

Capital Advantage Assurance Company – Small Group Plans

Rate Request filing ID # CABC-134095175 – This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <https://www.insurance.pa.gov/Consumers/HealthInsuranceFilings/Pages/ACA-Health-Rate-Filings.aspx>

Overview

Initial requested average rate change:	6.71%
Revised requested average rate change:	7.66%
Range of requested rate change:	3.04% to 12.78%
Effective date:	January 1, 2025
Mapped members:	32,631
Available in:	Rating Areas 6, 7, and 9

Key Information

Jan. 2023-Dec. 2023 financial experience

Premiums	\$296,275,624
Claims	\$264,133,825
Administrative Expenses	\$3,889,799
Taxes & Fees	\$1,691,382
<hr/>	
Insurers made (after taxes)	\$26,560,618

How it plans to spend your premium¹

This is how the insurance company plans to spend the premium it collects in 2025

Claims:	87%
Administrative:	10%
Taxes & Fees:	1%
Profit:	2%

The insurer expects its annual medical costs to increase **6.7%**.

Our Decision

The insurer requested an average 6.71% rate change in the small group market for enrollees in current 2024 plans who will continue coverage with the insurer in 2025. The insurer later revised its rate filing to request a rate change of 7.66% due to revisions made during the Department’s standard review. The statewide average rate increase request across all insurers is 7.6%.

For each requested plan, the Department reviewed the contract to see if the plan included all the benefits required by state and federal law, if the rates were reasonable in relation to the benefits, and if the insurer would be able to pay projected claims and expenses. The Department also considered factors such as the insurer’s revenues, medical and administrative

¹ Due to rounding, the percent total, in How it plans to spend your premium section, may not sum to 100%.

costs, actual and projected profits, and past rate changes, as well as the effect the 2025 rate change would have on Pennsylvania consumers.

The Department notes that the 2025 rates have increased by an average of 7.6% compared to the 4.1% average increase approved in 2024. Insurers have cited the following as key drivers of these rate changes:

- Increased hospital, physician, and prescription drug costs;
- Increased anticipated subscriber usage;
- Changes in anticipated risk adjustment amounts (money from a federal program that redistributes funds from plans with lower-risk enrollees to plans with higher-risk enrollees);
- Increased administrative expenses; and
- The base experience claims deviated from expected claim levels.

The resulting average final rate change approved for this insurer is 7.66% ranging from 3.04% to 12.78%.

General Note: An insurer may not increase your rates more than once in a calendar year. Due to insurer movement between counties, employers are encouraged to shop around and compare plans. The change in premium for a specific individual or employer may vary from the average rate change shown in this summary due to plan-specific factors, like the benefit package and provider network used by the plan, as well as four factors specific to the individual or employer/employees: geographic location, age, tobacco use, and family size.

What we consider

Premium is made up of three parts: medical claims, administrative expenses, and profit or loss. We review all of the information in rate filings for individual and small group health plans, including the plans' medical claims, administrative expenses, and projected profit or loss.

A key component used to calculate projected claims is medical trend. Medical trend is the change in claims costs over a specific period of time—usually one to two years—and is often based on both the company's past claims costs and what they expect to spend on claims in the future.

Administrative expenses are any expenses not related to the cost of medical claims; including, but not limited to, employee salaries and benefits, the cost of the company's office and equipment, customer service, appeals costs, taxes, agent commissions, etc.

The company's projected profit (or contribution to surplus) is a small part of the premium. The reasonableness of the projected profit may depend on the company's current surplus level and other factors.

Federal law requires health insurance companies to have a medical loss ratio (MLR) of at least 80%. This means that your insurance company must spend at least 80% of your premium dollars on medical care and activities that improve the quality of care. If your insurance company spends less than 80% on medical care and quality improvement then the company must give you money back in the form of a rebate. A medical loss ratio of 80% indicates that the insurer is using the remaining 20 cents of each premium dollar for administrative costs and profits. The Department does not approve rates in this market that appear likely to result in an MLR of less than 80%.

Glossary

Annual rate change: Companies normally file a rate change each year due to their medical claims experience. The annual rate request may or may not include benefit changes.

Average rate change: The average amount rates will change for all enrollees.

For individual health plans: How much your premium will change depends on your age, where you live, how many family members are covered on your plan, whether or not you or your family members smoke and which benefits you choose

For small employer health plans: The employer's premium will vary based on their employees' age, the employer's location, their employee's family size, and the benefits they choose.

Claims/Medical Costs: What the health plan spends on direct medical services including hospital stays, providers, and prescription drugs.

Individual Plans: Insurance you buy from an insurance company for yourself and/or your dependents; not insurance you get from your employer.

Premium: Under federal law, insurance companies can take into account only four factors when varying your rate in order to set the premium costs you will be charged each month. These four factors are:

- Age: Older people can be charged up to 3 times more for premiums than younger people.
- Geographic location: Where you live has a big effect on your premiums. Competition, local regulation, and cost of living in different areas account for this.
- Tobacco Use: Insurers can charge tobacco users up to 50% more than those who don't use tobacco.
- Individual vs. family enrollment: Insurers can charge more for a plan that covers a spouse and/or dependents.

Profit: The amount of money remaining after the company's claims, administrative expenses, and taxes and fees are paid.

Rate: The rate is the base amount that an insurance company charges a person. An insurance company can increase the base rate depending on four factors in order to calculate the monthly premium that a consumer will be charged. See "Premium."

Rating Area: Federal law requires that each state have a set number of geographic areas that all insurance companies may use to adjust how much they charge consumers. When insurance companies calculate premiums, all enrollees within a rating area will have the same adjustment factor applied. Depending on the rating area you live in the prices you pay may be higher or lower than the state average. Pennsylvania has 9 rating areas. (See the Pennsylvania Geographic Rating Area Map below.)

Small Group Plans: Small group plans are those sold to employers with 1-50 employees.

Surplus: An insurer's funds on hand for which the company has no corresponding liabilities. Insurers maintain a surplus so that they have sufficient funds to withstand adverse business conditions such as unexpectedly high medical claims or low enrollment, and in order to make investments in infrastructure and technology.

Re: **Capital Advantage Assurance Company**
Small Group Rates
Filing No 24-44
TOI Code: H16G Group Health – Major Medical
Sub-TOI Code: H16G.003A Small Group Only – PPO
Filing Type: Rate

Dear Ms. Swartz:

By this filing Capital Blue Cross, on behalf of its wholly owned subsidiary Capital Advantage Assurance Company, submits to the Department Small Group Rates effective January 1, 2025.

The following is a summary of the rate filing:

- Company Name: Capital Advantage Assurance Company (CAAC)
- NAIC: 14411
- Market: Small Group
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2025
- Average Rate Change: 6.7%
- Range of Requested Rate Change: 4.7% to 8.9%
- Total additional annual revenue generated from the proposed rate change: \$18,714,094
- Product: PPO
- Rating Areas: 6,7,9
- Metal Levels: Platinum, Gold, Silver, Bronze
- Current Covered Lives and Policyholders: 32,631/20,574
- 2025 Number of Plans/Change from 2024: 37/No Changes
- Contract Form #: C25-CAAC-SGP
- Form Filing SERFF #: CABC-134095150
- Binder SERFF #: CABC-PA25-125118579
- HIOS Issuer ID: 45127

In support of this filing, I have included an Actuarial Memorandum with supporting exhibits, URRT, Rates Table Template, and PA Plan Design Summary and Rate Tables.

If you have any questions regarding this filing, please call me at [REDACTED] (or via email at [REDACTED]) or [REDACTED] at [REDACTED] ([REDACTED]). Thank you for your assistance in this matter.

Sincerely,

[REDACTED]

Scope and Purpose

By this filing, Capital Advantage Assurance Company (CAAC), a subsidiary of Capital Blue Cross (Capital), submits rates for products to be made available to all small groups effective January 1, 2025.

Rate History and Proposed Variations in Rate Changes

Market	Company	Effective Date	SERFF #	Annual Increase
Small Group	CAAC	1/1/2021	CABC-132352718	-6.9%
Small Group	CAAC	10/1/2021	CABC-132750915	-4.6%
Small Group	CAAC	1/1/2022	CABC-132795876	4.9%
Small Group	CAAC	1/1/2023	CABC-133252091	8.9%
Small Group	CAAC	7/1/2023	CABC-133583495	8.6%
Small Group	CAAC	1/1/2024	CABC-133657260	5.1%

Average Rate Change

CAAC is proposing an aggregate annual 7.7% rate change, which varies by plan. The rate change is calculated in PA Rate Exhibits Part IV, Table 11, cell AN13.

The key drivers of the rate change, and approximate impact, are as follows:

- Future cost and utilization: 6.7%
- 2023 claims net risk adjustment experience: 1.0%

Membership

Membership is shown in PA Rate Exhibits Part I, Table 1. The average age is 38.

Benefit Changes 2024-2025

A summary of proposed 2025 benefits is included in Exhibit A.

There are several benefit changes being implemented in 2025. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and

a new plan was created in its place. Benefit changes by plan are listed in Exhibit B, highlighted in yellow.

Experience Period Premium and Claims

Single Risk Pool: The data used to develop rates and shown in URRT and PA Rate Exhibits abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-grandfathered, non-transitional product/plan combination for CAAC in the small group market.

Base Experience Period: The base experience period (BEP) includes completed fee-for-service paid and incurred claims for dates of service between January 1, 2023 and December 31, 2023.

Transitional membership is not included in PA Rate Exhibits Table 2 or URRT.

Paid Through Date: Claims in the BEP are paid through February 28, 2024

Premiums (net of MLR Rebate) in BEP: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments are equal to zero as CAAC does not expect to refund any MLR rebates in the BEP.

Allowed and Incurred Claims in BEP:

- Allowed claims are developed by combining paid claims with member cost-sharing. Allowed claims meet the definition in the URR instructions. They do not include provider quality incentive payments.
- Incurred claims are net of HHS CSR payments (CSR does not apply to Small Group).
- Capital only covers Essential Health benefits (EHBs).
- CAAC does not include capitated services.
- Allowed and Incurred claims are net of pharmacy rebates. BEP rebates are completed based on actual utilization of rebate-eligible drugs and rebate amounts.

Estimated Incurred but Not Paid Claims: Paid claims by date of service come directly from Capital's data warehouse. The method for calculating incurred claims in the BEP is as follows:

1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g. harmonic averages, time weighted averages, geometric averages) and regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.
4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are

divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.

5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP\ Incurred\ Claims = \sum \frac{BEP\ Paid\ Claims\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

$$BEP\ Allowed\ Claims = \sum \frac{BEP\ Paid\ Claims + BEP\ Member\ Cost\ Share\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

Risk Adjustment in BEP: Risk adjustment amounts in the BEP are equal to the amounts sent by the Department on 7/22/2024.

Loss Ratio in BEP: Loss ratio is 89.15%

Credibility of Data

For the purpose of rate development, CAAC small group products are combined with other product offerings (HMO, PPO) from Capital subsidiaries. Combining the experience is actuarially justifiable for several reasons:

1. The demographics of members buying PPO and other products are similar.
2. Cost and utilization between PPO and other products are similar.
3. Medical policy between PPO and other products are almost identical, with the exception of referrals and no out-of-network benefit on HMO.

The credibility manual PMPMs are the combination of CAAC, Capital Advantage Insurance Company (CAIC), and Keystone Health Plan Central (KHPC) HMO data. The credibility manual BEP includes completed fee-for-service paid and incurred claims and capitation for dates of service between January 1, 2023 and December 31, 2023. All data is trended and benefit-adjusted in the same manner as the experience data (same projection factors and trend).

Trend Identification

Trend: 6.72%

Trend levels reflect Capital's best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. Capital uses the following to project future costs:
 - a. Vendor Physician Cost Model and Internal Hospital Contracting Model
 - i. The medical cost models use best estimates of Capital Blue Cross (Capital)'s future contracting increases with physicians and hospitals. The models use cost estimates based on varying contract effective dates by physician and hospital. All facilities and providers are considered in this modeling effort (i.e. acute and non-acute, network and non-network, inpatient and outpatient, in- area and out-of-area). From there, a monthly anticipated cost (assuming static utilization) summary is produced which can be used in projecting future claims costs. Cost trends are determined at the Capital book of business level for all commercial business.
 - b. Internal Prescription Drug Trend Model
 - i. Price Inflation
 - ii. Contract Pricing
 - iii. Member Cost-Sharing
 - iv. Units per Script
 - v. Brand/Generic Mix
 - vi. Therapeutic Mix
 - vii. Cost per Script
 - viii. Pipeline (new drugs)
2. Utilization Considerations:
 - a. Intensity of medical services rendered
 - b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
 - c. Further migration from brand prescription drugs to generic prescription drugs
 - d. Favorable impacts of value based benefits designs
 - e. Medical utilization estimates reviewed by Capital's Chief Medical Officer
3. Leveraging: The trend model is based on allowed cost increases. Paid claims trend at a higher rate than allowed due to leveraging. Leveraging is the impact of static cost-share, such as deductibles and copays, to the paid trend.
4. Intensity: Measure of cost increase due to change in treatment sophistication. An example is migration from x-rays to MRIs at significantly higher cost.

5. **Underwriting Cycle:** The underwriting cycle is defined as the tendency to swing between profitable and unprofitable periods over time. The underwriting cycle is exacerbated partly by pricing performed with incomplete information as to the level of current experience trends. A reaction delay occurs, as carriers tend to rely on measurements of past experience in developing current pricing assumptions. As a result, carriers are often increasing their pricing trends when actual experience trends have begun to decline, and decreasing their pricing trends actual trends are increasing. Capital strives to mitigate the underwriting cycle by keeping trends consistent through times of increasing and decreasing claim cost and utilization.

Historical Experience: Historical experience was not used to the develop trend.

Benefit Categories: Claims in the benefit categories displayed in URRT come directly from Capital's data warehouse. These same categories are used to develop category-level trend. See Exhibit C for a description of benefits by benefit category.

See Exhibit E for CAAC's pricing trend, as well as cost and utilization components of the pricing trend.

Rate Development & Change

Projection Factors

Changes in Morbidity: Capital does not expect a change in morbidity. The morbidity factor is 1.0.

Changes in Benefits: Benefit changes are not applied to allowed claims as allowed should stay consistent from 2023 to 2025. Benefit changes are applied in the development of future incurred claims, due to changes in member cost-share. This calculation is shown in Exhibit D, and applied in Exhibit G. The manual cost PMPMs are developed from Capital's internal benefit relativity model, discussed in the Plan Adjusted Index Rate section below. The benefit change is equal to member-month weighted average projected manual PMPM divided by member-month weighted average manual PMPM in the BEP. This process is further discussed in the Paid-to-Allowed section below.

In addition to cost-sharing changes, Capital is also implementing two benefit coverage changes.

- **Senate Bill 8:** Coverage of mammographic examinations and diagnostic breast imaging at no cost share. This bill goes into effect for Small Group and Individual policies in 2025, but Capital adopted early compliance and covered the relevant services at no cost share starting in 2024.
 - Capital will continue to adjust plan year 2025 claims by an additional claim PMPM of \$0.20. This amount is unchanged from the additional claim PMPM calculated in 2024.
- **The Mental Health Parity and Addiction Equity Act (MHPAEA)** has expanded definitions of mental health services to include Autism coverage. With this expansion, Capital started coverage of Autism services in the Small Group market starting in 2024.

- Capital will continue to adjust plan year 2025 claims by an additional claim PMPM of \$0.40. This amount is unchanged from the additional claim PMPM calculated in 2024.

The additional claim cost PMPMs are shown on Exhibit D2 – Benefit Additions. Senate Bill 8 only impacts incurred claims (the change is to member cost share), and MHPAEA change impacts both allowed and incurred claims.

Changes in Demographics: CAAC does not expect changes in demographics in its small group population.

Changes in Network: A network adjustment is applied to show the value of changes in network from the BEP to the rating period. The value is calculated as:

$$\begin{aligned} \text{Network Factor} &= ([\text{Projected MM by Plan}] \times [\text{Network Factor by Plan}]) \\ &\div [\text{Total Projected MM}] \end{aligned}$$

The network calculation is found on Exhibit D2 – Network Mix Changes.

Other Adjustments: No other adjustment is applied to the BEP.

Benefits, Demographics, Network and Other adjustments are found in URRT Worksheet 1 and PA Rate Exhibits Table 5.

Index Rate

The experience period index rate is CAAC’s allowed claims PMPM, set in accordance with the single risk pool provision. All CAAC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index.

Projected Allowed Claims: The CAAC experience period allowed claims, benefit-adjusted, trended to the projection period (See Projection Factors section above), and credibility adjusted, is the *Projected Allowed Claims at Current Benefits*. This number is reflected in Worksheet 1 of URRT (“Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)”).

To calculate the projected index rate:

1. Start with *Projected Allowed Claims at Current Benefits*
2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January – December.

See Exhibit J as well as PA Rate Exhibits Table 5 for the Index Rate.

Paid to Allowed Ratio

CAAC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, CAAC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

1. Gather claims experience as described in the Data section above.
 - a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates
 - b. BEP Member Months
2. Develop BEP *Paid and Incurred Claims*:

$$\text{BEP Paid and Incurred Claims} = \frac{\text{BEP Paid Claims}}{\text{Completion Factor}}$$

The development of completion factors is described in Experience Period Premium and Claims above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

$$\text{BEP Paid and Incurred Claim PMPM} = \frac{\text{BEP Paid and Incurred Claims}}{\text{BEP Member Months}}$$

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the Projection Factors section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

Trended Claim PMPM

$$= [\text{BEP Paid and Incurred Claim PMPM}] \times (1 + [\text{Trend}\%])^{\text{Trend Months}/12}$$

5. Develop *Projected Paid and Incurred Claim PMPM*:

$$\begin{aligned} \text{Projected Paid and Incurred Claims PMPM} \\ = [\text{Trended Claim PMPM}] \times [\text{Benefit Adjustment}] \\ \times [\text{Morbidity Adjustment}] + [\text{Benefit Additions}] \end{aligned}$$

The *Benefit Adjustment*, *Morbidity Adjustment*, and *Benefit Additions* are discussed in the Projections Factors section above.

6. Develop *Projected Claims PMPM by Benefit* as follows:

- a. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
- b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

$$\textit{Benefit Level Adjustment} = \frac{\textit{Average Manual Cost in Projection Period}}{\textit{Manual Cost of Base Plan}}$$

- c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

$$\begin{aligned} &\textit{Base Plan Paid and Incurred Claims PMPM} \\ &= \frac{\textit{Benefit Adjusted Paid and Incurred Claims PMPM}}{\textit{Benefit Level Adjustment}} \end{aligned}$$

- d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

$$\textit{Benefit Relativity A} = \frac{\textit{Manual Cost of Benefit A}}{\textit{Manual Cost of Base Plan}}$$

- e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:
 - i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a PPO 2000 and PPO 1000 must be less than \$1000.

- a. So the *Projected Claims PMPM by Benefit* is:

$$\begin{aligned} & \text{Projected Claims PMPM Benefit A} \\ & = \text{Projected Claims PMPM Base Plan} \\ & \times \text{Pricing Relativity A} \end{aligned}$$

- b. And to arrive at the *Total Projected Claims PMPM*, CAAC assumes a distribution of members across the benefit plans being offered in the projection period. The *Total Projected Claims PMPM* :

$$\begin{aligned} = & \text{Projected Claims PMPM Benefit A} \times \text{Expected Member Dist of Benefit A} \\ & + \text{Projected Claims PMPM Benefit B} \\ & \times \text{Expected Member Dis of Benefit B} + \dots \end{aligned}$$

7. The Paid-To-Allowed Ratio is then:

$$\text{Paid to Allowed Ratio} = \frac{\text{Total Projected Claims PMPM}}{\text{Projected Allowed Claims at Current Benefits}}$$

See Exhibit G for the development of the *Paid-to-Allowed Ratio*. And see Exhibit L for the plan-level projected incurred amount development.

Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

$$\begin{aligned} & [\text{Market Adjusted Index Rate}] \\ & = ([\text{Index Rate}] \times [\text{Paid to Allowed Ratio}] \\ & - [\text{Projected Incurred Reinsurance Recoveries}] \\ & - [\text{Projected Incurred Risk Adjustment PMPM}] \\ & + [\text{Exchange Fees PMPM}]) \div [\text{Paid to Allowed Ratio}] \end{aligned}$$

Projected Incurred Risk Adjustments PMPM:

Relevant to 2025 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2025. The following items are those that we deem important in generating a CRA payment transfer adjustment:

1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
2. Statewide average premiums
3. Current market penetration of this company and competitors in the market and in the state
4. 2022-2023 risk adjustment results
5. Market improvement in coding risk: Capital's ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging. Because closing gaps in care and coding, and a myriad of other risk adjustment functions require more than a single year of data to facilitate an accurate depiction of risk, it is

believed that Capital is disadvantaged in the market. This will drive Capital's relative risk to the market down over time.

The 2025 projected risk adjustment amounts are equal to 2023 transfer amounts.

Projected Incurred Reinsurance Recoveries:

Reinsurance does not apply to the small group market.

Exchange Fee PMPM:

CAAC only offers off-exchange plans in the small group market, so the exchange fee is \$0.

Retention Items

Administrative Expense Load:

1. Risk Adjustment User Fee: To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of \$0.22 PMPM. The Risk Adjustment Fee PMPM is included in URRT Worksheet 1, URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.
2. Administrative Expense: Calculated using an allocation method from Capital's Finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large group, small group, individual, and government programs. Using those distributions, all costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to Capital small group products. Administrative expenses are included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Expense as a percentage of premium vary by plan because a fixed dollar admin PMPM is applied to each plan.
 - a. Value-Based Benefits (VBB): Standard with each plan, Capital Blue Cross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
 - i. Complete biometric screening and receive a gift card.
 - ii. Meeting biometric measure or finish online coaching program and receive a gift card reward.
 - iii. The wellness program is administered through a vendor and costs are based on vendor fees, anticipated participation, and reward card amounts.
 - iv. Fees are included in overall administrative expense fee discussed above.

- v. Included in URRT Worksheet 2, “Administrative Expense”, and PA Rate Exhibits Table 6.
3. Broker Expense: Calculated based on Capital’s explicit per contract broker fee. Broker Expense is included in URRT Worksheet 2, “Administrative Expense”, and PA Rate Exhibits Table 6. Brokers are paid on new business and renewals the same commission rate for all geographic locations, enrollment dates, and metal levels. Capital anticipates 2025 contracts to be finalized mid-summer. Until contracts are finalized, Capital will be sending 2024 approved contracts. Attached please find the approved 2024 broker agreements – redacted versions. Files are as follows:
 - a. Redacted Standard Producer Master Agreement: “SG_24-44_Initial_CAAC_PPO_SPMABrokerGroupRedacted_Supporting_20240515.pdf”
 - b. Redacted Preferred Producer Master Agreement: “SG_24-44_Initial_CAAC_PPO_PPMABrokerGroupRedacted_Supporting_20240515.pdf”
4. Additional Quality Improvement: QI amounts applied in rating equal 0.0%. Included in URRT Worksheet 2, “Administrative Expense”, and PA Rate Exhibits Table 6.

Profit (or Contribution to Surplus) & Risk Margin:

5. Contingency: Contingency is included in URRT Worksheet 2, “Profit & Risk Load”, and PA Rate Exhibits Table 6.

Taxes and Fees:

1. Fee for Patient-Centered Outcomes Research Trust Fund (PCORTF): As per the Notice of Proposed Rulemaking for Fees on Health Insurance Policies and Self-Insured Plans for the Patient-Centered Outcomes Research Trust Fund (REG-136008-11), 77 Fed. Reg. 22691: For policy years ending on or after October 1, 2023, and before October 1, 2024, the applicable dollar amount is \$3.22 per member per year (\$0.27 PMPM). Capital assumes the 2025 projected fee will be trended at 0%.
2. Exchange Fee: N/A
3. Federal Income Tax: Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in URRT Worksheet 2, “Taxes and Fees”, and PA Rate Exhibits, Table 6.

See Exhibit H as well as PA Rate Exhibits Table 6 for all retention values.

Plan Adjusted Index Rates

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using CAAC’s actuarial cost model. CAAC uses an actuarial

cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

2. Induced Demand: Induced Demand: Please see Table 8. Induced Demand is calculated as:

$$[\text{Pricing AV}]^2 - [\text{Pricing AV}] + 1.24$$

Where *Pricing AV* is adjusted by the Non-Funding of CSR factor: PA Rate Exhibits, Table 10, column K x column P.

3. Provider Network: CAAC is offering four networks: PPO, PPO Choice (2-tiered PPO), Performance PPO (2-tiered PPO), and PPO Choice Select (2-tiered PPO). The network factors are the same across each plan in the network.
 - a. The PPO Choice tiered design allows members to choose lower cost providers within their region. The product is offered in Adams (7), Berks (7) and Lancaster (7) counties. The network factor is unchanged from 2024 to 2025.
 - b. The Performance PPO tiered design allows members to choose lower cost providers within their region. The product is offered in Franklin (9), Lancaster (7), Lebanon (9), Lehigh (6), Northampton (6), Adams (7) and York (7) counties. The network factor is unchanged from 2024 to 2025.
 - c. The PPO Choice Select tiered design allows members to choose lower cost providers within their region. The product is offered in Cumberland (9), Dauphin (9), Perry (9), and York (7) counties. The network factor is unchanged from 2024 to 2025.

The network factors are shown on Exhibit O – Rating Factors.

4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
5. Adjustment for distribution and administrative costs: Described in Retention Items section above.
6. Tobacco Adjustment: Not applied to Small Group plans.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

Calibrated Plan Adjusted Index Rates

Age Curve Calibration: The average age factor is calculated by taking the member-weighted average of current small group enrollment by age in Capital. Age factors are applied in

accordance with CMS's Standard Age Curve. The age calibration factor is adjusted for contracts with greater than three children under the age of 21. Please see file SG_24-44_Initial_CAAC_PPO_List-Billed_Supporting_20240515.xlsb for the calculation.

Geographic Factor Calibration: The average geographic rating factor is calculated by taking the Capital member-weighted average by region.

Geographic factors are unchanged from 2024.

Tobacco Factor Calibration: Tobacco factor not applied.

The calibration is:

$$[\text{Calibrated Plan Adjusted Index Rate}] = [\text{Plan Adjusted Index Rate}] \div ([\text{Age Curve Calibration}] \times [\text{Geographic Factor Calibration}] \times [\text{Tobacco Factor}])$$

Calibrated Plan Adjusted Index Rates are found on PA Rate Exhibits Table 10.

The calibration factors and development are found on Exhibit N.

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

$$\begin{aligned} [\text{Member – Level Consumer Adjusted Premium Rate}] \\ = [\text{Calibrated Plan Adjusted Index Rate}] \times [\text{Age Factor}] \\ \times [\text{Geographic Factor}] \times [\text{Tobacco Factor}] \end{aligned}$$

2. $[\text{Family Consumer Adjusted Premium Rate}] = \sum[\text{Member – Level Consumer Adjusted Premium Rate}]$

With no more than three child dependents under age 21 taken into account

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. Age and Geographic factors are displayed in Exhibits O.

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

AV Metal Values

Plans: 45127PA0010057, 45127PA0010054, 45127PA0010116, 45127PA0010194, 45127PA0010089, 45127PA0010211 use alternative method 156.135(b)(2) to establish AV. SG_24-44_Initial_CAAC_PPO_UniquePlanDesign_Supporting_20240515 includes a detailed explanation of the approach.

All other AV Metal Values included in URRT Worksheet 2 and PA Rate Exhibits, Table 10 are based on the federally issued AV Calculator.

See find AV screenshots included with this submission:
SG_24-44_Initial_CAAC_PPO_AVScreenPrints_Supporting_CONF_20240515

AV Pricing Values

All AV Pricing values were developed using Capital’s actuarial cost model and actuarial judgment as described in section Paid to Allowed above. Differences in health status are not included.

Projected Loss Ratio

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

Membership Projection

The membership projections found in Worksheet 2 of URRT were developed by assuming steady enrollment and similar distribution to current.

Projected versus Actual MLR

Exhibit R shows a history of projected versus actual MLR and Member Months. Projected comes from the 2020-2022 filings. Actual comes from Table 4.

Calendar Year	MLR		Member Months	
	Actual	Pricing	Actual	Pricing
2020	75.96%	84.40%	367,944	480,000
2021	88.95%	86.10%	348,555	396,615
2022	89.07%	86.53%	445,809	320,527

Claim Cost Projection

Exhibit S shows a history of claim cost projection versus actual from 2020-2023 filings.

Actuarial Statement

I, [REDACTED], ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I, [REDACTED], ASA, MAAA, do hereby certify that:

1. This filing has been prepared in accordance with the following:
 - a. Actuarial Standard of Practice No. 5, “Health and Disability Claims”
 - b. Actuarial Standard of Practice No. 8, “Regulatory Filings for Rates and Financial Projections for Health Plans”
 - c. Actuarial Standard of Practice No. 12, “Risk Classification”
 - d. Actuarial Standard of Practice No. 23, “Data Quality”
 - e. Actuarial Standard of Practice No. 25, “Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage”
 - f. Actuarial Standard of Practice No. 26, “Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans”
 - g. Actuarial Standard of Practice No. 41, “Actuarial Communications”.

2. The index rate is:
 - a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
 - b. Developed in compliance with the applicable Actuarial Standards of Practice.
 - c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
 - d. Neither excessive nor deficient.
 - e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.
3. The percent of total premium that represents essential health benefits included in were calculated in accordance with actuarial standards of practice.
4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary. For any plan requiring an alternative method, the development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.
 - a. The analysis was
 - i. conducted by a member of the American Academy of Actuaries, and
 - ii. performed in accordance with generally accepted actuarial principles and methods.
5. Geographic area rating factors reflect only differences in the costs of delivery and not differences due to population morbidity.
6. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
7. New plans are not considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
8. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2023 Rate Filing Justification.

Data Relevant to the Rate Filing

Table 0. Identify Information

Carrier Name: Capital Advantage Assurance Company
Product(s): PPO and EPO
Market Segment: Small Group
Rate Effective Date: 1/1/2025
Base Period Start Date: 1/1/2023
Date of Most Recent Membership: 2/1/2024

Table 1. Number of Members

Table with 4 columns: Average Age, Member-months Experience Period, Members Current Period (as of 02-01-2024), Member-months Projected Rating Period. Rows include Total, 17-18, 18-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65+, and 999.

** Tables 1, 2 and 4 must include data for all non-grandfathered business (ACA compliant and Transitional)

Table 2. Experience Period Claims and Premiums

Table with 11 columns: Earned Premium, Paid Claims, Ultimate Incurred Claims, Member Months, Estimated Cost Sharing (Member + HHS), Allowed Claims (Non-Capitated), Non-EHB portion of Allowed Claims, Total Prescription Drug Rebates*, Total EHB Capitation, Total Non-EHB Capitation, Estimated Risk Adjustment, Estimated Reinsurance Recoveries.

** Express Prescription Drug Rebates as a negative number

Table 3. Trend Components

Table with 6 columns: Service Category, Cost*, Utilization*, Induced Demand*, Composite UHRT Trend, Weight*. Rows include Inpatient Hospital, Outpatient Hospital, Professional, Other Medical, Capitation, Prescription Drugs, Total Annual Trend, Months of Trend, Total Applied Trend Projection Factor.

* Express Cost, Utilization, Induced Utilization and Weight as percentages

** Should equal UHRT Trend

Table 4. Historical Experience

Large table with 11 columns: Month-Year, Total Annual Premium, Incurred Claims, Completion Factors*, Ultimate Incurred Claims, Members, Ultimate Incurred PMPM, Estimated Annual Cost Sharing (Member + HHS), Prescription Drug Rebates**, Allowed Claims (Net of Prescription Drug Rebates), Allowed PMPM. Rows span from 202001 to 202312.

* Express Completion Factor as a percentage

** Express Prescription Drug Rebates as a negative number

Carrier Name: Capital Advantage Assurance Company
Product(s): PPO and EPO
Market Segment: Small Group
Rate Effective Date: 1/1/2025

Table 2b. Manual Experience Period Claims and Premiums

Table with 11 columns: Earned Premium, Paid Claims, Ultimate Incurred Claims, Member Months, Estimated Cost Sharing (Member & HHS), Allowed Claims (Non-Capitated), Non-EHB portion of Allowed Claims, Total Prescription Drug Rebates*, Total EHB Capitation, Total Non-EHB Capitation, Estimated Risk Adjustment, Estimated Reinsurance Recoveries. Includes a Loss Ratio of 89.18%.

*Express Prescription Drug Rebates as a negative number

Table 3b. Manual Trend Components

Table with 6 columns: Service Category, Cost*, Utilization*, Induced Utilization*, Composite Trend, Weight*. Lists categories like Inpatient Hospital, Outpatient Hospital, Professional, etc.

* Express Cost, Utilization, Induced Utilization and Weight as percentages

Table 4b. Historical Manual Experience

Large table with 12 columns: Month-Year, Total Annual Premium, Incurred Claims, Completion Factors*, Ultimate Incurred Claims, Members, Ultimate Incurred PMPM, Estimated Annual Cost Sharing (Member + HHS), Prescription Drug Rebates**, Allowed Claims (Net of Prescription Drug Rebates), Allowed PMPM. Shows data from 202001 to 202312.

* Express Completion Factor as a percentage

** Express Prescription Drug Rebates as a negative number

The image shows a screenshot of an Excel spreadsheet. At the top, there is a header row with a light blue background, containing several columns of text that are mostly illegible. Below the header, the main body of the spreadsheet is filled with a grid of yellow cells. The grid is organized into several vertical columns, separated by thin vertical lines. The overall appearance is that of a data table or a list of entries.

Overview

Initial Requested Average Rate Change:	6.71%
Revised Requested Average Rate Change:	7.66%
Minimum Requested Rate Change:	3.04%
Maximum Requested Rate Change:	12.78%
Mapped Members:	32,631
Available in Rating Areas:	Rating Areas 6, 7, and 9

Carrier Name:	Capital Advantage Ass
Product(s):	PPO and EPO
Market Segment:	Small Group
Rate Effective Date:	1/1/2025

Key Information

Jan. 2023 - Dec. 2023 Financial Experience

Premium	\$	296,275,623.99
Claims	\$	264,133,824.65
Administrative Expenses	\$	3,889,799.00
Taxes & Fees	\$	1,691,382.00
Company Made After Taxes	\$	26,560,618.34

How It Plans to Spend Your Premium

This is how the company plans to spend the premium it collects in 2025:

Claims:	87.35%
Administrative Expenses:	10.06%
Taxes & Fees:	0.60%
Profit:	2.00%

The company expects its annual medical costs to increase:

6.72%

Explanation of requested rate change:

- Future cost and utilization: 6.7%
- 2023 claims net risk adjustment experience: 1.0%

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

ACTUARIAL MEMORANDUM

Small Group Rates

Effective January 1, 2025

General Information

Company Information

- Company Legal Name: Capital Advantage Assurance Company – CAAC
- State: PA
- HIOS Issuer ID: 45127
- Market: Small Group
- Effective Date: 1/1/2025

PID Company Information

- Company Name: Capital Advantage Assurance Company (CAAC)
- NAIC: 14411
- Market: Small Group
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2025
- Average Rate Change: 7.7%
- Range of Requested Rate Change: 3.0% to 12.8%
- Total additional annual revenue generated from the proposed rate change: \$21,367,977
- Product: PPO
- Rating Areas: 6,7,9
- Metal Levels: Platinum, Gold, Silver, Bronze
- Current Covered Lives and Policyholders: 32,631/20,574
- 2025 Number of Plans/Change from 2024: 37/No Changes
- Contract Form #: C25-CAAC-SGP
- Form Filing SERFF #: CABC-134095150
- Binder SERFF #: CABC-PA25-125118579
- HIOS Issuer ID: 45127

Company Contact Information

- Primary Contact Name: [REDACTED]
- Primary Contact Telephone Number: [REDACTED]
- Primary Contact Email Address: [REDACTED]

Scope and Purpose

By this filing, Capital Advantage Assurance Company (CAAC), a subsidiary of Capital Blue Cross (Capital), submits rates for products to be made available to all small groups effective January 1, 2025.

Rate History and Proposed Variations in Rate Changes

Market	Company	Effective Date	SERFF #	Annual Increase
Small Group	CAAC	1/1/2021	CABC-132352718	-6.9%
Small Group	CAAC	10/1/2021	CABC-132750915	-4.6%
Small Group	CAAC	1/1/2022	CABC-132795876	4.9%
Small Group	CAAC	1/1/2023	CABC-133252091	8.9%
Small Group	CAAC	7/1/2023	CABC-133583495	8.6%
Small Group	CAAC	1/1/2024	CABC-133657260	5.1%

Average Rate Change

CAAC is proposing an aggregate annual 7.7% rate change, which varies by plan. The rate change is calculated in PA Rate Exhibits Part IV, Table 11, cell AN13.

The key drivers of the rate change, and approximate impact, are as follows:

- Future cost and utilization: 6.7%
- 2023 claims net risk adjustment experience: 1.0%

Membership

Membership is shown in PA Rate Exhibits Part I, Table 1. The average age is 38.

Benefit Changes 2024-2025

A summary of proposed 2025 benefits is included in Exhibit A.

There are several benefit changes being implemented in 2025. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and

a new plan was created in its place. Benefit changes by plan are listed in Exhibit B, highlighted in yellow.

Experience Period Premium and Claims

Single Risk Pool: The data used to develop rates and shown in URRT and PA Rate Exhibits abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-grandfathered, non-transitional product/plan combination for CAAC in the small group market.

Base Experience Period: The base experience period (BEP) includes completed fee-for-service paid and incurred claims for dates of service between January 1, 2023 and December 31, 2023.

Transitional membership is not included in PA Rate Exhibits Table 2 or URRT.

Paid Through Date: Claims in the BEP are paid through February 28, 2024

Premiums (net of MLR Rebate) in BEP: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments are equal to zero as CAAC does not expect to refund any MLR rebates in the BEP.

Allowed and Incurred Claims in BEP:

- Allowed claims are developed by combining paid claims with member cost-sharing. Allowed claims meet the definition in the URR instructions. They do not include provider quality incentive payments.
- Incurred claims are net of HHS CSR payments (CSR does not apply to Small Group).
- Capital only covers Essential Health benefits (EHBs).
- CAAC does not include capitated services.
- Allowed and Incurred claims are net of pharmacy rebates. BEP rebates are completed based on actual utilization of rebate-eligible drugs and rebate amounts.

Estimated Incurred but Not Paid Claims: Paid claims by date of service come directly from Capital's data warehouse. The method for calculating incurred claims in the BEP is as follows:

1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g. harmonic averages, time weighted averages, geometric averages) and regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.
4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are

divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.

5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP\ Incurred\ Claims = \sum \frac{BEP\ Paid\ Claims\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

$$BEP\ Allowed\ Claims = \sum \frac{BEP\ Paid\ Claims + BEP\ Member\ Cost\ Share\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

Risk Adjustment in BEP: Risk adjustment amounts in the BEP are equal to the amounts sent by the Department on 7/22/2024.

Loss Ratio in BEP: Loss ratio is 89.15%

Credibility of Data

For the purpose of rate development, CAAC small group products are combined with other product offerings (HMO, PPO) from Capital subsidiaries. Combining the experience is actuarially justifiable for several reasons:

1. The demographics of members buying PPO and other products are similar.
2. Cost and utilization between PPO and other products are similar.
3. Medical policy between PPO and other products are almost identical, with the exception of referrals and no out-of-network benefit on HMO.

The credibility manual PMPMs are the combination of CAAC, Capital Advantage Insurance Company (CAIC), and Keystone Health Plan Central (KHPC) HMO data. The credibility manual BEP includes completed fee-for-service paid and incurred claims and capitation for dates of service between January 1, 2023 and December 31, 2023. All data is trended and benefit-adjusted in the same manner as the experience data (same projection factors and trend).

Trend Identification

Trend: 6.72%

Trend levels reflect Capital's best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. Capital uses the following to project future costs:
 - a. Vendor Physician Cost Model and Internal Hospital Contracting Model
 - i. The medical cost models use best estimates of Capital Blue Cross (Capital)'s future contracting increases with physicians and hospitals. The models use cost estimates based on varying contract effective dates by physician and hospital. All facilities and providers are considered in this modeling effort (i.e. acute and non-acute, network and non-network, inpatient and outpatient, in- area and out-of-area). From there, a monthly anticipated cost (assuming static utilization) summary is produced which can be used in projecting future claims costs. Cost trends are determined at the Capital book of business level for all commercial business.
 - b. Internal Prescription Drug Trend Model
 - i. Price Inflation
 - ii. Contract Pricing
 - iii. Member Cost-Sharing
 - iv. Units per Script
 - v. Brand/Generic Mix
 - vi. Therapeutic Mix
 - vii. Cost per Script
 - viii. Pipeline (new drugs)
2. Utilization Considerations:
 - a. Intensity of medical services rendered
 - b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
 - c. Further migration from brand prescription drugs to generic prescription drugs
 - d. Favorable impacts of value based benefits designs
 - e. Medical utilization estimates reviewed by Capital's Chief Medical Officer
3. Leveraging: The trend model is based on allowed cost increases. Paid claims trend at a higher rate than allowed due to leveraging. Leveraging is the impact of static cost-share, such as deductibles and copays, to the paid trend.
4. Intensity: Measure of cost increase due to change in treatment sophistication. An example is migration from x-rays to MRIs at significantly higher cost.

5. **Underwriting Cycle:** The underwriting cycle is defined as the tendency to swing between profitable and unprofitable periods over time. The underwriting cycle is exacerbated partly by pricing performed with incomplete information as to the level of current experience trends. A reaction delay occurs, as carriers tend to rely on measurements of past experience in developing current pricing assumptions. As a result, carriers are often increasing their pricing trends when actual experience trends have begun to decline, and decreasing their pricing trends actual trends are increasing. Capital strives to mitigate the underwriting cycle by keeping trends consistent through times of increasing and decreasing claim cost and utilization.

Historical Experience: Historical experience was not used to the develop trend.

Benefit Categories: Claims in the benefit categories displayed in URRT come directly from Capital's data warehouse. These same categories are used to develop category-level trend. See Exhibit C for a description of benefits by benefit category.

See Exhibit E for CAAC's pricing trend, as well as cost and utilization components of the pricing trend.

Rate Development & Change

Projection Factors

Changes in Morbidity: Capital does not expect a change in morbidity. The morbidity factor is 1.0.

Changes in Benefits: Benefit changes are not applied to allowed claims as allowed should stay consistent from 2023 to 2025. Benefit changes are applied in the development of future incurred claims, due to changes in member cost-share. This calculation is shown in Exhibit D, and applied in Exhibit G. The manual cost PMPMs are developed from Capital's internal benefit relativity model, discussed in the Plan Adjusted Index Rate section below. The benefit change is equal to member-month weighted average projected manual PMPM divided by member-month weighted average manual PMPM in the BEP. This process is further discussed in the Paid-to-Allowed section below.

In addition to cost-sharing changes, Capital is also implementing two benefit coverage changes.

- **Senate Bill 8:** Coverage of mammographic examinations and diagnostic breast imaging at no cost share. This bill goes into effect for Small Group and Individual policies in 2025, but Capital adopted early compliance and covered the relevant services at no cost share starting in 2024.
 - Capital will continue to adjust plan year 2025 claims by an additional claim PMPM of \$0.20. This amount is unchanged from the additional claim PMPM calculated in 2024.
- **The Mental Health Parity and Addiction Equity Act (MHPAEA)** has expanded definitions of mental health services to include Autism coverage. With this expansion, Capital started coverage of Autism services in the Small Group market starting in 2024.

- Capital will continue to adjust plan year 2025 claims by an additional claim PMPM of \$0.40. This amount is unchanged from the additional claim PMPM calculated in 2024.

The additional claim cost PMPMs are shown on Exhibit D2 – Benefit Additions. Senate Bill 8 only impacts incurred claims (the change is to member cost share), and MHPAEA change impacts both allowed and incurred claims.

Changes in Demographics: CAAC does not expect changes in demographics in its small group population.

Changes in Network: A network adjustment is applied to show the value of changes in network from the BEP to the rating period. The value is calculated as:

$$\begin{aligned} \text{Network Factor} &= ([\text{Projected MM by Plan}] \times [\text{Network Factor by Plan}]) \\ &\div [\text{Total Projected MM}] \end{aligned}$$

The network calculation is found on Exhibit D2 – Network Mix Changes.

Other Adjustments: No other adjustment is applied to the BEP.

Benefits, Demographics, Network and Other adjustments are found in URRT Worksheet 1 and PA Rate Exhibits Table 5.

Index Rate

The experience period index rate is CAAC’s allowed claims PMPM, set in accordance with the single risk pool provision. All CAAC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index.

Projected Allowed Claims: The CAAC experience period allowed claims, benefit-adjusted, trended to the projection period (See Projection Factors section above), and credibility adjusted, is the *Projected Allowed Claims at Current Benefits*. This number is reflected in Worksheet 1 of URRT (“Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)”).

To calculate the projected index rate:

1. Start with *Projected Allowed Claims at Current Benefits*
2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January – December.

See Exhibit J as well as PA Rate Exhibits Table 5 for the Index Rate.

Paid to Allowed Ratio

CAAC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, CAAC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

1. Gather claims experience as described in the Data section above.
 - a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates
 - b. BEP Member Months
2. Develop BEP *Paid and Incurred Claims*:

$$\text{BEP Paid and Incurred Claims} = \frac{\text{BEP Paid Claims}}{\text{Completion Factor}}$$

The development of completion factors is described in Experience Period Premium and Claims above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

$$\text{BEP Paid and Incurred Claim PMPM} = \frac{\text{BEP Paid and Incurred Claims}}{\text{BEP Member Months}}$$

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the Projection Factors section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

Trended Claim PMPM

$$= [\text{BEP Paid and Incurred Claim PMPM}] \times (1 + [\text{Trend}\%])^{\text{Trend Months}/12}$$

5. Develop *Projected Paid and Incurred Claim PMPM*:

$$\begin{aligned} \text{Projected Paid and Incurred Claims PMPM} \\ = [\text{Trended Claim PMPM}] \times [\text{Benefit Adjustment}] \\ \times [\text{Morbidity Adjustment}] + [\text{Benefit Additions}] \end{aligned}$$

The *Benefit Adjustment*, *Morbidity Adjustment*, and *Benefit Additions* are discussed in the Projections Factors section above.

6. Develop *Projected Claims PMPM by Benefit* as follows:

- a. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
- b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

$$\text{Benefit Level Adjustment} = \frac{\text{Average Manual Cost in Projection Period}}{\text{Manual Cost of Base Plan}}$$

- c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

$$\begin{aligned} &\text{Base Plan Paid and Incurred Claims PMPM} \\ &= \frac{\text{Benefit Adjusted Paid and Incurred Claims PMPM}}{\text{Benefit Level Adjustment}} \end{aligned}$$

- d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

$$\text{Benefit Relativity A} = \frac{\text{Manual Cost of Benefit A}}{\text{Manual Cost of Base Plan}}$$

- e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:
 - i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a PPO 2000 and PPO 1000 must be less than \$1000.
- a. So the *Projected Claims PMPM by Benefit* is:

$$\begin{aligned} & \text{Projected Claims PMPM Benefit A} \\ & = \text{Projected Claims PMPM Base Plan} \\ & \times \text{Pricing Relativity A} \end{aligned}$$

- b. And to arrive at the *Total Projected Claims PMPM*, CAAC assumes a distribution of members across the benefit plans being offered in the projection period. The *Total Projected Claims PMPM* :

$$\begin{aligned} = & \text{Projected Claims PMPM Benefit A} \times \text{Expected Member Dist of Benefit A} \\ & + \text{Projected Claims PMPM Benefit B} \\ & \times \text{Expected Member Dis of Benefit B} + \dots \end{aligned}$$

7. The Paid-To-Allowed Ratio is then:

$$\text{Paid to Allowed Ratio} = \frac{\text{Total Projected Claims PMPM}}{\text{Projected Allowed Claims at Current Benefits}}$$

See Exhibit G for the development of the *Paid-to-Allowed Ratio*. And see Exhibit L for the plan-level projected incurred amount development.

Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

$$\begin{aligned} & [\text{Market Adjusted Index Rate}] \\ & = ([\text{Index Rate}] \times [\text{Paid to Allowed Ratio}] \\ & - [\text{Projected Incurred Reinsurance Recoveries}] \\ & - [\text{Projected Incurred Risk Adjustment PMPM}] \\ & + [\text{Exchange Fees PMPM}]) \div [\text{Paid to Allowed Ratio}] \end{aligned}$$

Projected Incurred Risk Adjustments PMPM:

Relevant to 2025 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2025. The following items are those that we deem important in generating a CRA payment transfer adjustment:

1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
2. Statewide average premiums
3. Current market penetration of this company and competitors in the market and in the state
4. 2022-2023 risk adjustment results
5. Market improvement in coding risk: Capital's ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging. Because closing gaps in care and coding, and a myriad of other risk adjustment functions require more than a single year of data to facilitate an accurate depiction of risk, it is

believed that Capital is disadvantaged in the market. This will drive Capital's relative risk to the market down over time.

The 2025 projected risk adjustment amounts are equal to 2023 transfer amounts.

Projected Incurred Reinsurance Recoveries:

Reinsurance does not apply to the small group market.

Exchange Fee PMPM:

CAAC only offers off-exchange plans in the small group market, so the exchange fee is \$0.

Retention Items

Administrative Expense Load:

1. Risk Adjustment User Fee: To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of \$0.22 PMPM. The Risk Adjustment Fee PMPM is included in URRT Worksheet 1, URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.
2. Administrative Expense: Calculated using an allocation method from Capital's Finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large group, small group, individual, and government programs. Using those distributions, all costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to Capital small group products. Administrative expenses are included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Expense as a percentage of premium vary by plan because a fixed dollar admin PMPM is applied to each plan.
 - a. Value-Based Benefits (VBB): Standard with each plan, Capital Blue Cross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
 - i. Complete biometric screening and receive a gift card.
 - ii. Meeting biometric measure or finish online coaching program and receive a gift card reward.
 - iii. The wellness program is administered through a vendor and costs are based on vendor fees, anticipated participation, and reward card amounts.
 - iv. Fees are included in overall administrative expense fee discussed above.

- v. Included in URRT Worksheet 2, “Administrative Expense”, and PA Rate Exhibits Table 6.
3. Broker Expense: Calculated based on Capital’s explicit per contract broker fee. Broker Expense is included in URRT Worksheet 2, “Administrative Expense”, and PA Rate Exhibits Table 6. Brokers are paid on new business and renewals the same commission rate for all geographic locations, enrollment dates, and metal levels. Capital anticipates 2025 contracts to be finalized mid-summer. Until contracts are finalized, Capital will be sending 2024 approved contracts. Attached please find the approved 2024 broker agreements – redacted versions. Files are as follows:
 - a. Redacted Standard Producer Master Agreement: “SG_24-44_Initial_CAAC_PPO_SPMABrokerGroupRedacted_Supporting_20240515.pdf”
 - b. Redacted Preferred Producer Master Agreement: “SG_24-44_Initial_CAAC_PPO_PPMABrokerGroupRedacted_Supporting_20240515.pdf”
4. Additional Quality Improvement: QI amounts applied in rating equal 0.0%. Included in URRT Worksheet 2, “Administrative Expense”, and PA Rate Exhibits Table 6.

Profit (or Contribution to Surplus) & Risk Margin:

5. Contingency: Contingency is included in URRT Worksheet 2, “Profit & Risk Load”, and PA Rate Exhibits Table 6.

Taxes and Fees:

1. Fee for Patient-Centered Outcomes Research Trust Fund (PCORTF): As per the Notice of Proposed Rulemaking for Fees on Health Insurance Policies and Self-Insured Plans for the Patient-Centered Outcomes Research Trust Fund (REG-136008-11), 77 Fed. Reg. 22691: For policy years ending on or after October 1, 2023, and before October 1, 2024, the applicable dollar amount is \$3.22 per member per year (\$0.27 PMPM). Capital assumes the 2025 projected fee will be trended at 0%.
2. Exchange Fee: N/A
3. Federal Income Tax: Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in URRT Worksheet 2, “Taxes and Fees”, and PA Rate Exhibits, Table 6.

See Exhibit H as well as PA Rate Exhibits Table 6 for all retention values.

Plan Adjusted Index Rates

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using CAAC’s actuarial cost model. CAAC uses an actuarial

cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

2. Induced Demand: Induced Demand: Please see Table 8. Induced Demand is calculated as:

$$[\text{Pricing AV}]^2 - [\text{Pricing AV}] + 1.24$$

Where *Pricing AV* is adjusted by the Non-Funding of CSR factor: PA Rate Exhibits, Table 10, column K x column P.

3. Provider Network: CAAC is offering four networks: PPO, PPO Choice (2-tiered PPO), Performance PPO (2-tiered PPO), and PPO Choice Select (2-tiered PPO). The network factors are the same across each plan in the network.
 - a. The PPO Choice tiered design allows members to choose lower cost providers within their region. The product is offered in Adams (7), Berks (7) and Lancaster (7) counties. The network factor is unchanged from 2024 to 2025.
 - b. The Performance PPO tiered design allows members to choose lower cost providers within their region. The product is offered in Franklin (9), Lancaster (7), Lebanon (9), Lehigh (6), Northampton (6), Adams (7) and York (7) counties. The network factor is unchanged from 2024 to 2025.
 - c. The PPO Choice Select tiered design allows members to choose lower cost providers within their region. The product is offered in Cumberland (9), Dauphin (9), Perry (9), and York (7) counties. The network factor is unchanged from 2024 to 2025.

The network factors are shown on Exhibit O – Rating Factors.

4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
5. Adjustment for distribution and administrative costs: Described in Retention Items section above.
6. Tobacco Adjustment: Not applied to Small Group plans.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

Calibrated Plan Adjusted Index Rates

Age Curve Calibration: The average age factor is calculated by taking the member-weighted average of current small group enrollment by age in Capital. Age factors are applied in

accordance with CMS's Standard Age Curve. The age calibration factor is adjusted for contracts with greater than three children under the age of 21. Please see file SG_24-44_Initial_CAAC_PPO_List-Billed_Supporting_20240515.xlsb for the calculation.

Geographic Factor Calibration: The average geographic rating factor is calculated by taking the Capital member-weighted average by region.

Geographic factors are unchanged from 2024.

Tobacco Factor Calibration: Tobacco factor not applied.

The calibration is:

$$[\text{Calibrated Plan Adjusted Index Rate}] = [\text{Plan Adjusted Index Rate}] \div ([\text{Age Curve Calibration}] \times [\text{Geographic Factor Calibration}] \times [\text{Tobacco Factor}])$$

Calibrated Plan Adjusted Index Rates are found on PA Rate Exhibits Table 10.

The calibration factors and development are found on Exhibit N.

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

$$\begin{aligned} [\text{Member – Level Consumer Adjusted Premium Rate}] \\ &= [\text{Calibrated Plan Adjusted Index Rate}] \times [\text{Age Factor}] \\ &\times [\text{Geographic Factor}] \times [\text{Tobacco Factor}] \end{aligned}$$

2. $[\text{Family Consumer Adjusted Premium Rate}] = \sum[\text{Member – Level Consumer Adjusted Premium Rate}]$

With no more than three child dependents under age 21 taken into account

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. Age and Geographic factors are displayed in Exhibits O.

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

AV Metal Values

Plans: 45127PA0010057, 45127PA0010054, 45127PA0010116, 45127PA0010194, 45127PA0010089, 45127PA0010211 use alternative method 156.135(b)(2) to establish AV. SG_24-44_Initial_CAAC_PPO_UniquePlanDesign_Supporting_20240515 includes a detailed explanation of the approach.

All other AV Metal Values included in URRT Worksheet 2 and PA Rate Exhibits, Table 10 are based on the federally issued AV Calculator.

See find AV screenshots included with this submission:

SG_24-44_Initial_CAAC_PPO_AVScreenPrints_Supporting_CONF_20240515

AV Pricing Values

All AV Pricing values were developed using Capital’s actuarial cost model and actuarial judgment as described in section Paid to Allowed above. Differences in health status are not included.

Projected Loss Ratio

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

Membership Projection

The membership projections found in Worksheet 2 of URRT were developed by assuming steady enrollment and similar distribution to current.

Projected versus Actual MLR

Exhibit R shows a history of projected versus actual MLR and Member Months. Projected comes from the 2020-2022 filings. Actual comes from Table 4.

Calendar Year	MLR		Member Months	
	Actual	Pricing	Actual	Pricing
2020	75.96%	84.40%	367,944	480,000
2021	88.95%	86.10%	348,555	396,615
2022	89.07%	86.53%	445,809	320,527

Claim Cost Projection

Exhibit S shows a history of claim cost projection versus actual from 2020-2023 filings.

Actuarial Statement

I, [REDACTED], ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I, [REDACTED], ASA, MAAA, do hereby certify that:

1. This filing has been prepared in accordance with the following:
 - a. Actuarial Standard of Practice No. 5, “Health and Disability Claims”
 - b. Actuarial Standard of Practice No. 8, “Regulatory Filings for Rates and Financial Projections for Health Plans”
 - c. Actuarial Standard of Practice No. 12, “Risk Classification”
 - d. Actuarial Standard of Practice No. 23, “Data Quality”
 - e. Actuarial Standard of Practice No. 25, “Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage”
 - f. Actuarial Standard of Practice No. 26, “Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans”
 - g. Actuarial Standard of Practice No. 41, “Actuarial Communications”.

2. The index rate is:
 - a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
 - b. Developed in compliance with the applicable Actuarial Standards of Practice.
 - c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
 - d. Neither excessive nor deficient.
 - e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.
3. The percent of total premium that represents essential health benefits included in were calculated in accordance with actuarial standards of practice.
4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary. For any plan requiring an alternative method, the development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.
 - a. The analysis was
 - i. conducted by a member of the American Academy of Actuaries, and
 - ii. performed in accordance with generally accepted actuarial principles and methods.
5. Geographic area rating factors reflect only differences in the costs of delivery and not differences due to population morbidity.
6. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
7. New plans are not considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
8. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2023 Rate Filing Justification.

2025 Rates Table Template v14.0

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
 If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
 If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
 If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
 To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2025 Rates Table Template v14.0

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
 If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
 If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
 If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
 To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

HIOS Issuer ID*	45127
Rate Effective Date*	7/1/2025
Rate Expiration Date*	9/30/2025
Rating Method*	Age-Based Rates

Plan ID*	Rating Area ID*	Tobacco*	Age*	Individual Rate*

2025 Rates Table Template v14.0																								
All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.																								
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.																								
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.																								
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.																								
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.																								
<table border="1"> <tr> <td>HIOS Issuer ID*</td> <td>45127</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Rate Effective Date*</td> <td>10/1/2025</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Rate Expiration Date*</td> <td>12/31/2025</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Rating Method*</td> <td>Age-Based Rates</td> <td></td> <td></td> <td></td> </tr> </table>					HIOS Issuer ID*	45127				Rate Effective Date*	10/1/2025				Rate Expiration Date*	12/31/2025				Rating Method*	Age-Based Rates

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

Standard Questions Small Group Rates Effective January 1, 2025

Question 1 – Membership. If the projected membership for plan year 2025 significantly differs from the current 2/1/2024 membership, please explain why.

Answer 1. The projected membership for plan year 2025 does not significantly differ from the current 2/1/2024 membership.

Question 2 – Experience Period Claims.

- a. Please confirm that all claims which are capitated have been removed from the experience period claims.
- b. Please confirm that all non-EHB claims have been removed from the experience period claims.
- c. How are drug rebates projected to change from the base period to the rating period? How has this change been reflected in the rate development?

Answer 2.

- a. I confirm that all claims which are capitated have been removed from the experience period claims.
- b. I confirm that all non-EHB claims have been removed from the experience period claims.
- c. Drug rebates are projected to be trended at the drug trend. This change has been reflected in the rate development in Exhibit G_PdtoAll. Paid and allowed claims are net of rebates similar to the URRT.

Question 3 – COVID.

- a. Please confirm that Tables 2-4 of the PAAM Exhibits do not have any COVID adjustment. Additionally, please confirm that any COVID adjustment factor in the filing is reflected in Table 5 of the PAAM Exhibits.
- b. If there is a COVID adjustment other than 1.0, please provide a quantitative exhibit supporting the factor.
- c. Please provide commentary on how the Company believes services such as COVID vaccinations and COVID testing will be handled in PY25. Within your response, please clarify if these services will be considered preventative and covered at 100%.

Answer 3.

- a. I confirm that Tables 2-4 of the PAAM Exhibits do not have any COVID adjustment. I also confirm that any COVID adjustment factor in the filing is reflected in Table 5 of the PAAM Exhibits.
- b. There are no adjustments in the rate dev due to COVID.

- c. Capital will revert to handling COVID testing by application of normal benefits and cost sharing. Coverage for OTC COVID tests will be discontinued. COVID vaccinations will be covered as part of the preventive benefit at 100%.

Question 4 – Trend.

- a. [SG Only] If the Total Annual Trend in Table 3 (weighted by credibility) and the Annual Trend used to calculate quarterly rates in Table 5A differ, please provide an explanation and exhibit in support of the variation.
- b. [SG Only] In Table 5A, if cells K32:M32 are left to equal J32, please explain why that is a reasonable assumption.

Answer 4.

- a. The Total Annual Trend in Table 3 (weighted by credibility) and the Annual Trend used to calculate the quarterly rates in Table 5A do not differ.
- b. Because the year 1 and year 2 trends are almost identical, Capital assumes the year 3 trend will be similar to the year 1 and year 2 trends. Therefore, the trend amounts in cells K32:M32 of Table 5A can reasonably remain equal to J32.

Question 5 – Retention.

- a. Please confirm that the federal income tax is calculated using a Federal Income Tax Rate of 21%. If other adjustments were made in Table 6, cell C57, please provide a demonstration of how this number was calculated and an explanation of the other adjustments included in the calculation.
- b. Please confirm that the Risk Adjustment User Fee PMPM is consistent with HHS Final Notice of Benefit and Payment Parameters for plan year 2025.
- c. Please provide an exhibit showing the commission PMPM amount to be paid to brokers in the following situations: Open-Enrollment Enrollee – Renewing, Open Enrollment Enrollee – New, Special Enrollment Period Enrollee – New, Special Enrollment Enrollee – Renewing. If the commission PMPM is not consistent between the four options above, please provide a detailed explanation as to the reason for the difference.

Answer 5.

- a. I confirm that the federal income tax is calculated using a Federal Income Tax Rate of 21%.
- b. I confirm that the Risk Adjustment User Fee PMPM is consistent with the HHS Final Notice of Benefit and Payment Parameters for plan year 2025.
- c. N/A for Small Group

Question 6 – Pricing AVs.

- a. Please confirm that the Pricing AVs were calculated using a single risk pool (i.e., claims/utilization experience is not separated by metal level).
- b. Please identify and support any differences between the company's metallic AV calculator results and the corresponding Pricing AVs.

Answer 6.

- a. I confirm that the Pricing AVs were calculated using a single risk pool.
- b. Capital uses Milliman, Inc. Health Cost Guidelines Commercial Rating Structures (for active employees) to develop benefit relativities, which translate into pricing AVs. Below, I am pulling from Milliman’s methodology description. Anything in quotations is directly from Milliman, Inc.

“Milliman utilizes an enrollment and utilization database of full medical and prescription drug claims experience for over 78 million lives, of which approximately 41 million lives were selected and used as the primary source in developing the [model]. Other sources include a database of inpatient admission representing a large percentage of all admissions nationwide, retail pharmacy information, and other reference data sources.” CBC adjusts nationwide data to CBC’s average costs and contracting in our service area.

Capital uses the actuarial cost model noted above to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

The reference to actuarial judgment in the memorandum is a general statement to show that the model is evaluated regularly to ensure pricing relativities are reasonable. For this filing, all pricing AVs are developed in the Milliman model.

The pricing AV is calculated relative to the paid-to-allowed ratio. It is important to note that the average pricing AV in Table 10 matches the pricing AV calculated in Exhibit G, so rates are not inflated. Relativities are developed from Capital’s manual cost model.

Question 7 – Expanded Bronze Plans. Please provide an exhibit which demonstrates that the criteria for expanded bronze plans have been met.

Answer 7. Please see the following file for an exhibit which demonstrates that expanded bronze plans have been met.

“SG_24-44_Initial_CAAC_PPO_ExpandedBronze_Supporting_20240515.xlsx”

Question 8 – PAAM Exhibits – Consumer Factors.

- a. Please provide quantitative and qualitative support for the proposed geographic rating area factors, if different from the previous year.
- b. Please provide quantitative and qualitative support for the proposed network factors, if different from the previous year.

Answer 8.

- a. The proposed 2025 geographic rating area factors are unchanged from the 2024 factors.
- b. The proposed 2025 network factors are unchanged from the 2024 factors.

Question 9 – MLR Exhibit.

- a. Please complete table below which summarizes the most recent three years of complete MLR information.
 - i. Actual is the final information which was filed for the specified calendar year
 - ii. Projected is the information which was projected in the final annual filing for the given year (i.e., 2021 pricing information is from the plan year 2021 annual filing submitted in 2020)
- b. Are the MLRs and Member Months between Actual and Pricing comparable? If not, explain.
- c. Does the insurer expect to pay MLR rebates for the 3-year period above?

Answer 9.

- a. The MLR Exhibit is below:

Calendar Year	MLR		Member Months	
	Actual	Pricing	Actual	Pricing
2020	75.96%	84.40%	367,944	480,000
2021	88.95%	86.10%	348,555	396,615
2022	89.07%	86.53%	445,809	320,527

- b. The 2020 difference is due to COVID claim suppression but it is also impacted by risk adjustment, and the applied morbidity factor. 2021 has better risk adjustment estimates which explains the closer actual MLR and member months to pricing. 2022 member month differences is due to Capital’s plans being priced more competitively compared to other companies in our rating areas.
- c. CAAC does not expect to refund any MLR rebates in the BEP.

Question 10 – Plan of Withdrawal.

- a. Please confirm that a Plan of Withdrawal has been submitted if any plans are being discontinued. For further information regarding the Plan of Withdrawal process, click here. Please send all Plan of Withdrawals to Jeffery Rohaly, wrohaly@pa.gov.

Answer 10

- a. I confirm that a Plan of Withdrawal has been submitted for discontinued plans.

Question 11 – Transitional Plans.

- a. Starting in October 2024, the PID will discontinue the non-enforcement policy for individual transitional plans (the non-enforcement policy for small group transitional plans will continue until further notice, or until the federal government discontinues its non-enforcement policy). If applicable, please discuss the migration of individual transitional members into ACA-compliant plans effective January 1, 2025.

Answer 11

- a. N/A

Question 12 – Copay Adjustment Programs.

- a. Does the company use a copay adjustment program (also known as a copay accumulator program)?
- b. How does the company handle copay assistance coupons? For example, does the coupon apply to the MOOP?
- c. If any change to such a program has resulted in a pricing impact, please include a detailed quantitative exhibit supporting the pricing impact.

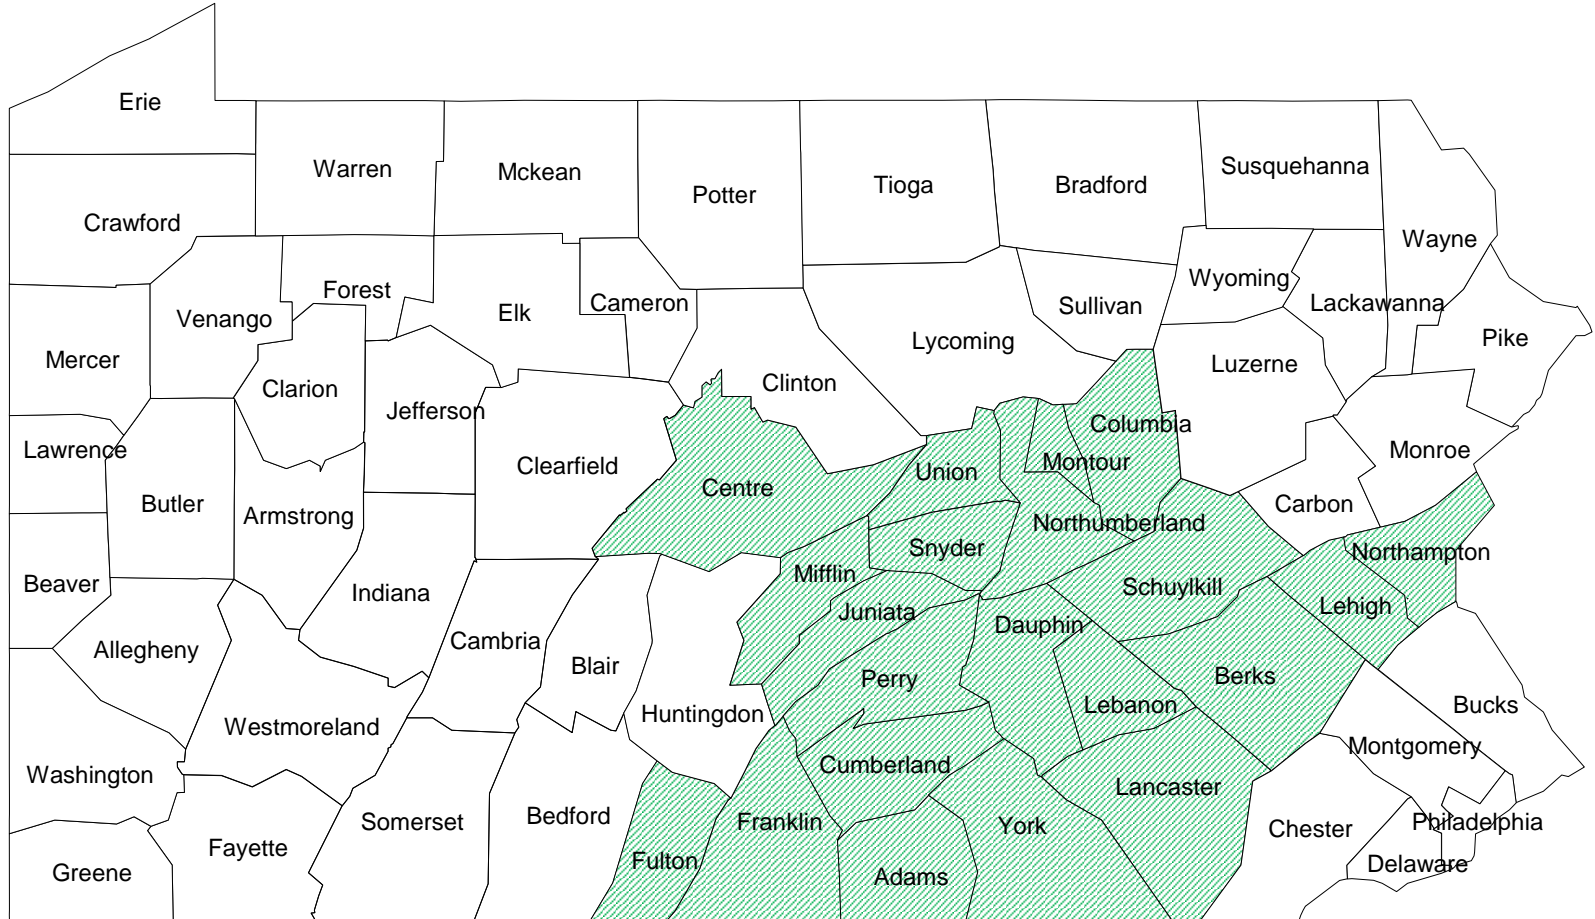

Answer 12

- a. Capital will be using a copay accumulator program for plan year 2025.
- b. Coupons do not apply to the MOOP.
- c. Capital started the copay accumulator program in 2024. Since the 2025 plan year filing uses 2023 BEP, Capital does not have sufficient data to make pricing conclusions. The assumed pricing impact in the 2025 filings is 0%.

Small Group Rates
Filing No 24-44
TOI Code: H16G Group Health – Major Medical
Sub-TOI Code: H16G.003A Small Group Only – PPO
Filing Type: Rate

Dear Ms. Swartz:

CAAC received an objection letter from the Department dated June 5, 2024. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Revised rate development workbook
- Revised PAAM exhibits
- Revised rates (PA and Federal templates)
- Revised memos
- Revised URRT

All changes are due to PID requests/questions and have been disclosed in the Q&A written response. Additionally, below is a summary of changes:

- Question 1: Correction to Risk Adjustment User Fee PMPMs.
- Question 5: Correction to Benefits in Addition to EHB on Table 8.
- Question 9: Correction to pricing relativities.

If you have any questions regarding this filing, please call me at [REDACTED] (or via email at [REDACTED]) or [REDACTED] at [REDACTED] ([REDACTED]). Thank you for your assistance in this matter.

Sincerely,

[REDACTED]

[REDACTED], ASA, MAAA

[REDACTED], Associate General Counsel

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

Question and Answer Small Group Rates Effective January 1, 2025

Question 1. Please change the HHS risk adjustment fee to be \$0.18 PMPM.

Answer 1. The risk adjustment fee has been changed in the Rate Dev as well as the Actuarial Memorandum.

Question 2. Please remove the formula for the exchange user fee PMPM from the “Exchange Fee PMPM” section of the Actuarial Memorandum since it does not apply in the SG market.

Answer 2. The “Exchange Fee PMPM” has been updated in the Actuarial Memorandum to remove the formula.

Question 3. The following objections pertain to the “Exhibit D2_BenAdd” tab in the “SG_24-44_Initial_CAAC_PPO_RateDev_Supporting_20240515” workbook:

- a. Please provide a detailed quantitative exhibit that supports the \$0.20 Additional Claim PMPM for coverage of mammographic examinations and diagnostic breast imaging at no cost share.
- b. Please provide a detailed quantitative exhibit that supports the \$0.40 Additional Claim PMPM for adding autism coverage.

Answer 3.

- a. Please see the supporting file “SG_24-44_Initial_CAAC_PPO_SenateBill8_Supporting_20240619.xlsm” for support of the \$0.20 Additional Claim PMPM. This is the same file sent with last year’s filing. The PMPM is unchanged from last year.
- b. Please see the supporting file “SG_24-44_Initial_CAAC_PPO_AutismDefinition_Supporting_20240619.xlsx” for support of the \$0.40 Additional Claim PMPM. This is the same file sent with last year’s filing. The PMPM is unchanged from last year.

Question 4. At the bottom of Page 9 in the Actuarial Memorandum under section “Paid to Allowed Ratio”, it is stated that “This pricing relativity is developed using actuarial judgement including the following considerations: ii. Adjustments for plan designs that fall outside of the actuarial cost model.” Please provide a detailed narrative explaining what part of the plan design would fall outside of the actuarial cost model and how CAAC is adjusting for them.

Answer 4. This was a statement that we needed in prior versions of the actuarial cost model, but as of current, we do not need to make adjustments outside the model. The Actuarial Memorandum has been updated to reflect this change.

Question 5. Section E and F of Table 8 in the PAAME do not match Section E and F of Table 8 in the ACA Supporting Rate Exhibits workbook. Please identify which Table 8 is correct and make the appropriate changes.

Answer 5. The Rate Dev and the PAAM Exhibits have been updated to fix the disconnect of Table 8.

Question 6. Based on the “Projected versus Actual MLR” section of the Actuarial Memorandum, please provide a detailed narrative on why CAAC believes the actual member months in 2022 were so much greater than the pricing assumption.

Answer 6. 2022 member month differences is due to Capital’s plans being priced more competitively compared to other companies in our rating areas. In addition, Capital saw an increase in actual member months in 2022 due to a competitor leaving the Small Group market.

Question 7. Under the “Projected Incurred Risk Adjustments PMPM” section of the Actuarial Memorandum it states that “Capital’s ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging.” What does CAAC believe the churn rate has been each year over the past 5 years? Please provide a detailed quantitative exhibit that supports the churn rate.

Answer 7. Please see Q&A Exhibit 1 for the churn rate of the Small Group market.

Question 8. Please provide a detailed quantitative exhibit that supports a completion factor of 0.8908 for December 2023.

Answer 8. Historically, a completion factor of around 89% is not abnormal for the last month of the annual rate filings, with two months of runout. It is important to note that claims increased during the BEP with runout through May 2024. Our updated completion factors with ultimate incurred claims through May 2024, would have yielded a 2023 completion factor of 97.08% instead of the current 97.53%.

Please see Q&A Exhibit 2 for the monthly completion factor breakout during the BEP.

Question 9. The following objections pertain to Table 10 of the PAAME:

- a. In comparing the metallic AV to the pricing AV, it is noted that for a couple of plans, the metallic AV is greater than the pricing AV. Please provide a detailed narrative as to why the following silver plans have a Metallic AV greater than the Pricing AV. Please be sure to include reference to any plan design differences that have caused this situation to occur.
 - i. Plan 39 – Silver QHDHP-E PPO 5300/0/15
 - ii. Plan 43 – Silver QHDHP-E PPO 3750/0/25
 - iii. Bronze QHDHP-E PPO 6900/0/0
 - iv. Bronze PPO 9200/0/0
- b. Please provide a detailed narrative on the reason each of the 4 Platinum plans have a Pricing AV greater than 10 percentage points higher than their corresponding Metallic AVs.

- c. Please provide a detailed narrative on the reason that each of the following Gold plans have a Pricing AV more than 10% greater than the Metallic AV.
- i. Plan 9 – Gold PPO 1000/0/20 Rx 250
 - ii. Plan 10 – Gold PPO 1000/0/20 Rx 0
 - iii. Plan 13 – Gold PPO 500/0/25 Rx 250
 - iv. Plan 14 – Gold PPO 500/0/25 Rx 0
 - v. Plan 19 – Gold QHDHP PPO 2000/0/10

Answer 9. The pricing AV is calculated relative to the paid-to-allowed ratio. So as an example, if a platinum plan has a pricing AV of 1.045 and the paid-to-allowed ratio is 0.837, the benefits are $1.045 / .837 - 1 = 25\%$ richer than the average plan in the projection period. It is important to note that the average pricing AV in Table 10 matches the pricing AV calculated in Exhibit G, so rates are not inflated. Relativities are developed from Capital’s manual cost model.

This first paragraph explains why pricing AV can be higher than metallic AV in general. Secondly, I think the best way to compare pricing AV to metallic AV is to compare the relativities between plans. If we take the plans listed above, you can see that the relativity using pricing AV and metallic AV are similar for most plans. Given the differences between Capital’s pricing model and the AV calculator, these answers are within a reasonable range. Some exceptions noted during this review are Gold PPO 500/0/25 Rx 250, Gold PPO 500/0/25 Rx 0, Silver QHDHP-E PPO 3750/0/25, Silver QHDHP-E PPO 5300/0/15, Bronze QHDHP-E PPO 6900/0/0, and Bronze PPO 9200/0/0. These plans have greater variances than we expected between metallic AV and pricing AV.

HIOS	Description	AV	Pricing AV	AV Relativity	Pricing AV Relativity
45127PA0010055	Platinum PPO 0/0/15 Rx 0	91%	105%	100%	100%
45127PA0010058	Platinum PPO 250/0/15 Rx 0	91%	103%	99%	99%
45127PA0010057	Platinum PPO 250/0/15 Rx 250	88%	100%	97%	96%
45127PA0010054	Platinum PPO 0/0/15 Rx 250	88%	101%	96%	97%
45127PA0010085	Gold PPO 1000/0/20 Rx 0	82%	95%	90%	91%
45127PA0010117	Gold PPO 500/0/25 Rx 0	81%	98%	88%	94%
45127PA0010084	Gold PPO 1000/0/20 Rx 250	79%	92%	87%	88%
45127PA0010161	Gold QHDHP PPO 2000/0/10	79%	89%	86%	85%
45127PA0010116	Gold PPO 500/0/25 Rx 250	78%	94%	86%	90%
45127PA0010214	Silver QHDHP-E PPO 3750/0/25	69%	67%	76%	64%
45127PA0010210	Silver QHDHP-E PPO 5300/0/15	68%	66%	75%	63%
45127PA0010135	Bronze QHDHP-E PPO 6900/0/0	64%	63%	70%	60%
45127PA0010213	Bronze PPO 9200/0/0	60%	52%	65%	50%

In order to correct the pricing relativities of these plans, CAAC is recommending changes to the plans that yield the following pricing AV relativity:

HIOS	Description	AV	Pricing AV	AV Relativity	Pricing AV Relativity
45127PA0010055	Platinum PPO 0/0/15 Rx 0	91%	104%	100%	100%
45127PA0010058	Platinum PPO 250/0/15 Rx 0	91%	103%	99%	99%
45127PA0010057	Platinum PPO 250/0/15 Rx 250	88%	100%	97%	96%
45127PA0010054	Platinum PPO 0/0/15 Rx 250	88%	101%	96%	97%
45127PA0010085	Gold PPO 1000/0/20 Rx 0	82%	95%	90%	91%
45127PA0010117	Gold PPO 500/0/25 Rx 0	81%	95%	88%	91%
45127PA0010084	Gold PPO 1000/0/20 Rx 250	79%	92%	87%	88%
45127PA0010161	Gold QHDHP PPO 2000/0/10	79%	89%	86%	85%
45127PA0010116	Gold PPO 500/0/25 Rx 250	78%	91%	86%	87%
45127PA0010214	Silver QHDHP-E PPO 3750/0/25	69%	71%	76%	68%
45127PA0010199	Silver QHDHP-E PPO 4500/0/10	69%	71%	75%	68%
45127PA0010210	Silver QHDHP-E PPO 5300/0/15	68%	70%	75%	67%
45127PA0010135	Bronze QHDHP-E PPO 6900/0/0	64%	66%	70%	63%
45127PA0010213	Bronze PPO 9200/0/0	60%	56%	65%	53%

As you can see, we have lowered the price of the Gold plans and raised the prices of the Silver and Bronze plans in question. Additionally, we lowered the price of Silver QHDHP-E PPO 4500/0/10 to align with the 3750 and 5300 plans. While there is still a disparity between the Silver and Bronze metallic AV relativity and pricing AV relativity, we are proposing an incremental pricing correction to mitigate large rate increases on these plans. Tab III Plan Rates now shows these plans are getting 13%-14% rate increases. Please note that the total requested rate increase for the block remains unchanged at 6.7%.

Question 10. Pages 13-14 of the Actuarial Memorandum describe the CAAC provider networks. Please answer the following:

- a. CAAC uses multiple tiered provider networks. In these tiered networks, can a provider change tiers at any point throughout the year?
- b. If so, how are the metallic AVs determined in such a case? And would providers changing tiers change the metallic AV and thus cause plans to potentially fall out of the allowable de minimis range for the given metal level?

Answer 10.

- a. A provider cannot change tiers mid-way through the year.
- b. N/A

Question 11. Based on the data that has been provided within Table 4b of the PAAME one can deduce that the R12 allowed claims PMPM trend averaged over January through December of 2023 is 4.8%. Capital's projected annual trend in this filing is almost 2 percentage points higher than this calculated average. Please provide a detailed quantitative exhibit along with an explanatory narrative that supports a trend assumption that is almost 2 percentage points higher than this average.

Answer 11. Capital does not use historical experience to develop trend. Capital cannot recreate the allowed claim PMPM trend of 4.8% for 2023. Please see Q&A Exhibit 3 for a calculation of the 2023 allowed claim PMPM trend, showing a 2023 annual trend of 6.6%.

Dear Ms. Swartz:

CAAC received an objection letter from the Department dated July 3, 2024. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Revised rate development workbook
- Revised PAAM exhibits
- Revised rates (PA and Federal templates)
- Revised memos
- Revised URRT

All changes are due to PID requests/questions and have been disclosed in the Q&A written response. Additionally, below is a summary of changes:

- Question 3: Correction to pricing relativities.

If you have any questions regarding this filing, please call me at [REDACTED] (or via email at [REDACTED]) or [REDACTED] at [REDACTED] ([REDACTED]). Thank you for your assistance in this matter.

Sincerely,

[REDACTED]

Question and Answer Small Group Rates Effective January 1, 2025

Question 1. Regarding the response provided to objection #5, what changes were made to fix the disconnect between these documents?

Answer 1. The Rate Dev formulas in Table 8 were not consistent to match the PAAME Table 8 formulas for 2025. The Rate Dev formulas were updated in Table 8 to be consistent. Also, in the May 15th submission of Table 9, we forgot to include a value of 1.0 in the new “2024 Benefits in Addition to EHB.” This was calculating in Table 8 as a 0.0 and was incorrect.

Question 2. It is noted that in comparing the Metallic AV Relativity to the Pricing AV Relativity, both platinum and gold plans have similar relativities, while silver and bronze diverge considerably more. This would suggest that the Company is attempting to reduce induced demand below what is prescribed by the Department for silver and bronze metal levels. Please provide a detailed quantitative exhibit that illustrates that there is no additional induced demand being included in the platinum and gold metal level plans and that the Company is not reducing induced demand being included in silver and bronze plans via Pricing AVs.

Answer 2. The best way to compare pricing AV to metallic AV is to compare the relativities between plans. There are some exceptions noted during this review that being with our silver and bronze plans. These plans have greater variances than we expected between metallic AV and pricing AV. Per the PID’s email on 7/15/2024, Capital is changing their Pricing AVs back to the initial submission on 5/15/2024.

Question 3. The following objections pertain to the response to Objection #9:

- a. Please provide each of the tables included in the prior response in excel with all formulas retained.
- b. Please provide a detailed narrative explaining what is driving the differences in the AV Relativity and Pricing AV Relativity. Please be sure to explain what specifically with regards to these 6 plans is causing the larger variance in the relativities.
- c. Please fill out the “Pricing AV Components” tab in the attached excel workbook for each HIOS ID included within.
- d. It is noted that it appears the benefits have been changed for at least one plan. For example, 45127PA0010213 now has a deductible of 9450 vs. 9200. The Department needs clarification on why this plan’s benefits were modified to be made leaner, in addition to the attempt to correct pricing AVs.
- e. It is noted when sorting all plans from largest to smallest in terms of Metallic AVs, the slope of the pricing AV relativities (i.e., the Pricing AV relativities highlighted in the “Slope Comparison” tab in the attached Excel workbook) is much steeper compared to the slope of the Metallic AV relativities. Please correct the slope of the pricing AV relativities to align with the slope of the Metallic AV relativities more closely.

Answer 3.

- a. Please see Q&A Exhibit 1 for the Metallic AV and Pricing AV Relativities by plan.
- b. Capital's cost model gives more credit to silver and bronze plans' premium PMPMs causing a larger variance between the Metallic AV and Pricing AV Relativities. Per the PID's email on 7/15/2024, Capital is changing their Pricing AVs back to the initial submission on 5/15/2024.
- c. Please see Q&A Exhibit 2 for the Member Cost Sharing by plan.
- d. We had a deductible of \$9450 for 45127PA0010213 in our 2024 rate filing. With the changes to the Maximum Out of Pocket limit in 2025, we reduced the deductible of this plan to \$9200 for the 2025 rate filing.
- e. The best way to compare pricing AV to metallic AV is to compare the relativities between plans. There are some exceptions noted during this review that being with our silver and bronze plans. These plans have greater variances than we expected between metallic AV and pricing AV. Per the PID's email on 7/15/2024, Capital is changing their Pricing AVs back to the initial submission on 5/15/2024 and will not be correcting the pricing AV relativities.

Question 4. The following objections pertain to trend:

- a. Regarding the response to Objection #11, the allowed claim PMPM trend of 4.8% for 2023 was the average of the 12 most recent R12 allowed claims PMPM trends (i.e., the average of each R12 allowed claims PMPM trend for each month in 2023). Please provide an explanatory narrative that supports a trend assumption that is almost 2 percentage points higher than this average.
- b. Please provide a detailed quantitative exhibit that supports the prescription drug cost trends for Year 1 and Year 2.
- c. Please provide a detailed narrative that explains why Year 1 drug trend is almost 1 percentage point higher than year 2.
- d. Please provide a detailed quantitative exhibit that supports the professional cost trends for year 1 and year 2.
- e. Please provide a detailed narrative that explains why Year 1 professional trend is 1.3 percentage points higher than year 2.
- f. Please provide a detailed quantitative exhibit that supports the Inpatient Hospital cost trends for Year 1 and Year 2.
- g. Please provide a detailed narrative that explains why Year 2 Inpatient Hospital cost trend is 70 basis points higher than Year 1.
- h. Please provide a detailed quantitative exhibit that supports the Outpatient Hospital cost trends for Year 1 and Year 2.
- i. Please provide a detailed narrative that explains why Year 2 Outpatient Hospital cost trend is 50 basis points higher than Year 1.
- j. Please note that if the Company cannot substantiate the aforementioned cost trends, the Department will not be able to approve the trend that has been proposed within the rate development.

Answer 4.

- a. With this submission, Capital is providing our medical and Rx cost models. These models contain the detail underlying our trend projection. Trends are based on known future cost increases and utilization change assumptions. While historical trends are useful as a comparison point, historical trends do not dictate future trends. Capital's Provider Contracting unit reports known and estimated contracted cost increases over the next 3 years. The model uses cost estimates based on varying contract effective dates by physician and hospital. These updated amounts are delivered to the Actuarial department each April before rate filing deliveries. Expected changes in utilization are discussed and documented with the Chief Medical Officer. The Actuarial department depends on the expertise of these departments to project future claim expense.

While historical trends are not used, we would like to note that the annual trend 2023 over 2022 (total 2023 allowed claim PMPM divided by total 2022 allowed claim PMPM) is 6.6%. The incurred trend is 6.4%. Please see Q&A Exhibit 3 for the detail taken from the PAAM exhibits I.b. Manual Data Table 4b. Additionally, Capital is also seeing higher than expected trends 2024 over 2023. Through May, Small Group medical claim PMPMs are 10.3% above the same time period in 2023.

The next bullets will be answered using the medical and Rx cost models included with this submission. Please see SG_24-44_Initial_CAAC_PPO_MedicalCostModel_Supporting_CONF_20240717.xlsx and Please see SG_24-44_Initial_CAAC_PPO_RxCostModel_Supporting_CONF_20240717.xlsx

The medical model explanations below are going to focus on tab "Commercial". This tab contains cost increase and utilization projections by month. Hospital increases are broken out into local and out of area (OOA). Claim weights from historical data are applied to establish an average Hospital IP and Hospital OP trend. Physician trends are also shown on this tab.

The monthly medical detail found on the Commercial tab is summarized on tab "Board Package Assumptions". Those trends are then again summarized into a filing format on tabs "Filing Summary SG" and "Filing Summary Ind". This step is to put trends into the correct filing category and to average years 2023 to 2025 to create appropriate year 1 and year 2 trends. Starting in row 41 you can find the final filed trends matching Exhibit E – Trend in the RateDev workbooks.

The Rx cost model is a model developed to forecast drugs at class and subclass level based on historical claims as well as any insight about future trends given from our pharmacy benefit manager (PBM) and Pharmacy department. The Actuarial department works with the Pharmacy department on any formulary and/or clinical developments that would help us in the forecast process. We categorize the largest classes of drugs based on the most recent year's PMPM. The remainder of the drugs are rolled up into their respective subclasses and classes. The numbered tabs are the

drugs/subclasses/classes that are forecasted on their own, split out by brand and generic, where applicable. The 2023-2025 tabs aggregate those drugs into one tab for each respective year, split out by brand and generic. The summary tab aggregates all forecast years together. “Summary” tab, row 91 are the final trends. These results shown in the medical cost model tab “Board Package Assumptions” and then shown again on “Filing Summary SG” and “Filing Summary Ind”. Starting in row 41 you can find the final filed trends matching Exhibit E – Trend in the RateDev workbooks.

- b. Please refer to SG_24-44_Initial_CAAC_PPO_RxCostModel_Supporting_CONF_20240717.xlsx and to the description above.
- c. All trends are calculated by year. The Summary tab shows the impact by class of drugs. The lower year 2 trend is driven by lower expected cost trends in 2025.
- d. Please refer to SG_24-44_Initial_CAAC_PPO_MedicalCostModel_Supporting_CONF_20240717.xlsx. The best way to view monthly professional trends is on tab “Commercial”, rows 18 (cost) and 36 (utilization). The cost portion are the known provider contracted increase over the next 3 years. The utilization projection is our best estimate of changes in utilization, reviewed by our Chief Medical Officer.
- e. The “Commercial” tab shows known cost increases by month. The lower Year 2 trend is driven by contracted provider rate changes. Year 1 reflects the average of 2023 and 2024 contracted rates. Year 2 reflects the average of 2024 and 2025 contracted rates. The lower expected cost increases in 2025 are driving the lower Year 2 trends.
- f. Please see tab “Commercial” rows 10 (cost) and 28 (utilization).
- g. The “Commercial” tab shows known cost increases by month. The lower Year 2 trend is driven by contracted provider rate changes. Year 1 reflects the average of 2023 and 2024 contracted rates. Year 2 reflects the average of 2024 and 2025 contracted rates. The lower expected cost increases in 2025 are driving the lower Year 2 trends.
- h. Please see tab “Commercial” rows 14 (cost) and 32 (utilization).
- i. The “Commercial” tab shows known cost increases by month. The lower Year 2 trend is driven by contracted provider rate changes. Year 1 reflects the average of 2023 and 2024 contracted rates. Year 2 reflects the average of 2024 and 2025 contracted rates. The lower expected cost increases in 2025 are driving the lower Year 2 trends.
- j. Capital is hopeful the above explanations and exhibits fulfill this requirement. If any additional questions remain, we will be happy to clarify.

Small Group Rates
Filing No 24-44
TOI Code: H16G Group Health – Major Medical
Sub-TOI Code: H16G.003A Small Group Only – PPO
Filing Type: Rate

Dear Ms. Swartz:

CAAC received an objection letter from the Department dated July 24, 2024. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Revised rate development workbook
- Revised PAAM exhibits
- Revised rates (PA and Federal templates)
- Revised memos
- Revised URRT

All changes are due to PID requests/questions and have been disclosed in the Q&A written response. Additionally, below is a summary of changes:

- Question 1: Update to 2023 experience period risk adjustment
- Question 2: Update to projected risk adjustment
- Question 10: Correction to pricing relativities.

If you have any questions regarding this filing, please call me at [REDACTED] (or via email at [REDACTED]) or [REDACTED] at [REDACTED] ([REDACTED]). Thank you for your assistance in this matter.

Sincerely,

[REDACTED]

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

Question and Answer Small Group Rates Effective January 1, 2025

Question 1. Please update the 2023 experience period risk adjustment amount, in Table 2, to reflect the final CMS risk adjustment amount released on July 22nd.

Answer 1. The 2023 experience period risk adjustment amount has been updated in Table 2 to reflect the final CMS risk adjustment amount released on July 22nd.

Question 2. If the projected risk adjustment transfer amount in Table 5 will be modified, due to the final CMS transfer amount published on July 22nd, please provide narrative and detailed supporting data to justify the proposed changes.

Answer 2. The 2025 projected risk adjustment amounts are equal to 2023 transfer amounts.

Question 3. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rate Templates are identical.

Answer 3. I confirm that we have tested to ensure that the rates in Table 11 of PAAM Exhibits, PA Plan Design Summary and Rate Table, Federal Rates Template, and binder are identical.

Question 4. Please ensure that the 7/31/24 versions of the following items are posted in SERFF with your July 31st response to this data call.

- a. Cover Letter identifying all changes made and the reasons for the change. Also, show the revised rate change.
- b. PA Actuarial Memorandum
- c. PA Actuarial Memorandum Exhibits
- d. Department's Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values - no "NA")
- e. URRT
- f. Federal Rate Template
- g. Part III: Actuarial Memorandum
- h. Rate Change Summary information included on the VI Rate Change Summary tab of the PA Actuarial Memorandum Exhibits
- i. Public PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits after the initial submission, in addition to all the above items).

Answer 4. I confirm that the above items are updated in SERFF.

Question 5. The Department's Standard Question 12(c) asks the issuer to estimate the pricing impact of any copay adjustment program. Capital's response to this question indicated that their copay adjustment program began in 2024; hence, they have insufficient data to estimate the pricing impact. Never-the-less, the Department would like Capital to estimate the program's expected impact on the 2025 premiums.

Answer 5. The net savings for small group insured is running around \$3.75 PMPM YTD for 2024. As coupons start to be exhausted, I'd expect that number to drop to closer to \$3 PMPM by year end.

Question 6. The following objections pertain to the "PMPMs" tab in the supporting exhibits workbook:

- a. Please provide a detailed narrative describing the underlying data in the cost model. For example, the time period and market segments being used.
- b. Please provide more clarification as to what each value at the top of the worksheet represents. For example, label what cells J1 and J2 represent.
- c. Please update the label for column G.
- d. Comparing the allowed PMPM amount for the \$0 cost plan for this year (\$462.44) to prior years, it appears this amount has not changed. Please provide a detailed narrative as to why this amount has remained the same for the past 3 years.
- e. Please provide a detailed narrative that discusses the reasons as to why the theoretical paid-to-allowed (0.70) ratio is considerably less than the actual experience paid-to-allowed ratio (0.837).

Answer 6.

- a. Capital uses Milliman, Inc. Health Cost Guidelines Commercial Rating Structures (for active employees) to develop benefit relativities, which translate into pricing AVs. Below, I am pulling from Milliman's methodology description. Anything in quotations is directly from Milliman, Inc.
"Milliman utilizes an enrollment and utilization database of full medical and prescription drug claims experience for over 78 million lives, of which approximately 41 million lives were selected and used as the primary source in developing the [model]. Other sources include a database of inpatient admission representing a large percentage of all admissions nationwide, retail pharmacy information, and other reference data sources." Capital adjusts nationwide data to Capital's average costs and contracting in our service area for our Commercial Group business. Data is currently calibrated to 2016 data.
- b. J1 is the average allowed amount with zero cost sharing. J2 is the actuarial model's pricing AV.
- c. Column G is the model's manual cost of each of the plans. The heading has been updated.
- d. The allowed PMPM amount for the \$0 cost plan has remained the same over the past 3 years because the model has not been updated in that time. While Capital receives annual updates from Milliman, we do not update annually. Capital has a data sharing arrangement with Milliman whereby we receive annual updates to national average utilization and billed charge data, as well as volumes of claim probability distributions,

giving us the opportunity to update data. Because the model is used as a benefit relativity model, the actual PMPMs do not necessarily need to be updated annually. The PMPM shown is calibrated to Capital's 2016 Group Commercial business. We plan to update this model before the 2026 filing submissions to calibrate to 2023 data.

- e. Firstly, I believe the model's pricing AV should be compared to the average metallic AV. These are within reason with average metallic AV at .761 and the model's AV at 0.70. Because Capital's model is calibrated to 2016 data, it seems to be giving too much credit to deductibles, lowering the average AV. Capital has worked with the Department this rating cycle to evaluate and change its relativities to more closely align with metallic AV. Capital will update its model to reflect current data before the 2026 filing cycle. Secondly, the difference between either metallic AV or the model's AV and paid-to-allowed ratio reflects population differences between theoretical AV and actual population utilization.

Question 7. Please provide Exhibit 2 from "SG 24-44 Initial CAAC PPO Q&AExhibits2 Supporting 20240717" in excel.

Answer 7. We have supplied the Exhibit 2 excel file in SERFF.

Question 8. Please fill in the highlighted cells in the attached excel workbook with the total number of members at each age for the base experience period and February 2024. Please provide the completed worksheet in excel.

Answer 8. Please see Q&A Exhibit 1 for the age calibration of Small Group CAAC.

Question 9. Regarding the response to Objection 2, it is noted that "There are some exceptions noted during this review that being with our silver and bronze plans. These plans have greater variances than we expected between metallic AV and pricing AV." Please provide a detailed narrative as to why these plans have greater variance between metallic AV and pricing AV than expected.

Answer 9. Because Capital's model is calibrated to 2016 data, it seems to be giving too much credit to deductibles. Capital has worked with the Department this rating cycle to evaluate and change its relativities to more closely align with metallic AV. Capital will update its model to reflect current data before the 2026 filing cycle.

Question 10. The response received for 3e is not sufficient. Please correct the slope of the pricing AV relativities to align with the slope of the metallic AV relativities more closely.

Answer 10. Capital has corrected the pricing slope per the direction of the PID on 7/25/2024 via email.

Question 11. The following objections pertain to the "SG_24-44_Initial_CAAC_PPO_MedicalCostModel_Supporting_CONF_20240717" workbook:

- a. It is noted that the Unit Cost trend summaries for 2023, 2024, and 2025 in the "Commercial" tab are developed using the same weights in column L for IP Acute, IP Other and OOA for each year. This is also noted for OP. Please provide a detailed

narrative as to why it is appropriate for the same weights to be used for each of the 3 years.

- b. It is noted that in the "Filing Summary SG" tab under both "Cost" and "Utilization", the Prescription Drug trend, both cost and utilization, for 2023, 2024, and 2025 does not match what is shown in the "Rx Trend Projections" tab in Row 5 and 9 for 2023, 2024, and 2025. Please update the trend so that the correct prescription drug trends are being used.

Answer 11.

- a. These weights do not vary significantly from year to year. The current month data is our best estimate of future year weights.
- b. With this submission, we are providing a revised Medical Cost Model. The Rx Trend Projections tab has been removed as it was not the final tab used to determine trends. Rx trends match the file SG_24-44_Initial_CAAC_PPO_RxCostModel_Supporting_CONF_20240717, Summary tab, line 91.

Sub-TOI Code: H16G.003A Small Group Only – PPO
Filing Type: Rate

Dear Ms. Swartz:

CAAC received an objection letter from the Department dated August 7, 2024. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Updated public filing

No changes have been made to exhibits or rates.

If you have any questions regarding this filing, please call me at [REDACTED] (or via email at [REDACTED]) or [REDACTED] at [REDACTED] ([REDACTED]). Thank you for your assistance in this matter.

Sincerely,

[REDACTED]

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

Question and Answer Small Group Rates Effective January 1, 2025

Question 1. Regarding the response to objection #5 in the 7/31/2024 response letter, please incorporate the \$3 PMPM savings into the rate development without making any offsetting changes. This should be reflected under “Change in Benefits” in Table 5 of the PAAM Exhibits

Answer 1. The response to objection #5 in the 7/31/2024 response letter was to estimate the savings we are currently seeing due to coupons reducing the costs of specialty drugs. This is strictly the cost of the drug with the coupon versus the cost without the coupon. We anticipate this savings is offset by increased utilization driven by coupons making specialty drugs more affordable. The copay optimization program is new and Capital does not yet have enough data to project the impact to 2025. Increased utilization and coupon expirations are two very large unknowns. Because of this uncertainty, we are not applying a specific copay optimization factor. But this program is considered by our Pharmacy department when projecting pharmacy trends.

Question 2. Considering both CAAC and KHPC Small Group use manual data in the rate development, the Department has combined the membership data provided in prior objection responses. In analyzing this combined data, the Department notes that the population is younger as of 2/1/2024 compared to the base experience period. The Department requests that this younger population base be built into the rate development. The Department has found that the member-weighted average age factor fell by 1.4% (please see the attached Excel worksheet for calculation). Please provide revised PAAM Exhibits that incorporate these savings by including a factor of 0.986 under “Change in Demographics” in Table 5 of the PAAM Exhibits.

Answer 2. While Capital understands the calculation, we cannot reduce rates for demographics. Our current population is younger than our base experience period, but we have not seen decreased utilization in 2024 from younger demographics. Small Group total PMPM trends through June are at 8.8% over the same time period in 2023, driven by medical utilization at 9.7%. So despite a younger population, both PMPM and utilization trends are far above filed. Please see Q&A Exhibit 1 for a trend exhibit.

Question 3. The Department reviewed both the CMS BY23 risk adjustment summary report and the risk adjustment assumption included within the PY23 rate filing. Converting the risk adjustment assumption of \$20.87 PMPM included within the PY23 rate filing to total dollars based off of CY23 member months, this amounts to \$8.6 million (receiver). Based on the CMS BY23 risk adjustment summary report, the total risk adjustment amount was \$15.0 million (receiver). The following questions stem around this observation:

- a. Please confirm that the Company agrees with the assumed total dollars calculated above. If not, please provide the appropriate calculation in excel with formulas preserved.
- b. Please explain the drivers of the variance between these amounts (i.e. 8.6 vs. 15.0).

- c. Please explain why this favorable variance to the Company should not be considered within the PY25 rate development.

Answer 3

- a. CAAC's Small Group receivable is \$13.5 million. Please see PAAM exhibits tab I Data, Table 2 for the \$13.5M reflected in the base experience period. We do not agree with \$20.87 PMPM. Our rate Risk Adjustment Transfer PMPM in VII Risk Adjustment sheet = \$34.50 which is the 2023 PMPM.
- b. There is no variance to explain.
- c. There is no variance to explain.

Question 4. Please ensure that the 8/9/24 versions of the following items are posted in SERFF with your response to this data call.

- a. Cover Letter identifying all changes made and the reasons for the change. Also, show the revised rate change.
- b. PA Actuarial Memorandum
- c. PA Actuarial Memorandum Exhibits
- d. Department's Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – do not use “NA” or any other non-numeric values)
- e. URRT
- f. Federal Rate Template
- g. Part III: Actuarial Memorandum
- h. Updated Rate Change Request Summary tab in the PA Actuarial Memorandum Exhibits
- i. Public PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits after the initial submission, in addition to all the above items).

Answer 4.

Capital did not make changes to exhibits in response to this objection letter. An updated public PDF is being provided to include this round of questions and responses.

Question 5. Please confirm that you have tested to ensure that the rates in Table 11 of the PAAM Exhibits, PA Plan Design Summary and Rate Table, Federal Rates Template, and binder are identical.

Answer 5.

Rates were not changed in response to this objection letter. All previously submitted files have been tested and rates confirmed to be identical.

Capital Advantage Assurance Company
Small Group Rates
Q&A Exhibit 1

Small Group Rates
Filing No 24-44
TOI Code: H16G Group Health – Major Medical
Sub-TOI Code: H16G.003A Small Group Only – PPO
Filing Type: Rate

Dear Ms. Swartz:

CAAC received an objection letter from the Department dated August 12, 2024. Per the PID's email dated August 20, 2024, Capital will not be revising rates. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Updated public filing

No changes have been made to exhibits or rates.

If you have any questions regarding this filing, please call me at [REDACTED] (or via email at [REDACTED]) or [REDACTED] at [REDACTED] ([REDACTED]). Thank you for your assistance in this matter.

Sincerely,

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

Question and Answer Small Group Rates Effective January 1, 2025

Question 1. The Department submitted a question to CAAC (Q#5 of our 7/24/2024 letter) and a question to KHPC (Q#5 of our 7/24/2024 letter) inquiring about the value of Capital's copay adjustment program. CBC estimated that the program could reduce claims by about \$3 PMPM for both CAAC and KHPC in the small group market. Please provide a revised PAAM that incorporates 50% of this savings (i.e. \$1.50 PMPM) by converting this PMPM value into an overall factor and incorporate this in the "Change in Benefits" section of Table 5 (Cells C20 and D20).

Answer 1. Per the PID's email dated August 20, 2024, Capital will not be revising rates.

Question 2. Considering both CAAC and KHPC Small Group use manual data in the rate development, the Department has combined the membership data provided in prior objection responses. In analyzing this combined data, the Department notes that the population is younger as of 2/1/2024 compared to the base experience period. The Department requests that this younger population base be built into the rate development. The Department has found that the member-weighted average age factor fell by 1.4%. Please provide a revised PAAM that incorporates 50% of this demographic shift by including a factor of 0.993 (i.e. $0.993 = 1 - 1.4\%/2$) under "Change in Demographics" in Table 5 of the PAAM Exhibits.

Answer 2. Per the PID's email dated August 20, 2024, Capital will not be revising rates.

Question 3. Regarding the response to objection #3 from objection letter dated 8/7/2024, it seems there is confusion on the numbers that are being referenced. The \$20.87 PMPM comes from Table 5 of the PY23 rate filing (submitted in 2022). The \$15.0 million consists of the HHS Risk Adjustment State Transfer Amount (\$13.5 million) and the High Cost Risk Pool amount (\$1.5 million). The following objections still stand:

- a. Please confirm that the Company agrees with the assumed total dollars calculated above. If not, please provide the appropriate calculation in excel with formulas preserved.
- b. Please explain the drivers of the variance between these amounts (i.e. 8.6 vs. 15.0).
- c. Please explain why this favorable variance to the Company should not be considered within the PY25 rate development.

Answer 3.

- a. Capital agrees with the Risk Adjustment State Transfer Amount of 13.5 million. High Cost Risk Pool is made of 2 components: a receivable and a charge. In 2023, CAAC received approximately \$1.5M and paid \$1.6M for a net transfer of -\$114,219. In the PY23 rate filing, Capital assumed a risk adjustment amount of \$20.87 PMPM and when that is multiplied by 2023 member months, that does equal \$8.6M.

- b. The driver of the variance is due to the fact that Capital's risk increased, and our demographics decreased. In addition, state risk decreased, and state demographics remained that same.
- c. When evaluating PY 2023, we believe risk adjustment cannot be singled out without reevaluating all factors/assumptions that went into 2023 premiums including CAAC's rate reduction to Q3/Q4 2023 rates. From PAAM Exhibits 1 Data Table 2, CAAC PY 2023 ran at an 89% loss ratio. From the 2023 Rate Change Summary, CAAC's target loss ratio is 87%, meaning rates were not adequate to cover claims, administrative expense and taxes.

Question 4. Please ensure that the 8/22/24 versions of the following items are posted in SERFF with your response to this data call.

- a. Cover Letter identifying all changes made and the reasons for the change. Also, show the revised rate change.
- b. PA Actuarial Memorandum
- c. PA Actuarial Memorandum Exhibits
- d. Department's Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – do not use "NA" or any other non-numeric values)
- e. URRT
- f. Federal Rate Template
- g. Part III: Actuarial Memorandum
- h. Updated Rate Change Request Summary tab in the PA Actuarial Memorandum Exhibits
- i. Public PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits after the initial submission, in addition to all the above items).

Answer 4. Capital did not make changes to exhibits in response to this objection letter. An updated public PDF is being provided to include this round of questions and responses.

Question 5. Please confirm that you have tested to ensure that the rates in Table 11 of the PAAM Exhibits, PA Plan Design Summary and Rate Table, Federal Rates Template, and binder are identical.

Answer 5. Rates were not changed in response to this objection letter. All previously submitted files have been tested and rates confirmed to be identical.
