

Pennsylvania Health & Wellness, Inc. – Individual Plans

Rate Request filing ID # CECO-134068773 – This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <https://www.insurance.pa.gov/Consumers/HealthInsuranceFilings/Pages/ACA-Health-Rate-Filings.aspx>

Overview

Initial requested average rate change:	6.21%
Revised requested average rate change:	1.88%
Range of requested rate change:	-5.54% to 18.81%
Effective date:	January 1, 2025
Mapped members:	29,211
Available in:	Rating Areas 1, 2, 3, 4, 5, 6, 7, and 8

Key Information

Jan. 2023-Dec. 2023 financial experience

Premiums	\$53,929,073
Claims	\$49,143,596
Administrative Expenses	\$15,623,843
Taxes & Fees	\$7,772,370
<hr/>	
Insurers made (after taxes)	\$-18,610,736

How it plans to spend your premium¹

This is how the insurance company plans to spend the premium it collects in 2025

Claims:	80%
Administrative:	14%
Taxes & Fees:	4%
Profit:	2%

The insurer expects its annual medical costs to increase **9.8%**.

Our Decision

The insurer requested an average 6.21% rate change in the individual market for enrollees in current 2024 plans who will continue coverage with the insurer in 2025. The insurer later revised its rate filing to request a rate change of 1.88% due to revisions made during the Department’s standard review. The statewide average rate change request across all insurers was originally 9.3% and was revised to 6%. A factor contributing to the rate change is the change in reimbursement from the state reinsurance program. In addition to the reinsurance program, the following have been cited as key rate drivers:

- Increased hospital, physician, and prescription drug costs;
- Increased anticipated subscriber usage;

¹ Due to rounding, the percent total, in How it plans to spend your premium section, may not sum to 100%.

- Changes in anticipated risk adjustment amounts (money from a federal program that redistributes funds from plans with lower-risk enrollees to plans with higher-risk enrollees);
- Increased administrative expenses; and
- The base experience claims deviated from expected claim levels.

Process and Considerations for the 2025 Plan Year

Consistent with plan year 2024, the Department instructed insurers to file requested rates for 2025 Affordable Care Act compliant plans assuming the federal government would not make Cost-Sharing Reduction (CSR) payments. Cost-Sharing Reductions apply to certain out-of-pocket costs, like deductibles and copayments, for low- and middle-income enrollees. Although the federal government has stopped making CSR payments, insurers are still required by federal law to reduce out-of-pocket costs for low- and middle-income enrollees.

Insurers offering on-exchange silver plans adjusted premiums for those plans to compensate for the ending of federal CSR payments. This means that premiums for on-exchange silver plans are greater than the premiums for off-exchange silver plans. Many on-exchange consumers who receive the Advanced Premium Tax Credit (APTC) will not experience the full effect of any rate change because this subsidy will change as well. Consumers who have an on-exchange silver plan and do not qualify for a subsidy may want to consider evaluating other metal level plans available on-exchange or purchasing an off-exchange silver plan because these plans will likely have lower premiums relative to the coverage level.

Pennsylvania was granted a 1332 Waiver by the federal government allowing the Commonwealth to create a state-based insurance exchange (Pennie™) and reinsurance program. The state reinsurance program will reimburse insurers for a portion of claims above a set dollar amount threshold which will allow the companies to lower premiums. As a result of the reinsurance program, Pennsylvania residents who purchase individual ACA compliant health policies effective in 2025 will have premiums that are approximately 5% less on average than they otherwise would have been without that program.

For each requested plan, the Department reviewed the contract to see if the plan included all the benefits required by state and federal law, if the rates are reasonable in relation to the benefits, and if the insurer will be able to pay projected claims and expenses. The Department also considers factors such as the insurer's revenues, medical and administrative costs, actual and projected profits, and past rate changes, as well as the effect the 2025 rate change will have on Pennsylvania consumers. In approving rates for 2025, the Department focused on making sure that Pennsylvanians in every county in the state continue to have access to healthcare coverage. Ensuring that affordable options remain available to Pennsylvania consumers is a top priority for the Department. The resulting average final rate change approved for this insurer is 1.88%, ranging from -5.54% to 18.81%.

General Note: An insurer may not increase your rates more than once in a calendar year. The change in premium for a specific individual or employer may vary from the average rate change shown in this summary due to plan-specific factors, like the benefit package and provider network used by the plan, as well as four factors specific to the individual or employer/employees: geographic location, age, tobacco use, and family size.

What we consider

Premium is made up of three parts: medical claims, administrative expenses, and profit or loss. We review all of the information in rate filings for individual and small group health plans, including the plans' medical claims, administrative expenses, and projected profit or loss.

A key component used to calculate projected claims is medical trend. Medical trend is the change in claims costs over a specific period of time—usually one to two years—and is often based on both the company's past claims costs and what they expect to spend on claims in the future.

Administrative expenses are any expenses not related to the cost of medical claims; including, but not limited to, employee salaries and benefits, the cost of the company's office and equipment, customer service, appeals costs, taxes, agent commissions, etc.

The company's projected profit (or contribution to surplus) is a small part of the premium. The reasonableness of the projected profit may depend on the company's current surplus level and other factors.

Federal law requires health insurance companies to have a medical loss ratio (MLR) of at least 80%. This means that your insurance company must spend at least 80% of your premium dollars on medical care and activities that improve the quality of care. If your insurance company spends less than 80% on medical care and quality improvement then the company must give you money back in the form of a rebate. A medical loss ratio of 80% indicates that the insurer is using the remaining 20 cents of each premium dollar for administrative costs and profits. The Department does not approve rates in this market that appear likely to result in an MLR of less than 80%.

Glossary

Annual rate change: Companies normally file a rate change each year due to their medical claims experience. The annual rate request may or may not include benefit changes.

Average rate change: The average amount rates will change for all enrollees.

For individual health plans: How much your premium will change depends on your age, where you live, how many family members are covered on your plan, whether or not you or your family members smoke and which benefits you choose

For small employer health plans: The employer's premium will vary based on their employees' age, the employer's location, their employee's family size, and the benefits they choose.

Claims/Medical Costs: What the health plan spends on direct medical services including hospital stays, providers, and prescription drugs.

Individual Plans: Insurance you buy from an insurance company for yourself and/or your dependents; not insurance you get from your employer.

Premium: Under federal law, insurance companies can take into account only four factors when varying your rate in order to set the premium costs you will be charged each month. These four factors are:

- Age: Older people can be charged up to 3 times more for premiums than younger people.
- Geographic location: Where you live has a big effect on your premiums. Competition, local regulation, and cost of living in different areas account for this.
- Tobacco Use: Insurers can charge tobacco users up to 50% more than those who don't use tobacco.
- Individual vs. family enrollment: Insurers can charge more for a plan that covers a spouse and/or dependents.

Profit: The amount of money remaining after the company's claims, administrative expenses, and taxes and fees are paid.

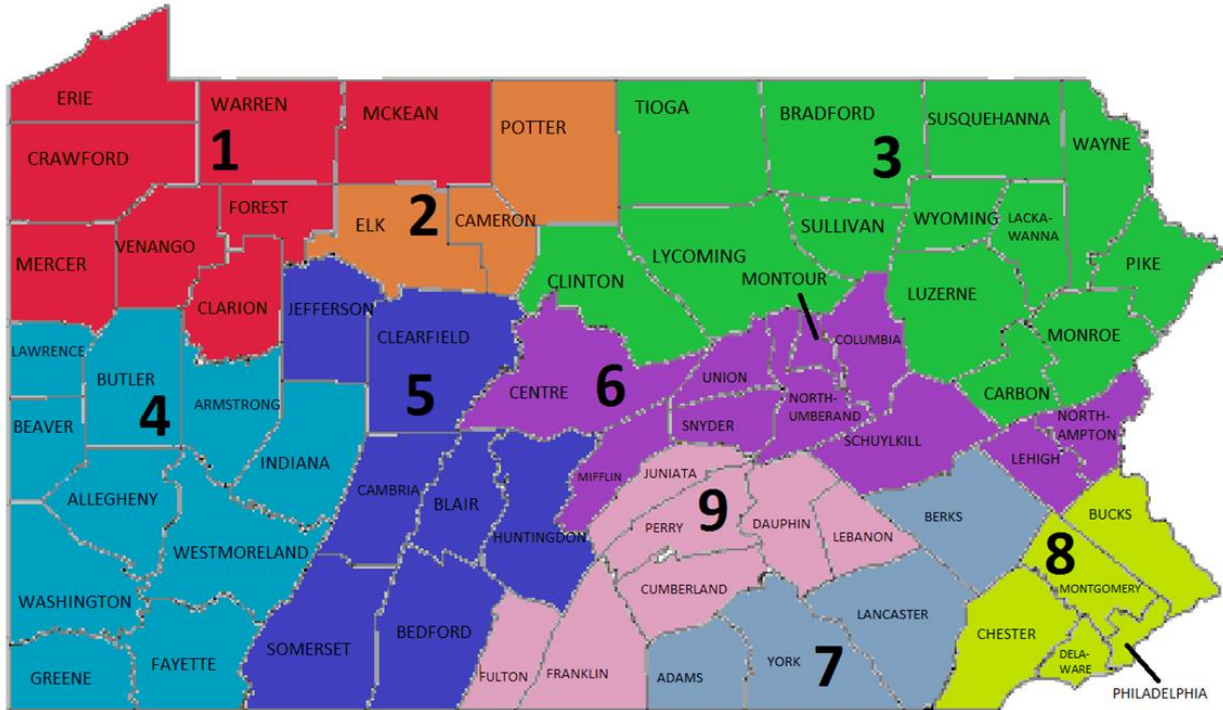

Rate: The rate is the base amount that an insurance company charges a person. An insurance company can increase the base rate depending on four factors in order to calculate the monthly premium that a consumer will be charged. See "Premium."

Rating Area: Federal law requires that each state have a set number of geographic areas that all insurance companies may use to adjust how much they charge consumers. When insurance companies calculate premiums, all enrollees within a rating area will have the same adjustment factor applied. Depending on the rating area you live in the prices you pay may be higher or lower than the state average. Pennsylvania has 9 rating areas. (See the Pennsylvania Geographic Rating Area Map below.)

Small Group Plans: Small group plans are those sold to employers with 1-50 employees.

Surplus: An insurer's funds on hand for which the company has no corresponding liabilities. Insurers maintain a surplus so that they have sufficient funds to withstand adverse business conditions such as unexpectedly high medical claims or low enrollment, and in order to make investments in infrastructure and technology.

Pennsylvania Geographic Rating Areas

August 20, 2024

Pennsylvania Insurance Department
1311 Strawberry Square
Harrisburg, PA 17120

**RE: Pennsylvania Health & Wellness, Inc., Individual HMO, ACA Filing for PY2025
Pennsylvania Insurance Department ID # CECO-134068773**

Mr. Carmody,

In response to the objection letter dated 8/19/2024 for Pennsylvania Health & Wellness, Inc. (PHW)'s Individual Market rates and supporting documentation for rates effective January 1, 2025, we are providing the following documents:

- "2025_PHW_Objection_Responses_20240821.pdf"
- "2025_PHW_Appendix 13.3.pdf"
- "2025_PHW_Appendix 13.3.xlsm"

No changes have been made to any previously submitted filing documents as part of this objection response.

REQUESTED COMPANY INFORMATION

Below you may find the requested company information, in response to the guidance posted April 3rd, 2024 and subsequent objections. This requested information has not changed since submission on August 5th, 2024.

1. Company Name & NAIC number: **Pennsylvania Health & Wellness, Inc.; NAIC # 16041**
2. Market (Individual or Small Group): **Individual**
3. On or Off Exchange: **On/Off Exchange**
4. Effective date of coverage: **January 1, 2025**
5. Average rate change requested (Table 11, cell AN13, Table 11 cell EN19 for quarterly filings): **1.9%**
6. Range of rate change requested (from Table 11, column AN for annual filings and column BU, DB, and EI for small group quarterly filings): **-0.8% to 5.9%**
7. Total additional annual revenue generated from the proposed rate change: **\$3,551,083**
8. Product(s) (Indemnity, HMO, POS (HMOs only), PPO, or EPO): **HMO**
9. Rating Areas and any changes from 2024: **In 2024 plans were offered in Rating Areas 3, 6, 7, and 8 only. For 2025, plans will be offered in Rating Areas 1, 2, 3, 4, 5, 6, 7, and 8.**
10. Metal Levels and Catastrophic Plans: **Gold, Silver, Bronze**
11. Current number of covered lives and of policyholders as of February 1, 2024 as shown in Cell V15 of Table 10: **Covered lives - 29,211; Policyholders – 22,676**
12. Number of plans offered in 2025 and the change this represents from 2024: **There are 23 plans offered in 2025. There were 26 plans offered in 2024.**
13. Corresponding contract form number, SERFF and Binder ID numbers: **FORM: CECO-134061623; SERFF: CECO-134068773; Binder: CECO-PA25-125118032**
14. HIOS Issuer ID number and submission tracking number: **HIOS Issuer ID number: 86199 Submission tracking number: Submitted in SERFF**

Pennsylvania Actuarial Memorandum

Redacted

Pennsylvania Health & Wellness Inc.

Annual Individual Health Rate Filing

Pennsylvania

Assuming CSR Subsidies are Unfunded

Effective January 1, 2025

Forms: 86199PA001, 86199PA002, 86199PA003

Contents

1. Basic Information and Data	3
2. Rate Development and Change	9
3. Plan Rate Development	18
4. Plan Premium Development for 21-Year Old Non-Tobacco Use	19
5. Plan Factors	20
6. Actuarial Certification	21

1. Basic Information and Data

The purpose of the actuarial memorandum is to provide certain information related to the submission, including support for the values entered into the Actuarial Memorandum Rate Exhibits. This information may not be appropriate for other purposes.

This information is intended for use by the Pennsylvania Insurance Department and their subcontractors to assist in the review of PHW's individual rate filing. However, we recognize that this certification may become a public document.

The premium rates developed and supported by this Actuarial Memorandum assume that federal cost-sharing reduction (CSR) subsidies will remain non-funded in plan-year 2025. This actuarial memorandum reflects the estimated impact of the Section 1332 State Relief and Empowerment Waiver for benefit year 2025. Future modifications to the operation and parameters of the State Relief and Empowerment Waiver, as well as to legislation, appropriations and/or court decisions regarding the funding of CSR payments may affect the extent to which the premium rates are neither excessive nor deficient.

As instructed by PHW, the premium rates developed and supported by this Actuarial Memorandum are based on legislative and regulatory provisions in effect at the time of preparation or otherwise scheduled by law or regulation to take effect in plan-year 2025. These provisions reflect the Inflation Reduction Act of 2022 (IRA) extension of the expanded advance premium tax credit (APTC) premium subsidies established by the American Rescue Plan Act of 2021 (ARP). Changes to these and other provisions that impact 2025 may affect the extent to which the premium rates are sufficient and neither excessive nor deficient. PHW reserves the right to file revised rates in the event of changes to the regulatory environment in which they were developed to ensure rates are appropriate.

At the time of this rate filing submission, there remains substantial uncertainty regarding the net impact of the COVID-19 public health emergency on claim costs in the 2023 experience period and on the trajectory of enrollment and healthcare utilization patterns in the months and years to come. Using the available information at the time of this rate filing, we have made assumptions regarding these impacts to historical claim costs and required 2025 premium rates, with the understanding that additional information may yet emerge to refine our expectations. If subsequent information becomes available that would materially affect this rate filing submission, we would like to work with the Pennsylvania Insurance Department to update our pricing assumptions regarding the impact of the ARP and COVID-19 and resubmit this rate filing. Additionally, should the funding of extended Advanced Premium Tax Credits (APTCs) be discontinued, we would like to revise our rates accordingly to ensure the rates are reasonable and accurate.

A. COMPANY INFORMATION

Please see Table 0, "Identifying Information", for the requested company identifying information.

B. RATE HISTORY AND PROPOSED VARIATION IN RATE CHANGES

The 3 year historical rate changes are:

Year	SERFF Filing #	Rate Change
2023	CECO-133248857	4.9%
2024	CECO-133651416	2.3%
2025	CECO-134068773	1.90%

The rate projections for 2025 have been updated from the previous year's projections to reflect the most recent assumptions and information available.

The following describes and quantifies the significant drivers underlying the proposed rate change for 2025. This breakdown is intended only for explanatory purposes and is distinct from the development of rates, as described in the subsequent sections of this memorandum.

- Single Risk Pool Experience and Morbidity (-7.70% premium impact versus 2024 filed rates)

The individual single risk pool experience underlying the rate projections has been updated. The current model reflects the projected utilization trend applied to adjusted experience (from 2023 to 2025), including anticipated changes in the average morbidity of the single risk pool. There is a full description of utilization trend and other projection factors applied to experience in Section 6, "Trend Factors".

Risk adjustment transfer experience for 2025 includes consideration of changes to the statewide average premium, the Risk Adjustment program, and Pennsylvania Health & Wellness Inc. enrollee population morbidity relative to the Pennsylvania single risk pool.

- Unit Cost trend (9.50% premium impact versus 2024 filed rates)

Unit costs and provider reimbursement agreements have been updated to reflect changes in the rating year.

- Benefit Design and CSR Subsidies (-4.70% to 3.40% premium impact versus 2024 filed rates, varies by plan)

PHW's 2025 rates assume no change in covered EHB or non-EHB benefits relative to benefits offered in 2024. The rates do reflect updated projections of actuarial value and cost sharing by plan. Premium rates continue to reflect the expectation that PHW will not be reimbursed by the U.S. Department of Health and Human Services (HHS) for cost-sharing on CSR Silver plans.

- Administrative Expenses and Profit (-0.80% premium impact versus 2024 filed rates)

See Section 2b, "Retention Items", for details on projected non-benefit expenses.

- Other

These components include capitation contracts, changes in the 1332 program, and interactions between prior steps.

As shown in Table 10, "Plan Rates", the rate change varies by plan. The variance in the rate changes across plans does not reflect the incorporation of plan-specific morbidity. When projecting plan rating factors, we have assumed the same demographic and risk characteristics for each plan priced. This pricing method excludes expected differences in the morbidity of members assumed to select the plan. Additional discussion of how the actuarial value of each plan is determined can be found

in Section 2, “Rate Development & Change”, which further addresses how rate changes can vary by plan under a single risk pool methodology.

C. AVERAGE RATE CHANGE

The average rate change in 21-year-old non-tobacco premium PMPM is 1.90%, as shown in Table 11, “Plan Premium Development for 21-Year-Old Non-Tobacco User”. The average rate change is 0.90%, as shown in Table 10, “Plan Rates”.

D. MEMBERSHIP COUNT

Please see Table 1, “Number of Members” for the average age, age breakdown, and total number of members for the projection period.

E. BENEFIT CHANGES

PHW’s 2025 rates assume no change in covered EHB or non-EHB benefits relative to benefits offered in 2024. The rates do reflect updated projections of actuarial value and cost sharing by plan, as described in “Plan Adjusted Index Rate” subsection in Section 2a. The premium rates developed and supported by this Actuarial Memorandum assume that federal cost-sharing reduction (CSR) subsidies will remain non-funded in plan-year 2025.

Please see Appendix 20.5 for details on benefit changes.

The names of all plans are changing effective 1/1/2025.

F. EXPERIENCE PERIOD CLAIMS AND PREMIUMS

The following information supports the best estimate of premium and claims for the single risk pool during the experience period, as reported in Worksheet 1, Section I and Worksheet 2, Section II of the URRT. The experience period for this rate filing is calendar year 2023.

Paid Through Date: 3/31/2024 Current Date: Mar-24

Earned premium in the experience period is not adjusted for taxes, assessments, risk adjustment receivables or payables or MLR rebates.

Allowed and Incurred Claims Incurred During the Experience Period

A breakout of the claims shown in Worksheet 1, Section I is provided in the appendices as Appendix 4.1.

Allowed and incurred claims, as defined by the URRT instructions, were determined from PHW’s claim record system. Incurred but not paid amounts were estimated using a combination, as appropriate, of the loss ratio and completion methodologies. The estimation for incurred but not paid amounts is based on the experience period claims reported. This estimation was performed using a consistent methodology for both allowed and paid claims. Differences in effective completion factors for allowed versus paid claims are attributable to differences in the seasonal patterns of allowed versus paid claims. Actual claims run-out may reflect some variability from expectations.

Incurred claims are defined as allowed claims less member cost-sharing, Section 1332 Waiver reinsurance and cost-sharing paid by the U.S. Department of Health and Human Services (HHS) on behalf of low-income members. Cost-sharing paid by HHS will be zero for 2025 under their current guidance.

Experience Period Non-EHBs

The benefits in excess of EHBs offered are adult vision and adult dental coverage. The experience period cost for these benefits is shown in Table 2.

Capitation

In 2023, children were capitated at \$5.11 PMPM for Envolve Vision (Exam & Hardware, Medical & Surgical), Vida (Health Coaching), Envolve People Care (NurseLine), Startsmart, and Teledoc - Telehealth. Adults on the base product were capitated at \$2.25 PMPM. Adults were lower since Envolve Vision (Exam & Hardware) is not included in the base product. Adults with the Vision+Dental buy-up were capitated an additional \$19.55 PMPM for Envolve Vision (Exam & Hardware) and Envolve Dental. The dates for the contract were CY 2023.

Treatment of Pharmacy Rebates on Incurred Claims

Incurred claims in Table 2 have been adjusted to be gross of pharmacy rebates, as opposed to net, shown on Worksheet 1 of the URRT.

Experience Period Risk Adjustment and Reinsurance Adjustments PMPM

The risk adjustment transfer and state-based reinsurance receivables for the experience period is shown on Worksheet 1, Section I of the URRT. The final amount for risk adjustment was not known at the time of rate development. This amount was estimated using data available through Mar-24. There were no federal reinsurance recoveries in 2023.

Current Enrollment and Premium

The current enrollment and premium values on Worksheet 2, Section II are reported as of Mar-24.

Loss Ratio

The loss ratio calculated in Table 2, "Experience Period Claims and Premiums" for the experience period data is 91.13%.

G. CREDIBILITY OF DATA

Description of Credibility Method Used Credibility is first calculated using the following formula:

If Member Months < 12,000:	0%
If 12,000 < Member Months < 125,000:	$(\text{Member Months}/125,000)^{0.5}$
If Member Months > 125,000:	100%

Here, "Member Months" is defined as total 2023 member months across PHW's calendar year 2023 individual block of business that are suitable for pricing.

Total 2023 Member Months: 172,810

Credibility Level Assigned To Base Period Experience: 100%

Note that credibility is calculated based on 2023 experience data that is suitable for pricing and may not exactly match the total 2023 member months shown above.

Actuarial Standard of Practice #25 "Credibility Procedures" was considered when determining the credibility level.

Manual Experience Basis

This filing is 100% experience rated. No credibility manual rate is being filed for 2025.

Where manual adjustments to claims are required to model changes in Pennsylvania Health & Wellness Inc.'s population and coverage over time, most notably utilization trend as discussed in section 2, these adjustments are based on the Milliman Managed Care Rating Model (MCRM) and the companion Milliman Health Cost Guidelines (HCGs), and consideration of relevant QHP experience in other states.

The HCGs provide a flexible but consistent basis for the determination of claim costs for a wide variety of health benefit plans. These rating structures are used to anticipate future claim levels, evaluate past experience, and establish interrelationships between different health coverage levels.

The Milliman HCGs are developed as a result of Milliman's continuing research on health care costs. They were first developed in 1954 and have been updated and expanded annually since then. These guidelines are continually monitored as they use them in measuring the experience or evaluating the rates of their clients and as they compare them to other data sources.

The HCGs are a cooperative effort of all Milliman health actuaries and represent a combination of their experience, research, and judgment. An extensive amount of data is used in developing these guidelines including published and unpublished data. In most instances, cost assumptions are based on their evaluation of several data sources and, therefore, are not specifically attributable to a single source. Since these guidelines are a proprietary document of Milliman, they are only available for release to specific clients that lease these guidelines and to Milliman consulting health actuaries.

H. TREND IDENTIFICATION Please see Table 3, "Trend Components" for the medical and prescription drug allowed claims cost and utilization trends as well as the induced demand adjustments.

This section demonstrates and describes the methodology for developing the trend factors used to project the 2023 experience period Essential Health Benefit (EHB) allowed claims to the 2025 projection period as shown in Worksheet 1, Section II of the URRT. The cost and utilization trend factors for "Year 1" and "Year 2" shown on the URRT are annual trends; the factors for "Year 1" represent 12 months of trend from 2023 to 2024 and the factors for "Year 2" represent 12 months of trend from 2024 to 2025.

Trend Factors (URRT Cost Trend and URRT Utilization Trend Projection Factors)

The cost trend factors reflect the following:

- Changes in contractual reimbursement and discounts between the experience and projection periods for a fixed basket of services. This is for providers that were already part of the network in 2023, based on actual 2023 contracts and ongoing provider and Pharmacy Benefit Manager (PBM) contracting efforts for 2025, controlling for changes in service mix, the geographic distribution of enrollees, and pharmacy rebates.
- Changes in the distribution of services among network providers other than changes driven by expanding the provider network (there were no other significant network changes from 2023 to 2025).
- Average charge trend between the experience and projection periods normalized for demographics, morbidity, and benefit design.

Appendix 6.1 decomposes the cost trend factor into its constituent parts.

The utilization trend factors reflect the following:

- Assumed changes in the mix or intensity of services provided for a fixed level of illness burden.
- Secular utilization trend, normalized for demographics, morbidity, and benefit design, informed by consideration of multiple sources, including typical industry trend assumptions, the Milliman Health Cost Guidelines, and analysis of observed historical trends for Ambetter products.

Appendix 6.2 compares the utilization trend factor by benefit category to various industry trends.

I. HISTORICAL EXPERIENCE

Please see Table 4, “Historical Experience” for the most recent 48 months of data with at least two months of runout. See Section 1h above for a description of the trend development.

2. Rate Development and Change

A. DEVELOPMENT OF PROJECTED INDEX RATE, MARKET-ADJUSTED INDEX RATE, AND TOTAL ALLOWED CLAIMS

Please see Table 5 for the development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims. The paid to allowed ratio shown in cell C28 is calculated using an alternative method as allowed by the rate filing guidance. The ratio is calculated as follows:

$$\text{Paid to Allowed Ratio} = \frac{\text{URRT WS2 Projected Incurred Claims} + \text{URRT WS2 Projected Reinsurance}}{\text{URRT WS2 Allowed Claims}}$$

Development of Manual EHB Allowed Claims PMPM

This filing is 100% experience rated for 2025.

Adjustments to Trended EHB Allowed Claims PMPM

This section describes and supports the adjustments other than trend used to project the 2023 experience period Essential Health Benefit (EHB) allowed claims to the 2025 projection period as shown in Worksheet 1, Section II of the URRT. Each factor represents the change between the experience period and projection period. The factors, therefore, are not annualized values.

Differences between the URRT adjustment factors and the adjustments shown in Table 5 are due to the order in which they are applied. Appendix 20.4 decomposes each adjustment factor into its components by service category for both Table 5 and the URRT.

Morbidity Adjustment

Claims were adjusted for estimated differences in morbidity between PHW's 2023 membership (172,810) and its projected 2025 membership (426,592).

The components of the morbidity projection factor are:

- An adjustment for differences in estimated direct costs associated with the COVID-19 pandemic between PHW's 2023 experience and the 2025 rating period. No explicit adjustments were made to the experience claims projections to reflect lasting changes in care delivery associated with increased use of telehealth services precipitated by the pandemic.
- An adjustment for potential changes in the health status profile of the statewide single risk pool from 2023 to 2025.

Consistent with the 2025 URR Instructions, these morbidity adjustments reflect the component of the change in average allowed claims PMPM holding constant the experience period population's demographics (e.g. age, gender, and region), product mix, and all provider network contracts and time parameters.

The relative morbidity assumption used for projecting claims reflects PHW's expectations regarding the morbidity of its 2025 membership relative to the single risk pool, and is consistent with the relative morbidity assumption used to estimate PHW's risk transfer payment/receivable.

Demographic Shift

Experience period claims were adjusted for differences in the projected mix of 2025 membership by gender and age band using demographic factors from the Milliman Health Cost Guidelines.

Experience period claims were also adjusted for differences in the projected mix of 2025 membership by metropolitan statistical area (MSA) using utilization and unit cost area factors from the Milliman Health Cost Guidelines and differences in contractual reimbursement by area.

Plan Design Changes

Experience period claims were adjusted for changes in plan mix and plan design.

This adjustment factor reflects anticipated changes in the demand for services due to differences in product mix and cost-sharing requirements from the experience period to the projection period. Population demographics and morbidity were held constant across plan designs for this adjustment to avoid confounding with demographic and morbidity shifts.

Where applicable, this factor is also used to reflect addition or removal of covered benefits to align the 2025 projection with benefits covered by the state EHB benchmark plan:

- No such benefit change adjustments were required from 2023 to 2025.

Other Adjustments

Experience period claims were also adjusted for the following changes between the experience period and projection period:

- Anticipated changes in capitation contracts.
- Changes in pharmacy rebates and dispensing fees between the experience and projection periods developed based on changes to PBM contracting from 2023 to 2025 and projected drug utilization.
- Expected savings due to ongoing managed care efforts.
- The reimbursement impact of expanding the provider network from 2023 to 2025 (developed using estimates of the distribution of services and relative unit costs by provider). This only reflects the impact of new providers; the impact of changes in the distribution of services among existing network providers is reflected in unit cost trend.
- Adjustment for expected claims costs without corresponding premium revenue, due to ACA grace period provisions.

Projected Index Rate

The Index Rate for the Experience Period (calendar year 2023) is a measurement of the average allowed claims PMPM for EHB benefits. This value (\$359.95) is located on Worksheet 1, Section II of the URRT. The Index Rate for the Experience Period reflects the actual mixture of smoker/non-smoker population, area factors, plan enrollment, and the actual mixture of risk morbidity in the single risk pool during the experience period. The Index Rate for the Experience Period has not been adjusted for payments and charges under the risk adjustment and reinsurance programs or for Exchange user fees. We have adjusted the Index Rate for the Experience Period to remove any non-EHBs. The claim system does not currently distinguish between EHB and non-EHB claims, so this adjustment was made based on the expected percentage of non-EHB claims for the experience period. The experience period did not contain non-single risk pool claims, so no adjustment was made for this.

The Index Rate for the Projection Period (\$450.05) is reflected in Worksheet 1, Section II of the URRT. It was developed following the specifications of 45 CFR part 156.80(d)(1). The Index Rate for the Projection Period represents the estimated total combined projected allowed claims PMPM for EHBs for calendar year 2025 and has not been adjusted for payments and charges under the risk adjustment program or for Exchange user fees. The total allowed claims include benefits in excess of EHBs (coverage for adult vision and adult dental). The Index Rate for the Projection Period was calculated based on the methodology discussed in Section 2a. The Index Rate for the Projection Period will remain unchanged until a renewal filing effective January 1, 2026.

The development of the Index Rate for the Projection Period is shown in Worksheet 1, Section II. This reflects:

- The projection period of calendar year 2025
- The anticipated claim level of the projection period with respect to trend, benefits, and demographics
- The experience of all policies expected to be in the single risk pool (with necessary adjustments)

Appendix 10.1 and Table 5 demonstrate the calculation of the Projected Index Rate by blending the Experience Period Index Rate with the Credibility Manual Index Rate, as applicable. The next two sections further describe the steps taken to develop the Market-Wide Adjusted Index Rate and Plan Adjusted Index Rates.

Market-Adjusted Index Rate

The Index Rate for the Projection Period is adjusted to arrive at the Market-Wide Adjusted Index Rate (\$542.20) based on the following three adjustments, as outlined in 45 CFR 156.80(d)(1):

- Adjustment for Section 1332 State Relief and Empowerment Waiver (state-based reinsurance program)
- Adjustment for the Risk Adjustment Program
- Exchange user fee adjustment

Since the Index Rate is on an allowed claims basis, the market-level adjustments are applied on an allowed basis. Similar to the Index Rate, the Market-Wide Adjusted Index Rate reflects the average demographic characteristics of the single risk pool. The Market-Wide Adjusted Index Rate is not calibrated. Appendix 11.1 and Table 5 show the development of the Market-Wide Adjusted Index Rate.

Reinsurance

No federal reinsurance recoveries are expected in the projection period. The reinsurance that was entered in the field for projected reinsurance on URRT Worksheet 1, Section II and Table 5 reflects a reduction in the index rate due to the Section 1332 State Relief and Empowerment Waiver. On Appendix 11.1, the reinsurance adjustment is shown on an allowed basis as a multiplicative factor, and this factor is 0.95.

Tabs II.a. and II.b. in the PAAM Exhibits show the impact of the reinsurance program in the individual market.

We used Pennsylvania Health & Wellness, Inc's actual 2023 claims experience, including the distribution thereof by annual claims per member, scaled to anticipated 2025 costs levels, to model the proposed reinsurance scenario. The scaled claims probability distribution (CPD) reflects expectations regarding plan year 2025 population, plan, and network characteristics for purposes of calculating the projected incurred claims impact in the rating period.

We then applied the proposed coinsurance parameter to claims that fall within the reinsurance window to calculate the expected reinsurance receivable.

Risk Adjustment Payment/Charge

The Projected Risk Adjustment Transfer PMPM (████████) is shown on Worksheet 1, Section II on an allowed basis. This amount does not include the 2023 Risk Adjustment User Fee of \$0.18 PMPM (0.03% of premium). The Risk Adjustment User Fee is included with Taxes and Fees on Worksheet 2, line 3.7. Appendix 11.1 shows how the anticipated risk adjustment transfer revenue is applied to the Index Rate in the development of the Market-Wide Adjusted Index Rate. See Appendix 11.2 for the development of the Projected Risk Adjustment Transfer and Appendix 11.3 for the development of the multiplicative adjustment factor.

The state transfer calculation portion of the total risk adjustment transfer is based on the risk adjustment transfer formula, as provided in the Federal Register Volume 78 Number 47 and displayed below.

$$T_i = \left[\frac{(PLRS_i \times IDF_i \times GCF_i)}{\sum_i (S_i \times PLRS_i \times IDF_i \times GCF_i)} - \frac{(AV_i \times ARF_i \times IDF_i \times GCF_i)}{\sum_i (S_i \times AV_i \times ARF_i \times IDF_i \times GCF_i)} \right] \times \bar{P}_s$$

Where:

\bar{P}_s = statewide average premium \times 0.86 (to reflect the admin reduction adjustment);

$PLRS_i$ = plan i 's plan liability risk score;

AV_i = plan i 's metal level AV;

ARF_i = plan i 's allowable rating factor;

IDF_i = plan i 's induced demand factor;

GCF_i = plan i 's geographic cost factor;

S_i = plan i 's share of state enrollment as measured in member months;

and the denominator is summed across all plans in the risk pool in the market in the state.

We project the portfolio average for each factor in the risk adjustment transfer formula using a combination of (i) the state's actual historical risk adjustment factors adjusted to the projected population and (ii) adjustments for market and risk adjustment program changes. The resulting aggregate payment or receivable is then proportionally allocated to all plans in the portfolio.

For the purpose of our modeling, each of these factors was approximated as follows.

\bar{P}_s : The state average premium was assumed to be approximately ██████████ PMPM.

PLRS: The statewide average risk score is projected based on the average PLRS of the single risk pool in 2023, as reported by the U.S. Department of Health and Human Services (HHS), adjusted

for projected changes in the demographics, morbidity, and plan mix of the single risk pool from 2023 to 2025.

The average risk score for PHW's membership is projected by adjusting the projected single risk pool average risk score for risk score differences associated with demographic, plan mix, and morbidity differences between the two populations.

HHS's proposed HCC model and coefficient changes for 2024 and 2025 were considered in the development of the projected risk adjustment transfer. The demographic, plan mix, and morbidity assumptions supporting the projected statewide and PHW risk score projections are consistent with the demographic, plan mix, and morbidity assumptions used to project claims costs.

IDF: The statewide average IDF is projected based on the average IDF of the single risk pool in 2023. For historical risk transfer data, we rely on a combination of the latest available HHS Summary Report on Permanent Risk Adjustment Transfers and when available, Wakely's National Risk Adjustment Report (WNRAR) for Pennsylvania.

The average IDF for PHW is projected by applying the induced demand factors from the market reform rule published in the March 11, 2013 Federal Register, page 15433, Table 11 to PHW's projected population. The formula recognizes the following IDF factors by metallic tier: Bronze 1.00, Silver 1.03, Gold 1.08 and Platinum 1.15.

AV: The statewide average actuarial value (AV) is projected based on the average metal level AV of the single risk pool in 2023. For historical risk transfer data, we rely on a combination of the latest available HHS Summary Report on Permanent Risk Adjustment Transfers and when available, Wakely's National Risk Adjustment Report (WNRAR) for Pennsylvania.

The average AV for PHW is projected by applying the metal level AV factors from the market reform rule published in the March 11, 2013 Federal Register, page 15433, Table 9 to PHW's projected population. The formula recognizes the following AV values by metallic tier: Bronze 0.60, Silver 0.70, Gold 0.80, and Platinum 0.90.

ARF: As stated in the March 11, 2013 Federal Register, page 15433, the allowable rating factor (ARF) adjustment accounts only for age rating.

The statewide average ARF is projected based on the average ARF of the single risk pool in 2023. For historical risk transfer data, we rely on a combination of the latest available HHS Summary Report on Permanent Risk Adjustment Transfers and when available, Wakely's National Risk Adjustment Report (WNRAR) for Pennsylvania, adjusted for projected changes in the demographics of the single risk pool from 2023 to 2025.

The average ARF for PHW is projected by applying the proposed 2025 HHS age rating factors to PHW's projected population. An equal distribution across ages within each age band was assumed.

GCF: The average GCF for PHW relative to the statewide average was modeled based on historical GCFs by rating area, any anticipated changes in these GCFs over time, and PHW's projected enrollment by rating area.

The total transfer is calculated as the sum of the state transfer calculation described above and a net transfer for 2025 attributable to the high cost risk pooling program. We modeled this as the

combination of a receivable, based on the attachment point and coinsurance from the 2025 Notice of Benefit and Payment Parameters (NBPP), and an assessment, based as a percentage of premium.

Outliers were reflected in our calculations to the extent that outliers are reflected in historical risk scores used as the starting point of the 2024 risk transfer projection and via the calculation of the net high cost risk pooling receivable or payment. Otherwise, there were no “potential outlier assumptions” that would have an impact on transfers.

The projected transfer amount assumes no impact under the Risk Adjustment Data Validation (RADV) process.

The risk adjustment transfer amounts (██████████) shown on Worksheet 1 of the URRT are the actual PMPM amounts expected in the projection period on an allowed basis. The risk adjustment transfer amount applied to the Index Rate in the development of the Market-Wide Adjusted Index Rate is on an allowed claims basis, as the Index Rate is on an allowed claims basis.

The demographic, plan mix, and morbidity assumptions supporting the risk transfer projection are consistent with the demographic, plan mix, and morbidity assumptions used to project claims costs.

Exchange User Fees

The Exchange user fee adjustment applied to premium rates is 2.98% of premium. This is based on weighting the expected distribution of issuer enrollment sold through the Exchange and sold outside of the Exchange. Per the 2025 ACA-Compliant Health Insurance Rate Filing Guidance, the Exchange user fee is 2.98% of premium for members purchasing coverage via the Exchange, and there is no Exchange fee for members enrolling in coverage outside of the Exchange. We assumed 99.29% of members would enroll through the Exchange and 0.71% would enroll outside of the Exchange. On Appendix 11.1, the user fee is shown on an allowed basis as a multiplicative factor, and this factor is 1.038. See Appendix 11.3 for the development of this factor.

Non-EHBs

The non-EHB allowed claims shown in Table 5 are comprised of Adult Vision and Adult Dental benefits (\$3.85).

Plan-Adjusted Index Rate

The Plan Adjusted Index Rates (average Plan Adjusted Index Rate: \$548.16) are included in Worksheet 2, Section III of the URRT. The Plan Adjusted Index Rates are the Market-Wide Adjusted Index Rate adjusted for only the following allowable adjustments, where applicable, as outlined in 45 CFR 156.80(d)(2):

- The actuarial value and cost-sharing design of the plan
 - The actuarial value for each plan was developed using a claims simulation methodology with a large dataset of individual exchange data, calibrated to the expected population.
 - * Under a claims simulation approach to modeling plan relativities, member-level claims are re-adjudicated using the cost sharing parameters of each plan design, thereby calculating plan versus patient liability.
 - * Using the same dataset for plan rating factors ensures that a static demographic and risk profile informs the rating factor of each plan so that allowed relativities by plan

solely reflect benefit design differences.

- * Rate increases can vary by plan under this methodology without reflecting morbidity differences. For example, rate increases naturally vary by plan over time as the relationship changes between cost sharing levels and the allowed costs to which they are applied (i.e., leveraging).
 - The actuarial and cost-sharing pricing adjustment reflects full plan liability for CSR subsidies. CSR costs are reflected as a uniform percentage load of 22.00% applied to each silver ACA-compliant plan sold through the Exchange.
 - Induced Demand for each plan is calculated according to the 2025 ACA-Compliant Health Insurance Rate Filing Guidance released by the Pennsylvania Insurance Department.
- The plan’s provider network, delivery system characteristics, and utilization management adjustment practices.
 - Not applicable. All plans have the same provider network.
- Benefits provided under the plan that are in addition to the EHBs.
 - For a subset of plans, additional benefits include coverage for adult vision and adult dental.
- Administrative costs, excluding the Exchange user fees (which are already accounted for in the Market-Wide Adjusted Index Rate).
 - Non-benefit expenses (\$77.65) are discussed in Section 2b below. Appendix 12.2 decomposes the administrative cost adjustment into its components.

There are no catastrophic plans being offered, so there is no eligibility adjustment made for catastrophic plan enrollment.

Administrative costs and other benefits (non-EHB) common to all plans are added to the Market-Wide Adjusted Index Rate. Then, factors for actuarial value and cost-sharing and non-EHBs by plan are applied to reach the Plan Adjusted Index Rate for each plan.

The development and values of the Plan Adjusted Index Rates are shown in Appendix 12.1.

The Plan Adjusted Index Rates reflect the average demographic characteristics of the single risk pool and are not calibrated.

Inclusion of Capitation Payments

Capitated payments for services are accounted for through a PMPM allocation to claims, where the average capitation amount replaces the projected claims amount.

In 2024, children will be capitated at \$3.34 PMPM for Envolve Vision (Exam & Hardware, Medical & Surgical), Vida (Health Coaching), Envolve People Care (NurseLine), Startsmart, and Teledoc - Telehealth. Adults on the base product will be capitated at \$1.16 PMPM. Adults are lower since Envolve Vision (Exam & Hardware) is not included in the base product. Adults with the

Vision+Dental buy-up will be capitated an additional \$20.19 PMPM for Envolve Vision (Exam & Hardware) and Envolve Dental. The dates for the contract are CY2022.

In 2025, children will be capitated at \$3.72 PMPM for Envolve Vision (Exam & Hardware, Medical & Surgical), Vida (Health Coaching), Envolve People Care (NurseLine), Startsmart, and Teledoc - Telehealth. Adults on the base product will be capitated at \$1.48 PMPM. Adults are lower since Envolve Vision (Exam & Hardware) is not included in the base product. Adults with the Vision+Dental buy-up will be capitated an additional \$20.41 PMPM for Envolve Vision (Exam & Hardware) and Envolve Dental. The dates for the contract are CY2023.

B. RETENTION ITEMS

Please see Table 6, “Retention”, for the retention items. Combined with margin and contingency from Table 10, “Plan Rates”, this represents the total administrative expenses and taxes and fees. Profit, margin, and administrative expenses do not vary by plan. The calculation of the retention loads are shown in Appendix 12.2. The PMPM values listed below are not expected to match Table 6 because the loads are calculated as a percent of EHB-only premium but are applied to aggregate projections.

Administrative Expense Load

The administrative expense load (14.20% of Premium) was provided by PHW. This allowance is based on projected enrollment and is estimated to appropriately cover expenses for overhead, operations, sales, and marketing expenses.

This includes approved quality improvement expenses (\$3.00) and provider incentive payments (\$2.00).

The administrative expenses are allocated proportionally by plan on a constant percentage of Premium basis. A breakdown of administrative expenses can be found in Appendix 12.2. See Appendix 12.3 for the development of the Administrative Cost factor applied on Appendix 12.1.

Taxes and Fees

The taxes and fees load (0.85% of Premium) account for the following: Risk Adjustment User Fee (\$0.18), PCORI Fee (\$0.27), PA Premium Tax and State Income Tax (\$1.02) and Federal Income Tax (\$3.18).

See Section 2a above for a description of how the Exchange user fee is calculated and applied to the Market-Wide Adjusted Index Rate.

Profit (or Contribution to Surplus) & Risk Margin

This load (2.00% of Premium) was applied proportionally to all products and plans and can be found in Appendix 12.2.

Broker Commissions

A sample producer agreement and commission schedules have been included in Appendix 20.2.

Loss Ratio

The projected medical loss ratio (MLR) is 84.10%. The projected MLR is based on the prescribed calculation from 45 CFR 158, but solely reflects the projection year single risk pool experience, rather than the three-year combined period that is used for determining MLR rebates. There was no credibility adjustment applied to the projected MLR. Including a credibility adjustment would only increase the projected MLR, which already satisfies the MLR requirement. See Appendix 15.1 for the calculation for the projected federal medical loss ratio.

C. NORMALIZED MARKET-ADJUSTED PROJECTED ALLOWED TOTAL CLAIMS

Normalization factors are shown in Table 7, “Normalized Market-Adjusted Projected Allowed Total Claims”. Rates were normalized for age, tobacco usage, and benefit richness.

Age Curve Calibration

The development of the average age factor (1.6968) may be found in Appendix 13.2.

The age curve calibration factor is calculated by weighting the prescribed age rating factors with the projected single risk pool membership distribution. This age curve calibration calculation is based on page 9 of the 2023 Unified Rate Review Instructions. The age factor for each age band is the simple average of the factors in that band. The rounded weighted average age corresponding to this age calibration factor is 50 years.

Geographic Factor Calibration

The development of the average geographic factor (1.000) may be found in Appendix 13.3.

In order to determine the calibration factor for geography, the projected distribution of members by area was determined. The weighted average of the area factors was then calculated using this distribution.

Tobacco Use Rating Factor Calibration

The development of the average tobacco factor (1.0048) may be found in Appendix 13.4.

The tobacco use calibration factor removes the portion of the cost expected to be recouped through the tobacco surcharge. This factor is calculated by weighting the tobacco factors with the single risk pool membership distribution of tobacco and non-tobacco users

Benefit Richness Calibration

The development of the average benefit richness factor (1) can be found in Appendix 20.3.

Network Calibration

PHW operates in a single network. There are no network differences, and thus the network factor is 1.

D. COMPONENTS OF RATE CHANGE

Please see Table 8, “Components of Rate Change”, and Table 9, “Year-over-Year Data to Support Table 8” for the buildup of the components of rate change.

Additional detail on the drivers of the rate changes are included in Section 1b.

3. Plan Rate Development

Table 10, “Plan Rate Development” shows the development of the final 2025 rates by plan.

The buildup of the Induced Utilization shown in column L of Table 10 is shown in Appendix 20.3

The AV Metal Values included in Table 10 were calculated using the Final 2025 Federal AV Calculator for the plan provisions that fit within the calculator parameters and making appropriate adjustments to the AV identified by the calculator for plan design features that are not compatible with the parameters of the AV Calculator. The Unique Plan Design Supporting Documentation and Justification for applicable plans is included as part of the QHP filing.

Please refer to Appendix 16.1 for screenshots documenting the outcomes of the AV Calculator for each plan.

The 2025 version of the Unified Rate Review Template (v6.1) has error checking that aligns with the AV de minimis ranges outlined in the 2025 NBPP.

CSR Defunding Adjustment

A CSR Defunding Adjustment of 22.00% was selected based on review of PHW’s calculated CSR rate load, which fell below the low end of the allowable CSR rate load range of 1.22-1.26. The expectation is that the actual required CSR rate load under the alternate scenario in which expanded subsidies are extended to plan year 2025 will also fall below the 1.22 minimum allowable CSR rate load. As such, a CSR Defunding Adjustment of 1.22 would be selected in either scenario.

4. Plan Premium Development for 21-Year Old Non-Tobacco Use

Table 11, “Plan Premium Development for 21-Year-Old Non-Tobacco User”, shows the premium development and rate change for a 21-year-old non-tobacco user.

5. Plan Factors

A. AGE AND TOBACCO FACTORS

Age and tobacco factors are shown in Table 12, “Age and Tobacco Factors”. Age factors represent the federal standard age curve.

The tobacco factor for 2025 is set to 1.15 for all ages 21+. In lieu of credible data, the factor was selected from a reasonable range of cost impacts based on tobacco cost literature. Specifically, the report ‘The Business Case for Coverage of Tobacco Cessation, 2012 Update’ by Leif Associates, Inc. was considered which suggests that healthcare costs for smokers are greater than those of nonsmokers and may be as much as 34% higher than costs for non-smokers.

B. GEOGRAPHIC FACTORS

The Geographic Areas used are consistent with those defined by the state. Geographic factors are shown in Table 13, “Geographic Factors”.

The geographic factors were developed to reflect provider reimbursement and practice pattern differences by area. The reimbursement reflected in the geographic factors is based on current and projected contracts for providers by rating area. The practice patterns reflected in the geographic factors are based on Health Cost Guidelines research. Projected risk pool morbidity and age/gender factors were set at statewide levels during geographic factor development. The area factors used are reflective of differences in delivery costs (including unit cost and provider practice pattern differences) only and do not reflect differences in population morbidity.

C. NETWORK FACTORS

Network factors are shown in Table 14, “Network Factors”. PHW only has one network, so this factor is shown as 1.000.

D. SERVICE AREA COMPOSITION

Not Applicable. Rates do not vary by Service Area.

E. COMPOSITE RATING

Not Applicable. This is an individual rate filing.

F. CONNECTIVITY FACTORS

Not Applicable. This product filing does not include connectivity features.

6. Actuarial Certification

I, [REDACTED], am a member of the American Academy of Actuaries in good standing and meet its qualification standards for actuaries issuing statements of actuarial opinion in the United States promulgated by the American Academy of Actuaries, and have the education and experience necessary to perform the work. This filing is prepared on behalf of Pennsylvania Health & Wellness, Inc. (the “Company”) to comply with applicable State and Federal Statutes for individual rate filings.

I certify the rates were developed in accordance with the appropriate Actuarial Standards of Practice (ASOPs) and the profession’s Code of Professional Conduct. While other ASOPs apply, particular emphasis was placed on the following:

- ASOP No. 5, Incurred Health and Disability Claims
- ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health Benefits
- ASOP No. 12, Risk Classification
- ASOP No. 23, Data Quality
- ASOP No. 25, Credibility Procedures
- ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
- ASOP No. 41, Actuarial Communications
- ASOP No. 42, Health and Disability Actuarial Assets and Liabilities Other Than Liabilities for Incurred Claims
- ASOP No. 45, The Use of Health Status Based Risk Adjustment Methodologies
- ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act
- ASOP No. 56, Modeling

I certify that to the best of my knowledge and judgment:

1. The Index Rate for the Projection Period is:
 - (a) In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102)
 - (b) Developed in compliance with the applicable Actuarial Standards of Practice
 - (c) Reasonable in relation to the benefits provided and the population anticipated to be covered
 - (d) Neither excessive nor deficient based on my best estimates of the 2023 individual market.

2. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.
3. The geographic rating factors used reflect only differences in the cost of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.
4. The CMS Actuarial Value Calculator, with appropriate adjustments, was used to determine the AV Metal Values shown in Worksheet 2, Section I of the URRT for all plans. Regarding Pennsylvania state certification requirements, I certify that to the best of my knowledge and judgment:
5. All factor, benefit, and other changes from the prior approved filing have been disclosed.
6. No new plan is a modification of an existing plan.
7. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2025 Rate Filing Justification.

The URRT does not demonstrate the process used to develop proposed premium rates. It is representative of information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

The 2025 plan year premium rates in this actuarial memorandum are contingent upon the status of the state and federal ACA statutes and regulations including applicable legislation, regulatory guidance, court decisions, and otherwise. Changes to these provisions have the potential to greatly impact required 2025 plan year premium rates as described in this Actuarial Memorandum and the alignment of these premium rates with incurred costs. Such changes may include but are not limited to changes to permissible or mandated covered benefits and benefit designs, changes to operation and parameters of the state Section 1332 waiver reinsurance program, changes to eligibility for and determination of APTCs, and changes to the funding status of cost sharing reduction plans.

Differences between the projections and actual amounts depend on the extent to which future experience conforms to the assumptions made for this analysis. It is certain that actual experience will not conform exactly to the assumptions used in this analysis. Actual amounts will differ from projected amounts to the extent that actual experience deviates from expected experience. Furthermore, due to the substantial uncertainty regarding the past and future impacts of the COVID-19 pandemic and associated federal public health emergency, we believe some of the assumptions related to the pandemic's financial impact may exhibit a greater degree of divergence from expectations than would typically be expected in a more stable economic and healthcare environment.

The information provided in this actuarial memorandum is in support of the items illustrated in the URRT and does not provide an actuarial opinion regarding the URRT's process used to develop proposed premium rates. It does certify that rates were developed in accordance with applicable regulations, as noted.

It is certain that actual experience will not conform exactly to the assumptions used in this analysis.

PA Rate Template Part VI - Rate Change Summary

Table 15. Rate Change Summary Information

Overview

Initial Requested Average Rate Change:	6.21%
Revised Requested Average Rate Change:	1.88%
Minimum Requested Rate Change:	-5.54%
Maximum Requested Rate Change:	18.81%
Mapped Members:	29,211
Available in Rating Areas:	Rating Areas 1, 2, 3, 4, 5, 6, 7, and 8

Key Information

Jan. 2023 - Dec. 2023 Financial Experience

Premium	\$	53,929,072.52
Claims	\$	49,143,595.53
Administrative Expenses	\$	15,623,842.97
Taxes & Fees	\$	7,772,370.45
Company Made After Taxes	\$	(18,610,736.43)

The company expects its annual medical costs to increase:

9.78%

Explanation of requested rate change:

Factors such as cost of care, taxes, utilization of health services, proposed changes in benefits, anticipated changes in morbidity in relation to the single risk pool, changes to the parameters of the Section 1332 Waiver, and updated expectations regarding the impacts of COVID-19 in the rating period all contribute to the 2024 rate change.

Carrier Name:	Pennsylvania Health & Wellness, Inc.
Product(s):	HMO
Market Segment:	Individual
Rate Effective Date:	1/1/2025

How It Plans to Spend Your Premium

This is how the company plans to spend the premium it collects in 2025:

Claims:	80%
Administrative Expenses:	14%
Taxes & Fees:	4%
Profit:	2%

Company Name: Pennsylvania Health & Wellness, Inc.
 Market: Individual
 Product: HMO
 Effective Date of Rates: January 1, 2025

Ending date of Rates: December 31, 2025

Rating Area Data Collection

*Specify the total number of Rating Areas in your State by selecting the Create Rating Areas button or Ctrl + Shift + R.
Select only the Rating Areas you are offering plans within and add a factor for each area.
To validate, select the Validate button or Ctrl + Shift + I.
To finalize, select the Finalize button or Ctrl + Shift + F.*

Rating Area	Rating Factor
Rating Area 1	1.0041
Rating Area 2	1.3336
Rating Area 3	1.1101
Rating Area 4	0.8831
Rating Area 5	1.1005
Rating Area 6	1.2350
Rating Area 7	1.0512
Rating Area 8	0.8293

2025 Rates Table Template v14.0		All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.				
		If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.				
		If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.				
		If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.				
		To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

1. General Information

Scope and Purpose:

This document contains the Part III Actuarial Memorandum for Pennsylvania Health & Wellness Inc.'s individual health block of business annual rate filing, effective January 1, 2025. This Actuarial Memorandum is submitted in conjunction with the Part I Unified Rate Review Template (URRT). This is a renewal rate filing.

The purpose of this Actuarial Memorandum is to provide certain information related to the submission, including support for the values entered into the Part I URRT. In combination, these documents support compliance with the market reform rating rules and reasonableness of applicable rate increases. This information may not be appropriate for other purposes.

Consistent with the October 12, 2017 payment memo from the U.S. Department of Health and Human Services (HHS)¹, the premium rates developed and supported by this Actuarial Memorandum assume that cost-sharing reduction (CSR) subsidies will not be funded. Future modifications in legislation, regulation and/or court decisions regarding the funding of CSR payments may affect the extent which the premium rates are sufficient and neither excessive nor deficient.

Pennsylvania Health & Wellness Inc. asserts that the premium rates developed and supported by this Actuarial Memorandum are based on legislative and regulatory provisions in effect at the time of submission.

Pennsylvania Health & Wellness Inc. reserves the right to file revised rates in the event of changes to the regulatory environment in which they were developed to ensure rates are appropriate. In addition to CSR payments and risk adjustment program payments and disruption, material rating impacts could arise from changes to various factors, including but not limited to:

- Advance Premium Tax Credits, including extension of Advanced Premium Tax Credits as provisioned in the Inflation Reduction Act
- The resumption of Medicaid redeterminations due to the end of the continuous enrollment condition under the Consolidated Appropriations Act, 2023
- Constraints on age rating factors
- Open enrollment and grace periods
- Enrollment of other populations, such as Medicare, Medicaid, and high risk pools
- Taxes and fees, notably the suspension of the ACA Insurer Fee
- Emerging experience as it relates to impacts from the current COVID-19 pandemic potentially extending into the benefit year.
- Emerging experience as it relates to both claims and risk adjustment, notably the updated HCC coefficients in the 2025 model as laid out in the Final Rule for the 2025 Annual Notice of Benefit and Payment Parameters

¹<https://www.hhs.gov/sites/default/files/csr-payment-memo.pdf>

- Enrollment and emerging experience of members with an FPL under 150% as it relates to the special enrollment period granting year-round enrollment
- 1332 Reinsurance parameters; this filing includes an attachment point of \$60,000.

If there are material deviations in market level premiums from our projected statewide average premium (SWAP) assumption for 2025 - for example, based on changes in the number of carriers in the market or carriers' pricing assumptions for 2025 - we would like to work with the Pennsylvania Insurance Department after initial submissions to revise our filing to update our estimated risk adjustment transfer. Market disruption, resulting from changes or carriers' perceived changes in the risk adjustment program, could also necessitate working with the Department to update other critical pricing assumptions such as market morbidity and relative risk.

Additional uncertainty remains around the impact of the COVID-19 pandemic on claim costs and required premium rates in 2025.

This information is intended for the sole use by the Pennsylvania Insurance Department, the Center for Consumer Information and Insurance Oversight (CCIIO), and their subcontractors to assist in the review of the Pennsylvania Health & Wellness Inc. individual rate filing. However, we recognize that this certification may become a public document.

These results are actuarial projections. Actual results will vary from those projected in the filing for a number of reasons, including but not limited to changes in membership, claims experience, and random variation from selected assumptions.

Company Identifying Information:

- Company Legal Name: Pennsylvania Health & Wellness Inc.
- State: The State of Pennsylvania has regulatory authority over these policies
- HIOS Issuer ID: 86199
- Market: Individual
- Effective Date: January 1, 2025

Company Contact Information:

- Primary Contact Name: [REDACTED]
- Primary Contact Telephone Number: [REDACTED]
- Primary Contact Email Address: [REDACTED]

Description of Benefits: These products are issued by Pennsylvania Health & Wellness Inc. as HMO health policies. The major provisions of this form for each plan design and product can be found in Appendix 1.1.

Rate Guarantees:

Rates are guaranteed not to change through December 31, 2025.

Renewability:

Each policy is renewable by paying the applicable renewal premiums, unless the policyholder no longer meets the eligibility requirements of the policy or Pennsylvania Health & Wellness Inc. decides to discontinue that specific policy.

Applicability:

These rates will apply to both new and renewing business.

General Marketing Method:

This product will be sold through agents, direct mailings, the internet, and the Health Insurance Exchange.

Estimated Average Annual Premium:

The estimated average annual premium per policy in calendar year 2025 is \$6,578.

Distribution of Business:

See Appendix 1.2 for the expected age and geographic distributions for these products.

Rate Tables:

See Appendix 1.3 for allowable rating factors and Appendices 1.3b and 1.3c for clarification on service area definitions. Appendix 1.4 also includes an example of how rating factors will be applied. Note that for family coverage, rates for children are charged to no more than the three oldest covered children under age 21 consistent with the Family Structure rules of the Patient Protection and Affordable Care Act (ACA).

2. Proposed Rate Changes

The rate increases for each product offered in the single risk pool by Pennsylvania Health & Wellness Inc. in the state of Pennsylvania are reflected in Worksheet 2, Section I of the Part I URRT.

Reasons for Rate Increase(s):

The rate projections for 2025 have been updated from the previous year's projections to reflect the most recent assumptions and information available.

The following provides a narrative description of the significant factors driving the proposed rate increase for 2025.

- Single Risk Pool Experience and Morbidity (-7.70% of premium impact versus 2024 filed rates)

The individual single risk pool experience underlying the rate projections has been updated. The current model reflects the projected utilization trend applied to adjusted experience (from 2023 to 2025), including anticipated changes in the average morbidity of the single risk pool. There is a full description of utilization trend and other projection factors applied to experience in Section 6, "Trend Factors".

Risk adjustment transfer experience for 2025 includes consideration of changes to the statewide average premium, the Risk Adjustment program, and Pennsylvania Health & Wellness Inc. enrollee population morbidity relative to the Pennsylvania single risk pool.

- Unit Cost trend (9.50% of premium impact versus 2024 filed rates)

Unit costs and provider reimbursement agreements have been updated to reflect changes in the rating year.

- Utilization trend (1.60% of premium impact versus 2024 filed rates)

The projected utilization trends are consistent with observed historical trends based on internal analysis of our marketplace experience, supplemented by the Milliman Health Cost Guidelines. There is a description of the Health Cost Guidelines in Section 8, "Manual Rate Adjustments".

- Changes in Administrative Expenses and Profit (-0.80% of premium impact versus 2024 filed rates)

Changes in general administrative expenses incorporated into 2025 rates are resulting in a rate change due to differences from prior year expense assumptions. See Section 12, "Plan Adjusted Index Rate", for details on projected non-benefit expenses.

- Other

These components include capitation contracts, changes in the 1332 program, and interactions between prior steps.

Note that the requested rate change may not be the same across all plans within a product due to changes to the member cost sharing amounts by plan. Additionally, the defunding of CSR subsidies has contributed to the rate levels being higher than if the subsidies were to be funded.

3. Single Risk Pool

The Index Rate is based on the single risk pool defined by the state of Pennsylvania, which was established according to the requirements in 45 CFR Part 156.80. The single risk pool is defined as including all non-grandfathered individual business in Pennsylvania.

The single risk pool for the experience period does not include transitional products/plans. The single risk pool for the 2025 projection period does not include members who still remain enrolled in transitional plans.

4. Experience and Current Period Premium, Claims and Enrollment

The following information supports the best estimate of premium and claims for the single risk pool during the experience period, as reported in Worksheet 1, Section I of the URRT. The experience period for this rate filing is incurrual year 2023, and includes claims paid through 3/31/2024.

Allowed and Incurred Claims incurred During the Experience Period:

A breakout of the claims shown in Worksheet 1, Section I is provided in Appendix 4.1.

Allowed and incurred claims, as defined by the URR instructions, were determined from Pennsylvania Health & Wellness Inc.'s claim record system. Incurred but not paid amounts were estimated using a combination, as appropriate, of the loss development and Bornhuetter-Ferguson completion methodologies. There are no material differences in the methodology for estimating completed allowed versus completed incurred claims. The estimation for incurred but not paid amounts is based on the experience period claims reported. Actual claims run-out may reflect some variability from future expectations. There are no unusually high or low completion factors being applied to allowed or incurred claims resulting from internal shifts in administration practices.

Cost-sharing reduction (CSR) subsidies were unfunded for the entirety of the base period. For rating purposes, we assumed that CSR subsidies will continue to be unfunded throughout the projection period.

Experience Period Risk Adjustment and Reinsurance Adjustments PMPM:

The risk adjustment transfer and reinsurance receivables for the experience period are shown on Worksheet 1, Section I of the URRT. The final amounts for risk adjustment and any applicable reinsurance receivables were not known at the time of rate development. These amounts were estimated using data available through 3/31/2024.

Current Enrollment and Premium:

The current enrollment and premium values on Worksheet 2, Section II are reported as of 3/31/2024.

Earned premium in the experience period is not adjusted for taxes, assessments, risk adjustment receivables or payables or MLR rebates.

5. Benefit Categories

The benefit categories in Worksheet 1, Section II of the Part I URRT were populated using the Milliman Health Cost Guidelines (HCG) methodology. Due to the high detail of the HCG's benefit categories, the HCG categories were consolidated via a mapping to the URRT's benefit categories. See Appendix 5.1 for a description of this mapping.

The algorithm used to assign both the experience and manual utilization data and cost information is summarized as follows.

Inpatient Hospital

Inpatient hospital includes non-capitated facility services for medical, surgical, maternity, mental health and substance abuse, skilled nursing, and other services provided in an inpatient facility setting and billed by the facility.

Outpatient Hospital

Outpatient hospital includes non-capitated facility services for surgery, emergency room, lab, radiology, therapy, observation, and other services provided in an outpatient facility setting and billed by the facility

Professional

Professional includes non-capitated primary care, specialist, therapy, the professional component of laboratory and radiology, and other professional services other than hospital based professionals whose payments are included in facility fees.

Other Medical

Other medical includes non-capitated ambulance, home health care, DME, prosthetics, supplies, vision exams, dental services, and other services. The measurement units for utilization used in this category are a mix of visits, cases, procedures, etc.

Capitation

Capitation includes all services provided under one or more capitated arrangements.

Prescription Drug

Prescription drug includes drugs dispensed by a pharmacy and is net of rebates.

6. Trend Factors

This section describes and supports the factors used to project the 2023 experience period allowed claims to the 2025 projection period as shown in Worksheet 1, Section II of the URRT.

Trend Factors:

Trend Factors (cost/utilization): Experience period claims were trended 24 months to 2025. The annualized cost trend factors reflect the following:

- Changes in contractual reimbursement and discounts between the experience and projection periods for a fixed basket of services. This is for providers that were already part of the network in 2023, based on its actual 2023 contracts and ongoing provider and PBM contracting efforts for 2025, controlling for changes in service mix, the geographic distribution of its enrollees, and pharmacy rebates. This also includes the change in distribution of services among network providers other than changes driven by expanding the provider network.
- Average charge trend between the experience and projection periods normalized for demographics, morbidity, and benefit design based on the Milliman Health Cost Guidelines

Appendix 6.1 decomposes the cost trend factor into its constituent parts.

The annualized utilization trend factors reflect the following:

- Assumed changes in the mix or intensity of services provided for a fixed level of illness burden.
- Secular utilization trend, normalized for demographics, morbidity, and benefit design, informed by consideration of multiple sources, including typical industry trend assumptions, the Milliman Health Cost Guidelines, and analysis of observed historical trends for Ambetter products.

Appendix 6.2 decomposes the utilization trend factor into its constituent parts.

7. Adjustments to Trended EHB Allowed Claims PMPM

This section describes and supports the adjustments other than trend used to project the 2023 experience period Essential Health Benefit (EHB) allowed claims to the 2025 projection period as shown in Worksheet 1, Section II of the URRT. Each factor represents the change between the experience period and projection period. The factors, therefore, are not annualized values.

Morbidity Adjustments:

Claims were adjusted for estimated differences in morbidity between Pennsylvania Health & Wellness Inc.'s 2023 membership and its projected 2025 membership. Appendix 7.1 decomposes the morbidity projection factor into its components.

Utilization was adjusted for projected changes in single risk pool morbidity from 2023 to 2025 considering regulatory and market uncertainties, as well as projected morbidity changes for Pennsylvania Health & Wellness Inc.'s members relative to the single risk pool from 2023 to 2025.

Consistent with the 2025 URR instructions, these morbidity adjustments reflect the component of the change in average allowed claims PMPM, holding constant the experience period population's demographics (e.g. age, gender, and region), product mix, and all provider network contracts and time parameters.

The relative morbidity assumption used for projection claims reflects Pennsylvania Health & Wellness Inc.'s expectations regarding the morbidity of its 2025 membership relative to the single risk pool, and is consistent with the relative morbidity assumption used to estimate Pennsylvania Health & Wellness Inc.'s risk transfer payment or receivable.

An adjustment for differences in estimated direct costs associated with the COVID-19 pandemic between PHW's 2023 experience and the 2025 rating period. No explicit adjustments were made to the experience claims projections to reflect lasting changes in care delivery associated with increased use of telehealth services precipitated by the pandemic.

Morbidity was adjusted to account for changes in the market population due to the continuation of eAPTCS as well as the resumption of Medicaid Redeterminations.

Demographic Shift:

Experience period claims were adjusted for differences in the projected mix of 2025 membership by gender and age band using demographic factors. The factors underlying this trend represent the blending of two sets of factors: a manually developed set from the Milliman Health Cost Guidelines and a set developed from Pennsylvania Health & Wellness Inc.-specific experience. This approach was selected to mitigate shifts observed in our experience demographic factors relative to the manual Health Cost Guideline factors.

Plan Design Changes:

This adjustment factor reflects anticipated changes in the demand for services due to differences in product mix and cost-sharing requirements from the experience period to the projection period. Population demographics and morbidity were held constant across plan designs for this adjustment to avoid confounding with morbidity.

Other Adjustments:

Experience period claims were also adjusted for the following changes between the experience period and projection period:

- Changes in capitation contracts
- Changes in pharmacy rebates and dispensing fees between the experience and projection periods developed based on changes to PBM contracting from 2023 to 2025 and projected drug utilization
- The reimbursement impact of expanding the provider network from 2023 to 2025 (developed using estimates of the distribution of services and relative unit costs by provider). This only reflects the impact of new providers; the impact of changes in the distribution of services among existing network providers is reflected in unit cost trend.
- Adjustment for expected claims costs without corresponding premium revenue, due to ACA grace period provisions.

8. Manual Rate Adjustments

This filing is 100% experience rated. No credibility manual rate is being filed for 2025.

Where manual adjustments to claims are required to model changes in Pennsylvania Health & Wellness Inc.'s population and coverage over time, most notably utilization trend as discussed in section 2, these adjustments are based on the Milliman Managed Care Rating Model (MCRM) and the companion Milliman Health Cost Guidelines (HCGs), and consideration of relevant QHP experience in other states.

The HCGs provide a flexible but consistent basis for the determination of claim costs for a wide variety of health benefit plans. These rating structures are used to anticipate future claim levels, evaluate past experience, and establish interrelationships between different health coverage levels.

The Milliman HCGs are developed as a result of Milliman's continuing research on health care costs. They were first developed in 1954 and have been updated and expanded annually since then. These guidelines are continually monitored as they use them in measuring the experience or evaluating the rates of their clients and as they compare them to other data sources.

The HCGs are a cooperative effort of all Milliman health actuaries and represent a combination of their experience, research, and judgment. An extensive amount of data is used in developing these guidelines including published and unpublished data. In most instances, cost assumptions are based on their evaluation of several data sources and, therefore, are not specifically attributable to a single source. Since these guidelines are a proprietary document of Milliman, they are only available for release to specific clients that lease these guidelines and to Milliman consulting health actuaries.

9. Credibility of Experience

This filing is 100% experience rated, based on the assumption that a state with experience exceeding 125,000 member months should receive full credibility. No credibility manual rate is being filed for 2025.

Here, “member months” are defined as the aggregate 2023 member months across Pennsylvania Health & Wellness Inc. calendar year 2023 individual block of business that are suitable for pricing.

- Total 2023 Member Months: 172,810
- Credibility Level Assigned to Base Period Experience: 100%

Note that credibility is calculated based on 2023 experience data that are suitable for pricing and may not exactly match the total 2023 member months shown above.

Actuarial Standard of Practice #25 “Credibility Procedures” was considered when determining the credibility level.

10. Establishing the Index Rate

The Index Rate for the Experience Period (calendar year 2023) is a measurement of the average allowed claims PMPM for EHB benefits. This value is located on Worksheet 1, Section I of the URRT. The Index Rate for the Experience Period reflects the actual mixture of smoker/non-smoker population, area factors, plan enrollment, and the actual mixture of risk morbidity in the single risk pool during the experience period. The Index Rate for the experience period has not been adjusted for payments and charges under the risk adjustment and reinsurance programs or for Exchange user fees. We have adjusted the Index Rate for the Experience Period to remove any non-EHBs. The claim system does not currently distinguish between EHB and non-EHB claims, so this adjustment was made based on the expected percentage of non-EHB claims for the experience period. The experience period did not contain non-single risk pool claims, so no adjustment was made for this.

The Index Rate for the Projection Period (calendar year 2025) is reflected in Worksheet 1, Section II of the URRT. It was developed following the specifications of 45 CFR part 156.80(d) (1). The Index Rate for the Projection Period represents the estimated total combined projected allowed claims PMPM for Essential Health Benefits (EHB) for calendar year 2025 only and has not been adjusted for payments and charges under the risk adjustment program or for Exchange user fees. The index rate differs from the total allowed claims in that the total allowed claims include benefits in excess of EHBs (adult vision and adult dental). The Index Rate for the Projection Period was calculated based on the methodology discussed in Section 6, “Trend Factors” and Section 7, “Adjustments to Trended EHB Allowed Claims PMPM”, above and does not include benefits in excess of the EHBs. The Index Rate for the Projection Period will remain unchanged until a renewal filing effective January 1, 2026.

The development of the Index Rate for the Projection Period is shown in Worksheet 1, Section II. This reflects:

- The 12-month projection period shown in Worksheet 1, Section II
- The anticipated claim level of the projection period with respect to trend, benefits, and demographics
- The experience of all policies expected to be in the single risk pool (with necessary adjustments)

Appendix 10.1 demonstrates the calculation of the Projected Index Rate by blending the Experience Period Index Rate with the Credibility Manual Index Rate, as applicable. The next two sections further describe the steps taken to develop the Market Adjusted Index Rate and Plan Adjusted Index Rate.

11. Development of the Market-Wide Adjusted Index Rate

The Index Rate for the projection period is adjusted to arrive at the Market Adjusted Index Rate (MAIR) based on the following, as outlined in 45 CFR 156.80(d):

- Adjustment for the Risk Adjustment Program
- Exchange user fee adjustment

The risk adjustment payment/charge is described below. Since the Index Rate is on an allowed claims basis, the market-level adjustments are also performed on an allowed basis.

The net Exchange user fee adjustment applied to premium rates is 2.98% of premium. Per the 2025 final benefit and payment parameters, the Exchange user fee is 2.98% of premium for members purchasing coverage via the Exchange. Similar to the Index Rate, the MAIR reflects the average demographics of the single risk pool. In other words, the MAIR is not calibrated. In Appendix 11.1, the user fee is shown on an allowed basis as a multiplicative factor of 1.038. For further detail on the development of the MAIR, please refer to Appendix 11.1.

Reinsurance:

No federal reinsurance recoveries are expected in the projection period. The reinsurance that was entered in the field for projected reinsurance on URRT Worksheet 1, Section II reflects a reduction in the index rate due to the Section 1332 State Relief and Empowerment Waiver. On Appendix 11.1, the reinsurance adjustment is shown on an allowed basis as a multiplicative factor, and this factor is 0.946.

Risk Adjustment Payment/Charge:

The Projected Risk Adjustment PMPM is shown on Worksheet I, Section II. The amount excludes the 2025 Risk Adjustment User Fee of \$0.18 PMPM (0.03% of premium). The amount includes the projected reinsurance impact from the high risk pool assessment under the risk adjustment program. The gross impact in 2025 was estimated by trending experience and applying the provisions of the reinsurance contract to known high risk exposures. This amount was subtracted from a 0.28% of premium charge to fund the pool. This net impact was combined with the projected risk adjustment transfer amount to calculate a final risk adjustment liability for 2025. Appendix 11.1 shows how the anticipated risk adjustment transfer is applied to the Index Rate in the development of the Market Adjusted Index Rate.

The Risk Transfer calculations are based on the risk adjustment transfer formula, as provided in the Federal Register Volume 78 Number 47, and displayed below:

$$T_i = \left[\frac{(PLRS_i \times IDF_i \times GCF_i)}{\sum_i (s_i \times PLRS_i \times IDF_i \times GCF_i)} - \frac{(AV_i \times ARF_i \times IDF_i \times GCF_i)}{\sum_i (s_i \times AV_i \times ARF_i \times IDF_i \times GCF_i)} \right] \times \bar{P}_s$$

Where:

\bar{P}_s = statewide average premium \times 0.86 (to reflect the admin reduction adjustment);

$PLRS_i$ = plan i 's plan liability risk score;

AV_i = plan i 's metal level AV;

ARF_i = plan i 's allowable rating factor;

IDF_i = plan i 's induced demand factor;

GCF_i = plan i 's geographic cost factor;

S_i = plan i 's share of state enrollment as measured in member months.

The denominator is summed across all plans in the risk pool in the market in the state.

We project the portfolio average for each factor in the risk adjustment transfer formula using a combination of (i) actual historical risk adjustment factors adjusted to the projected population and (ii) adjustments for market and risk adjustment program changes. The resulting aggregate payment or receivable is then proportionally allocated to all plans in the portfolio.

For the purposes of stable modeling, each factor was approximated as follows:

\bar{P}_s : The state average premium was assumed to be approximately [REDACTED] PMPM (net of the 14% administrative cost carve out).

PLRS: The statewide average risk score is projected based on the average PLRS of the single risk pool in 2023. For historical risk transfer data, we rely on a combination of the latest available HHS Summary Report on Permanent Risk Adjustment Transfers and when available, Wakely's National Risk Adjustment Reporting Project (WNRAR) for the state of Pennsylvania.

Pennsylvania Health & Wellness Inc.'s projected average risk score differs from the projected single risk pool average risk score due to differences in demographics, plan mix, and morbidity between the two populations.

Based on the Final Rule for the 2025 Annual Notice of Benefit and Payment Parameters, HHS's proposed 2023 and 2025 HCC model and coefficient changes for 2025 (including partial year adjustment factors, prescription drug condition categories, and model recalibration) were considered in the development of the projected risk adjustment transfer. The demographic, plan mix, and morbidity assumptions were used to project claims costs.

IDF: The statewide average IDF is projected based on the average IDF of the single risk pool in 2025. For historical risk transfer data, we rely on a combination of the latest available HHS Summary Report on Permanent Risk Adjustment Transfers and when available, Wakely's National Risk Adjustment Reporting Project (WNRAR) for the state of Pennsylvania.

The average IDF for Pennsylvania Health & Wellness Inc. is projected by applying the induced demand factors from the market reform rule published in the March 11, 2013 Federal Register, page 15433, Table 11 to Pennsylvania Health & Wellness Inc.'s projected population. The formula recognizes the following IDF factors by metallic tier: Bronze 1.00, Silver, 1.03, Gold 1.08, and Platinum 1.15.

AV: The statewide average actuarial value (AV) is projected based on the average metal level AV of the single risk pool in 2023. For historical risk transfer data, we rely on a combination of the latest available HHS Summary Report on Permanent Risk Adjustment Transfers and when available, Wakely's National Risk Adjustment Reporting Project (WNRAR) for the state of Pennsylvania. The average AV for Pennsylvania Health & Wellness Inc. is calculated by applying the metal level AV factors from the market reform rule published in the March 11, 2013 Federal Register, page 15433, Table 9 to Pennsylvania Health & Wellness Inc.'s projected population. The formula recognizes the following AV values by metallic tier: Bronze 0.60, Silver 0.70, Gold 0.80, and Platinum 0.90.

ARF: As stated in the March 11, 2013 Federal Register, page 15433, the allowable rating factor (ARF) adjustment accounts only for age rating.

The statewide average ARF was set equal to the average ARF of the single risk pool in 2023. For historical risk transfer data, we rely on a combination of the latest available HHS Summary Report

on Permanent Risk Adjustment Transfers and when available, Wakely's National Risk Adjustment Reporting Project (WNRAR) for the state of Pennsylvania.

The average ARF for Pennsylvania Health & Wellness Inc. is projected by applying the proposed 2025 HHS age rating factors to Pennsylvania Health & Wellness Inc.'s projected population. An equal distribution across ages within each age band was assumed.

GCF: The average Geographic Cost Factors for Pennsylvania Health & Wellness Inc.'s membership is projected based on the 2022 GCFs, as reported by HHS, adjusted for projected changes caused by carrier rate actions from 2022 to 2025.

Outliers were reflected in our calculations to the extent that outliers are reflected in historical risk scores used as the starting point of the 2025 risk transfer projection and via the calculation of the net High Risk Pool receivable or payment. Otherwise, there were no "potential outlier assumptions" that would have an impact on transfers.

The projected transfer amount assumes no impact under the Risk Adjustment Data Validation (RADV) process.

The risk adjustment transfer amounts shown on Worksheet 1 of the URRT are the actual PMPM amounts expected in the projection period. The risk adjustment transfer amount applied to the Index Rate in the development of the Market Adjusted Index Rate is on an allowed claims basis, as the Index Rate is on an allowed claims basis.

The demographic, plan mix, and morbidity assumptions supporting the risk transfer projection are consistent with the demographic, plan mix, and the morbidity assumptions used to project claims costs.

Exchange User Fees:

Exchange user fees have been applied as an adjustment to the Index Rate at the market level. In Appendix 11.1, the user fee is shown on an allowed basis as a multiplicative factor. Note, we assumed 99.29% of members would enroll through the Exchange and 0.71% would enroll outside of the Exchange.

12. Plan Adjusted Index Rate

The Plan Adjusted Index Rate (PAIR) is included in Worksheet 2, Section III of the URRT. The PAIR is the MAIR adjusted for only the following allowable adjustments, where applicable, as outlined in 45 CFR 156.80(d):

- Actuarial value and cost-sharing design of the plan.
 - The CMS Actuarial Value Calculator was used to determine the AV metal value for plan provisions that fit within the calculator parameters. The AVs for all plans were developed using appropriate adjustments as described in section 16 of this actuarial memorandum.
 - The actuarial value and cost-sharing pricing adjustment was developed using a claims simulation methodology with a large dataset of individual exchange data, calibrated to the expected population.
 - * Under a claims simulation approach to modeling plan relativities, member-level claims are re-adjudicated using the cost sharing parameters of each plan design, thereby calculating plan versus patient liability.
 - * Using the same dataset for plan rating factors ensures that a static demographic and risk profile informs the rating factor of each plan so that allowed relativities by plan solely reflect benefit design differences.
 - * Rate increases can vary by plan under this methodology without reflecting morbidity differences. For example, rate increases naturally vary by plan over time as the relationship changes between cost sharing levels and the allowed costs to which they are applied (i.e., leveraging).
 - The actuarial and cost-sharing pricing adjustment reflects full plan liability for CSR subsidies. CSR costs are reflected as a uniform percentage load applied to each silver ACA-compliant plan.
- The plan’s provider network, delivery system characteristics, and utilization management adjustment practices
 - Not applicable. All plans have the same provider network.
- Benefits provided under the plan that are in addition to the EHBs.
 - These benefits include adult vision and adult dental.
- Administrative costs, excluding the Exchange user fees (which are already accounted for in the Market Adjusted Index Rate).
 - The administrative costs are discussed further in the subsequent paragraphs of this section

There are no catastrophic plans being offered, so there is no eligibility adjustment made for catastrophic plan enrollment.

Administrative costs and non-EHB benefits common to all plans are added to the Market Adjusted Index Rate. Then, factors for actuarial value and cost-sharing and non-EHBs by plan are applied to reach the Plan Adjusted Index Rate for each plan.

The development and values of the Plan Adjusted Index Rates are shown in Appendix 12.1 and are not calibrated.

On Worksheet 2, Section II, the Plan Adjusted Index Rate of the Experience Period is reported.

Administrative Expense Load: The administrative expense allowance is based on the projected enrollment and is estimated to appropriately cover expenses for overhead, operations, sales, and marketing expenses.

There is an additional amount to cover approved quality improvement expenses and provider incentive payments. This amount is still included in the numerator (and excluded from the denominator) of the federal MLR calculation, but is described in Appendix 12.2 due to sharing similar attributes with other administrative expenses.

The administrative expenses are allocated proportionally by plan on a constant percentage of premium basis.

Profit (or Contribution to Surplus) & Risk Margin: This load was applied proportionally to all products and plans and can be found in Appendix 12.2.

Taxes and Fees: The taxes and fees which may be subtracted from premiums for purposes of calculating the MLR are listed in Appendix 12.2. The Risk Adjustment User Fee has been included as part of this adjustment. See Section 11, “Development of the Market-Wide Adjusted Index Rate”, for a discussion on how the Exchange user fee was calculated and applied to the Market Adjusted Index Rate.

13. Calibration

The Plan Adjusted Index Rate is calibrated for plans within the single risk pool to correspond to an age rating factor of 1.0, a geographic rating factor of 1.0, and a tobacco use rating factor of 1.0. The intent of the calibration factors is to reset the Plan Adjusted Index Rate so that applying the age factor, geographic rating area factor, and tobacco use factor will result in the appropriate consumer adjusted premium rate. The calibration factors for each of the age, geographic, and tobacco use factors are shown in Appendix 13.1. Note that each of the calibration factors has one value that is applied uniformly and does not vary by plan.

Age Curve Calibration: The age curve calibration factor is applied in Appendix 13.1. The age curve calibration factor is calculated by weighting the prescribed age rating factors with the single risk pool membership distribution. This age curve calibration calculation is based on page 9 of the 2025 Unified Rate Review Instructions. Appendix 13.2 demonstrates the factors and member months used in the calculation of the average age rating factor. The age factor for each age band is the simple average of the factors in that band. The rounded weighted average age corresponding to this age calibration factor is 49 years.

Appendix 13.1 of the Actuarial Memorandum demonstrates the calibration of the Plan Adjusted Index Rate for age. The distribution of members by age is in Appendix 1.2 and the corresponding age factors are included in Appendix 1.3.

Geographic Factor Calibration: The geographic rating factors are displayed in Appendix 1.3. Appendix 13.3 demonstrates the factors and member months used in the calculation of the average geographic rating factor. In order to determine the calibration factor for geography, the projected distribution of members by area was determined. Next, the weighted average of the area factors was calculated utilizing this distribution.

The 2025 geographic factors were developed to reflect provider reimbursement and practice pattern differences by area. The reimbursement reflected in the geographic factors is based on provider contracts by rating area. The practice patterns reflected in the geographic factors are based on Health Cost Guidelines research. Projected risk pool morbidity and age/gender factors were set at statewide levels during 2025 geographic factor development. The area factors used are reflective of differences in delivery costs (including unit cost and provider practice pattern differences) only and do not reflect differences in population morbidity.

Tobacco Use Rating Factor Calibration: The tobacco use calibration factor is applied in Appendix 13.1. The tobacco use calibration factor removes the portion of the cost expected to be recouped through the tobacco surcharge. This factor is calculated by weighting the tobacco factors with the single risk pool membership distribution of tobacco and non-tobacco users. The tobacco factors are included in Appendix 1.3. Appendix 13.4 demonstrates the factors and member months used in the calculation of the average tobacco rating factor.

Calibration adjustments are applied uniformly to all plans: The calibration adjustment does not vary by plan and this is demonstrated in Appendix 13.1. Member-level adjustments as described in 45 CFR 147.102 are applied uniformly to all plans in the single risk pool, and these adjustments do not vary by plan.

In Appendix 13.1, the Plan Adjusted Index Rate is calibrated for age, tobacco, and geography to determine the Calibrated Plan Adjusted Index Rate. The Calibrated Plan Adjusted Index Rate can then be converted to the Base Rate by dividing by the average plan factor. Multiplying the Base Rate by the plan, age, tobacco, and area factors produces the Consumer Adjusted Premium Rate. The distribution of members by rating area is included in Appendix 1.2. Furthermore, Appendix 1.4 provides a sample calculation of premium rates.

14. Consumer Adjusted Premium Rate Development

Each Plan Adjusted Index Rate is divided by the overall calibration factor to determine the Calibrated Plan Adjusted Index Rate.

The following allowable rating factors, as specified by 45 CFR Part 147.102, are applied to the Calibrated Plan Adjusted Index Rate to determine the rate that is charged to the health insurance subscriber:

- Rating Area
 - The area factors are listed in Appendix 1.3. The methodology for developing geographic factors is included in Section 13, "Calibration".
- Age
 - The prescribed standard age factors were used.
- Tobacco Status
 - The tobacco factor for 2025 is set to 1.15 for all ages 21+. In lieu of credible data, the factor was selected from a reasonable range of cost impacts based on tobacco cost literature. Specifically, the report 'The Business Case for Coverage of Tobacco Cessation, 2012 Update' by Leif Associates, Inc. was considered which suggests that healthcare costs for smokers are greater than those of nonsmokers and may be as much as 34% higher than costs for non-smokers.
- For family coverage, rates for children are charged to no more than the three oldest covered children under age 21.

Appendix 1.3 lists the allowable rating factors and Appendix 1.4 contains an example walking through the calculation of a theoretical family's rates.

15. Projected Loss Ratio

The projected medical loss ratio (MLR) for Pennsylvania Health & Wellness Inc. in 2025 in Pennsylvania is 84.10%, which satisfies the state of Pennsylvania's minimum MLR requirement of 80%. This projected MLR is calculated according to 45 CFR 158. The projected MLR is the projected 2025 calendar year single risk pool experience rather than the three-year period used for determining rebates. No credibility adjustment based on projected enrollment and average deductible was estimated. See Appendix 15.1 for the detail underlying the calculation.

16. AV Metal Values

The AV Metal Values included in Worksheet 2 of the Part I URRT were calculated using the Final 2025 Federal AV Calculator for the plan provisions that fit within the calculator parameters and making appropriate adjustments to the AV identified by the calculator for plan design features that are not compatible with the parameters of the AV Calculator.

This filing includes plans with two generic drug tiers (preferred generic and non-preferred generic), but the AV Calculator only has one input for generic drug cost share. The member cost share, usually a copay, for preferred generics is less than or equal to the member cost share for non-preferred generics. Plans are administered such that the member pays the lesser of the stated copay or the actual cost of the drug, and the preferred generic tier generally consists of drugs with an actual cost less than or equal to the stated copay. Therefore, the non-preferred generic cost sharing has been used as the generic drug input to the AV Calculator.

17. Membership Projections

Pennsylvania Health & Wellness Inc. developed its membership projections based on 2024 QHP open enrollment data, adjusting for expected enrollment changes through 2025. The expected enrollment changes are based on historical shifts in membership combined with market-specific adjustments.

Silver plan membership projections are broken out separately for each cost-sharing reduction subsidy variant. This was performed in a similar manner to the aggregate membership projections.

The details of the projected membership by subsidy level are shown in Appendix 17.1.

18. Terminated Plans and Products

A list of the plans being terminated and the plans to which these are being mapped is included in the appendices as Appendix 18.1.

19. Plan Type

The plan types listed in Worksheet 2, Section I of the Part I URRT describe Pennsylvania Health & Wellness Inc.'s plans exactly.

20. Effective Rate Review Information

See Appendix 20.1 for documents summarizing the capital and surplus position of PHW.

The following Pennsylvania state-specific requirements have been included elsewhere in this filing package:

- 2025_PHW_State_Actuarial_Memo_20240820.pdf
- 2025_PHW_State_Actuarial_Memo_20240820.pdf

- 2025_PHW_Completeness_and_Redaction_Checklist_20240820.xlsm
- 2025_PHW_Pennsylvania_Counties_Map_20240820.ppt
- 2025_PHW_State_Required_Cover_Letter_20240820.docx
- 2025_PHW_Inc_Redaction_Justification_20240820.pdf
- 2025_PHW_Rate_Change_Request_Summary_20240820.docx
- 2025_PHW_Inc_Public_Rate_Filing_PDF_20240820.pdf

21. Reliance

See Appendix 21.1 for a detailed listing of items received and relied upon for rate development.

22. Actuarial Certification

I, [REDACTED], am a member of the American Academy of Actuaries in good standing and meet its qualification standards for actuaries issuing statements of actuarial opinion in the United States promulgated by the American Academy of Actuaries, and have the education and experience necessary to perform the work. I certify the rates were developed in accordance with the appropriate Actuarial Standards of Practice (ASOPs) and the profession's Code of Professional Conduct. While other ASOPs apply, particular emphasis was placed on the following:

- ASOP No. 5, Incurred Health and Disability Claims
- ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health Benefits
- ASOP No. 12, Risk Classification
- ASOP No. 23, Data Quality
- ASOP No. 25, Credibility Procedures
- ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
- ASOP No. 41, Actuarial Communications
- ASOP No. 42, Health and Disability Actuarial Assets and Liabilities Other Than Liabilities for Incurred Claims
- ASOP No. 45, The Use of Health Status Based Risk Adjustment Methodologies
- ASOP No. 50, Determining minimum value and Actuarial Value under the Affordable Care Act
- ASOP No. 56, Modeling

I certify that to the best of my knowledge and judgement:

1. The Index Rate for the Projection Period is:
 - (a) In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102);
 - (b) Developed in compliance with the applicable Actuarial Standards of Practice;
 - (c) Reasonable in relation to the benefits provided and the population anticipated to be covered;
 - (d) Neither excessive nor deficient based on my best estimate of the 2025 individual market
2. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.
3. The geographic rating factors reflect only difference in the cost of delivery and do not include differences for population morbidity by geographic area.

4. The CMS Actuarial Value Calculator, with appropriate adjustments, was used to determine the AV Metal Values shown in Worksheet 2, Section I of the URRT for all plans. This rate filing was prepared in compliance with all applicable state and federal statutes and regulations.

Regarding Pennsylvania state certification requirements, I certify that to the best of my knowledge and judgment:

5. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
6. No new plans are modifications of existing plans as described in the uniform modification standards in 45 C.F.R. § 147.106.
7. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2025 Rate Filing Justification.

The URRT does not demonstrate the process used to develop proposed premium rates. It is representative of information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

The 2025 plan year premium rates in this actuarial memorandum are contingent upon the status of the ACA statutes and regulations including any regulatory guidance, court decisions, or otherwise. Changes have the potential to greatly impact the 2025 plan year premium rates provided in this Actuarial Memorandum and the alignment of these premium rates with incurred costs. Changes include, but are not limited to, any legislative or regulatory amendment, court decision, or a decision by Congress, the Health and Human Services Secretary or the Centers for Medicare and Medicaid Services director to adjust funding of CSR subsidies or advance premium tax credits. In the event that a material provision is impacted, a revision to the rates will be needed.

The information provided in this actuarial memorandum is in support of the items illustrated in the URRT and does not provide an actuarial opinion regarding the process used to develop proposed premium rates. It does certify that rates were developed in accordance with applicable regulations, as noted.

Differences between the projections and actual amounts depend on the extent to which future experience conforms to the assumptions made for this analysis. It is certain that actual experience will not conform exactly to the assumptions used in this analysis. Actual amounts will differ from projected amounts to the extent that actual experience deviates from expected experience. Furthermore, due to the substantial uncertainty regarding the past and future impacts of the COVID-19 pandemic, we believe some of the assumptions related to the pandemic's financial impacts may exhibit a greater degree of divergence from expectations than would typically be expected in a more stable economic and healthcare environment.

Rating Example

Family Rating Example

Plan Design:	Choice Bronze HSA - Standard Bronze On Exchange Plan
Product:	86199PA001
HIOS ID:	86199PA0010022

Member	Age	Smoking Status	Rating Area	(a)	(b)	(c)	(d) = ((a) + (b)) x (c)	(e)	(f)	(g)	(h) = (d) x (e) x (f) x (g)
				Base	Prod. Adj.	Plan Rate Factor	(Base + Prod. Adj.) * Plan Factor	Age Factor	Tobacco	Area	Final Premium
Subscriber	40	Non-Smoker	Rating Area 1	\$345.93	\$0.00	0.7129	\$246.61	1.278	1.000	1.0041	\$316.46
Spouse	38	Non-Smoker	Rating Area 1	\$345.93	\$0.00	0.7129	\$246.61	1.246	1.000	1.0041	\$308.54
Child 1	18	Non-Smoker	Rating Area 1	\$345.93	\$0.00	0.7129	\$246.61	0.913	1.000	1.0041	\$226.08
Child 2	16	Non-Smoker	Rating Area 1	\$345.93	\$0.00	0.7129	\$246.61	0.859	1.000	1.0041	\$212.71
Child 3	14	Non-Smoker	Rating Area 1	\$345.93	\$0.00	0.7129	\$246.61	0.765	1.000	1.0041	\$189.43
Child 4	11	Non-Smoker	Rating Area 1	\$345.93	\$0.00	0.7129	\$246.61	0.000	1.000	1.0041	\$0.00
Total											\$1,253.22

Steps to Calculate Final Premium:

- (1) Look up the plan's Base Rate factor (a) and Product Adjustment factor (b). Add together.
- (2) Look up the Plan Rate factor based on the plan design (c).
- (3) Multiply the sum of (a) and (b) by the Plan Rate factor as shown in column (d).
- (4) Look up the age factors for each member based on age (e).

Note that premiums can only be charged for the oldest 3 children under age 21, so the age factor for all subsequent children will be 0.

- (5) Look up the tobacco factor for each member according to smoking status and age (f).
- (6) Look up the area factor based on the rating area (g).
- (7) Multiply column (d) by the age, tobacco and area factors for each member individually.
- (8) Sum the results from (7) for the final premium for the family.

Appendix 4.1

Outpatient Hospital	1.008	1.021	1.007	1.035	1.020
Professional	1.008	1.021	1.008	1.033	1.020
Other Medical	1.008	1.020	1.002	1.035	1.025
Capitation ⁽³⁾	1.000	n/a	n/a	n/a	n/a

Annualized PMPM Trend⁽⁴⁾

Benefit Category	2024 URRT Worksheet 1 - Individual Market ⁽¹⁾			
	2025 URRT Annual PMPM Trend Factor	Median	20th Percentile	80th Percentile
Prescription Drug	1.054	1.028	1.011	1.049

- (1) Reflects annualized Utilization trends from Worksheet 1, Section II from 2024 URRTs. Based on public use files released by CCIIO, filtered on all 2024 Individual Market URRTs with non-zero credibility and non-zero trend factors. Note, PMPM trends are provided for prescription drugs, see footnote (4).
- (2) The Ambetter nationwide trend study analyzed changes over time in normalized medical allowed claims PMPM for Ambetter individual marketplace products offered across the United States. In order to isolate secular forces of utilization trend, the study first normalized claims costs for differences in population characteristics (age/sex, morbidity), benefit design (induced demand), renewal status, and network characteristics (e.g. unit cost and provider practice patterns) by area and over time.
- (3) Pennsylvania Health & Wellness Inc. capitation costs are based on actual and expected contracts in 2025, and do not require any trend adjustment.
- (4) Due to differences in how sources allocate intensity/mix change between utilization and unit cost trend, prescription drug trends are best compared at the PMPM level, instead of separately for utilization and unit cost.

Projected MLR Table

a)	Incurred Claims, Quality Initiatives, Provider Incentives	\$358.41
b)	Quality Improvement Expense & Provider Incentive Payments	\$5.00
c)	Risk Adjustment Transfer	\$80.25
d)	Projected Claims for MLR (a+b+c)	\$443.66
e)	Administrative Expenses	\$72.65
f)	Post-Tax Profit and Contribution to Surplus	\$10.96
g)	Taxes and Fees	\$16.78
h)	Federal Income Tax	\$3.18
i)	State Income Tax	\$1.02
j)	Premium (d+e+f+g+h+i)	\$548.26
k)	Medical Loss Ratio (d/(j-g-h-i))	84.1%
l)	URRT Worksheet 2 Loss Ratio Calculation	76.6%

This projected MLR is calculated according to 45 CFR 158. The projected MLR is the projected 2025 calendar year single risk pool experience rather than the three-year period used for determining rebates. No credibility adjustment based on projected enrollment and average deductible was estimated.

E. Standard Questions

1. Membership:

- a. If the projected membership for plan year 2025 significantly differs from the current 2/1/2024 membership, please explain why.

RESPONSE:

We expect moderate growth in plan year 2025 vs current 2024 enrollment. The main drivers are PHW's service area expansion and expected market size growth.

2. Experience Period Claims:

- a. Please confirm that all claims which are capitated have been removed from the experience period claims.

RESPONSE:

Capitated expenses have been withheld from our base period experience, both in applicable reporting exhibits and within the development of our projected claims expenses. On a prospective rating year basis, capitated expenses are included in addition to our projected fee-for-service claims.

- b. Please confirm that all non-EHB claims have been removed from the experience period claims.

RESPONSE:

Similar to capitated expenses, non-EHB expenses are not included within our base period experience, both in applicable reporting exhibits and within the development of our projected claims expenses.

- c. How are drug rebates projected to change from the base period to the rating period? How has this change been reflected in the rate development?

RESPONSE:

Rebates are projected to decrease slightly in the projection period relative to the experience period (from \$27.30 PMPM to \$25.40 PMPM). This is primarily driven by estimated change in negotiated rebates and expected drug mix. Within our filing documentation, most notably the URRT Worksheet 1, Section 2, changes in pharmacy rebates and dispensing fees are captured within the "Other" trend adjustment.

3. COVID:

- a. Please confirm that Tables 2-4 of the PAAM Exhibits do not have any COVID adjustment. Additionally, please confirm that any COVID adjustment factor in the filing is reflected in Table 5 of the PAAM Exhibits.

RESPONSE:

Data and values provided in Tables 2-4 have not been adjusted for COVID and are consistent with the raw data. Table 5 does include an adjustment for changes in expected COVID expenses between the experience and rating years, within the morbidity trend adjustment.

- b. If there is a COVID adjustment factor other than 1.0, please provide a quantitative exhibit supporting the factor.

RESPONSE:

PHW applied a COVID adjustment factor to reflect anticipated ingredient costs for COVID vaccines and treatment, as the government will no longer be subsidizing the ingredient cost as they had in the experience period. This adjustment is applied to the Prescription Drug service category within the Morbidity Adjustment, as seen in [Appendix 20.4].

Please refer to [Standard Question Support - Question 3] for the quantitative breakdown of this factor.

- c. Please provide commentary on how the Company believes services such as COVID vaccinations and COVID testing will be handled in PY25. Within your response, please clarify if these services will be considered preventative and covered at 100%.

RESPONSE:

For COVID vaccinations, we have assumed responsibility for ingredient costs and expect to cover them at no cost to the member. As it relates to COVID testing, Physician/PCR tests will be covered under the standard laboratory cost share, while OTC home testing kits will not be covered.

4. Trend:

- a. [SG. Only] If the Total Annual Trend in Table 3 (weighted by credibility) and the Annual Trend used to calculate quarterly rates in Table 5A differ, please provide an explanation and exhibit in support of the variation.

N/A

- b. [SG. Only] In Table 5A, if cells K32:M32 are left to equal J32, please explain why that is a reasonable assumption.

N/A

5. Table 6 – Retention:

- a. Please confirm that the federal income tax is calculated using a Federal Income Tax Rate of 21%. If other adjustments were made in Table 6, cell C57, please provide a demonstration of how this number was calculated and an explanation of the other adjustments included in the calculation.

RESPONSE:

We confirm we are using a Federal Income Tax Rate of 21%, reflected as such in Table 6.

- b. Please confirm that the Risk Adjustment User Fee PMPM is consistent with HHS Final Notice of Benefit and Payment Parameters for plan year 2025.

RESPONSE:

We confirm we are using the Risk Adjustment User Fee PMPM as identified in the plan year 2025 NBPP.

- c. Please provide an exhibit showing the commission PMPM amount to be paid to brokers in the following situations: Open-Enrollment Enrollee – Renewing, Open Enrollment Enrollee – New, Special Enrollment Period Enrollee – New, Special Enrollment Enrollee – Renewing. If the commission PMPM is not consistent between the four options above, please provide a detailed explanation as to the reason for the difference.

RESPONSE:

PHW does not pay different commissions based on the above four scenarios. See the below table for on-exchange and off-exchange commissions.

Exchange Status	Commission PMPM

6. Pricing AVs:

- a. Please confirm that the Pricing AVs were calculated using a single risk pool (i.e., claims/utilization experience is not separated by metal level).

RESPONSE:

We confirm that our Pricing AVs were calculated using a single risk pool. Our Pricing AV development uses a claims simulation methodology, with the same dataset used in the simulation for all plan designs regardless of metal level.

- b. Please identify and support any differences between the company’s metallic AV calculator results and the corresponding Pricing AVs.

RESPONSE:

Please refer to Table 10 of the PAAM for the metallic AV calculator results and Pricing AVs for each plan.

The Federal AV calculator is a tool designed to determine levels of coverage (metallic tiers). The AV calculator methodology published by CMS specifically states that “the AV Calculator is intended to establish a comparison tool and was not developed for pricing purposes”. It is expected that AV pricing values will not track with metallic AVs, due to differences in modeling methodology and underlying data. Our pricing AVs were developed using a claims simulation model calibrated to the expected PA population, as discussed in section 12 of the actuarial memorandum, which is a more accurate reflection of expected claims costs than the general dataset underlying the Federal AV calculator. We have sensitivity tested our internal modeling and found that differences in benefit design do not impact our modeled AVs in the same manner as the Federal AV calculator results.

7. Expanded Bronze Plans:

- a. Please provide an exhibit which demonstrates that the criteria for expanded bronze plans have been met.

RESPONSE:

The criteria for expanded bronze are that the plan must either be a qualified HDHP OR cover at least one major service with reasonable cost sharing before the deductible. The list of major services is primary care visits, specialist visits, inpatient hospital services, generic drugs, specialty drugs, preferred brand drugs, or emergency room services; and based on discussions with PID in previous years “reasonable cost sharing” is defined as no greater than 50% member coinsurance or equivalent copay. Please refer to the table below

for an exhibit showing all expanded bronze plans included in this filing along with a description of how each plan meets the expanded bronze criteria.

Plan Design	Plan ID	Expanded Bronze Criteria Met
Ambetter Choice Bronze HSA	86199PA0010022	Plan is a qualified HDHP
Ambetter Elite Bronze	86199PA0010031	PCP visit - copay \$50 not subject to deductible
Ambetter Everyday Bronze	86199PA0010028	PCP visit - copay \$40 not subject to deductible
Ambetter Choice Bronze HSA + Vision + Adult Dental	86199PA0020022	Plan is a qualified HDHP
Ambetter Elite Bronze + Vision + Adult Dental	86199PA0020031	PCP visit - copay \$50 not subject to deductible
Ambetter Everyday Bronze + Vision + Adult Dental	86199PA0020028	PCP visit - copay \$40 not subject to deductible

8. PAAM Exhibits – Consumer Factors:

- a. Please provide quantitative and qualitative support for the proposed geographic rating area factors, if different from the previous year.

RESPONSE:

Please refer to [Standard Question Support - Question 8] for quantitative and qualitative support for the proposed geographic rating area factors.

- b. Please provide quantitative and qualitative support for the proposed network factors, if different from the previous year.

RESPONSE:

PHW does not utilize network factors.

9. MLR Exhibit:

- a. Please complete table below which summarizes the most recent three years of complete MLR information.

- i. Actual is the final information which was filed for the specified calendar year
 ii. Pricing is the information which was projected in the final annual filing for the given year (i.e., 2020 pricing information is from the plan year 2020 annual filing submitted in 2019)

Calendar Year	MLR		Member Months	
	Actual	Projected	Actual	Projected
2020	75.0%	90.6%	44,706	112,029
2021	76.2%	83.3%	58,241	57,063
2022	77.9%	85.4%	102,980	127,772

- b. Are the MLRs and Member Months between Actual and Pricing comparable? If not, explain.

RESPONSE:

PHW has generally had low membership in conjunction with favorable experience, which is especially apparent in 2020 and 2021. We expect that as we continue to grow our membership within the state, our experience will level out and our Actual MLR will be closer to our Pricing MLR.

- c. Does the insurer expect to pay MLR rebates for the 3-year period above?

RESPONSE:

PHW has paid MLR rebates for the above timeframe. We anticipate that as our membership and experience grows, we will not be paying MLR rebates in future years.

10. Plan of Withdrawal:

- a. Please confirm that a Plan of Withdrawal has been submitted if any plans are being discontinued.

RESPONSE:

We confirm that we will not need to submit a Plan of Withdrawal for plan year 2025.

11. Transitional Plans:

- a. Starting in October 2024, the PID will discontinue the non-enforcement policy for individual transitional plans (the non-enforcement policy for small group transitional plans will continue until further notice, or until the federal government discontinues its non-enforcement policy). If applicable, please discuss the migration of individual transitional members into ACA-compliant plans effective January 1, 2025.

RESPONSE:

PHW does not have any individual transitional plans.

12. Copay Adjustment Programs

- a. Does the company use a copay adjustment program (also known as a copay accumulator program)?

RESPONSE:

We do not use a copay adjustment program.

- b. How does the company handle copay assistance coupons? For example, does the coupon apply to the MOOP?

RESPONSE:

Copay assistance coupons count towards the deductible and MOOP.

- c. If any change to such a program has resulted in a pricing impact, please include a detailed quantitative exhibit supporting the pricing impact.

RESPONSE:

We have had no significant change to this program since the pricing base year in 2023.

Standard Question Support - Question 3
Pennsylvania Health & Wellness, Inc.
Direct COVID-19 Rx Adjustment

Direct COVID-19 Rx Adjustments

Rx Tier	2023 Allowed Experience	COVID Factor
Generic	\$ 2,421,073.29	1.000
Brand ⁽¹⁾	\$ 7,159,576.54	1.005
Specialty ⁽²⁾	\$ 5,842,807.02	1.012
Rebates	\$ (4,615,957.73)	1.000
Total	\$ 10,807,499.12	1.010

Notes

(1) Brand factor accounts for expected COVID vaccine ingredient costs that were not included in the 2023 experience.

(2) Specialty factor accounts for expected COVID treatment ingredient costs that were not included in the 2023 experience.

**RE: ACTUARIAL MEMORANDUM – PENNSYLVANIA – PENNSYLVANIA HEALTH & WELLNESS, INC. –
INDIVIDUAL RATE FILING, EFFECTIVE JANUARY 1, 2025**

Mr. Carmody,

In response to the objection letter dated June 6th, 2024 for Pennsylvania Health & Wellness, Inc. (PHW)'s Individual Market rates and supporting documentation for rates effective January 1, 2025, we are providing the following documents:

- "2025_PHW_Objection_Responses_20240619.pdf"
- "2025_PHW_Objection_Responses_Exhibits_20240619.xlsx"

As requested by PID, a full list of changes from the previously submitted filing documents is included below.

- Round 1 - Objection 1: Corrected values in Table 2 of the PAAM Exhibits. No impact to rates.
- Round 1 - Objection 2: Converted PHW's ACA Service Area Map to a PDF.
- Round 1 - Objection 3: "Number of Policyholders Affected for this Program" in SERFF & associated documents updated to the number of covered lives in Table 10 of the PAAM Exhibits.
- Round 1 - Objection 13: Updated "Appendix" 13.3 in PHW's Memorandum Appendices to retain formulas.

The following files have been updated to reflect the changes listed above:

- "2025_PHW_Actuarial_Memorandum_Appendices_20240619.xlsm"
- "2025_PHW_PA_Actuarial_Memorandum_Rate_Exhibits_20240619.xlsm"

RE: Rate Filing Review for the Pennsylvania Insurance Department

Company: Pennsylvania Health & Wellness, Inc.

Filing Number: CECO-134068773

Product: Individual

Effective Date: January 2025

Objection 1

The following objections pertain to the PAAM Exhibits vs URRT:

- a. Per Table 1 of the PAAM Exhibits, Incurred Claims equal \$43,033,035.25. However, based on the URRT Worksheet 1, the Incurred Claims in Experience Period (Cell E16) is equal to \$49,143,596.53. This appears to be the Ultimate Incurred Claims amount. Please update or explain the discrepancy.

Response:

Upon review, we discovered that the experience paid and allowed claims within the PAAM Exhibits were inclusive of Capitation, Prescription Drug Rebates, and Reinsurance. We have resubmitted an updated version of our PAAM Exhibits workbook with corrected values that now show Incurred Claims of \$49,143,596.53 in both Table 15 of the PAAM Exhibits and URRT Worksheet 1.

- b. Per Table 2 of the PAAM Exhibits, the Loss Ratio (Cell M38) is equal to 81.80%. However, based on the URRT Worksheet 2 (Cell D36), the Loss Ratio is equal to 93.42%. Please update or explain the discrepancy.

Response:

This has been corrected in our PAAM Exhibits resubmission. The Loss Ratio now shows 93.42% in both Table 2 of the PAAM and URRT Worksheet 2.

Objection 2

Per the Rate Filing Guidance, The ACA Service Area Map is to be submitted in PDF format. The current ACA Service Area Map is a PowerPoint document. Please resubmit as a PDF document.

Response:

The ACA Service Area Map has been resubmitted as a PDF document.

Objection 3

Per the Rate Filing Guidance, the number of affected policyholders listed in the Rate/Rule Schedule tab in SERFF should be populated using the total covered lives shown in Table 10 Cell V15 of the PAAM Exhibits. Please update so that the covered lives are consistent.

Response:

The "Number of Policyholders Affected for this Program" in SERFF has been updated to reflect the total covered lives, as shown in Table 10 of the PAAM Exhibits.

Objection 4

Please provide quantitative development of the projected allowed non-EHB claims PMPM included in Table 5 of the PAAM Exhibits.

Response:

Please refer to [Objection Exhibit 4] for quantitative support for the development of the \$3.85 projected allowed non-EHB claims PMPM shown in PAAM Exhibits Table 5. The values in this exhibit were developed in coordination with our vendors for both Dental and Vision services.

Objection 5

Per the Rate Filing Guidance, the Exchange User Fee is to be a maximum of 3%. Please update URRT Worksheet 1 Cell F45 to reflect this.

Response:

Please see [Objection Exhibit 5] for the calculation of the 3.6% Exchange User Fee reflected on URRT Worksheet 1. This represents a 3% fee which has been grossed up by the paid-to-allowed ratio to be on an allowed claims basis.

Objection 6

Please provide a quantitative development of the \$17.05 "Projected Incurred Exchange User Fees PMPM" found in Cell C32 of Table 5.

Response:

Please see [Objection Exhibit 5] for the calculation of the \$17.05 Exchange User Fee found in Table 5. This matches the Unadjusted Exchange User Fee PMPM shown in URRT Worksheet 1.

Objection 7

Please provide a quantitative exhibit detailing the 21.1% year over year increase in base period allowed claims after normalization as shown in Table 8.

Response:

Please refer to [Objection Exhibit 7] for quantitative support of the change in the requested component. The 21.1% year over year increase within table 8 of the PAAM represents the percent increase in "Calibrated Plan Adjusted Index Rate" (CPAIR) driven by increases in base period normalized allowed claims. This is primarily driven by increases in base experience, trend, and lower expected average age of membership.

PHW has experienced a large increase in allowed claims between 2022 and 2023. This can be attributed to several factors, including large growth in membership and increased trends. Historically, PHW has had a low number of members that have been relatively healthy, resulting in a higher risk adjustment payable. Given that PHW experienced a membership growth of 68% in 2023, we expect that PHW's risk pool more closely aligns with the rest of market, resulting in an increase in allowed claims.

Additionally, we expect a decrease in the average age factor between 2024 and 2025. Given that the product of normalization factors in a denominator when calculating "Normalization factor component of change", a 4% decrease in the product of factors will dampen the impact in normalization (vs a scenario where the factors are left unchanged).

Objection 8

The following objections pertain to Tab VI Rate Change Summary of the PAAM Exhibits:

- a. Please revise the section on how the company plans to spend the premium it collects in 2025, as the current submission totals 20%.
- b. Please update Cell B23 to include a brief, written explanation for the reason of the requested rate change.

Response:

The errors in Tab VI Rate Change Summary have been corrected and resubmitted with these responses.

Objection 9

Please provide a detailed narrative for the proposed geographic rating factor increase in Rating Area 3.

Response:

The large increase in the Rating Area 3 geographic rating factor is a result of increases to provider reimbursement costs within the region, relative to other Rating Areas.

Objection 10

Please provide a detailed quantitative exhibit in Excel showing the development of the Inpatient and Outpatient Hospital Trend Factors found in Appendix 6.1.

Response:

Please see [Objection Exhibit 10] which provides an illustrative example of how the reimbursement trends shown in Appendix 6.1 were developed. Note the values in this exhibit do not represent actual contracts, as PHW contract details consist of proprietary information.

Objection 11

Regarding Appendix 7.1, please provide a detailed narrative and a quantitative exhibit in Excel showing the development of the following factors:

- a. Prospective COVID Calibration Adjustment

Response:

Please see [Objection Exhibit 11a] for an exhibit showing the 1.002 Prospective COVID Calibration Adjustment. Given that the ingredient cost of COVID vaccines and treatments were still being subsidizing by the government during a portion of 2023, we did not incur these costs for the full experience period of 2023. To reflect the costs we expect to incur for COVID vaccines and treatments for a full year of coverage in 2025, we applied an additional loading to Rx unit cost trends.

- b. The 2023 to 2025 Statewide Morbidity Trend

Response:

Please refer to [Objection Exhibit 11b] for quantitative and qualitative support of the “2023 to 2025 Statewide risk pool morbidity trend”. This adjustment reflects the assumed impact to statewide morbidity on projected claims costs driven by market growth from the base period to the projection period.

- c. The 2023 to 2025 Relative Morbidity Trend

Response:

Please refer to [Objection Exhibit 11c] for quantitative support for the development of PHW’s “2023 to 2025 Relative Morbidity Trend”.

Objection 12

Regarding Appendix 12.2, please provide the development of the Aggregate Premium of \$572.22 found in Cell E8.

Response:

The aggregate premium of \$572.22 matches the plan adjusted index rate shown in URRT Worksheet 2. Please see Appendix 12.1 for the development of this plan adjusted index rate.

Objection 13

The following objections pertain to Appendix 13.3:

- a. Please provide this exhibit with formulas retained.
- b. Please provide some added perspective on the geographic factor for Rating Area 2 being 1.356.

Response:

Appendix 13.3 has been updated to retain the formulas. Please refer to the updated appendices included with these responses.

We are entering one county in Rating Area 2 for the first time in plan year 2025. PHW’s contracted reimbursement rates for the providers in this county are higher than the contracted rates in most others within PHW’s footprint. Given this, the geographic rating factor is higher than all others within the state.

Objection 14

Regarding Appendix 20.4 “Other Adjustments,” please provide a detailed narrative and quantitative exhibit in Excel showing the development of the following factors:

- a. Changes in Pharmacy Rebates and Dispensing Fees

Response:

Please refer to [Objection Exhibit 14a] for quantitative support of the expected changes in Pharmacy Rebates and Dispensing Fees from the 2023 experience period to the 2025 rating year. This is intended to account for anticipated changes in pharmacy utilization and their corresponding rebates. The total change in rebates and dispensing fees defined on a PMPM basis is converted to a factor-based adjustment by dividing by an intermediate estimate of projected claims, excluding rebates and dispensing fees.

- b. Grace Period

Response:

The Grace Period adjustment represents our assumption for delinquency. These are members assumed to become delinquent and do not pay their premiums. Thus, the adjustment accounts for the claims that these members would be liable for. This factor is based off a bad debt analysis done by our Finance team, in which they pull members who are in delinquent status and the associated delinquent premium dollars. The bad debt experience in CY22 ranged from 0.14% to 0.48% of the premium among the Centene markets. The base period range is used as the basis to develop the delinquency adjustment pricing assumption.

c. Other/Interaction

Response:

Please refer to [Objection Exhibit 14c] for quantitative support of the Other/Interaction factor. This adjustment represents a balancing item to ensure the projected index rate in Worksheet 1 of the URRT reconciles with the experience period claims trended for all other factors included in Worksheet 1 and the accompanying Appendices 7.1, 7.2, 7.3 and 7.4. This balancing item is required, as the process laid out within the URRT, while a reasonable representation, does not fully capture our pricing methodology. Within this factor are all items not quantified elsewhere, which most notably includes the revisions to our pricing model and methodology, which we expect to account for minor fluctuations as observed here.

Objection 15

The Actuarial Memorandum mentions in Section 2A - Other Adjustments, "Experience period claims were also adjusted for the following changes between the experience period and projection period: Expected savings due to ongoing managed care efforts." Are these expected savings reflected in Appendix 20.4? If so, where?

Response:

These expected savings are included as an adjustment to the utilization factors and are therefore reflected in the starting Trended EHB Allowed Claims PMPM values of Appendix 20.4.

Objection 16

The Actuarial Memorandum states "A CSR Defunding Adjustment of 22.0% was selected based on review of PHW's calculated CSR rate load, which fell below the low end of the allowable CSR rate load range of 1.22-1.26." Please provide a detailed quantitative exhibit of PHW's CSR Defunding Adjustment calculation.

Response:

Please refer to [Objection Exhibit 16] for quantitative support of PHW's calculated CSR Defunding Adjustment in the absence of a mandated range.

Objection 17

Please provide a detailed narrative on the Pricing AVs of the Elite Bronze Plans, Plan 86199PA0010031 and Plan 86199PA0020031, being significantly higher than their respective Metallic AVs.

Response:

It is expected that AV pricing values will not track with metallic AVs due to differences in modeling methodology and underlying data. Pricing AVs are developed using our claims simulation model. Sensitivity testing of the model has shown that is markedly more sensitive to deductible levels than the federal AV calculator. Elite Bronze has a deductible of \$0 medical/\$3,800 pharmacy, while other bronze plans in the portfolio have much higher deductibles, ranging from \$7,250 to \$8,450. The very low deductible on Elite Bronze drives a greater difference between the metallic AV and the pricing AV as compared to other bronze plans.

Objection 18

Please confirm that you have tested to ensure that the rates in Table 11 of the PAAM Exhibits, PA Plan Design Summary and Rate Table, Federal Rates Template, and binder are identical.

Response:

We can confirm that the rates in the above listed templates are identical.

Objection Exhibit 10

Illustrative Example of Development of Reimbursement (% of Benchmark) Values

Note: Due to the proprietary nature of PHW's contacts with its providers, all values in this exhibit are illustrative only and do not represent actual contracts between PHW and its providers. The actual reimbursement assumptions are developed using the same calculation methodology presented herein, but at a more granular service category level based on on actual and anticipated contracts.

Experience Contractual Reimbursement						
Actual and Anticipated Market Share by Facility (Excluding "Significant Network Changes")⁽¹⁾						
Facility			Reimbursement Relative to Fixed Benchmark⁽²⁾			
	PY 2023	PY 2025	PY 2023	PY 2025	Reimbursement Change	
Hospital A	50%	55%	130%	190%	1.462	
Hospital B	25%	20%	115%	120%	1.043	
Hospital C	18%	20%	102%	95%	0.931	
In-Network Composite	93%	95%	121%	153%	1.268	
Out-of Network Composite	7%	5%	215%	265%	1.233	
Total Composite	100%	100%	127%	158%	1.246	

Notes:

(1) Reimbursement change factors in Appendix 6.1 are calculated prior to significant network changes (e.g. the addition or elimination of a hospital system(s) or provider group(s), or expansion into new counties and rating areas). Per URR instructions, reimbursement impacts attributable to significant network changes are reflected in the URRT 'Other' factor.

(2) In- and out-of-network contracts are expressed as a percentage of a fixed benchmark to enable appropriate comparison of reimbursement levels across contracts and over time.

Total	Component
0.985	Change in Market Growth Morbidity Impact ⁽²⁾
1.072	x Mandated Fee Adjustment ⁽³⁾
1.056	= 2023 to 2025 Statewide risk pool morbidity trend

Notes:

(1) This exhibit demonstrates the components within the "2023 to 2025 Statewide risk pool morbidity trend". As such, this is one of several components that is included in the Final URRT Morbidity Adjustment, also identified in table 5 of the PAAM Exhibits.

(2) This component represents the assumed impact to statewide morbidity on projected claims costs driven by market growth from the base period to the projection period.

(3) This component represents a mandated per member per month (PMPM) fee that is included within the pricing development. Per the department's instructions, this is not included as a retention component and is instead included as an adjustment to claims (in order to target \$24.95 PMPM). Since this is a claims adjustment, it only applies to the claims 'statewide morbidity trend' and does not impact the risk transfer calculation.

1311 Strawberry Square
Harrisburg, PA 17120

**RE: Pennsylvania Health & Wellness, Inc., Individual HMO, ACA Filing for PY2024
Pennsylvania Insurance Department ID # CECO-134068773**

Mr. Carmody,

In response to the objection letter dated 7/03/2024 for Pennsylvania Health & Wellness, Inc. (PHW)'s Individual Market rates and supporting documentation for rates effective January 1, 2025, we are providing the following documents:

- "2025_PHW_Objection_Responses_20240717.pdf"

No changes have been made to any previously submitted filing documents as part of this objection response.

RE: Rate Filing Review for the Pennsylvania Insurance Department

Company: Pennsylvania Health & Wellness, Inc.

Filing Number: CECO-134068773

Product: Individual

Effective Date: January 2025

Objection 1

Last year, Pennsylvania Health & Wellness projected membership for Policy Year 2024 at 15,376 members. However, membership as of April 2024, sits at 30,862. Please describe the drivers of the large influx of members. Further, please discuss the morbidity of the new members in comparison to the existing members of the block and the impact this has on risk adjustment.

Response:

Historically, PHW has had a small, low morbidity population relative to the rest of market, resulting in a high risk adjustment payable. With this large increase membership and market share, we expect that PHW's morbidity will become closer to the statewide average morbidity, resulting in a lower payable. This membership growth can be linked to PHW's 2024 price position in most counties, as well as efforts to improve our network.

Additionally, we have observed a large increase in membership in the ACA marketplace nationwide since the beginning of 2023. We believe this is driven by several factors, including eAPTC's and increased marketing. We have observed these members are generally less morbid than the rest of market, which helps offset the increase to morbidity discussed above.

Objection 2

In reference to Standard Question #12 regarding Copay Adjustment Programs, does counting copay assistance coupons towards the deductible and the MOOP have an impact on rates?

Response:

PHW has historically allowed copay assistance coupons to count toward deductible and MOOP, including during the experience period. As such, we expect that the impacts of doing so would be accounted for in the experience used for pricing and no specific trend adjustments were included in the pricing build up for plan year 2025.

Objection 3

Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rate Templates are identical.

Response:

We confirm that the rates in the above listed documents are identical.

August 5, 2024

Pennsylvania Insurance Department
1326 Strawberry Square
Harrisburg, PA 17120

**RE: ACTUARIAL MEMORANDUM – PENNSYLVANIA – PENNSYLVANIA HEALTH & WELLNESS, INC. –
INDIVIDUAL RATE FILING, EFFECTIVE JANUARY 1, 2025**

Mr. Yanick,

In response to the objection letters dated July 24th, 2024 and July 30th, 2024 for Pennsylvania Health & Wellness, Inc. (PHW)'s Individual Market rates and supporting documentation for rates effective January 1, 2025, we are providing the following documents:

- "2025_PHW_Objection_Responses_20240805.pdf"
- "2025_PHW_PA_Actuarial_Memorandum_Rate_Exhibits_20240805_no_UC_adjustment.xlsm"
- "2025_PHW_Plan_Design_Summary_and_Rate_Tables_20240805_no_UC_adjustment.xlsm"

As requested by PID, a full list of changes from the previously submitted filing documents is included below.

- Round 3 – Objection 2: Rates have been updated to reflect reinsurance savings inclusive of new parameters.
- Round 3 - Objection 3: The experience period risk adjustment has been updated to reflect final CMS risk adjustment amount released on July 22nd.
- Round 3 - Objection 4: The projected risk adjustment transfer in PHW's 8/05 re-filing submission reflects the final 2023 CMS transfer payment information published on July 22nd, 2024. Specifically, the following changes were made to the projected risk transfer calculation:
 - Updated our base period risk transfer estimate using risk transfer actuals from the CMS report issued July 22nd, 2024.
 - Updated PHW's base period relative PLRS to align with PHW's 2023 risk adjustment transfer payment from the CMS Transfer Payment Issuer Report (TPIR). The updated base period PLRS represents a revised starting point for PHW's relative risk score projection.
- Round 4 - Objection 1: Updated unit cost trend to reflect recent reimbursement updates. This change only impacts rates in Rating Area 3. Please refer to "2025_PHW_Objection_Responses_20240805.pdf" for more information.

The following files have been updated to reflect the changes listed above:

- "2025_PHW_Actuarial_Memorandum_20240805.pdf"
- "2025_PHW_Actuarial_Memorandum_20240805_Redacted.pdf"

- "PA_PY25UnifiedRateReview_v2_080524.xlsm"

REQUESTED COMPANY INFORMATION

Below you may find the requested company information, in response to the guidance posted April 3rd, 2024 and objections received July 24th, 2024 and July 30th, 2024.

1. Company Name & NAIC number: **Pennsylvania Health & Wellness, Inc.; NAIC # 16041**
2. Market (Individual or Small Group): **Individual**
3. On or Off Exchange: **On/Off Exchange**
4. Effective date of coverage: **January 1, 2025**
5. Average rate change requested (Table 11, cell AN13, Table 11 cell EN19 for quarterly filings): **1.9%**
6. Range of rate change requested (from Table 11, column AN for annual filings and column BU, DB, and EI for small group quarterly filings): **-0.8% to 5.9%**
7. Total additional annual revenue generated from the proposed rate change: **\$3,551,083**
8. Product(s) (Indemnity, HMO, POS (HMOs only), PPO, or EPO): **HMO**
9. Rating Areas and any changes from 2024: **In 2024 plans were offered in Rating Areas 3, 6, 7, and 8 only. For 2025, plans will be offered in Rating Areas 1, 2, 3, 4, 5, 6, 7, and 8.**
10. Metal Levels and Catastrophic Plans: **Gold, Silver, Bronze**
11. Current number of covered lives and of policyholders as of February 1, 2024 as shown in Cell V15 of Table 10: **Covered lives - 29,211; Policyholders – 22,676**
12. Number of plans offered in 2025 and the change this represents from 2024: **There are 23 plans offered in 2025. There were 26 plans offered in 2024.**
13. Corresponding contract form number, SERFF and Binder ID numbers: **FORM: CECO-134061623; SERFF: CECO-134068773; Binder: CECO-PA25-125118032**

RE: Rate Filing Review for the Pennsylvania Insurance Department

Company: Pennsylvania Health & Wellness, Inc.

Filing Number: CECO-134068773

Product: Individual

Effective Date: January 2025

Below are the responses from the objection letter dated July 24th, 2024.

Round 3 - Objection 1

Please update the estimated risk adjustment in cell L36 of the PAAME's Data tab to reflect the correct amount. Please also update this amount in the URRT.

Response:

The experience period risk adjustment amount in both of the above listed documents has been updated to reflect the final CMS risk adjustment report.

Round 3 - Objection 2

The program parameters for Plan Year 2025 will be adjusted from the parameters announced in Notice 2024-07 published at 54 Pa.B. 2907 (May 25, 2024). Beginning January 1, 2025, the program-adopted parameters will be adjusted to an attachment point of \$60,000, a cap of \$100,000 and a coinsurance rate of 60%. Please update these factors in the PAAM Exhibits.

Response:

PHW's filing has been updated to reflect the update parameters listed above.

Round 3 - Objection 3

Please update the 2023 experience period risk adjustment amount, in Table 2, to reflect the final CMS risk adjustment amount released on July 22nd.

Response:

PHW's filing has been updated to reflect the final CMS risk adjustment amount released on July 22nd.

Round 3 - Objection 4

If the projected risk adjustment transfer amount in Table 5 will be modified, due to the final CMS transfer amount published on July 22nd, please provide narrative and detailed supporting data to justify the proposed changes.

Response:

The projected risk adjustment transfer in PHW's 8/05 re-filing submission reflects the final 2023 CMS transfer payment information published on July 22nd, 2024. Specifically, the following changes were made to the projected risk transfer calculation:

- (1) Updated our base period risk transfer estimate using risk transfer actuals from the CMS report issued July 22nd, 2024.
- (2) Updated PHW's base period relative PLRS to align with PHW's 2023 risk adjustment transfer payment from the CMS Transfer Payment Issuer Report (TPIR). The updated base period PLRS represents a revised starting point for PHW's relative risk score projection.

Please refer to 'Appendix 11.2' in the 8/05 re-filing documents for detailed development of PHW's projected 2025 risk adjustment transfer.

Round 3 - Objection 5

Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rate Templates are identical.

Response:

We have confirmed all rates are identical between Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, and the Federal Rate Template.

Round 3 - Objection 6

Please ensure that the 7/31/24 versions of the following items are posted in SERFF with your July 31st response to this data call.

- a. Cover Letter identifying all changes made and the reasons for the change. Also, show the revised rate change.
- b. PA Actuarial Memorandum
- c. PA Actuarial Memorandum Exhibits

- d. Department's Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no "NA")
- e. URRT
- f. Federal Rate Template
- g. Part III: Actuarial Memorandum
- h. Rate Change Summary information included on the VI Rate Change Summary tab of the PA Actuarial Memorandum Exhibits
- i. Public PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits after the initial submission, in addition to all the above items).

Response:

Updated versions of all above listed documents are included in this filing.

Below is the response from the objection letter dated July 30th, 2024.

Round 4 - Objection 1

In response to the discussion the Company had with the Department on 7/30/2024, pertaining to potential network changes, please provide 2 updated versions of the Department's PAAME and Plan Design Summary. The first updated version should include only the revisions to risk adjustment and reinsurance. The second updated version should include the risk adjustment, reinsurance, and network revisions.

The updated documents should be provided alongside a detailed qualitative narrative describing the changes that were made between the 2 versions.

Please provide this information no later than noon on 8/5/2024, so that the Department can have enough time to review the potential impacts.

Response:

As mentioned during our conversation on 7/30/2024, PHW has been able to sign a major provider system in rating area 3. As a result, our provider reimbursement has increased in this rating area. In order to account for the increase in cost related to the inclusion of this provider system, PHW would need to increase its rates in area 3 by +7.9%. This can be seen in the table below, which calculates **Base Rate X Area Factor** for each rating area as seen in the revised filing that includes risk adjustment + 1332 change (reinsurance parameters) and the final filing that includes the change risk adjustment + 1332 change + network reimbursement update. Please note that premiums in no other rating areas are changing from this adjustment, as can be seen in the "% Change" column below.

Area	Projected MM	Risk adj + 1332 updates			Risk adj + 1332 + Network updates				% Change
		[A] Base Rate (BR)	[B] Area Factor (AF)	[C] [A] x [B] BR x AF	[D] interim Area Factor	[E] Base Rate	[F] [D] / 1.017 normalized Area Factor (AF)	[G] [E] x [F] BR x AF	
1	767	340.28	1.021	347.37	1.021	345.95	1.004	347.37	0.0%
2	481	340.28	1.356	461.35	1.356	345.95	1.334	461.35	0.0%
3	60,752	340.28	1.046	355.9	1.129	345.95	1.110	384.13	7.9%
4	7,871	340.28	0.898	305.50	0.898	345.95	0.883	305.50	0.0%
5	7,297	340.28	1.119	380.71	1.119	345.95	1.100	380.71	0.0%
6	42,774	340.28	1.256	427.23	1.256	345.95	1.235	427.23	0.0%
7	64,831	340.28	1.069	363.65	1.069	345.95	1.051	363.65	0.0%
8	117,397	340.28	0.843	286.89	0.843	345.95	0.829	286.89	0.0%
Total	302,170		1.000		1.017		1.000		

As requested, we have included versions of the PAAME and PDS that represent the "Risk adjustment + 1332 updates" scenario above, [2025_PHW_PA_Actuarial_Memorandum_Rate_Exhibits_20240515_no_UC_adjustment.xlsm] and [2025_PHW_Plan_Design_Summary_and_Rate_Tables_20240805_no_UC_adjustment.xlsm] respectively. The above demonstrated relationship should be observed when comparing the rates in these templates to the final versions also included in this filing.

August 8, 2024

Pennsylvania Insurance Department
1311 Strawberry Square
Harrisburg, PA 17120

**RE: Pennsylvania Health & Wellness, Inc., Individual HMO, ACA Filing for PY2024
Pennsylvania Insurance Department ID # CECO-134068773**

Mr. Carmody,

In response to the objection letter dated 8/06/2024 for Pennsylvania Health & Wellness, Inc. (PHW)'s Individual Market rates and supporting documentation for rates effective January 1, 2025, we are providing the following documents:

- "2025_PHW_Objection_Responses_20240808.pdf"

No changes have been made to any previously submitted filing documents as part of this objection response.

RE: Rate Filing Review for the Pennsylvania Insurance Department

Company: Pennsylvania Health & Wellness, Inc.

Filing Number: CECO-134068773

Product: Individual

Effective Date: January 2025

Objection 1

The Standard Question responses submitted May 15 state that Centene expects “moderate growth in plan year 2025 vs current 2024 enrollment. The main drivers are PHW’s service area expansion and expected market size growth.” However according to table 1 of the PAAME, projected membership equals roughly 25,181 which is less than the current 29,211. Please revise Table 1, or explain why membership is expected to decrease.

Response:

Please refer to Table 10 of the PAAME for a year-over-year comparison of current members to projected members (V15:W15). Based on the enrollment information stated here, PHW does expect to see moderate growth, due to the reasons listed above.

The difference in projected members in Table 10 versus the department’s calculation above is due to PHW’s assumptions around SEP and lapse rate for 2024 and 2025.

August 15, 2024

Pennsylvania Insurance Department
1311 Strawberry Square
Harrisburg, PA 17120

**RE: Pennsylvania Health & Wellness, Inc., Individual HMO, ACA Filing for PY2024
Pennsylvania Insurance Department ID # CECO-134068773**

Mr. Carmody,

In response to the objection letter dated 8/09/2024 for Pennsylvania Health & Wellness, Inc. (PHW)'s Individual Market rates and supporting documentation for rates effective January 1, 2025, we are providing the following documents:

- "2025_PHW_Objection_Responses_20240815.pdf"
- "2025_PHW_Objection_Responses_Exhibits_20240815.xlsx"

As requested by PID, a full list of changes from the previously submitted filing documents is included below.

- Round 6 - Objection 1: Updated projected member months in Table 1 of the PAAM Exhibits

The following files have been updated to reflect the change listed above:

- "2025_PHW_PA_Actuarial_Memorandum_Rate_Exhibits_20240815.xlsm"

RE: Rate Filing Review for the Pennsylvania Insurance Department

Company: Pennsylvania Health & Wellness, Inc.

Filing Number: CECO-134068773

Product: Individual

Effective Date: January 2025

Objection 1

Please revise the PAAME's Table 1 projected member months to be consistent with Table 10.

Response:

Per the department's request, we have updated projected member months in the updated PAAM Exhibits included with these responses.

Objection 2

Please provide a detailed quantitative exhibit that includes risk-adjusted loss ratios by rating area for each of the last 3 years and YTD 2024. At a minimum, the exhibit should include membership, claims, risk score, and premium by year by rating area.

Response:

Please refer to [Objection Exhibit 2] for the requested information. Note that the adjusted loss ratios for rating area 3 are trending up as PHW increases its membership each year, and that the loss ratios do not account for other expenses such as administrative costs and taxes/fees.

Objection 3

In the objection response dated 20240619, objection 9, the large initial increase in RA3's rating factor (i.e., 0.966 vs. 1.110) is attributed to increases in provider reimbursement costs. Which provider networks, in particular, are driving the large reimbursement cost increases?

Response:

[Redacted response content]

Objection 4

The following objections pertain to the response received to objection 10 dated 20240619:

- a. The illustrative exhibit provides little to no value to the Department in understanding the Company's specific situation with regards to high reimbursement changes overall. Please review the Department's rate filing guidance, page 5, which outlines allowable redactions. This exhibit would qualify to be redacted.
- b. Please provide an updated version of Exhibit 10 that includes actual data.
- c. Please provide an exhibit like Exhibit 10 that includes actual data specific to RA3 for PY23, PY25 prior to new arrangement, and PY25 including potential new arrangement.

Response:

Please refer to [Objection Exhibit 4a] and [Objection Exhibit 4b] for the requested exhibits showing Facility Rates before and after the new arrangement, respectively. Note that the Total Composite Reimbursement rates developed in this table tie to the composite rates listed in the respective versions of Appendix 13.3, included in previous objection responses.

Objection 5

Please provide a detailed quantitative exhibit that demonstrates that the reimbursement changes, as given in appendix 6.1, for Inpatient/Outpatient Hospital are not double counting the impact of reimbursement changes in RA3. Furthermore, a detailed narrative should be included that details how the changes being made in RA3 go above what is already being considered in trend. Otherwise, the initial increase in RA3's area factor of 8.3% should be adjusted to only include the portion above and beyond what trend is already including.

Response:

Appendix 6.1 is meant to provide additional support for the unit cost trends shown in Section II of Worksheet 1 of the URRT. Consistent with the development within the URRT, the trends represent aggregate two-year movements in claims from the 2023 experience period to the 2025 rating year. These statewide trends are calculated by comparing anticipated reimbursement rates for contracted providers in the rating year with observed historical reimbursement rates associated with our 2023 experience across all rating areas. When we receive information relating to changes in contracted reimbursement rates, as was the case in rating area 3, the projected reimbursement rates used in the two-year unit cost trends need to be updated reflect the latest contracted rates. Absent of these updates, the unit cost trend previously being shown would not adequately capture the true increase in expected claim costs, inclusive of the rating area 3 provider contract revisions.

With this methodology, rating area 3 reimbursement rates would be included when calculating the aggregate reimbursement trends shown in Appendix 6.1 and Section 2 of the Worksheet 1 in the URRT. However, to calculate rating area factors and premiums, we complete a separate analysis comparing area specific projected reimbursement rates to the statewide average projected reimbursement rates. This analysis is only interested in the relationship of projected area specific reimbursement rates to the statewide average reimbursement rates and does not directly include adjustments for the two-year trends being applied in as part of our Index Rate development.

Please refer to Appendix 13.3, which shows the development of our area factors. Within this appendix, you will see two components of our area factors. The first adjustment is the "100% of Medicare Factor", which captures differences in base Medicare charge levels by area. This basis is consistent with how our provider contracts are defined in terms of Medicare charge amounts. The source for these factors is the Milliman Health Cost Guidelines. The second component is the "Relative Reimbursement Adjustment", which as described above effectively compares each rating area's average reimbursement to projected statewide average reimbursement rates.

Objection 6

The Department notes and is struggling with the large change in RA3's increase. That is, based on the PAAME including the new provider arrangement the overall increase in RA3 as noted in cell AG13 in Table 11 increases to 16.0%, as compared to 7.5% without the new provider. Please provide a few suggested edits to the rate development that would lower RA3's increase, making this change more amenable to the Department.

Response:

We understand that the department is concerned with the year-over-year premium increase in rating area 3. However, we hope that the responses we have provided here allow the department to see that this increase is justified. Though signing this new provider will increase PHW's unit cost in rating area 3, it will provide better access to large medical facilities to all of PHW's members.

Furthermore, based on our estimates that PHW will be the low-cost Silver and second low-cost Silver carrier (both before and after the proposed update to Rating Area 3), a justified increase in rates would mean an increase to the benchmark premium plan, from which the advanced premium tax credits (APTCs) are calculated. Additionally, PHW has reduced its plan portfolio for PY2025 (in-line with the PENNIE initiative to reduce member confusion), which will change the benchmark plan to a higher premium plan in PHW's portfolio. This will also increase member subsidies across rating area 3. Given that a vast majority of the PA enrollees fall below 250% FPL, and thus rely heavily on these premium subsidies, an increase in the benchmark premium increases the amount of the subsidy these members would be eligible for to purchase a plan on the Exchange. Given the above information, the increase in subsidy should also outpace the increase in premium for most PHW members in rating area 3 (as well as benefit members of other carriers).

Given all of this, we hope the department will find this proposed increase, driven purely by unit cost expectations, to be acceptable.

Mr. Carmody,

In response to the objection letter dated 8/19/2024 for Pennsylvania Health & Wellness, Inc. (PHW)'s Individual Market rates and supporting documentation for rates effective January 1, 2025, we are providing the following documents:

- "2025_PHW_Objection_Responses_20240821.pdf"
- "2025_PHW_Appendix 13.3.pdf"
- "2025_PHW_Appendix 13.3.xlsm"

No changes have been made to any previously submitted filing documents as part of this objection response.

RE: Rate Filing Review for the Pennsylvania Insurance Department

Company: Pennsylvania Health & Wellness, Inc.

Filing Number: CECO-134068773

Product: Individual

Effective Date: January 2025

Objection 1

Please provide the Department the updated PAAME which includes the revised projected member months in Table 1. The most recent upload under the ACA Actuarial Memorandum Rate Exhibits dropdown of the Supporting Documentation tab appears to be the response exhibit submitted 8/15.

Objection 2

Please revise Appendix 13.3 of the Memorandum Appendices to reflect the updated projected member months.

Response:

Please see the revised Appendix 13.3 provided in Excel and PDF formats, titled "2025_PHW_Appendix 13.3.xlsm" and "2025_PHW_Appendix 13.3.pdf".
