SUBMITTED VIA SERFF

**RE: Keystone Health Plan East
Small Group HMO Rate Filing effective 1/1/2019
INAC-131478481**

Dear Ms. Gray:

Attached is the rating methodology for HMO plans of Keystone Health Plan East (KHPE), and Direct Point-of-Service (DPOS) plans, of which a large majority of benefit expenses is attributed to KHPE and the remainder to QCC Insurance Company (QCC), and offered to small employer groups in the Commonwealth of Pennsylvania. Rates for new and renewing plans are being filed and satisfy market reform requirements of the Affordable Care Act (ACA).

This rate filing includes rates for these plans and specifies compliance with rating requirements of the ACA. The enclosed is for rating periods effective from January 1, 2019 through December 31, 2019.

The proposed rates represent a 4.3% increase over the previously approved 2018 rates.

Rate Change Summary

Keystone Health Plan East – Small Group Plans

Rate request filing ID INAC-131478481 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

Overview

| | |
|--|-------------------|
| Initial requested average rate change: | 4.3% ¹ |
| Revised requested average rate change: | N/A ¹ |
| Range of requested rate change: | 0.6% - 5.3% |
| Effective date: | January 1, 2019 |
| People impacted: | 114,365 |
| Available in: | Area 8 |

Key information

Jan. 2017-Dec. 2017 financial experience

| | |
|----------------------------|---------------------|
| Premiums | \$646,128,766 |
| Claims | \$451,358,874 |
| Administrative expenses | \$115,719,582 |
| Taxes & fees | \$24,917,439 |
| Company made (after taxes) | \$54,132,871 |

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2019:

| | |
|-----------------|-------|
| Claims: | 83% |
| Administrative: | 14.5% |
| Taxes & fees: | 0.5% |
| Profit: | 2% |

The company expects its annual medical costs to increase **6.9%**.

Explanation of requested rate change

Scope and Range of the Rate Increase:

Keystone Health Plan East ("KHPE") is revising premium rates for the Pennsylvania Small Group ACA compliant products, effective from January 1, 2019.

About 114,000 members will be affected.

Financial Experience of the Product:

KHPE is required by federal law to pay out a minimum of 80% percent of premium dollars for medical

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

claims—this is referred to as the minimum Medical Loss Ratio (MLR). The rate action proposed in this filing is expected to achieve a Medical Loss Ratio of greater than 80%.

Changes in Medical Service Costs:

Premium rates for health care insurance are increasing as the cost of health care service rise. Health care service costs increase as health care providers increase their fees, members use more health care services and supplies, and the types of health care services and supplies change, among other factors.

We are projecting that claims will increase by 6.9% in 2019. Nearly half of the change in health care service costs is driven by changes to health care provider fees.

Changes in Benefits:

Some plan benefits are mandated by federal and state law. Benefit changes for some plans were also made. All changes in benefits are in compliance with the uniform modifications rules stipulated by the Federal government.

Administrative Costs:

In addition, the Affordable Care Act (ACA) imposes taxes and other levies.

PENNSYLVANIA ACTUARIAL MEMORANDUM

PURPOSES

This Actuarial Memorandum is provided along with the Unified Rate Review Template (URRT) and PA Actuarial Memorandum Rate Exhibits to provide certain information to support the gross premium for the single risk pool for small group market health care insurance underwritten by Keystone Health Plan East in the Commonwealth of Pennsylvania. It is provided as a component of a state rate filing. This submission may not be appropriate for other purposes.

1. BASIC INFORMATION AND DATA

A. COMPANY INFORMATION

| | |
|----------------------------------|---|
| Company Legal Name: | Keystone Health Plan East ("KHPE") |
| State: | Pennsylvania |
| NAIC #: | 95056 |
| Market: | Small Group |
| Marketplace: | Off Exchange |
| Effective Date(s): | 1/1/2019-3/31/2019, 4/1/2019 – 6/30/2019, 7/1/2019 – 9/30/2019, 10/1/2019 – 12/31/2019 |
| Average Rate Change: | 4.3% |
| Range of Rate Changes: | 0.6% - 5.3% |
| Products: | HMO |
| Rating Areas: | Rating Area 8 |
| Metal Levels: | Platinum, Gold, Silver, Bronze |
| Current Members: | 114,365 |
| Current Policyholders: | 16,061 |
| Number of 2019 Plans: | 20 |
| HIOS Issuer ID (5-digit): | 33871 |

Worksheet 1 of the accompanying URRT contains experience period data and development of the projected Single Risk Pool Gross Premium Average Rate PMPM for the small group market for KHPE. Worksheet 2 contains experience period data and projections by product for the single risk pool for the same entities. This memorandum pertains only to plans denoted in Worksheet 2 by Plan IDs starting with the sequence 33871.

B. RATE HISTORY AND PROPOSED VARIATIONS IN RATE CHANGES

| | | |
|-----------------|--------|-----------------|
| January 1, 2015 | 8.40% | INAC- 129626509 |
| October 1, 2015 | -0.30% | INAC- 130111004 |
| January 1, 2016 | 6.88% | INAC- 129955625 |
| January 1, 2017 | 27.97% | INAC- 130539718 |
| July 1, 2017 | 2.00% | INAC- 130959307 |
| January 1, 2018 | 10.19% | INAC- 131005809 |
| July 1, 2018 | 1.59% | INAC- 131405465 |

The historical rate changes varied by metallic tier based on plan benefits as illustrated via the Pricing AV.

Proposed rate changes may vary by metallic tier and plan based on plan benefit changes.

C. AVERAGE RATE CHANGE

The average proposed rate change shown in Cell AC15 of Table 10 is 4.3%. The changes to the single risk pool gross premium average rate per member per month (PMPM) from calendar year 2017 to calendar year 2019 are incorporated into the pricing and reflected in the Unified Rate Review Template.

The change in 21-year-old Non-Tobacco Premium PMPM calculated in Table 11, Cell AN13 is 0.7%. The change shown in Cell V45 of Worksheet 1 of URRT Part I is 8.61%. The change shown in Cell V46 of Worksheet 1 of URRT Part I is 4.22%.

D. MEMBERSHIP COUNT

Table 1 illustrates the Experience Period member-months, Current Period members as of February 1, 2018, and Projected Rating Period Member-months by ages.

E. BENEFIT CHANGES

Benefit changes were made to the following plans to assure compliance with Actuarial Value Requirements, including differences that resulted from changes to the AV Calculator. The basis for pricing changes was our internal pricing model.

F. EXPERIENCE PERIOD CLAIMS AND PREMIUMS

Table 2 illustrates the experience period claims and premiums using calendar year data. The data is consistent with the data reported in Section 1 of Worksheet I of the URRT.

Experience period premium, claims, and member months are obtained from the company's internal data warehouse. The claims data is collected for incurred dates from January through December 2017 and paid through February 2018. Earned premiums and member months are for January through December 2017. The data are for all direct-written small group business of KHPE in the Commonwealth of Pennsylvania, including out-of-network claims written by KHPE but paid by QCC for POS plans. No private reinsurance was applicable.

Projected Risk Adjustment PMPM

Non-EHB benefits are illustrated separately in cell H36 of Table 2. Capitation is uniform by age for the experience period. Net pharmacy rebates are illustrated in cell I36 of Table 2.

Projected Risk Adjustment is accounted for in Projected Incurred Claims before ACA Reinsurance and Risk Adjustment to reflect anticipated risk adjustment transfer amounts for the projection period. The amount reflects the projected morbidity for the single risk pool for IBCFOC in the projection period.

The estimated risk adjustment revenue for all of the plans in the risk pool is developed using the following methodology. We recognize that the HHS payment transfer formula implies that the projected incurred claims based solely on the experience period single risk pool claims need to be adjusted by the ratio of the current statewide market's risk relative to allowable rating factor (ARF) for age compared to the single risk pool's risk relative to ARF presented during the experience period. This adjustment, together with the assumed future changes in population risk morbidity, results in the issuer's pricing being consistent with the anticipated morbidity level of the future statewide market.

The anticipated risk adjustment transfer revenue is allocated proportionally based on plan premium. The Projected Risk Adjustment is subtracted from Projected Incurred Claims before ACA Risk Adjustment to reflect anticipated receipt of risk adjustment transfer amounts for the projection period.

When the projected risk adjustment amounts for KHPE and Independence Blue Cross (QCC) are combined, the result is consistent with the projection made in our submission. We also considered preliminary 2017 risk transfer results.

G. CREDIBILITY OF DATA

The experience period data is considered 100% credible.

H. TREND IDENTIFICATION

Table 3 identifies the proposed annual medical and prescription drug allowed claims cost and utilization trends. These data match the data illustrated in Section 2 of Worksheet I of the URRT. Additional discussion is provided in Section I, Historical Experience.

We observed significantly lower than expected experience in the first half of 2017. We have updated our trends to reflect that the low first half utilization will not repeat in 2018 and 2019. Specifically, we expect the first half of 2019 to be similar to what we are seeing in the first half of 2018.

I. HISTORICAL EXPERIENCE

Table 4 illustrates historical experience from 2014 through 2017 for the product line.

a. Annualized Cost Trend

Annual cost trend reflects changes in costs of medical treatment due to medical inflation and changes in the distribution of services across network providers. The trend value is developed by reviewing historical medical costs for the single risk pool and adjusting them for anticipated future provider contracting reimbursement levels. The data is normalized for changes in age, benefit changes during the experience period, changes to provider contracts, and prescription drug formulary, and new drugs brought to market.

b. Annualized Utilization Trend

Annual utilization trend reflects the change in the number of units per 1,000 members for a fixed level of illness burden and includes changes due to the mix and intensity of services provided and changes related to shifts in product mix. It also includes effects of selection, if any, since this cannot be reflected in the relative cost of the various products and plans offered.

J. TERMINATED PLANS

No plans are being terminated during 2019.

2. RATE DEVELOPMENT AND CHANGE

A. DEVELOPMENT OF PROJECTED INDEX RATE, MARKET-ADJUSTED INDEX RATE, & TOTAL ALLOWED CLAIMS

Table 5 illustrates the development of the Projected Index Rate and Market-Adjusted Index Rate beginning with the Experience Period Index Rate. Exhibit A provides additional information about the adjustment factors.

Changes in Population Risk Morbidity

Experience period allowed claims are adjusted to account for differences in the average morbidity of the single risk pool population underlying the experience and the anticipated population in the projection period. This adjustment reflects changes in the small group market-wide morbidity.

Changes in Other Factors

Experience period allowed claims are adjusted to account for differences in the single risk pool population underlying the experience and the anticipated population in the projection period pertaining to several factors not due to changes in morbidity or the costs and utilization of medical care. This adjustment reflects: additional benefits required to be covered as essential health benefits; recently mandated benefits required by state law that are not reflected in the experience period data; benefits in the experience that are removed for the projection period; anticipated changes in the average utilization of services due to differences in average cost sharing requirements during the experience period and average cost sharing requirements in the projection period; changes in demographic characteristics of the single risk pool experience period population and the projection period population (including age, gender, region, and tobacco use); changes in the provider network (adding or removing a provider system or introducing a limited network option); and anticipated changes in pharmacy rebates.

Table 5 of the Actuarial Memorandum Rate Exhibit shows the components used in calculating change in other. The calculations of the components are based on the changes in values shown in Table 7.

B. RETENTION ITEMS

Table 6 illustrates the retention items, expressed as percentages of premium. Consistent with conversations with our State regulator, no Pricing load was applied for the Managed Care Assessment levied pursuant to Article VIII-I of the Pennsylvania Code, as it will be separately reimbursed.

| | | |
|---|-------|--------|
| Administrative Expenses | | 14.55% |
| General and Claims | 6.35% | |
| Agent/Broker Fees and Commissions | 7.40% | |
| Quality Improvement Initiatives | 0.80% | |
| Taxes and Fees | | 0.52% |
| PCORI Fees | 0.00% | |
| PA Premium Tax | 0.00% | |
| Federal Income Tax | 0.52% | |
| Health Insurance Providers Fee ¹ | 0.00% | |
| Profit/Contingency | | 2.00% |
| Total Retention | | 17.07% |

¹ – the annual trend in Table 5A includes an additional 2.9% to reflect the restoration of the HIF for premiums due in 2020. The 2.9% is the HIF (2.145%) adjusted for federal income tax.

C. NORMALIZED MARKET-ADJUSTED PROJECTED ALLOWED TOTAL CLAIMS

Table 7 compares the normalization factors used in this filing to those used in the 2018 filing. The changes in the factors reflect small differences from the projected populations in 2018 and 2019.

D. COMPONENTS OF RATE CHANGE

Table 8 illustrates the components of rate change, based on inputs from other sections of the Rate Exhibits. The results in Row H are similar to the values in Row A of Table 8.

Data in Table 9 was taken from the 2018 URRT with the exceptions of Risk Adjustment and Reinsurance which were revised to project company-specific values.

3. PLAN RATE DEVELOPMENT

Table 10 is populated with plan information consistent with entries in the 2019 URRT. Plan mappings, where applicable, are illustrated in Column F of Table 10.

Attached to this actuarial memorandum are exhibits providing actuarial certifications for the use of alternate methods of calculating the Actuarial Value, where applicable, as well as required support for the calculations.

4. PLAN PREMIUM DEVELOPMENT FOR 21-YEAR OLD NON-TOBACCO USER

Table 11 is populated from other sections of the Rate Exhibits, along with the population by age and rating area for the Projection Period.

5. PLAN FACTORS

Tables 12, 13, and 14 illustrate the factors used in pricing for age, tobacco, geographic rating area, and network. The tobacco factors match the previously approved tobacco factors from the 2018 filing.

6. ACTUARIAL CERTIFICATION

I, [REDACTED], am Director & Actuary of Commercial Markets for the Independence Blue Cross Family of Companies. I am a member of the Society of Actuaries and the American Academy of Actuaries with the education and experience necessary to perform the work necessary and meet the Qualification Standards of the American Academy of Actuaries to render the qualified actuarial opinion contained herein. The developed rates and memorandum have been prepared in conformity with appropriate Actuarial Standards of Practice and the Academy's Code of Professional Conduct.

The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop the premium rates and allowable rating factors. Rather, it represents information required by

Federal regulation to be provided in support of the review of gross premium rate increases, for certification of qualified health plans for Federally facilitated exchanges, and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

I hereby certify that, to the best of my knowledge and judgment, the following:

- The projected index rate is:
 - In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.08(d)(1) and 147.106);
 - Developed in compliance with applicable Actuarial Standards of Practice;
 - Reasonable in relation to the benefits provided and the population anticipated to be covered; and
 - Neither excessive nor deficient.
- The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
- The AV Calculator was used to determine the AV Metal Values illustrated in Worksheet 2 of the Part I Unified Rate Review Template for all plans, unless an alternate methodology was required. If an alternate methodology was used to calculate the AV Metal Value for at least one plan offered, a copy of the actuarial certification required by 45 CFR Part 156, §156.135 will be included.
- All factor, benefit, and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2019 Rate Filing Justification.

URRT Part II – Consumer Friendly Justification

Scope and Range of the Rate Increase:

Keystone Health Plan East ("KHPE") is revising premium rates for the Pennsylvania Small Group ACA compliant products, effective from January 1, 2019. The proposed revisions to each plan are shown on the second page of this exhibit.

About 114,000 members will be affected.

Financial Experience of the Product:

KHPE is required by federal law to pay out a minimum of 80% percent of premium dollars for medical claims—this is referred to as the minimum Medical Loss Ratio (MLR). The rate action proposed in this filing is expected to achieve a Medical Loss Ratio of greater than 80%.

Changes in Medical Service Costs:

Premium rates for health care insurance are increasing as the cost of health care service rise. Health care service costs increase as health care providers increase their fees, members use more health care services and supplies, and the types of health care services and supplies change, among other factors.

We are projecting that claims will increase by 6.9% in 2019. Nearly half of the change in health care service costs is driven by changes to health care provider fees.

Changes in Benefits:

Some plan benefits are mandated by federal and state law. Benefit changes for some plans were also made. All changes in benefits are in compliance with the uniform modifications rules stipulated by the Federal government.

Administrative Costs:

The premium rates presented in this filing include a 2% contribution to reserves. Furthermore, the Affordable Care Act (ACA) imposes taxes and other levies.

GENERAL OVERVIEW

PURPOSES

This Actuarial Memorandum is provided along with the Unified Rate Review Template (URRT) to provide certain information to support the gross premium for the single risk pool for small group market health care insurance underwritten by Keystone Health Plan East in the Commonwealth of Pennsylvania. It is provided as a component of an application for certification as a Qualified Health Plan and a state rate filing. This submission may not be appropriate for other purposes.

GENERAL INFORMATION

COMPANY IDENTIFYING INFORMATION

Company Legal Name: Keystone Health Plan East (“KHPE”)

State: Pennsylvania

HIOS Issuer ID (5-digit): 33871

Market: Small Group

Effective Date(s): 1/1/2019-3/31/2019, 4/1/2019 – 6/30/2019, 7/1/2019 – 9/30/2019,
10/1/2019 – 12/31/2019

Worksheet 1 of the accompanying URRT contains experience period data and development of the projected Single Risk Pool Gross Premium Average Rate PMPM for the small group market for KHPE. Worksheet 2 contains experience period data and projections by product for the single risk pool for the same entities.

COMPANY CONTACT INFORMATION

Primary Contact Name: [REDACTED]

Primary Contact Telephone Number: [REDACTED]

Primary Contact Email Address: [REDACTED]

PROPOSED RATE INCREASE

The changes to the single risk pool gross premium average rate per member per month (PMPM) from calendar year 2017 to calendar year 2019 were incorporated into the pricing and reflected in the Unified Rate Review Template. The changes are driven by factors including: changes in market-wide population risk morbidity and covered services, increasing unit costs for medical services, increasing utilization of medical services, increasing fees and taxes imposed by the federal government, anticipated costs to administer the plan, anticipated revenue or payments due to market-wide risk adjustment, and the discontinuance of net reinsurance payments from the Federal Transitional Reinsurance Program.

The weighted average increase across KHPE plans based on projected membership, inclusive of the impact of benefit and cost sharing changes, is 4.3%. The minimum increase is 0.6% and the maximum increase is 5.3%.

WORKSHEET 1: DATA COLLECTION TEMPLATE

SECTION I: EXPERIENCE PERIOD PREMIUM AND CLAIMS

PAID THROUGH DATE

Experience period premium, claims, and member months are obtained from the company's internal data warehouse. The claims data is collected for incurred dates from January through December 2017 and paid through February 2018. Earned premiums and member months are for January through December 2017. The data are for all direct-written small group business of KHPE in the Commonwealth of Pennsylvania, including out-of-network claims written by KHPE but paid by QCC for POS plans.

PREMIUMS (NET OF MLR REBATE) IN EXPERIENCE PERIOD

Earned Premiums (net of MLR Rebate) in Experience Period are developed by summing the earned premium reported in the company's internal data warehouse and adjusting for MLR rebates, if any, for the period. Although 2017 federal MLR rebate calculations are not final as of the writing of this memorandum, no federal MLR rebates are expected for calendar year 2017, so no adjustment to earned premium for MLR rebates is needed.

The calculation for federal minimum loss ratio rebates is based on 2015, 2016, and 2017 experience of earned premium, incurred claims, quality improvement expenses, and taxes. The three years of experience is blended for all segments.

ALLOWED AND INCURRED CLAIMS INCURRED DURING THE EXPERIENCE PERIOD

Paid-to-Date and Incurred Claims, and Member Months

Insurer fee-for-service claims expenses and member liabilities for dates of service in January 2017 through December 2017 and paid through February 2018 are sourced from the IBCFOC's internal data warehouse. The claims and member liabilities are completed with incurred but not reported (IBNR) adjustments to develop ultimate incurred insurer fee-for-service claims expenses and member liabilities for the January through December 2017 period. Capitation amounts are also sourced from the internal data warehouse for the January through December 2017 period but they are not adjusted for IBNR.

Allowed Claims

Allowed claims are determined by separately obtaining paid-to-date fee-for-service claims and member cost-sharing amounts, applying claim lag factors to those amounts to estimate ultimate incurred fee-for-service claims and member-sharing amounts and adding them together with capitation amounts.

Allowed claims do not include ineligible claims, payments for services other than medical care provided, recovery payments related to internal large claim pooling mechanisms, or active live reserves.

IBNR Development

Medical fee for service incurred but not reported (IBNR) claims are modeled through the use of standard claim lag methodologies. A range of results is developed, and a provision for adverse deviation is applied. The provision for adverse deviation is dependent on many factors such as stability, size, product mix, etc.

The completion factors are developed annually in the 2Q – 3Q period. We do not believe our IBNR is unusually high or unusually low for incurred 2017 paid through February 2018.

Experience Period Index Rate

The Index Rate of Experience Period is estimated by removing cost and utilization trend from the Index Rate for Projection Period.

SECTION II: ALLOWED CLAIMS, PMPM BASIS

BENEFIT CATEGORIES

Utilization and Unit Cost data for allowed claims in the experience period are provided in Section II. The data is provided by benefit category using a standardized indicator from the internal data warehouse that assigns each claim line to a category based on the type of provider and the location of the service. The utilization and unit cost data are provided for the following categories: Inpatient Hospital admits, Outpatient Hospital visits, Professional visits, Other Medical visits, Capitation per member per month (PMPM), and Prescription Drug scripts.

Experience Period capitation is reported as a per member per month (PMPM) value. In order to complete the URRT, the Utilization per 1,000 statistics for capitated services only is reported as 1,000 so that the appropriate capitation PMPM is reported.

PROJECTION FACTORS

The estimated incurred claims experience on an allowed basis for January 2017 through December 2017 is projected to the future rating period by several factors. Factors were calculated from the combined experience of QCC and KHPE.

Changes in Population Risk Morbidity

Experience period allowed claims are adjusted to account for differences in the average morbidity of the single risk pool population underlying the experience and the anticipated population in the projection period. This adjustment reflects changes in the small group market-wide morbidity.

Changes in Other Factors

Experience period allowed claims are adjusted to account for differences in the single risk pool population underlying the experience and the anticipated population in the projection period pertaining to several factors not due to changes in morbidity or the costs and utilization of medical care. This adjustment reflects: additional benefits required to be covered as essential health benefits; recently mandated benefits required by state law that are not reflected in the experience period data; benefits in the experience that are removed for the projection period; anticipated changes in the average utilization of services due to differences in average cost sharing requirements during the experience period and average cost sharing requirements in the projection period; changes in demographic characteristics of the single risk pool experience period population and the projection period population (including age, gender, region, and tobacco use); changes in the provider network (adding or removing a provider system or introducing a limited network option); and anticipated changes in pharmacy rebates.

Trend Factors

a. Annualized Cost Trend

Annual cost trend reflects changes in costs of medical treatment due to medical inflation and changes in the distribution of services across network providers. The trend value is developed by reviewing historical medical costs for the single risk pool and adjusting them for anticipated future provider contracting reimbursement levels. The data is normalized for changes in age, benefit changes during the experience period, changes to provider contracts, and prescription drug formulary, and new drugs brought to market.

b. Annualized Utilization Trend

Annual utilization trend reflects the change in the number of units per 1,000 members for a fixed level of illness burden and includes changes due to the mix and intensity of services provided and changes related to shifts in product mix. It also includes effects of selection, if any, since this cannot be reflected in the relative cost of the various products and plans offered.

CREDIBILITY MANUAL RATE DEVELOPMENT

The experience period claims for the single risk pool are determined to be fully credible; therefore no credibility adjustment is required.

SECTION III: PROJECTED EXPERIENCE

PAID TO ALLOWED RATIO

The Projected Allowed Experience Claims PMPM shown in Worksheet 1 represents projected allowed claims experience PMPM for the projected portfolio of plans. The Paid to Allowed Average Factor in

Projection Period adjusts the allowed down to Projected Incurred Claims before ACA reinsurance and risk adjustment for the population anticipated to be covered in the projection period. The Projected Incurred Claims before ACA reinsurance and risk adjustment represents the net amount of incurred insurer claim liability expected in the projection period, net of member cost sharing and cost sharing paid by HHS on behalf of low-income members. It reflects the average benefit level anticipated during the projection period. The ratio was calculated using incurred (before ACA reinsurance and risk adjustment) and allowed PMPMs from worksheet two of the URRT.

RISK ADJUSTMENT AND REINSURANCE

Projected Risk Adjustment PMPM

Projected Risk Adjustment is accounted for in Projected Incurred Claims before ACA Reinsurance and Risk Adjustment to reflect anticipated risk adjustment transfer amounts for the projection period. The amount reflects the projected morbidity for the single risk pool for IBCFOC in the projection period.

The estimated risk adjustment revenue for all of the plans in the risk pool is developed using the following methodology. We recognize that the HHS payment transfer formula implies that the projected incurred claims based solely on the experience period single risk pool claims need to be adjusted by the ratio of the current statewide market's risk relative to allowable rating factor (ARF) for age compared to the single risk pool's risk relative to ARF presented during the experience period. This adjustment, together with the assumed future changes in population risk morbidity, results in the issuer's pricing being consistent with the anticipated morbidity level of the future statewide market.

The anticipated risk adjustment transfer revenue is allocated proportionally based on plan premium. The Projected Risk Adjustment is subtracted from Projected Incurred Claims before ACA Risk Adjustment to reflect anticipated receipt of risk adjustment transfer amounts for the projection period.

When the projected risk adjustment amounts for KHPE and QCC are combined, the result is consistent with the projection made in our submission. We also consider preliminary 2017 risk transfer results.

NON-BENEFIT EXPENSES AND PROFIT & RISK

Administrative Expense Load

An Administrative Expense Load is applied to Projected Incurred Claims to reflect expenses related to quality improvement and fraud detection/recovery and other expenses of operating a business, broker commissions, and premium payment processing fees.

Profit & Risk Load/Contribution to Surplus

A Profit & Risk Load/Contribution to Surplus for the single risk pool is applied to Projected Incurred Claims for the projection period, if applicable.

Taxes and Fees

A Taxes & Fees load is applied to Projected Incurred Claims to pass through fees and taxes levied by the federal and state governments.

PROJECTED LOSS RATIO

The projected loss ratio for the single risk pool is estimated to exceed 80% reflecting premium adjustments permitted by the federal MLR calculation.

SINGLE RISK POOL

The single risk pool reflects all covered lives for every small group non-grandfathered product and plan combination for KHPE in the state of Pennsylvania. It is established according to the Single Risk Pool requirements in 45 CFR § 156.80(d).

INDEX RATE

The Index Rate is defined as the EHB portion of projected allowed claims divided by all projected single risk pool lives. The Index Rate is the same value for all non-grandfathered plans for KHPE Small Group Plans in Pennsylvania. The Index Rate reflects the twelve month projection for calendar year 2019. It has been developed following the specifications of 45 CFR § 156.80(d)(1).

MARKET ADJUSTED INDEX RATE

The Market Adjusted Index rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules: federal reinsurance program adjustment, risk adjustment and exchange user fees. The Market Adjusted Index Rate reflects the average demographic characteristics of the single risk pool.

PLAN ADJUSTED INDEX RATE

The Plan Adjusted Index Rate is calculated as the issuer Market Adjusted Index Rate adjusted for all allowable plan level modifiers defined in the market rating rule. These include actuarial value and cost sharing adjustment, provider network, delivery system and utilization management adjustment, adjustment for benefits in addition to the EHBs, impact of specific eligibility categories for the catastrophic plan and administrative costs.

CALIBRATION

The plan adjusted index rate is projected for all products using the same anticipated age distribution and the mandated age curve. Therefore the consumer adjusted premium rate is the plan adjusted index rate divided by the average age, geographic and tobacco factors for the expected distribution. The average age of the combined small group risk pool population is 36.

The Average Age factor is the weighted average age factor based on the projected membership. The Tobacco Factor is calculated as the projected average factor for tobacco users multiplied by the projected tobacco use prevalence.

There is only one geographic rating area for this filing. The geographic rating area factor for this filing is 1.0.

WORKSHEET 2: PRODUCT-PLAN DATA COLLECTION

AV METAL VALUES

The AV Metal Values included in Worksheet 2 of the URRT were valued using the AV Calculator, where possible, otherwise the AV Metal Values were developed under an alternate methodology. Actuarial certifications required by 45 CFR Part 156, §156.135 are provided in a separate document.

AV PRICING VALUES

The AV Pricing Value represents the cumulative effect of adjustments made by plan to move from the Market Adjusted Index Rate to the Plan Adjusted Index Rate.

MEMBERSHIP PROJECTIONS

Enrollment is projected based on current and anticipated enrollment by plan. Items impacting these projections include changes in the size of the market due to introduction of guarantee issue requirements, the individual mandate, and the introduction of a Basic Health Program.

TERMINATED PLANS

No plans are being terminated during 2019.

WARNING ALERTS

There are no warning alerts in URRT part 1.

ACTUARIAL CERTIFICATION

I, [REDACTED], am Director & Actuary of Commercial Markets for the Independence Blue Cross Family of Companies. I am a member of the Society of Actuaries and the American Academy of Actuaries with the education and experience necessary to perform the work necessary and meet the Qualification Standards of the American Academy of Actuaries to render the qualified actuarial opinion contained herein. The developed rates and memorandum have been prepared in conformity with appropriate Actuarial Standards of Practice and the Academy's Code of Professional Conduct.

The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop the premium rates and allowable rating factors. Rather, it represents information required by Federal regulation to be provided in support of the review of gross premium rate increases, for certification of qualified health plans for Federally facilitated exchanges, and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

I hereby certify that, to the best of my knowledge and judgment, the following:

- The projected index rate is:
 - In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.08(d)(1) and 147.102);
 - Developed in compliance with applicable Actuarial Standards of Practice;
 - Reasonable in relation to the benefits provided and the population anticipated to be covered; and
 - Neither excessive nor deficient.
- The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
- Geographic rating factors reflect only differences in the costs of delivery of and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, unless an alternate methodology was required. If an alternate methodology was used to calculate the AV Metal Value for at least one plan offered, a copy of the actuarial certification required by 45 CFR Part 156, §156.135 will be included.

2019 Rates Table Template v8.1

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
 If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
 If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
 If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
 To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2019 Rates Table Template v8.1

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
 If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
 If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
 If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
 To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2019 Rates Table Template v8.1

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
 If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
 If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
 If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
 To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2019 Rates Table Template v8.1

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
 If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
 If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
 If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
 To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans MUST have the same dates on a sheet.

| 33871PA0110020 Rating Area 8 | Tobacco User/Non-Tobacco User | 64 and over | 816.27 | 1122.39 |

No change was assumed.

The change in demographics was calculated considering changes to age, geography, and tobacco use.

The change in the average age was measured by comparing the average age factor calculated in this filing, based on February 2018 enrollments, to the average age factor calculated in the prior filing, based on February 2017 enrollments.

| | 2018 Filing | 2019 Filing | Change |
|------------------------------------|----------------|----------------|--------|
| Age Factor | 1.447 | 1.475 | 1.019 |
| Change from geography: No change | | | 1.000 |
| Change from tobacco use: No change | | | 1.000 |
| Total change | | | 1.019 |

No changes were assumed for this filing.

The network factors used in Table 10 are based on the network differentials from the prior filing.

The network factor used for Keystone HMO was 1.100.

The network factor used for Proactive was 1.000.

The factors used in Table 10 recalibrate the values so that the differentials between the factors remains constant, and the composite factor equals 1.000.

| | | |
|-------------------|-----------|-------|
| Table 10 factors: | HMO | 1.036 |
| | Proactive | 0.941 |

HIOS Product ID: 33871PA010, 33871PA011

This single PDF file contains two separate actuarial certifications for the unique plan designs under Issuer ID 33871. Please refer to all of the pages contained herein.

Unique Plan Design Supporting Documentation and Justification

ACTUARIAL MEMORANDUM

HIOS Issuer ID: 33871

HIOS Product IDs: 33871PA010, 33871PA011

Applicable HIOS Plan IDs (Standard Component): 33871PA0100023, 33871PA0110014, 33871PA0100047, 33871PA0100024, 33871PA0110016, 33871PA0100048

Purpose of document:

The purpose of this document is to provide CMS with a justification of the methods used in calculating the actuarial value for unique plan designs offered in the individual or small group market for the plan year beginning 1/1/2019. As prescribed by law, the AV calculation was based on the AV calculator to the full extent possible. The AV is meant to represent the average percent of costs paid by the insurer for a standard population, and may vary from actual member experience. The resulting AV was based on prescribed methodology and, therefore, may not reasonably reflect the actuary's estimate of the portion of allowed costs covered by the health insurance plan. The AV was determined based on the plan's benefits and coverage data, the standard population, and utilization and continuance tables published by HHS for purposes of the valuation of AV. This actuarial analysis is not appropriate for any other purposes.

Reasons the plan design is unique (benefits that are not compatible with the parameters of the AV calculator and the materiality of those benefits):

The cost-sharing for outpatient facility fee varies by site of service. Outpatient facility fee accounts for roughly 12% of allowed costs in the AV calculation.

Acceptable alternate method used per 156.135(b)(2) or 156.135(b)(3):

Method 156.135(b)(2) was used for the outpatient facility site of service cost-sharing.

Confirmation that only in-network cost-sharing, including multitier networks, was considered:

I confirm that only in-network cost-sharing was considered.

Description of the standardized plan population data used:

For the freestanding and hospital utilization data for outpatient facility, we used our commercial PPO and HMO data incurred between August 2014 and July 2015.

If the method described in 156.135(b)(2) was used, a description of how the benefits were modified to fit the parameters of the AV calculator:

For the outpatient facility site of service cost-sharing, our recent data indicated that 80% of outpatient facility claims came from the hospital setting.

The cost-sharing entered into the AV calculator is a weighted average of the coinsurance at a hospital and the coinsurance at an ambulatory surgery center.

| Plans | 33871PA0100023, 33871PA0110014 | 33871PA0100047 | 33871PA0100024, 33871PA0110016 | 33871PA0100048 |
|----------------------------------|-----------------------------------|----------------|-----------------------------------|----------------|
| Hospital Coinsurance | 60% | 70% | 50% | 70% |
| ASC Coinsurance | 90% | 100% | 70% | 100% |
| Effective Coinsurance | 66.00% | 76.00% | 54.00% | 76.00% |

If the method described in 156.135(b)(3) was used, a description of the data and method used to develop the adjustments:

Not applicable

Certification Language:

The development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for those benefits that deviate substantially from the parameters of the AV Calculator and have a material impact on the AV.

The analysis was

- (i) conducted by a member of the American Academy of Actuaries; and
- (ii) performed in accordance with generally accepted actuarial principles and methodologies.

I am an employee of the issuer, I meet the *Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States* promulgated by the American Academy of Actuaries, and I have the education and experience necessary to perform this work. All AVs herein were determined in accordance with the ASOPs established by the Actuarial Standards Board and comply with applicable laws and regulations; furthermore, all metal levels herein were appropriately assigned based on applicable law.

Unique Plan Design Supporting Documentation and Justification

ACTUARIAL MEMORANDUM

HIOS Issuer ID: 33871

HIOS Product IDs: 33871PA010, 33871PA011

Applicable HIOS Plan IDs (Standard Component): 33871PA0100026, 33871PA0110020, 33871PA0100044, 33871PA0100045

Purpose of document:

The purpose of this document is to provide CMS with a justification of the methods used in calculating the actuarial value for unique plan designs offered in the individual or small group market for the plan year beginning 1/1/2019. As prescribed by law, the AV calculation was based on the AV calculator to the full extent possible. The AV is meant to represent the average percent of costs paid by the insurer for a standard population, and may vary from actual member experience. The resulting AV was based on prescribed methodology and, therefore, may not reasonably reflect the actuary's estimate of the portion of allowed costs covered by the health insurance plan. The AV was determined based on the plan's benefits and coverage data, the standard population, and utilization and continuance tables published by HHS for purposes of the valuation of AV. This actuarial analysis is not appropriate for any other purposes.

Reasons the plan design is unique (benefits that are not compatible with the parameters of the AV calculator and the materiality of those benefits):

The cost-sharing of inpatient hospital services for these plans is a combination of copays for facility claims and coinsurance for professional claims. Inpatient hospital services account for about 22% of allowed costs in the AV calculation.

Plans 33871PA0100044 and 33871PA0100045 have three in-network tiers with expected third tier utilizations of 37% and 41% respectively.

Acceptable alternate method used per 156.135(b)(2) or 156.135(b)(3):

Method 156.135(b)(2) was used for inpatient hospital cost-sharing.

Method 156.135(b)(3) was used to accommodate the three tier design.

Confirmation that only in-network cost-sharing, including multitier networks, was considered:

I confirm that only in-network cost-sharing was considered.

Description of the standardized plan population data used:

For the freestanding and hospital utilization data for outpatient facility, we used our commercial PPO and HMO data incurred between August 2014 and July 2015.

If the method described in 156.135(b)(2) was used, a description of how the benefits were modified to fit the parameters of the AV calculator:

Combination of Copays and Coinsurance for IP Hospital

The copays for inpatient hospital facility claims were combined with the coinsurance on professional claims to calculate equivalent copays for inpatient claims.

First we took the allowed PMPY inpatient costs and divided that by the utilization by admit PMPY to calculate the average cost per admit. We also took the utilization by day PMPY and divided that by the utilization by admit PMPY to calculate the average length of stay.

The average cost per admit was divided by the average length of stay to calculate the average cost per day. Based on our data, we assumed that 84% of the cost was from facility claims and the remaining 16% was from professional claims.

The professional coinsurance was multiplied by the professional portion of the daily inpatient cost to calculate equivalent daily copay for that piece. Because there is a 5-day maximum on our plans' inpatient copays, an effective copay factor was calculated by dividing the PMPY cost-sharing from a \$100 per day inpatient copay with a 5-day maximum by the PMPY cost-sharing from a \$100 per day inpatient copay without any maximum. The equivalent daily professional copay amount was then divided by this factor in order to determine the final professional copay reflecting a 5-day maximum.

The final professional copay was then added onto the facility copay in order to determine the equivalent overall IP hospital copay amount. The exhibit below details this calculation.

| Total Copay per Day, 5-day max | \$1,513 | \$1,021 | \$1,581 | \$981 | \$1,461 |

If the method described in 156.135(b)(3) was used, a description of the data and method used to develop the adjustments:

Using the AV calculator and the methods described above, we calculated the AV for each tier in each plan, as follows. Based on actual tier utilization experience incurred in 2015, we projected expected utilization by tier for the plans. The final AV for the plan was then calculated by taking the weighted average of the tier AVs using the utilization by tier. The following exhibits details this calculation.

| Utilization | Tier 1 | Tier 2 | Tier 3 | Total |
|----------------|--------|--------|--------|-------------|
| 33871PA0100044 | 47% | 16% | 37% | 100% |
| 33871PA0100045 | 50% | 9% | 41% | 100% |

| | Actuarial Value | | | |
|----------------|-----------------|--------|--------|---------------|
| HIOS ID | Tier 1 | Tier 2 | Tier 3 | Average |
| 33871PA0100044 | 78.33% | 76.13% | 74.77% | 76.66% |
| 33871PA0100045 | 75.27% | 69.18% | 68.49% | 71.94% |

Certification Language:

The development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for those benefits that deviate substantially from the parameters of the AV Calculator and have a material impact on the AV.

The analysis was

- (i) conducted by a member of the American Academy of Actuaries; and
- (ii) performed in accordance with generally accepted actuarial principles and methodologies.

I am an employee of the issuer, I meet the *Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States* promulgated by the American Academy of Actuaries, and I have the education and experience necessary to perform this work. All AVs herein were determined in accordance with the ASOPs established by the Actuarial Standards Board and comply with applicable laws and regulations; furthermore, all metal levels herein were appropriately assigned based on applicable law.

COVER LETTER
KHPE SMALL GROUP
JUNE 14 RESPONSES

Below are responses to the questions from the June 14, 2018 objection letter. Included with this cover letter is a workbook that contains additional requested information. Changes made to documents in this rate filing are listed in a separate worksheet included with this letter.

In addition, the PCORI fee has been removed from the rate calculations.

- 1. In Wksh 2 of the URRT, the AV Pricing Values should be equal to the total adjustment from the Market Adjusted Index Rate (MAIR) to the Plan Adjusted Index Rate (PAIR) for each plan (e.g. MAIR x AV Pricing Value = PAIR). However, this does not appear to be the case. Please explain why this is not the case or correct the issue to follow the Part III URRT Instructions Section 2.2.3.**

We entered the AV Pricing Values from the Actuarial Memorandum Rate Exhibit. The attached worksheet shows a calculation by plan of the product of all of the factors used in the calculation of the plan-specific rates. Should PID prefer that those value be entered, we will revise them in the URRT.

- 2. We are unable to replicate the rates on the Rate Data template using the Plan Adjusted Index Rates (PAIRs) entered in the URRT Wksh II section IV. It appears the PAIRs entered in the URRT do not match the Pure Premium values in column AA on tab [III Plan Rates] when removing the aggregate calibration factor. Please explain why these values would be different. If this was done in error, please correct the rate filing documents to be consistent.**

We found that our formula for Plan Adjusted Index Rates was referencing the Age Calibration Factor from the Actuarial Memo Rate Exhibit instead of the Aggregate Calibration Factor; the difference is the Tobacco Calibration Factor. After this correction is made, the Plan Adjusted Index Rates in Section IV are correct.

For example, for Plan 33871PA0100020, the value shown in the filed URRT was \$721.54, which is the First Quarter 2019 Calibrated Plan Adjusted Index Rate (Table 11, Column AC) multiplied by 1.475. Adjusting by the Aggregate Calibration Factor provides the correct values.

- 3. The following questions are related to the proposed annual trend rate equal to 6.9%: a) Please show a numerical development of the assumed annual trend rate being used to project the experience period claims to the projected 2019 coverage year. b) Please provide the trends based on historical allowed claims experience for each benefit category for years 2015, 2016, 2017, and 2018 (year to date). We realize 2018 trends will be partially based on estimated claim costs. c) Please also provide a breakout of the calendar year experience between the first half and second half of each year to demonstrate how much lower the experience observed in the first half of 2017 was than expected, as stated in the Actuarial Memorandum.**

Please see below for information on the projected unit cost trends.

| | PA Small Group | | | | |
|-------------|----------------|------------|--------------|------------|------|
| HMO | Inpatient | Outpatient | Professional | Capitation | RX |
| 2016 | 4.2% | 3.5% | 1.6% | 1.8% | 4.5% |
| 2017 | 3.6% | 2.4% | 0.7% | 2.5% | 4.5% |
| 2018 | 3.0% | 2.5% | 1.1% | 1.4% | 4.5% |
| 2019 | 3.8% | 3.5% | 1.3% | 15.0% | 3.0% |
| Utilization | 1.5% | 1.5% | 1.5% | 0% | 1.6% |
| Composite | 5.4% | 5.1% | 2.8% | 15.0% | 4.7% |
| Weights | 15% | 15% | 16% | 22% | 32% |

Annual Trend 6.82%

4. The following questions are related to the Demographics factors (1.447 and 1.475) shown in the file [ACA KHPE SG Supporting.xlsx]: a) Please show the quantitative development of the above-referenced factors, making sure to include the membership by age that is used in calculating them. b) Please specify what age curve is being used to determine these factors (e.g. 2019 federal default age curve, internal age curve)?

- (a) The calculation of the 2019 demographic factor is shown in the attached worksheet. This was compared to the factor used in the 2018 rate filing to measure the change in the demographic factor used to calculate 2019 rates.
- (b) We used the 2019 federal default age curve per the PID instructions.

| KHPE SG | 2019 Members | Demo Factors 2019 | | 2018 Members | Demo Factors 2018 |
|---------|--------------|-------------------|-------|--------------|-------------------|
| 0-20 | 25,041 | 0.812 | 0-20 | 27,622 | 0.811 |
| 21-29 | 17,166 | 1.037 | 21-29 | 17,909 | 1.032 |
| 30-39 | 21,052 | 1.207 | 30-39 | 21,633 | 1.202 |
| 40-49 | 19,035 | 1.461 | 40-49 | 20,429 | 1.457 |
| 50-59 | 22,336 | 2.193 | 50-59 | 24,156 | 2.182 |
| 60-63 | 7,725 | 2.831 | 60-63 | 7,346 | 2.825 |
| 64+ | 2,507 | 3.000 | 64+ | 1,405 | 3.000 |
| Total | 114,862 | 1.475 | Total | 120,498 | 1.447 |

5. **Please explain and provide the numerical development of the Change in Network Factor of 0.993 applied to the Single Risk Pool Adjustment factors entered in Table 5 of the PA Actuarial Memorandum Exhibits.**

Please see the calculation in the attached worksheet (Network Factor tab)

6. **The sum of rate increase components shown in Table 8 line H does not approximate line A as indicated by the label. Please explain why this value is so different from the change in the Calibrated Plan Adjusted Index Rate (i.e. 4.3%).**

We revised the value shown in cell C73 to be the value from the prior 2018 annual filing and line H is much closer to line A as a result.

7. **We have the following questions regarding the Benefit Richness (induced demand) column in Table 10: a) Please provide numerical support for the Benefit Richness (induced demand) factors shown in Table 10. b) Please confirm and demonstrate in your support that health status was not taken into account when developing these factors. c) Please explain why these values vary so significantly within a given metal if health status is not taken into account; for Bronze plans the factors range from 0.815 to 0.850, for Silver plans the factors range from 0.871 to 1.034, for Gold plans the factors range from 1.010 to 1.104, and for Platinum plans the factors range from 1.072 to 1.208.**

(a) The PID-required calculation is shown in the attached worksheet.

(b) Our induced demand factors do not take into account health status.

(c) We utilized this approach because we are trying to preserve the rate relationship we currently have in the market.

8. **Please list the Non-EHB's that are being offered and provide the numerical development of the 1.002 factor applied at the plan level shown in column M of Table 10 of the PA Actuarial Memorandum Exhibits.**

Non-EHBs are elective abortion, acupuncture, and adult vision. We estimate that the abortion and acupuncture benefits each add 0.1% to claims. We estimate the adult vision adds 0.7% to claims but we reflected a lower amount in pricing.

9. **Please describe the methodology used to determine the provider network factor used in column N of Table 10. Be sure to support (numerically) the underlying network factor values which are provided in Table 14 of the PA Actuarial Memorandum Exhibits.**

The provider network factor is calculated based on the expected unit cost differences between the proactive and non-proactive networks. These differences are a combination of different contracting

between the networks. (I.e. The same facilities contracted at different rates between the two networks) and facility mix. (I.e. Different facilities being utilized for the same services between the two networks.)

We expect the proactive network to be 10% less expensive than the Non-proactive network. We then normalized so that the weighted average of the factors equals 1.00.

This results in a factor of 0.941 for Proactive and 1.036 for Non-proactive. (I.e. $1.036/0.941 = 1.10$ or a 10% difference)

10. Please provide the numerical development of the tobacco surcharge of 1.011 shown in cell T6 of Table 10.

| | | | |
|-------|-----|------|-------|
| 0-20 | 28% | 5.0% | - |
| 21-29 | 14% | 5.0% | 0.125 |
| 30-39 | 14% | 5.0% | 0.175 |
| 40-49 | 16% | 6.0% | 0.225 |
| 50-59 | 20% | 6.0% | 0.375 |
| 60-63 | 7% | 6.0% | 0.375 |
| 64+ | 1% | 6.0% | 0.375 |
| Total | | | 1.1% |

11. Please provide the numerical development of the projected MLR calculation that shows compliance with the 80% minimum MLR.

Projected Premium from Table 6 = \$633.72

Projected Premium from Table 6 = \$547.30

Projected Paid Claims from Table 5 = \$382.41

Projected Risk Adjustment from Table 5= (\$70.57)

QI = 0.80%; Taxes and fees = 0.52% (From table 6)

$$\text{MLR} = (382.41 + (547.30 \times 0.008)) / (547.30 - 70.57 - (547.30 \times 0.0052)) = 81.6\% > 80\% \text{ minimum}$$

12. The following questions are related to the quarterly small group index rate development in Table 5A: a) Please show support and explain the methodology used to project the quarterly member months shown in Table 5A. b) Please demonstrate quantitatively how the 2.5% quarterly trend factor being utilized in Table 5A was developed.

(a) The distribution of members months in Table 5A is based on the February 2018 distribution by renewal/effective date.

(b) The quarterly trend is developed within the Actuarial Memorandum Rate Exhibit using the formulas in row 34, and considers both claims trend and the phasing out of the HIF moratorium for premium due in calendar year 2020. The 1.025 comes from raising the annual trend to the (1/4) power representing one-fourth of the year.

- 13. We have the following questions regarding the projected risk adjustment PMPM value: a) Please provide the quantitative development of the projected risk adjustment PMPM receipt equal to \$6.38. b) Please provide the actual 2016 risk adjustment PMPM payment/receipt.**

Please see the calculation in the attached worksheet (Risk Adjustment tab).

The following additional questions or comments are from PID.

- 14. Please explain the discrepancy between the enrollment in Table 1, Cell D18 of 114,365 members and Table 10, Cell AP15 of 114,861.**

We revised Table 1 to include AHPA members which had been included in Table 10 but not Table 1. The remaining difference is members who we could not associate with a HIOS ID and do not appear in Table 10. We deemed the difference to be not material.

- 15. Table 2 – Please correct the Estimated Cost Sharing formula as per our telephone discussion.**

We corrected the Cost Sharing formula in Table 2 as requested. This did not impact any of the calculations later on in the Exhibit and therefore had no rate impact.

- 16. Rate Change Summary - The numbers in the 'How premiums will be spent' table add to 101%. Please correct to add to 100%**

We revised the values to total 100%. Rounding caused the filed data to add up to 101%.

- 17. Table 5: Please support the calculations of change in Network of 0.993**

Please refer to our response to Item 5 above.

- 18. Table 5A: Please support the calculation of the component of 7.27% of the Annual trend in cell J32. (the annual trend is 6.92% from Table 3 and 2.9% is for HIF).**

The 7.27% trend includes a component for HIF that will be assessed for non-January first quarter renewals. We projected that 2.9% is the annualized additional value for HIF beginning in the second quarter. While January renewals will not be assessed the HIF over their twelve months of coverage, February will be assessed for one month, and March for two. The filing instructions required that we reflect the end of the moratorium either in Table 6, or as an addition to premium trend, but not in both. We added 0.35% to the premium trend in Table 5A to account for this, which is approximately half of one quarter of the HIF amount.

- 19. Table 10: Please provide the workbook with support data and calculations for the following: a) Age calibration factor of 1.475 b) Tobacco calibration factor of 1.011 c) Benefit Richness Factors in Column L – please provide table to support as directed on page 16 of PID Rate Filing Guidance. d) Provider Network factors of 1.036 and 0.941 in Column N.**

- (a) We based the age calibration factor on the age distribution shown in the workbook attached to this response.
- (b) Please refer to Item 10 above.
- (c) The table supporting Benefit Richness Factors is included in the attached workbook.
- (d) The provider network factor is calculated based on the expected unit cost differences between the Keystone and Proactive networks.

We expect the Keystone network to be 10% more expensive than the Proactive network. We then normalized so that the weighted average of the factors equals 1.00.

This results in a factor of 1.036 for Keystone and 0.941 for Proactive. (I.e. $1.036/0.941 = 1.10$ or a 10% difference).

20. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, Federal Rates Template and the binder are identical.

Confirmed that we made those checks prior to submitting the rate filing.

21. For the expanded Bronze plans, please demonstrate that the copay is less than or equal to 50% coinsurance for that category.

Our average allowed cost per visit for PCP is about \$120. Therefore \$50 PCP copay is less than 50% coinsurance. Specialist copay is set to 2x PCP copay.

COVER LETTER
KHPE SMALL GROUP
JULY 13 RESPONSES

1. **Based on the changes noted in the file: ‘June 22 PA Revisions List.xlsx’ an updated URRT should have been provided. However, the URRT ‘33871khpeurrt1_sg_2019_062118_RV.xlsx’ does not appear to include all of these changes. Please upload the June 22nd version of the URRT which we believe should include the changes outlined.**

As discussed in our previous response, we would make the revision should PID prefer that we enter those values instead of the Pricing AV values shown in their exhibit. Nevertheless, we revised the URRT with this response as you requested.

2. **Please provide the following information related to the proposed annual trend rate equal to 6.8%:**
- a. **Please provide a breakout of the calendar year experience between the first half and second half of each year (i.e., for 2016, 2017, and 2018) to demonstrate how much lower the utilization experience observed in the first half of 2017 was than expected, as stated in the Actuarial Memorandum.**

The experience is shown in Table 4 of the Actuarial Memorandum Rate Exhibit on an Incurred Basis, and on an Allowed Claim basis in the Tab “Allowed Claims History” in the “Table For Objection KHPE SG RV” sent with the previous response.

- b. **Please show the historical utilization trends for years 2016, 2017, 2018, and projected 2019 which support the 1.5% projected utilization assumption shown in row 7 of tab [Unit Cost Trends] in the file ‘Table For Objection KHPE SG RV.xlsx’. Note: We realize 2018 trends will be partially based on estimated claim costs.**

The chart below shows the utilization used in rating for 2016, 2017, and 2018.

| | | |
|------|--|-------|
| 2016 | | 3.42% |
| 2017 | | 2.94% |
| 2018 | | 3.21% |

- c. **Please explain and show numerical support for the large capitation trend (15.0%) for 2019.**

The capitation trend reflects increases in our payments to the providers due to contract revisions.

- 3. In regards to your response to the first round question 4, demographic factors, you show an increase in projected 2019 membership for ages 64+ of 2,507 from 2018 membership of 1,405. Please explain why you are assuming an increase in enrollment for this age bucket and provide justification demonstrating that the assumption is appropriate.**

For measurement of the change due to demography, we compare the result of the 2019 projection to the result of the 2018 projection. The member counts shown in the “Demo Summary” compare the projection used in the 2019 rate filing to the projection used in the 2018 filing. What was used in the 2018 filing was the basis for the factor used then. This year’s projection is more consistent with the membership shown in Table 1 of the Actuarial Memorandum Rate Exhibit.

- 4. In regards to your response to the first round question 7c) Benefit Richness factors, you state “We utilized this approach because we are trying to preserve the rate relationship we currently have in the market.” Please explain the “approach” you are referring to.**

Consistent with last year, our induced demand factors do not take into account health status. For 2019 we did not update the induced demand factors, rather we first solved for the induced demand factors that would generate the 2018 rates slope in 2019 before benefit changes.

We utilized this approach because we are trying to preserve the rate relationship we currently have in the market. The approach refers to the relationship of these factors across the plans. We maintained the same relationships used in the 2018 filing, and re-normalized them so that the composite factor would be 1.000.

- 5. In regards to your response to the first round question 9 you state “We expect the proactive network to be 10% less expensive than the Non-proactive network”. Please explain how you determined the 10% assumption and provide any quantitative analysis that was performed in support of this expectation.**

Consistent with last year, the provider network factor is calculated based on the expected unit cost differences between the proactive and non-proactive networks. These differences are a combination of different contracting between the networks. (I.e. The same facilities contracted at different rates between the two networks) and facility mix. (I.e. Different facilities being utilized for the same services between the two networks.)

We expect the proactive network to be 10% less expensive than the Non-proactive network. We then normalized so that the weighted average of the factors equals 1.00.

It varies from the number we are projecting for 2019, (\$70.57), as for 2019, we adjusted our mix for changes developing in 2018. We also adjusted the statewide average premium used in the calculation.

PID's Issues:

- 7. Responses for the second-round questions are due on July 13, 2018. No modifications other than Risk adjustment updates based on Federal Risk Adjustment Report and the Department requested changes will be accepted.**

No revisions were made to these factors. However, we revised the EHB% in the URRT Part 1 Worksheet 2, Section IV, to be consistent with the Actuarial Memo Rate Exhibits.
