Products: EPO and PPO
8. Rating Areas: All
9. Metal levels: All

10. Current number of covered lives and policyholders: Currently, they are 2,419 policyholders which cover 24202 lives.

11. Number of plans offered in 2019: They are 46 plans offered in 2019.

12. Corresponding contract form #, SERFF and Binder ID#s

Rate Change Summary

UnitedHealthcare Insurance Company – Small Group Plans

Rate request filing ID # 23489 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

Overview

Initial requested average rate change:	10.6%
Revised requested average rate change:	8.1%
Range of requested rate change:	-8.1% to 15.7%
Effective date:	1/1/2019
People impacted:	24,202
Available in:	All

Key information

Jan. 2017-Dec. 2017 financial experience

Premiums	\$145,563,299
Claims	\$116,178,159
Administrative expenses	\$11,754,086
Taxes & fees	\$7,378,129
Company made (after taxes)	\$10,252,925

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2019:

Claims:	83.6%
Administrative:	12.0%
Taxes & fees:	2.4%
Profit:	2.0%

The company expects its annual medical costs to increase **7.95%**.

Explanation of requested rate change

UnitedHealthcare insurance Company in requesting the rate increase because of the increase in medical costs and utilization of health care services.

Actuarial Memorandum
UnitedHealthcare Insurance Company, NAIC #79413
PA Small Group Rate Filing

August 2nd, 2018

This rate filing presents proposed premium rates effective January 1st, 2019 through December 31, 2019 for medical and Rx benefit plans to be sold by the UnitedHealthcare Insurance Company to small group employers.

The filing has been prepared as required by the “2019 ACA Compliant Health Insurance Rate Filing Guidance Final 3-13-18”, as well as current ACA rules. This rate filing should not be used for any other purposes. Within that context, there are no limitations or constraints on the use or applicability of the rating items discussed herein. The intended user of this filing is the PA Department of Insurance.

1. Basic Information and Data

A. Company Information

UnitedHealthcare Insurance Company NAIC Company Code **79413**
Small Group Rate Filing Off Exchange only

B. Rate History and Proposed Variations in Rate Changes

UHLC – 129638130 submitted 7/16/2014 for effective date 1/1/2015-12/31/2015
0% rate change and 7.2% annual trend applied quarterly. All rate revisions were applied uniformly

UHLC – 130076987 submitted 5/15/2015 for effective date 1/1/2016-12/31/2016
-1.5% rate change and 8% annual trend applied quarterly. All rate revisions were applied uniformly

UHLC - 130536849 submitted 5/11/2016 for effective date 1/1/2017-12/31/2017
4.23% year over year increase which includes 7.8% annual trend applied quarterly. We also adjusted area factors as follows:

<u>Rating Area</u>	<u>Change</u>
Rating Area 1	2.7%
Rating Area 2	10.2%
Rating Area 3	5.1%
Rating Area 4	6.0%
Rating Area 5	8.9%
Rating Area 6	-1.5%
Rating Area 7	-0.1%
Rating Area 8	-5.4%
Rating Area 9	-1.0%

UHLC – 130830047 submitted 12/2/2016 for effective date 4/1/2017-12/31/2017
+3% rate change and 9.4% annual trend applied quarterly. All rate revisions were applied uniformly

UHLC-131030030 submitted 5/19/2017 for effective date 1/1/2018-12/31/2018 base rate change of 2.6%, age factors were updated to reflect the CMS guidance, trend was updated to 9.6% annual applied quarterly, and the entire portfolio was resloped. All rate revisions were applied uniformly

C. Average Rate Change

Please see Table 10 for the calculation of the average rate change in the attached PA Actuarial Memorandum Rate Exhibits

The “Proposed Rate Change Compared to Prior 12 months” in Table 10 Column AC is 8.1%.

In Table 11, the change in 21-year-old non-tobacco premium PMPM Cell AN13 is 6.9%

As requested, for comparison purposes, these are the two rate increase amounts calculated on the URRT worksheet 1:

- The percent increase over Experience Period in cell V45 is 22.59%
- The percent increase, annualized, in cell V46 is 10.72%

D. Membership Count

Table 1. Number of Members

	Member-months	Members	Member-months
	Experience Period	Current Period (as of 02-01-2018)	Projected Rating Period
Average Age	34.0	34.2	34.2
Total	350,282	30,190	333,585
<18	77,027	6,556	72,440
18-24	34,366	2,884	31,867
25-29	30,656	2,783	30,751
30-34	33,643	2,946	32,552
35-39	30,119	2,619	28,939
40-44	26,591	2,252	24,883
45-49	30,960	2,600	28,729
50-54	31,738	2,660	29,392
55-59	30,312	2,609	28,828
60-63	17,664	1,616	17,856
64+	7,206	665	7,348

*Tables 1, 2 and 4 must include data for all non-grandfathered business (ACA compliant and Transitional)

E. Benefit Changes

Changes to member cost sharing were required for certain benefit plans. Use of the new federal Actuarial Value (AV) Calculator led to some benefit plans falling outside the allowed AV metal ranges. Benefit plan changes were made to move these plans back into the allowed AV ranges. The benefit changes for these plans are listed in Exhibit 2.

We refined the medical and pharmacy plan price relativities to reflect the most recent pricing methodology and pricing models. The methodology is based on UnitedHealthcare nationwide experience data, which contains utilization frequencies and unit costs by service category, in addition to claim distributions and adjustment factors for a large number of plan design variables. Benefit design parameters such as deductibles, coinsurance, copays, out-of-pocket maximums, etc.

were input for each plan. The expected paid-to-allowed relativities and expected utilization differences due to differences in cost sharing for each plan are then used to develop the plan factors for each benefit plan. All benefit plans are priced consistently with each other, with the rates differing by the estimated value of the benefits and the expected utilization differences due to differences in cost sharing. The utilization differences do not reflect differences due to health status.

All the changes are revenue neutral and the Plan Relativity Factors are listed in Exhibit 3a and 3b. Also, the revenue neutrality factor development is shown in Exhibit 14.

F. Experience Period Claims and Premium

Premiums (net of MLR Rebate) in Experience Period

Earned premium for our small group market business in Pennsylvania for 2017 was approximately \$ 145,563,299. MLR rebate payments are not anticipated in Pennsylvania for the 2016 calendar year, an estimate that was provided by UnitedHealthcare's finance department. The estimated 2017 benefit year risk adjustment transfer payment is \$ 6,484,441.

The claims data was available directly from company claims records. The claims data represents all non-grandfathered policies in the single risk pool. Table 2 is consistent with the data used in the URRT.

The claims and premiums for the transitional policies were included in the experience data. The transitional policies cover 72,118 member months with earned premiums of \$29,381,858 and incurred claims of \$20,879,455.

Paid Through Date

The experience period is January 1, 2017 to December 31, 2017, with claims paid through February 28, 2018.

Support for estimate of incurred but not paid claims

The UnitedHealthcare Reserving process utilizes the Reserve Production System (RPS) to record reserves into the PeopleSoft general ledger. Fee for service and paid claim data is loaded into RPS and becomes the basis for the monthly reserve calculations at the various business unit, location, and line of business levels. The assignment of the paid claims into RPS packages is based on the mapping rules maintained by the Corporate Actuarial department. RPS calculates a preliminary best estimate Incurred But Not Reported (IBNR) for each reserving model (package) primarily using standard completion factors based on historical claim experience. The Claims Reserving Team adjusts the preliminary IBNR based on specific knowledge of the entity (i.e. catastrophic claims, pending claims, etc.) to calculate the final IBNR. In months where adjudicated claims experience is not complete enough for an estimate using completion factors, a seasonally adjusted PMPM is used to estimate incurred claims.

A description of the Sarbanes Oxley controls, audited by Deloitte & Touche, in place regarding the reserving process includes:

- 1) Market Paid claim Tie-outs: To verify completeness and accuracy of financial data in RPS, paid claim data is tied out between source system (RPS) and PeopleSoft general ledger.

2) Market Expense Tie-outs: RPS reserve changes on the income statement are tied to the PeopleSoft general ledger to ensure that information is accurate subsequent to computing the reserve.

Allowed claims by benefit category were obtained from UnitedHealthcare claim paying system reports. The same completion factors are applied to both incurred and allowed claims amounts.

Non-EHB benefits and the experience period cost

The non-EHB claims account for 1.6% of the total claims in the experience period. The non-EHB services are exclusively for physician and outpatient claims. We expect the same benefits to be covered during the rating period.

Capitation

Capitation includes all services provided under one or more capitated agreements and it is applied uniformly across all membership during the experience period. For this experience period, the capitated amount is \$10.84 PMPM and it is the same for ACA only experience.

Pharmacy Rebates

The prescription drug cost is net of rebates received from drug manufacturers. For this experience period the average pharmacy rebate is -\$18.56 PMPM. ACA only rebate is -\$19.96.

Risk Adjustment and Reinsurance:

Risk Adjustments percentage applied to the experience period premium is -4.45% which represents the expected 2017 CMS adjustment. For ACA only this represents -4.29%.

Risk adjustment transfer PMPM is -\$18.51 PMPM applied to the experience period premium for the combined ACA and Transitional business. For ACA only, the PMPM is -\$17.93.

Since this is a small group filing and the state of Pennsylvania chose not to combine its individual and small group markets, reinsurance recoveries are not applicable to this rate filing. As such, no adjustments were made to the experience.

G. Credibility of Data

Due to the extension of the Transitional program, we do not expect the groups in this program to migrate to the ACA plans. Therefore, we consider the ACA only experience is appropriate for the rate development purposes.

We believe the small group ACA experience used for developing the credibility manual to be fully credible. A specific credibility formula was not used for this determination, but rather professional actuarial judgment. As ASOP 25, section 3.4 states: "Professional Judgment - The actuary should use professional judgment when selecting, developing, or using a credibility procedure. The use of credibility procedures is not always a precise mathematical process."

H. Trend Identification

Two years of annual trend were applied to the experience to project it to the rating period. The table below details the components of each trend factor.

Table 3. Trend Components

Service Category	Cost*	Utilization*	Induced Demand*	Composite URRT Trend **	Weight*
Inpatient Hospital	4.48%	2.65%	0.00%	7.25%	21.50%
Outpatient Hospital	5.35%	4.40%	0.00%	9.99%	33.15%
Professional	2.45%	2.40%	0.00%	4.91%	21.70%
Other Medical	2.66%	-0.64%	0.00%	2.00%	4.19%
Capitation				2.45%	2.51%
Prescription Drugs	4.79%	5.75%	0.00%	10.82%	16.95%
Total Annual Trend				7.95%	100.00%
Months of Trend				24	
Total Applied Trend Projection Factor				1.165	

* Express Cost, Utilization, Induced Utilization and Weight as percentages

** Should = URRT Trend

See the definition in the Historical Experience section.

We are proposing an increase to the annual Pricing Trend from 9.6% to 9.7% applied quarterly.

The following table shows how we are incorporating the 2.65% ACA fee in the quarterly trend to apply the appropriate portion of the fee for each renewal quarter.

Since the pricing trend is 9.7%, the quarterly trend is 2.3%.

The quarterly portion of the ACA fee is 0.7% and it is added to the 2.3% quarterly trend. This calculation results in a 3% quarterly trend and ACA fee which, when annualized, becomes 12.6%. In Table 5 trend was populated with the 12.6% value.

	<u>Q1</u>	<u>Q2</u>	<u>Q3</u>	<u>Q4</u>	<u>Annual</u>
Quarterly Trend	1	1.023	1.047	1.072	1.097
Insurer's Fee	1	1.007	1.013	1.020	1.0265
Combined	1	1.030	1.061	1.093	1.126

In Table 3 of the PA Actuarial Memorandum Rate Exhibits the annual trend of 7.95% is calculated and is used to project claims from the experience period to a rate date of 1/1/2019. This trend number reflects a blend of multiple years and it does not include leveraging. With leveraging, the 7.95% claim trend becomes 9.1%.

The 9.7% pricing trend included in the calculation of the 12.6% input in Table 5 represents future quarterly pricing trends that will be used to increase 1/1/2019 premium rates to determine 4/1/2019, 7/1/2019, and 10/1/2019 premium rates. The difference in trends reflect future expected changes contracting caused by a difference in time periods and the additional uncertainty caused by projecting further into the future. We expect our future pricing trends to vary as new information on contracting emerges.

The details of the proposed 9.7% trend are in Exhibit “6 – Pricing Trend” included in this filing.

Our trend setting process is outlined by the following narrative and exhibits. In general, recent/emerging claims experience is reviewed at the market level for several broad medical expense categories (inpatient, professional, pharmacy, etc.), with utilization, unit cost, benefit leveraging, and business mix identified for each category. Depending on the amount of underlying experience, additional markets may be added together to limit the variability of small blocks of experience. Historical patterns will produce highly variable results with limited credibility. National utilization/mix assumptions along with local contract assessment will be used to produce a more stable and reliable trend estimate.

Unit Cost Projections

Unit cost projections are developed based on evaluations of current and anticipated provider contract economics, as well as consideration to both current and expected changes in non-contracted provider cost exposure. **Schedule A1** summarizes our PA market contract assessment by service category. Regional provider assignments are an internal process only and do not correspond to allowable rating areas.

Utilization/mix assumption

In determining our projected utilization/mix assumption, we first examine our national historical experience for medical and pharmacy. In order to eliminate business mix issues, our national experience is limited to accounts that exist in both the prior and current period of experience. We call this a “Same Store” assessment. **Schedule B1** compares “Same Store” allowed claim cost between the most complete years. The change in allowed cost is adjusted for demographics, working day differences, and other minor changes. Our estimated national unit cost (**Schedule A2**) is subtracted from this total to determine a national historic utilization/mix trend. In order to develop our forward looking utilization/mix component, we must now assess the expected changes that will occur from administrative initiatives, provider contracting, economic conditions, environmental impact, policy provisions, regulatory change, and technological advancements. (**Schedule B2**) Given the complexity of some of these estimates, many of the expected changes are applied uniformly across all service categories. The aggregate utilization mix change is determined and then applied at the service level to create our service level splits. (**Schedule B3**) Given the variation in service level trends, aggregate medical and pharmacy projected trends are developed and service level splits are based on proportional historical experience.

Benefit leveraging

Our final step is to determine a trend estimate for benefit leveraging. Since our analysis is based on allowed cost differences, we must also include a component for which recognizes the benefit leveraging impact from fixed deductibles, copays, and stop loss limits. **Schedule D** includes a process that simulates a net trend calculation assuming the impact of various cost sharing components at the service level.

In general, we’re seeing our contract costs or unit cost percentage increase slightly due to financial requirements by various facilities. Since we fix our pharmacy unit cost pricing at 4.8%, a majority of the new pricing schedules both for existing and new drugs flow through into our mix of service category. Pharmacy trends have been high and are expected to stay that way. Within our current history, we’ve implemented programs to manage medical fraud, waste, and abuse. These programs have artificially lowered our trends in 2017. Since we have no additional major programs scheduled for the near future, we expect utilization trends to increase slightly going into 2018 and 2019.

I. Historical Experience

Table 4 below describes the most recent 48 months of experience data with 2 month of runout for the legal entity which includes both ACA and Transitional business.

Table 4b below describes the most recent 48 months of experience data with 2 month of runout for the credibility manual which covers only ACA business.

Table 4. Historical Experience

Month-Year	Total Annual Premium	Incurred Claims	Completion Factors*	Ultimate Incurred Claims	Members	Ultimate Incurred PMPM	Estimated Annual Cost Sharing (Member + HHS)	Prescription Drug Rebates**	Allowed Claims (Net of Prescription Drug Rebates)	Allowed PMPM

UnitedHealthcare develops forward-looking medical expense estimates based on a number of considerations. In general, recent/emerging claims experience is reviewed at the market level for several broad medical expense categories (inpatient, professional, pharmacy, etc.), with utilization, unit cost, and benefit leveraging identified for each category. Future trends are developed based on a projection of each component.

Utilization rates by category are measured and projected. Forward looking utilization levels are developed based on emerging market level data, supplemented by regional and/or national level utilization data. Macro-economic data is often used to develop assumptions regarding directional changes in national health care consumption rates. UnitedHealthcare uses same store analysis to reflect utilization.

Market-level unit cost projections are developed based on evaluations of current and anticipated provider contract economics, as well as consideration to both current and expected changes in non-

contracted provider cost exposure. Unit cost projections also consider the estimated cost impact of new technologies, service availability/mandates, or other factors that might influence mix of procedures. Unit cost is based on our contractual changes with providers.

In addition, market-level healthcare affordability activities that are expected to impact forward-looking medical costs are recognized. Depending on the nature of individual initiatives, the impact may be recognized in one or more of the component cost items discussed above. Only incremental activities are recognized for this purpose in the expected trend impact for any particular period.

This rate filing proposes quarterly rates.

2. Rate Development & Change

A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

Table 5. Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims

Development of the Projected Index Rate	Actual Experience Data	Manual Data
Total Allowed EHB Claims + EHB Capitation PMPM (net of prescription drug rebates) PMPM	\$ 398.12	\$ 411.08
Two year trend projection Factor	1.165	1.165
Unadjusted Projected Allowed EHB Claims PMPM	\$ 463.90	\$ 478.93
Single Risk Pool Adjustment Factors		
Change in Morbidity	1.000	0.996
Change in Other	1.030	1.054
Change in Demographics	1.000	1.000
Change in Network	1.000	1.000
Change in Benefits	1.000	1.000
Change in Other	1.030	1.054
Total Adjusted Projected Allowed EHB Claims PMPM	\$ 477.81	\$ 503.15
Credibility Factors	0%	100%
Blended Projected EHB Claims PMPM		\$ 503.15
Development of the Market-Adjusted Index Rate and Total Allowed Claims		
Adjusted Projected Allowed EHB Claims PMPM	\$ 503.15	<- Index Rate for Proje
Adjusted Projected Allowed EHB Claims PMPM [will only populate for small group filings]	\$ 526.21	
Projected Paid to Allowed Ratio	0.808	<- Paid to Allowed Ave
Projected Paid EHB Claims PMPM	\$ 425.17	
Market-wide Adjustments		
Projected Risk Adjustment PMPM	\$ (12.80)	
Projected Paid Exchange User Fees PMPM	\$ -	
Market-Adjusted Projected Paid EHB Claims PMPM	\$ 437.98	
Market-Adjusted Projected Allowed EHB Claims PMPM	\$ 542.05	<- Market-Adjusted In
Projected Allowed Non-EHB Claims PMPM	\$ 8.18	
Market-Adjusted Projected Paid Total Claims PMPM	\$ 444.59	
Market-Adjusted Projected Allowed Total Claims PMPM	\$ 550.23	

Projected risk adjustment PMPM is -\$13.01 and it matches URRT worksheet 1 section 3. We applied an adjustment for EHB and the resulting PMPM is -\$12.80 = -\$13.01 * 0.984.

The Index Rate for the experience period is approximately 98.4% of allowed claims due to benefits in excess of EHBs. The reported percentage amount is based on experience data. The Index Rate in the projection period represents 98.4% of allowed claims due to the benefits in excess of EHBs.

The Index rate calculation is demonstrated in Table 5A below:

Table 5A. Small Group Projected Index Rate with Quarterly Trend

Effective Date	1/1/2019	4/1/2019	7/1/2019	10/1/2019	Total Single Risk Pool
# of Member Months Renewing in Quarter	117,178	47,969	56,247	112,189	333,583
Adjusted Projected Allowed EHB Claims PMPM Q1	\$ 503.15	\$ 503.15	\$ 503.15	\$ 503.15	\$ 503.15
Months of Trend	-	3	6	9	
Annual Trend	12.57%	12.57%	12.57%	12.57%	
Single Risk Pool Projected Allowed Claims	\$ 503.15	\$ 518.26	\$ 533.83	\$ 549.86	\$ 526.21
Quarterly Trend Factor	100.0%	103.0%	106.1%	109.3%	104.6%
2019 Trend Factors by Quarter	0.9562	0.9849	1.0145	1.0450	

The market adjusted index rate includes market-wide adjustments for the risk adjustment program and exchange user fees. Incurred values were grossed up by the average paid-to-allowed ratio to reflect an allowed basis.

Plan adjusted index rates include adjustments for all allowable plan level modifiers as defined in the market rating rules, 45 CFR 156.80(d)92). The adjustments are as follows:

Actuarial Value and Cost Sharing Adjustment

UnitedHealthcare has a proprietary pricing model that was used in developing the actuarial value and cost sharing adjustment for each plan. The model calculates plan relativity factors for medical and pharmacy benefits. Also included under the actuarial value and cost sharing adjustment are adjustments for leveraging and the difference between the average plan relativity factor and the projected paid to allowed ratio.

Historical affiliated carrier experience was used to develop the actuarial value and cost sharing adjustment for each plan as well as the distribution and administrative costs adjustment.

Provider network, deliver system and utilization management adjustment

Any adjustments for these items are included in the plan relativity factors.

Benefits in Addition to EHBs

Benefit Extra EHB is the percentage of claims that are covered and are not included in EHB. The projected non- EHB impact is 1.6%.

Distribution and Administrative Costs

Distribution and Administrative Costs include premium tax, SG&A, quality improvements, federal income tax, and after-tax income. These items are discussed in the section Non-Benefit Expenses and Profit of this memorandum. Risk adjustment transfers and user fees and exchange fees are excluded because they are accounted for in the market adjusted index rate.

Tobacco Factors

Tobacco factors are not used in rating. As such, no adjustment is made for costs that are expected to be recouped through the tobacco surcharge.

Calibration

Plan Adjusted Index Rates need to be calibrated to apply the allowable rating factors of age and geography in order to calculate the Consumer Adjusted Premium Rates. Calibration factors are applied uniformly to all plans.

Age Calibration

The calculated age curve calibration is 1.4257, which equals the average age factor of the expected member distribution by age in the ACA enrollment. This corresponds with an approximate age of 44 years. The age factors used in this calculation are the HHS-specified age curve.

Exhibit 7 shows the Average Age calibration factor development.

Geographic Calibration

The geographic factor calibration is 0.851, which equals the expected average area factor. A table of the geographic rating factors is below.

Geographic Area Factors			
Area	Counties	Current Factor	Proposed Factor
Rating Area 1	Erie, Crawford, Mercer, Venango, Clarion, Forest, Warren, McKean	0.734	0.772
Rating Area 2	Elk, Cameron, Potter	0.769	0.780
Rating Area 3	Tioga, Clinton, Lycoming, Sullivan, Bradford, Susquehanna, Wyoming, Lackawanna, Wayne, Pike, Monroe, Carbon, Luzerne	1.003	0.919
Rating Area 4	Lawrence, Beaver, Washington, Greene, Butler, Allegheny, Westmoreland, Armstrong, Indiana, Fayette	0.760	0.809
Rating Area 5	Jefferson, Clearfield, Cambria, Somerset, Bedford, Blair, Huntingdon	0.773	0.795
Rating Area 6	Centre, Mifflin, Union, Snyder, Montour, Northumberland, Columbia, Schuylkill, Lehigh, Northampton	0.941	0.924
Rating Area 7	Adams, York, Lancaster, Berks	0.998	0.946
Rating Area 8	Chester, Delaware, Montgomery, Bucks, Philadelphia	0.950	0.902
Rating Area 9	Fulton, Franklin, Cumberland, Perry, Juniata, Dauphin, Lebanon	0.891	0.894

New geographic rating factors are proposed with this rate filing. The analysis is in Exhibit “16 - Area Factor Analysis” which is included in this filing. These changes are revenue neutral as shown in Exhibit “16 - Area Factor Analysis” cell P77. The area factors estimate the average unit cost across geographic area.

Methodology

In developing the new geographic factors we started with experience geographic factors by counties for 12 months ending June 2017. To determine the experience factors actual allowed claims for the geographic area were compared to national repriced dollars to develop the area factors. This data is based on member residence.

Those factors are trended to the rating period using Cost Report Trend (UCRT) data for 2017, 2018 and 2019. The result is normalized and compared to the current factors. A proposed new set of geographic factors is calculated in column Q of the exhibit “16 - Area Factor Analysis”.

We then mapped the Employer’s membership to the county they reside in. We created a table that assigned the Rating Area based where the member lives and the Employer’s county.

Using this mapping we re-calculated the proposed area factors so they would reflect the expected cost by employer’s county rather than the member’s residence.

The changes were made revenue neutral using the ACA only membership enrollment as of January 2018.

Exhibit 8 shows the Average Geographic factor calibration development.

Population morbidity by area was not considered when determining geographic area factors changes.

Calibrating the plan adjusted index rate to the age curve and geographic distribution results in the calibrated premium rate for each plan. The calibrated premium rate represents the preliminary premium rate charged to an individual before applying the consumer specific rating adjustments for age, area, and tobacco status.

Consumer Adjusted Premium Rate Development

The consumer adjusted premium rate is the final premium rate that is charged to an individual. It is developed by calibrating the plan adjusted index rate by the average age and geographic rating factors, and applying the consumer specific age, geographic, and tobacco status rating factors. The calculation is provided below.

	Plan Adjusted Index Rate
/	Age Calibration Factor
/	Geographic Calibration Factor
x	Consumer Specific Age Rating Factor
x	Consumer Specific Geographic Rating Factor
x	Tobacco Status Factor
x	Small Group Trend Adjustment
=	Consumer Adjusted Premium Rate

Small Group Trend Adjustment

Since this is a small group filing that includes rates with schedule trend increases by quarter, the Index Rate, Market Adjusted Index Rate and Plan Adjusted Index Rate reflect the member weighted average premium over the calendar year. As such, the Consumer Adjusted Premium Rate includes the trend adjustments in calculated quarterly rates.

B. Retention Items

Administrative Expense Load

The administrative expense load is a long-term estimate of administrative expenses, including selling expenses and general administrative expenses. This load varies by plan. These assumptions are based on the general ledger actual results for 2017 with known adjustments. Known adjustments include, but are not limited to, pay increases/raises for employees and administrative expenses as a result of Healthcare Reform and compliance requirements.

The administrative expense allocation methodology used in pricing is appropriate because it is consistent with how UnitedHealthcare runs its business and how it allocates administrative costs for Statutory Filings and the Healthcare Reform Exhibits.

For this filing, this is calculated at 12.03%.

Administrative Expenses Allocation		Estimated % of Premium
	Selling Expenses (Commissions, Broker Bonus)	3.43%
	General Admin Expenses	8.60%
	Total	12.0%

Profit and Risk Margin

The Profit and Risk Margin of 2.0% is shown in Worksheet 1, Section 3 of the URRT. This target does not vary by product or plan.

Taxes and Fees

Taxes and fees are expected to be 2.35% and include premium tax and federal income tax. The following is a breakdown of the taxes and fees.

Premium Taxes and Fees Allocation	Estimated % of Premium
Federal / State Income Tax on Profit & Risk Load	0.53%
Premium Tax	1.73%
ACA Taxes: Insurer Fee	0.00%
ACA Taxes: Reinsurance Fee	0.00%
ACA Taxes: PCORI Fee	0.00%
ACA Taxes: Risk Adjustment User Fee	0.00%
ACA Taxes: Exchange User Fee	0.00%
All Other Taxes & Fees	0.09%
Total	2.35%

C. Normalized Market-Adjusted Projected Allowed Total Claims

The 2019 average age factor is slightly higher than the 2018 factor, the age normalization factor in 2018 is 1.414 compared to 1.4257 in 2019. The age factors used in this calculation are the HHS-specified age curve.

The 2019 average geographic factor is 0.851 compared to 0.852 in 2018.

D. Components of Rate Change

Table 7. Normalized Market-Adjusted Projected Allowed Total Claims

<u>Normalization Factors</u>	2018	2019
Average Age Factor	1.414	1.426
Average Geographic Factor	0.852	0.851
Average Tobacco Factor	1.000	1.000
Average Benefit Richness (induced demand)	1.134	1.136
Average Network Factor	1.000	1.000
Market-Adjusted Projected Allowed Total Claims PMPM	\$ 508.26	\$ 550.23
Normalized Market-Adjusted Projected Allowed Total Claims PMPM	\$ 372.09	\$ 399.40

Table 9. Year-over-Year Data to Support Table 8

	2018	2019
Paid-to-Allowed	0.776	0.808
URRT Trend (Total Applied Trend Factor)	1.158	1.165
URRT Morbidity	1.005	0.996
URRT "Other"	1.011	1.054
Risk Adjustment	\$ 20.51	\$ 12.80
Exchange User Fee	\$ -	\$ -
Capitation	\$ 16.91	\$ 13.27
Network	1.000	1.000
Pricing AV	0.791	0.828
Benefit Richness	1.122	1.122
Catastrophic Eligibility	1.000	1.000
Administrative Expenses	13.20%	12.03%
Taxes and Fees	5.88%	2.35%
Profit and/or Contingency	1.41%	2.00%

Changes in “Other” include the changes in the catastrophic claims adjustment impact and the changes due to the methodology change to use as credibility manual the ACA only experience. The capitation arrangements for 2018 resulted in a projection of \$16.91 PMPM while for 2019 is \$13.27 PMPM.

3. Plan Rate Development

Table 10 has been populated as instructed.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 has been populated as instructed.

5. Plan Factors

A. Age and Tobacco Factors

Table 12 has been populated as instructed using the default federal standard age curve.

B. Geographic Factors

Table 13 has been populated as instructed

C. Network Factors

Table 14 has been populated as instructed

D. Service Area Composition

There is just one service area that includes all the counties.

E. Composite Rating

No composite rating is offered for this product.

6. Actuarial Certifications

I, [REDACTED], an Actuary at UnitedHealthcare, I am a members of the American Academy of Actuaries, and I meet the Academy's qualification standards for rendering statements of actuarial opinion with respect to the filing of rates for health insurance products. I have reviewed applicable ASOPs during the preparation of this rate filing.

To the best of my knowledge and judgment, I certify that:

- The projected index rate is:
 - In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102),
 - Developed in compliance with the applicable Actuarial Standards of Practice,
 - Reasonable in relation to the benefits provided and population anticipated to be covered,
 - Neither excessive, deficient, nor unfairly discriminatory.
- The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2019 Rate Filing Justification
- All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
- The AV calculator was used to determine the AV metal values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Some of our plan designs are not directly compatible with the AV calculator. The values were developed in accordance with generally accepted actuarial principles and methodologies. The unique plan design actuarial certification required by 45 CFR Part 156.135 has been separately attached.
- The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop their rates. Rather, it represents information required by federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges, and for certification that the index rate is developed in accordance with federal regulation and used consistently and only adjusted by the allowable modifiers.
- All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
- New plans are not considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2019 Rate Filing Justification.
I certify that the anticipated loss ratio meets the minimum requirement, the rates are reasonable in relation to benefits, the filing complies with the laws and regulations of PA and all applicable Actuarial Standards of Practice, including ASOP No. 8 and the rates are not unfairly discriminatory.

UnitedHealthcare Insurance Company

Pennsylvania Small Group

2019 Non-Grandfathered Employer Rates

(1) Scope and Range of the Rate Increase

The requested rate change for small group health benefit plans sold in the state of Pennsylvania will be effective January 1, 2019 and impacts 30,190 covered lives. The rate change experienced by members will vary depending on plan selection and geographic area. Additional premium changes may occur upon renewal due to changes in member age, changes in plan selection, and changes in geographic location.

(2) Financial Experience of the Product

The benefit care ratio for these products during the 2017 calendar year is 82.5%. This ratio is the portion of premium that is needed to pay medical claims. The complement of the benefit care ratio is the portion of premium needed for taxes and fees, administrative expenses, and margin.

(3) Changes in Medical Service Costs

There are many different healthcare cost trends that contribute to increases in the overall U.S. healthcare spending each year. These trend factors affect health insurance premiums, which can mean a premium rate increase to cover costs. Some of the key healthcare cost trends that have affected this year's rate actions include:

- Increasing cost of medical services: Annual increases in reimbursement rates to healthcare providers, such as hospitals, doctors, and pharmaceutical companies.
- Increased utilization: The number of office visits and other services continues to grow. In addition, total healthcare spending will vary by the intensity of care and use of different types of health services. The price of care can be affected by the use of expensive procedures such as surgery versus simply monitoring or providing medications.
- Higher costs from deductible leveraging: Healthcare costs continue to rise every year. If deductibles and copayments remain the same, a higher percentage of healthcare costs need to be covered by health insurance premiums each year.
- Cost shifting from the public to the private sector: Reimbursements from the Centers for Medicare and Medicaid Services (CMS) to hospitals do not generally cover the cost of providing care to these patients. Hospitals typically make up this reimbursement shortfall by charging private health plans more.
- Impact of new technology: Improvements to medical technology and clinical practice often result in the use of more expensive services, leading to increased healthcare spending and utilization.

(4) Changes in Benefits

Changes in covered benefits impact costs and therefore affect premium changes. Benefit plans are typically changed for one of three reasons: to comply with the requirements of the Affordable Care Act or state law, to respond to consumer feedback, or to address a particular medical cost issue to provide greater long-term affordability of the product.

(5) Administrative Costs and Anticipated Margins

UnitedHealthcare Insurance Company works to directly control administrative expenses by adopting better processes and technology and developing programs and innovations that make healthcare more affordable. We have led the marketplace by introducing key innovations that make healthcare services more accessible and affordable for customers, improve the quality and coordination of healthcare services, and help individuals and their physicians make more informed healthcare decisions. Taxes and fees imposed by the State and Federal government are significant factors that impact healthcare spending and have to be included in the administrative costs associated with

the plans. These fees include Affordable Care Act taxes and fees which impact health insurance costs and need to be reflected in premium. Another component of premium is margin, which is set to address expected volatility and risk in the market.

The requested rate change is anticipated to be sufficient to cover the projected benefit and administrative costs for the 2019 plan year.

Section 1: Purpose

The following is a rate filing prepared by UnitedHealthcare Insurance Company. This filing has been prepared to provide the necessary information required by the Department of Health and Human Services and the state of Pennsylvania. The purpose of this memorandum is to provide information relevant to the Federal Part I Unified Rate Review Template (URRT).

This filing establishes rates intended to be used for non-grandfathered PPACA compliant small group health benefit plans sold off the Small Business Health Options Program in Pennsylvania for the 2019 plan year. A rate increase is being filed at this time. The rates and other information in this submission are based on the current regulations and guidance from HHS. Changes to this filing may be necessary if there are revisions to the regulations or updated guidance from HHS.

This memorandum is intended solely for the information of and use by the Department of Health and Human Services and the Pennsylvania Department of Insurance and Financial Services. It will demonstrate compliance with state and federal laws and regulations related to the development of the index rate and allowable rating factors and is not intended to be used for any other purpose.

The attached document contains confidential, proprietary information and trade secrets. This information is strictly confidential and protected from disclosure by 40 P.S. § 65.2-A. If the prohibition against disclosure by the Department of Insurance and Financial Services is reassessed at a later date, it may not be disclosed to any other state or federal regulatory agencies unless the recipient agrees in writing prior to receipt to maintain the confidentiality of the information.

Section 2: General Information

Company Identifying Information

Company Legal Name: UnitedHealthcare Insurance Company
State: Pennsylvania
HIOS Issuer ID: 23489
Market: Small Business, 1-50
Proposed Effective Date: January 01,2019

Primary Contact Information

Name: [REDACTED]
Telephone Number: [REDACTED]
Email Address: [REDACTED]

Section 3: Proposed Rate Changes

The proposed change in rates for this filing is 10.42% compared to the prior filing. The change in geographic rating factors ranges from -8.41% to 6.42% and is revenue neutral based on the current inforce population. These changes are applied uniformly to all plans within a rating area. The proposed pricing trend is 9.7% annually.

- Changes in medical service costs
 - Increasing Cost of Medical Services – Annual increases in reimbursement rates to health care providers – such as hospitals, doctors and pharmaceutical companies.
 - Increased Utilization – The number of office visits and other services continues to grow. In addition, total health care spending will vary by the intensity of care and/or use of different types of health services. Patients who are sicker generally have a higher intensity of health care utilization. The price of care can be affected by the use of expensive procedures such as surgery vs. simply monitoring or providing medications.
 - Higher Costs from Deductible Leveraging – Health care costs continue to rise every year. If deductibles and copayments remain the same, a greater percentage of health care costs need to be covered by health insurance premiums each year.
 - Cost shifting from the public to the private sector – Reimbursements from the Center for Medicare and Medicaid Services (CMS) to hospitals do not generally cover all of the cost of care. The cost difference is being shifted to private health plans. Hospitals typically make up this difference by charging private health plans more.
 - Impact of New Technology – Improvements to medical technology and clinical practice often result in the use of more expensive services - leading to increased health care spending and utilization.
- Administrative costs and anticipated profit
 - UnitedHealthcare works to directly control administrative expenses by adopting better processes and technology and through the development of programs and innovations that make health care more affordable. We have led the marketplace by introducing key innovations that make health care services more accessible and affordable for customers, improve the quality and coordination of health care services, and help individuals and their physicians make more informed health care decisions.
 - Additionally, UnitedHealthcare indirectly controls medical cost payments by using appropriate payment structures with providers and facilities. UnitedHealthcare’s goal is to control costs, maximize efficiency, and work closely with physicians and providers to obtain the best value and coverage.

-
- State and/or Federal government imposed taxation and fees are additional significant factors that impact health care spending. These fees include ACA taxes and fees which will have increased health insurance costs and need to be reflected in premium.
 - Changes that vary by plan
 - All plan relativity factors have been updated to reflect UnitedHealthcare's most recent pricing model.
 - The impact of any changes to plans that have occurred due to uniform modification are also reflected in the updated plan relativity factors. Please see the "Plan Adjusted Index Rate" section of the memorandum for more detail on these changes.

We refined the medical and pharmacy plan price relativities to reflect the most recent pricing methodology and pricing models. The methodology is based on UnitedHealthcare nationwide experience data, which contains utilization frequencies and unit costs by service category, in addition to claim distributions and adjustment factors for a large number of plan design variables. Benefit design parameters such as deductibles, coinsurance, copays, out-of-pocket maximums, etc. were input for each plan. The expected paid-to-allowed relativities and expected utilization differences due to differences in cost sharing for each plan are then used to develop the plan factors for each benefit plan. All benefit plans are priced consistently with each other, with the rates differing by the estimated value of the benefits and the expected utilization differences due to differences in cost sharing. The utilization differences do not reflect differences due to health status. The net impact of all changes by plan can be found in Worksheet 2, Section I of the Unified Rate Review Template.

Significant factors driving the proposed rate changes are discussed in further detail in Section 6 (*Projection Factors*) and Section 7 (*Credibility Manual Rate Development*) of this memorandum.

Section 4: Experience Period Premium and Claims

Paid Through Date

The experience period is 1/1/2017 through 12/31/2017, with claims paid through 2/28/2018.

Premiums (net of MLR Rebate) in Experience Period

Earned premium for our small group market business in Pennsylvania for 2017 was approximately \$139,078,900. MLR rebate payments are not anticipated in Pennsylvania for the 2017 calendar year, an estimate that was provided by UnitedHealthcare's finance department. Therefore, premium net of MLR rebates and risk adjustment (payment/receivable) is \$145,563,299.

Support for estimate of incurred but not paid claims

Historical claims are categorized both by the month in which they were incurred and the month in which they were adjudicated. For incurral months with sufficient adjudicated claim experience, incurred claims are estimated by applying completion factors derived from the historical claims. Adjustments are made based on specific knowledge of the entity (e.g., catastrophic claims, pended claims, etc.). For incurral months where adjudicated claim experience is not sufficient to rely on completion factors, a PMPM is used to estimate incurred claims. PMPM estimates are based on expected claim seasonality patterns, monthly calendar days and work days, emerging claim trends, and other factors.

The same completion factors are applied to both incurred and allowed claims amounts.

Section 5: Benefit Categories

Claims were assigned to each of the benefit categories based on where services were administered and the types of medical services rendered. The benefit categories were defined by our claims department using standard industry definitions.

Inpatient Hospital

Includes non-capitated facility services for medical, surgical, maternity, mental health and substance abuse, skilled nursing, and other services provided in an inpatient facility setting and billed by the facility.

Outpatient Hospital

Includes non-capitated facility services for surgical, emergency room, laboratory, radiology, therapeutic, observation, and other services provided in an outpatient facility setting and billed by the facility.

Professional

Includes non-capitated primary care, specialist care, therapeutic, the professional component of laboratory and radiology, and other professional services, other than hospital based professionals whose payments are included in facility fees.

Other Medical

Includes non-capitated ambulatory, home health care, durable medical equipment, prosthetics, supplies, vision exams, dental services and other services.

Capitation

Includes all services provided under one or more capitated agreements.

Prescription Drug

Includes drugs dispensed by a pharmacy. This amount is net of rebates received from drug manufacturers.

Section 6: Projection Factors

Changes in the Morbidity of the Population Insured

The total Population Risk Morbidity Adjustment is 0%.

Other Adjustments

The total other adjustments are 5%, it is comprised of the following factors:

Catastrophic Claims Adjustment:

An adjustment was made to account for catastrophic claims experience in the experience period. The claims were adjusted by -0.22% to align with expected catastrophic claim levels in the rating period.

Demographic Creep:

A morbidity adjustment of 0.5% was made for expected claim costs in 2019 compared to the experience period. The adjustment is needed to account for policies being quoted on an "issue-age" basis, where a 12-month rate is developed based on a member's age as of the effective date of the policy. The age factors do not account for aging that occurs during the policy year.

All Other Adjustments:

All other adjustments resulted in an adjustment of 4.75%.

Trend

24 months of trend were applied to our 2017 experience to project it to the 2019 rating period. Our most recent analysis indicates annual trend in the state of Pennsylvania for the 2018 and 2019 calendar years will be 7.95% and 7.95%, respectively. The table below details the components of each trend factor.

Trend Component	2018 (a)	2019 (b)	Annualized for URRT Wksh1 (c) = $((1+a)*(1+b))-1$
Unit Cost	4.30%	4.30%	4.30%
Utilization	3.50%	3.50%	3.50%
Total	7.95%	7.95%	7.95%

UnitedHealthcare develops forward-looking medical expense estimates based on a number of considerations. In general, recent/emerging claims experience is reviewed at the market level for several broad medical expense categories (inpatient, professional, pharmacy, etc.), with utilization, unit cost, and benefit leveraging identified for each category. Future trends are developed based on a projection of each component.

Utilization rates by category are measured and projected. Forward looking utilization levels are developed based on emerging market level data, supplemented by regional and/or national level utilization data. Macro-economic data is often used to develop assumptions regarding directional changes in national health care consumption rates. UnitedHealthcare uses same store analysis to reflect utilization.

Market-level unit cost projections are developed based on evaluations of current and anticipated provider contract economics, as well as consideration to both current and expected changes in non-contracted provider cost exposure. Unit cost projections also consider the estimated cost impact of new technologies, service availability/mandates, or other factors that might influence the mix of procedures. Unit cost is based on our contractual changes with providers.

In addition, market-level healthcare affordability activities that are expected to impact forward-looking medical costs are recognized. Depending on the nature of individual initiatives, the impact may be recognized in one or more of the component cost items discussed above. Only incremental activities are recognized for this purpose in the expected trend impact for any particular period.

Section 7: Credibility Manual Rate Development

Source and Appropriateness of Data Used

- The credibility manual was created using PA small group ACA experience.

Adjustments Made to the Data

Adjustments similar to the ones described in Section 6 were applied to the experience of the credibility manual to project it to the projection period. In addition, the credibility manual was adjusted to reflect the average age, geography, plan design and morbidity of the adjusted experience period claims.

An adjustment to the credibility manual was made to account for catastrophic claims experience in the experience period.

Inclusion of Capitation Payments

Capitation payments are included in both the experience and projections.

Section 8: Credibility of Experience

We believe that the small group ACA experience used for developing the credibility manual for this product to be fully credible. A specific credibility formula was not used for this determination, but rather professional actuarial judgment. As ASOP 25, section 3.4 states: "Professional Judgment - The actuary should use professional judgment when selecting, developing, or using a credibility procedure. The use of credibility procedures is not always a precise mathematical process."

Section 9: Paid-to-Allowed Ratio

Paid-to-allowed ratios were developed for each plan using the proprietary UnitedHealthcare pricing model. This model uses nationwide UnitedHealthcare experience, which is fully credible. Claim data is projected to the pricing period based on national projections of utilization and unit costs. These projections are done at the service category level (inpatient, outpatient, etc.). Benefit design parameters such as deductibles, copays, and coinsurance rates are applied to the claim distributions of the matching service category. Cost sharing is applied, and the values of each service category are summed to determine an overall benefit value, or paid-to-allowed ratio. In order to preserve consistency, the same claim experience and projection assumptions are applied to all plan relativity calculations.

The average paid-to-allowed ratio is based on the paid-to-allowed ratios developed for each plan using the model discussed above and weighting them by the projected membership by plan. The member distribution is discussed under Section 21 (*Membership Projections*) of this memorandum.

Section 10: Risk Adjustment and Reinsurance

Experience Period Risk Adjustment and Reinsurance Adjustments (PMPMs)

Risk Adjustments for the experience period are not known at this time.

Our 2017 risk adjustment transfer PMPM is estimated using data provided to UnitedHealthcare as a result of our participation in a multi-state study done by a large, independent actuarial consulting firm. Based on the results of that study, we expect that risk level of the membership insured by UnitedHealthcare Insurance Company to be lower than the market. This results in an approximate adjustment of -\$18.51 PMPM.

Since this is a small group filing and the state of Pennsylvania chose not to combine its individual and small group markets, reinsurance recoveries are not applicable to this rate filing. As such, no adjustments were made to the experience.

Projected Risk Adjustments Net of Risk Adjustment User Fees

UnitedHealthcare Insurance Company anticipates paying an average of \$12.86 PMPM for risk adjustment transfers in the state of Pennsylvania for the 2019 plan year. We are assuming the risk level of our business relative to that of our competitors for the 2019 plan year will be similar to what it was in the 2017 plan year. Since risk adjustment transfer payments are a function of the market level premium, our 2019 risk adjustment transfer PMPM amount is calculated by adjusting our estimated 2017 risk adjustment transfer PMPM amount for the projected market level trend, changes in reinsurance fees and recoveries, and other adjustments based on the overall financial performance of the market. The HHS Notice of Benefit and Payment Parameters for 2019 specifies a risk adjustment user fee of \$0.15 PMPM.

The projected risk adjustment transfers net of risk adjustment user fees are therefore \$-13.01 PMPM.

Projected ACA Reinsurance Recoveries Net of Reinsurance Premium

The reinsurance program ended in 2016. As such, reinsurance premiums were not included in the 2019 rate development.

Section 11: Non-Benefit Expenses and Profit

Administrative Expense Load

The administrative expense load is a long-term estimate of administrative expenses, including selling expenses and general administrative expenses. This load is consistent across most products and plans. However, a small number of plans may have different expense loads due to unique features of those plans. These assumptions are based on the general ledger actual results (GAAP) for 2017 with known adjustments. Known adjustments include, but are not limited to, pay increases/raises for employees and administrative expenses as a result of Healthcare Reform and compliance requirements. The administrative expense allocation methodology used in pricing is appropriate because it is consistent with how UnitedHealthcare runs its business and how it allocates administrative costs for Statutory Filings and the Healthcare Reform Exhibits.

Profit and Risk Margin

The profit and risk margin is shown in Worksheet 1, Section III of the URRT. This target does not vary by product or plan.

The profit and risk margin is derived from the difference between the target loss ratio and the administrative expenses, taxes and fees.

The profit and risk margin results in an anticipated MLR that is above the minimum requirements as described in the Projected Loss Ratio section.

Taxes and Fees

Taxes and fees are expected to be 2.35% and include premium tax and federal income tax. The following is a breakdown of the taxes and fees.

Premium Taxes and Fees Allocation	Estimated % of Premium
Federal / State Income Tax on Profit & Risk Load	0.53%
Premium Tax	1.73%
ACA Taxes: Insurer Fee	0.00%
ACA Taxes: Reinsurance Fee	0.00%
ACA Taxes: PCORI Fee	0.00%
ACA Taxes: Risk Adjustment User Fee	0.00%
ACA Taxes: Exchange User Fee	0.00%
All Other Taxes & Fees	0.09%
Total	2.35%

Section 12: Projected Loss Ratio

The projected loss ratio using the federally prescribed MLR methodology for calendar year 2019 is 86.5%. UnitedHealthcare Insurance Company agrees to comply with the rebate requirements of 45 CFR Part 158 should the actual market MLR fall below the 80.0% requirement.

Section 13: Single Risk Pool

The single risk pool reflects all covered lives for every small group non-grandfathered product and plan combination for UnitedHealthcare Insurance Company in the state of Pennsylvania. It is established in accordance with the requirements of 45 CFR §156.80(d).

Section 14: Index Rate

The Index Rate for the experience period is approximately 98.41% of allowed claims due to benefits in excess of EHBs. The reported percentage amount is based on experience data. The index rate of the experience period has been reported accordingly, rounded to the nearest whole dollar value as required by the URRT. The Index Rate in the projection period represents 98.41% of allowed claims due to the benefits in excess of EHBs.

Small Group Trend Adjustment

We are proposing premium rates that trend by quarter. The trend assumption only includes unit cost and utilization trend as this calculation is on an allowed basis.

	Q1	Q2	Q3	Q4	Average
CY 2019 Index Rate	\$ 503.15	\$ 503.15	\$ 503.15	\$ 503.15	\$ 503.15
Average Quarterly Trend	1.000	1.030	1.061	1.093	1.046
Quarterly Index Rate	\$ 503.15	\$ 518.26	\$ 533.83	\$ 549.86	\$ 526.21
Member Months	117,178	47,969	56,247	112,189	333,583

Section 15: Market Adjusted Index Rate

The market adjusted index rate includes market-wide adjustments for the risk adjustment program and exchange user fees. Please refer to Section 10 (*Risk Adjustment*) and Section 11 (*Non-Benefit Expenses and Profit*) of this memorandum for a brief description of each of these items. Incurred values were grossed up by the average paid-to-allowed ratio to reflect an allowed basis.

Index Rate	Net Risk Adjustment (allowed basis)	Exchange Fee Adjustment (allowed basis)	Market Adjusted Index Rate
\$526.21	\$15.85	\$0.00	\$542.05

Section 16: Plan Adjusted Index Rates

The development of the projected index rate and all rating factors is in compliance with all applicable federal statutes and regulations (45 CFR 156.80 and 147.102)

Actuarial Value and Cost Sharing Adjustment

UnitedHealthcare has a proprietary pricing model that was used in developing the actuarial value and cost sharing adjustment for each plan. The model calculates plan relativity factors for medical and pharmacy benefits. Also included under the actuarial value and cost sharing adjustment are adjustments for leveraging and the difference between the average plan relativity factor and the projected paid to allowed ratio.

UnitedHealthcare Insurance Company does not utilize Induced Demand factors in our rate development. Instead, our plan-specific pricing factors are based on an analysis of UnitedHealthcare Insurance Company's nationwide block of Small Group health insurance, which reflects over 10 million member months of experience. Our approach complies with the prohibition of rating for morbidity differences by normalizing out the cost differences attributable to morbidity as measured by HHS's risk adjustment mechanism.

Historical UnitedHealthcare experience was used to develop the actuarial value and cost sharing adjustment.

Provider network, delivery system and utilization management adjustment

Any adjustments for these items are included in the plan relativity factors.

Benefits in Addition to EHBs

The Index Rate for the experience period is approximately 98.41% of allowed claims due to benefits in excess of EHBs. The reported percentage amount is based on experience data. The index rate of the experience period has been reported accordingly, rounded to the nearest whole dollar value as required by the URRT. The Index Rate in the projection period represents 98.41% of allowed claims due to the benefits in excess of EHBs.

Distribution and Administrative Costs

Distribution and administrative costs include premium tax, PCORI fees, SG&A, quality improvements, federal income tax, and after-tax income. These items were previously discussed in Section 11 (*Non-Benefit Expenses and Profit*) of this memorandum. Risk adjustment transfers and user fees and exchange fees are excluded because they are accounted for in the market adjusted index rate.

Section 17: Calibration

Plan Adjusted Index Rates need to be calibrated to apply the allowable rating factors of age and geography in order to calculate the Consumer Adjusted Premium Rates. Calibration factors are applied uniformly to all plans.

Age Calibration

The calculated age curve calibration is 1.4257, which equals the average age factor of the expected member distribution by age. This corresponds with an approximate age of 44 years. The age factors used in this calculation are the HHS-specified age curve.

Geographic Calibration

The geographic factor calibration is 0.851, which equals the expected average area factor. A table of the geographic rating factors is below.

Rating Area	Area Factor
1	0.772
2	0.780
3	0.919
4	0.809
5	0.795
6	0.924
7	0.946
8	0.902
9	0.894

Geographic rating factors are reviewed periodically versus UnitedHealthcare claims data that reflects unit cost differences by county. Such a review was conducted as part of our January 1, 2019 rate development.

Our analysis did not indicate that there were credible, material differences indicated by the comparison of currently approved area factors and the UHC data reflecting unit cost differences.

Population morbidity by area was not considered when determining geographic area factors.

Calibrating the plan adjusted index rate to the age curve and geographic distribution results in the calibrated premium rate for each plan. The calibrated premium rate represents the preliminary premium rate charged to an individual before applying the consumer specific rating adjustments for age and area.

Tobacco Calibration

Tobacco factors are not used in the rating of these products, and no calibration is needed.

Section 18: Consumer Adjusted Premium Rate Development

The consumer adjusted premium rate is the final premium rate that is charged to an individual. It is developed by calibrating the plan adjusted index rate by the average age and geographic rating factors, and applying the consumer specific age and geographic rating factors. The calculation is provided below.

Plan Adjusted Index Rate

/ Age Calibration Factor

/ Geographic Calibration Factor

* Consumer Specific Age Rating Factor

* Consumer Specific Geographic Rating Factor

* Small Group Trend Adjustment

=Consumer Adjusted Premium Rate

Small Group Trend Adjustment

Since this is a small group filing that includes rates with scheduled trend increases by quarter, the Index Rate, Market Adjusted Index Rate and Plan Adjusted Index Rate reflect the member weighted average premium over the calendar year. As such, the Consumer Adjusted Premium Rate needs to include a trend adjustment specific to the quarter for which the rates are being calculated. The trend factors used to develop the consumer adjusted premium rates are shown below.

	Quarterly Trend (a)	Average Trend (b)	Trend Adjustment (a) / (b)
Q1	1.015	1.061	0.957
Q2	1.045	1.061	0.985
Q3	1.077	1.061	1.014
Q4	1.109	1.061	1.045

Section 19: AV Metal Values

The AV calculator used to calculate the AV metal values is based on a prescribed methodology and, therefore, does not necessarily reflect a reasonable estimate of the portion of allowed costs covered by the associated plan. Please refer to Section 9 (*Paid-to-Allowed Ratio*) of this memorandum for further detail regarding our estimate of the portion of allowed costs covered by each plan.

Some plans within this portfolio have cost sharing features that differ between individual and family coverage (i.e., when two or more people are covered by the plan). For all plans, consistent with the Actuarial Value Calculator inputs, we have used only the cost sharing provisions applicable for individuals in the actuarial value calculation.

The AV calculator was used to determine the AV metal values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Some of our plan designs are not directly compatible with the AV calculator. The values were developed in accordance with generally accepted actuarial principles and methodologies. Additional details are provided below to describe the types of adjustments that were made for plan designs that are not directly compatible with the AV calculator.

Copays Paid in Conjunction with Coinsurance

Some of our plan designs include copays that are paid in conjunction with coinsurance in the coinsurance range. This benefit design is not directly compatible with the AV calculator, so the alternate methodology described in 45 CFR 156.135(b)(2) was used for the AV calculation. In order to modify the AV calculator input for a copay paid in conjunction with coinsurance, the following formula was used to estimate the insurer's cost share.

$$\text{Effective Insurer Coinsurance Rate} = (1 - \text{Member Copay}/\text{Average Unit Cost}) * (1 - \text{Member Coinsurance Rate})$$

The benefit was then marked as "Subject to Deductible" and "Subject to Coinsurance" with a "Coinsurance, if different" equal to the effective insurer coinsurance rate as calculated above. The copay was entered in the "Copay if separate" column.

The average unit cost was calculated based on the claims data included within the AV calculator continuance tables for each metal level. For example, if the plan was expected to fall within a Silver Metal Tier, the average unit cost was calculated from the Silver continuance tables. All enrollees within a continuance table whose claims exceeded \$1,500 were included in the calculation of the average unit cost for each benefit type.

Benefits that Vary Based on Place of Service

For some types of services, our plan designs include different benefit levels based on the place of service (i.e. physician's office, free standing facility, or outpatient hospital facility). To incorporate this differentiation in benefits, the Tiered Network Option was selected within the AV calculator, and utilization was assigned to each tier based on historical experience of affiliated carriers.

Physician Tiering

Select plan designs include lower cost sharing when members utilize providers we designate as meeting cost and efficiency standards. The tiered network functionality of the AV calculator was utilized to account for the cost sharing differences. The utilization of providers was based on a UnitedHealthcare study of differences in cost sharing and their effectiveness at driving utilization patterns.

Per Occurrence Copays

Select plan designs have per occurrence copays where a copay is paid before coinsurance is applied between the deductible and maximum out of pocket. These copays accumulate to the maximum out of pocket. To reflect this type of benefit an effective insurer coinsurance rate was calculated based on the average unit cost of the service and member coinsurance rate. The calculation is as follows:

$$\text{Effective Insurer Coinsurance Rate} = (1 - \text{Member Copay}/\text{Average Unit Cost}) * (1 - \text{Member Coinsurance Rate})$$

Some of the copays only apply to portions of the benefit categories that the AV calculator defines. For example, the Inpatient Hospital Services includes both physician and facility charges. To the extent the plan design per occurrence copay only applies to a portion of the services, the tiered Network functionality was utilized. The mix of services within the AV calculator benefit categories was based on historical experience.

The average unit cost was calculated based on the claims data included within the AV calculator continuance tables for each metal level where available.

Section 20: AV Pricing Values

The AV pricing values represent the cumulative effect of adjustments made by the issuer to move from the market adjusted index rate to the plan adjusted index rate. Each of the allowable modifiers to move from the market adjusted index rate to the plan adjusted index rate was previously discussed in Section 16 (*Plan Adjusted Index Rates*) of this memorandum.

Section 21: Membership Projections

The 2019 plan year membership projection was developed utilizing the experience period plan level membership distribution along with sales and persistency targets. Member distribution by plan was then based on current enrollment, taking into consideration changes in the portfolio of plans to be offered in 2019. Strictly for purposes of the URRT, we have projected membership by plan.

Section 22: Terminated Products

There are no products being terminated in this rate filing.

Terminated plans will be mapped to another plan in the projection period for purposes of completing the URRT. It should be noted that this mapping is preliminary and may deviate based on business decisions and practices at a future date.

Section 23: Plan Type

A plan type of EPO & PPO has been selected, which describes the plans exactly.

Section 24: Warning Alerts

There are no warning alerts on Worksheet 2 of the URRT.

Section 25: Reliance

Due to responsibility allocation, I have relied upon other individuals within the UnitedHealthcare organization to provide certain assumptions. Although I have performed a limited review of the information and have not found it unreasonable or inconsistent, I have not reviewed it in enough detail to fully judge the reasonableness of the information due to the substantial amount of additional time required. I have therefore relied upon the expertise of those individuals who have developed the assumptions, and am providing the information required by Actuarial Standard of Practice 41, section 4.3. A list of reliances is included below.

UnitedHealthcare Finance Department

- Projected SG&A Assumption
- Total Projected Membership

UnitedHealthcare National Pricing Team

- Plan Relativity Modeling

UnitedHealthcare Healthcare Economics Department

- Projected Trend
- Estimates of Incurred but not Paid Claims
- ACO/Premium Designated Provider
- Cost Savings Estimates
- Plan Relativity Modeling

Section 26: Actuarial Certification

I, , am an Associate Director Actuarial Services for UnitedHealthcare, and a member of the American Academy of Actuaries. I meet the Academy's qualification standards for rendering statements of actuarial opinion with respect to the filing of rates for health insurance products.

To the best of my knowledge and judgment, I certify that:

- The projected index rate is:
 - In compliance with state and federal statutes and regulations related to the development of the index rate and allowable rating factors (such as 45 CFR 156.80 and 147.102). To comply with the PA DOI regulation, in the development of the index rate I applied a trend that included leveraging.
 - Developed in compliance with the applicable Actuarial Standards of Practice.
 - Reasonable in relation to the benefits provided and population anticipated to be covered.
 - Neither excessive, deficient, nor unfairly discriminatory.
- The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV calculator was used to determine the AV metal values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Some of our plan designs are not directly compatible with the AV calculator. The values were developed in accordance with generally accepted actuarial principles and methodologies. The unique plan design actuarial certification required by 45 CFR Part 156.135 has been separately attached.
- The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop their rates. Rather, it represents information required by federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges, and for certification that the index rate is developed in accordance with federal regulation and used consistently and only adjusted by the allowable modifiers.

Notes:

- [1] Represents core utilization only, exclusive of demographic change impacts; includes expected impact of changes in business day content.
 [2] Represents expected changes in intensity of services provided.
 [3] Represents core unit pricing increases, exclusive of service mix / intensity of services impact;
 [4] Impact of member cost-share leveraging on net claims cost trend.
 [5] Represents trend impact of age and gender changes; No provision included for Small Group business (age/gender community rating variable).
 [6] Pricing models do not distinguish between Primary and Specialty medical care; same trends shown for both.

Notes:

- Data is based on claims incurred through 12/31/2017 and paid through 12/31/2017 for ACR experience
- Items b-f are the average PA UHIC values of each factor
- Items g-j are estimated averages of the products by plan and area
- The products of the corresponding average factors (items b-f) do not equal the values in items g and h, which are averages of plan/area products

Notes:

- [1] Represents core utilization only, exclusive of demographic change impacts; includes expected impact of changes in business day content.
- [2] Represents expected changes in intensity of services provided.
- [3] Represents core unit pricing increases, exclusive of service mix / intensity of services impact;
- [4] Impact of member cost-share leveraging on net claims cost trend.
- [5] Represents trend impact of age and gender changes; No provision included for Small Group business (age/gender community rating variable).
- [6] Pricing models do not distinguish between Primary and Specialty medical care; same trends shown for both.

Regional information includes all in-state and out-of-state facilities and providers with contract changes weighted by claim dollars. The contract % change represents all provider changes both in-state and out-of-state over the projection period. Regional provider assignments are an internal process only and do not correspond to allowable rating areas.

2019 Rates Table Template v8.1		All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.			
		If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.			
		If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.			
		If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
		To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.
