

## UPMC Health Options, Inc. – Individual Plans

Rate request filing ID # UPMC-134082071 – This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <https://www.insurance.pa.gov/Consumers/HealthInsuranceFilings/Pages/ACA-Health-Rate-Filings.aspx>

### Overview

Initial request average rate change:	4.83%
Revised requested average rate change: <sup>1</sup>	4.83%
Range of requested:	2.02% to 9.76%
Effective date:	January 1, 2025
Mapped members:	105,426
Available in:	Rating Areas 1, 2, 3, 4, 5, 6, 7, and 9

### Key Information

#### Jan. 2023 – Dec. 2023 financial experience

Premiums	\$597,357,532
Claims	\$498,862,884
Administrative Expenses	\$73,269,002
Taxes & Fees	\$542,418
Insurer made (after taxes)	\$24,683,228

#### How insurer plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2025

Claims:	85%
Administrative:	13%
Taxes & Fees:	1%
Profit:	2%

The insurer expects its annual medical costs to increase 6.4%.

### Explanation of Requested Rate Change:

Increases in medical and pharmacy cost and utilization.

<sup>1</sup> Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

May 15, 2024

Ms. Lindsi Swartz  
Director - Life, Accident, and Health Rate and Policy Form Review  
Bureau of Life, Accident and Health Insurance  
Pennsylvania Insurance Department  
1311 Strawberry Square  
Harrisburg, PA 17120

Dear Ms. Swartz,

UPMC Health Options, Inc. respectfully requests approval of a rate filing for Individual On and Off Exchange PPO/EPO products. The rates are proposed for effective dates of 1/1/2025 through 12/31/2025.

Company Name/NAIC #: UPMC Health Options, Inc./15345  
Market: Individual  
On or Off Exchange: On and Off  
Effective Date of Coverage: 1/1/2025  
Average Rate Change Requested (Table 11): 4.83% (\$14.85)  
Range of Rate Change Requested (Table 11): 2.02% to 9.76% (\$6.20 to \$29.99)  
Products Offered: PPO, EPO  
Rating Areas Where Plans are Offered: 1, 2, 3, 4, 5, 6, 7, 9 (no change from 2024)  
Metal Levels Offered: Catastrophic, Bronze, Silver, Gold  
Currently Enrolled Lives Affected by the Rate Change: 105,426  
Currently Enrolled Policyholders Affected by the Rate Change: 74,832  
Number of Plans Offered in 2025: 35 (no change from 2024)  
Total additional annual revenue generated from the proposed rate change: \$35,095,362  
Corresponding Contract Form #: 663, 664, 671, 672  
Binder ID#: UPMC-PA25-125118381  
HIOS Issuer ID #: 16322  
Submission Tracking #: UPMC-134082071

If you have any questions or require additional information, please call me at [REDACTED] or email me at [REDACTED].

Sincerely,

[REDACTED]

# PA Actuarial Memorandum

## Section 1 - Basic Information and Data

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

### 1A. Company Information

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Legal Name: UPMC Health Options, Inc.  
NAIC #: 15345  
HIOS Issuer ID: 16322  
Market: Individual  
Exchange: On and Off Exchange  
Products: PPO, EPO  
Effective Date: 1/1/2025

#### Company Contact Information:

[REDACTED]

Binder SERFF Tracking #: UPMC-PA25-125118381

### 1B. Rate History and Proposed Variations in Rate Changes

Historical and proposed rate changes vary by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The values listed below and overall proposed rate change for 2025 are weighted averages of the increase for each plan based on projected enrollment. Please see Table 10 of the PA Actuarial Memorandum Exhibits for a breakdown of plan-by-plan rate increases.

SERFF Tracking #	Year	Rate Change*
UPMC-132801412	2022	-1.2%
UPMC-133257270	2023	4.2%
UPMC-133641878	2024	5.9%

\* Historical increases in this table are from Table 10

### **1C. Average Rate Change**

- Average rate change in Table 10, column AC of the PA Actuarial Memorandum Exhibits: 4.6%
- Change in 21-year-old non-tobacco premium PMPM in Table 11, cell AN13 of the PA Actuarial Memorandum Exhibits: 4.8%

### **1D. Membership Count**

Various illustrations of the membership count for the captioned company and market are displayed in Table 1 of the PA Actuarial Memorandum Exhibits.

### **1E. Benefit Changes**

A table with these changes has been included in Appendix I. All plans have metal level actuarial values in accordance with the latest HHS requirements.

### **1F. Experience Period Claims and Premium**

The single risk pool consists of members that are anticipated to enroll in ACA-compliant policies offered by UPMC in the Individual market. Claims and premium data for all non-grandfathered policies in the single risk pool for the captioned company and market from the experience period (January 2023 - December 2023) with two months of run-out are displayed in Table 2 of the PA Actuarial Memorandum Exhibits. This section provides a discussion of each field in the table and its relation to the corresponding fields on the URRT.

#### Earned Premium:

This represents the revenue accumulated by the captioned company during the experience period. No adjustments were made for MLR rebates as we do not anticipate owing them. HHS cost-sharing is not included in the premium data. Please note that the earned premium listed in Table 2 does match the total premium listed in section I, worksheet 1 of the URRT.

#### Paid Claims:

This field includes uncompleted paid medical, pharmacy, and pediatric dental and vision experience period claims for the captioned company and market.

#### Ultimate Incurred Claims:

This field includes completed paid medical and pharmacy experience period claims for the captioned company and market. We used the standard Development/Completion Factor Method to calculate claims that are incurred but not reported (IBNR). The completion factors used in Table 4b are displayed in the table below. Factors were calculated using our entire ACA-compliant Individual block of business. Please note that the ultimate incurred claims shown in Table 2 do not match the total incurred claims displayed in section I, worksheet 1 of the URRT because the value in the URRT equals the ultimate incurred claims less total prescription drug rebates listed in Table 2.

Month	Completion Factor
1/1/2023	0.9990
2/1/2023	0.9989
3/1/2023	0.9987
4/1/2023	0.9978
5/1/2023	0.9972
6/1/2023	0.9966
7/1/2023	0.9802
8/1/2023	0.9932
9/1/2023	0.9907
10/1/2023	0.9743
11/1/2023	0.9785
12/1/2023	0.9630

The following table shows the ultimate paid claims for the experience period distinguished between claims paid and fully adjudicated and claims estimated by IBNR:

Incurred Claims Processed by Claim System:	\$ 598,047,262
Claims Processed Outside Claim System:	\$ -
Claims Estimated by IBNR:	\$ 7,031,358
<b>Ultimate Incurred Claims:</b>	<b>\$ 605,078,620</b>

Member Months:

The sum of the experience period member months shown in Table 1 is also displayed in Table 2.

Estimated Cost Sharing:

This field represents the difference between allowed claims and ultimate incurred claims in Table 2.

Allowed Claims:

This field includes allowed medical and pharmacy claims as well as pediatric dental and vision claims from the experience period for the captioned company and market, which are pulled directly from our data warehouse. Please note that the allowed claims shown in Table 2 do not match the total allowed claims displayed in section I, worksheet 1 of the URRT because the value in the URRT equals the allowed claims less total prescription drug rebates listed in Table 2.

Non-EHB portion of Allowed Claims:

This field displays the amount of allowed experience period claims that can be attributed to non-EHBs for the captioned market and company.

Total Prescription Drug Rebates:

This field shows the amount of prescription drug rebates received for the captioned company and market during the experience period. Pharmacy rebates have been removed from the total incurred and allowed claims displayed in section I, worksheet 1 of the URRT.

Total EHB Capitation:

EHB benefits were not paid for via capitation during the experience period.

Total Non-EHB Capitation:

Non-EHB benefits were not paid for via capitation during the experience period.

Estimated Risk Adjustment:

Experience period Risk Adjustment for the captioned company is estimated to be a payment of \$29,473,894. This estimate is based on information provided by Wakely Consulting using UPMC and other participating carriers' CY 2023 data as of December 31, 2023 with zero months of runout. The payment translates to a PMPM of \$25.54.

Estimated Reinsurance Recoveries:

Experience period recoveries from the state-based reinsurance program for the captioned company are estimated to be a receivable of \$27,053,581, which translates to a PMPM of \$23.44. This estimate uses UPMC Individual market member-level data, calculating reinsurance recoveries for CY 2023 with parameters of 53% coinsurance between the \$60,000 attachment point and the ceiling of \$100,000, per member.

Loss Ratio:

The loss ratio calculated in Table 2 is 83.51%.

**1G. Credibility of Data**

The manual data for this filing was developed using the entirety of ACA-compliant experience period data from each of UPMC's subsidiary companies in the Individual market, which is displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits. The manual data consists of 1,179,314 member months of experience.

The experience period data for this company consists of 1,154,080 member months from ACA-compliant policies. Because the manual data encompasses the single risk pool of all UPMC Individual market companies, we believe it most appropriately represents the claim experience for use in calculating projected rates. Therefore, we assign 100% credibility to the manual data and 0% credibility is used for each company-specific single risk pool. Adjustments to the data include the trend and network adjustments discussed in the "Index Rate" section below.

**1H. Trend Identification**

The overall annual trend used in rate development is 6.38%. Historical allowed claims from our Individual block of ACA-compliant business across all of UPMC's subsidiary companies were used to develop trend factors for use in the projected rates, and the basis for this trend is a least squares regression analysis on 12-month rolling cost and utilization claims experience between 2019 and 2023. The selected trends fall within the 95% confidence interval of regression analysis for each service category (Inpatient Hospital, Outpatient Hospital, Professional, Other Medical, and Prescription Drug), and the selected aggregate trend is the weighted average aggregation of the component trends.

The large enrollment count and consistent makeup of this population make it appropriate for use in trend development for this filing. Service categories were defined to be consistent with the URRT instructions. Please see Tables 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development calculations. No changes in provider contracting are expected between the experience and projection periods, and therefore, no adjustments have been applied.

## **11. Historical Experience**

Historical data from the four most recent calendar years for the captioned company and market with two months of run-out is provided in Table 4. Allowed claims were developed using the same manner described above for Table 2. The historical data listed in Table 4b consists of a blend of ACA-compliant experience data from each of UPMC's subsidiary companies in the Individual market and was used in the development of trend.

## **Section 2 - Rate Development & Change**

### **2A. Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims**

Table 5 of the PA Actuarial Memorandum Exhibits shows the development of the projected index rate, Market-Adjusted Index Rate, and projected total allowed claims. Detailed discussions on the development of each quantity are provided below.

#### Index Rate:

For this filing, the Index Rate of the Experience Period is set equal to the manual rate as outlined above in Section 1G of this memorandum. The calculation of the manual rate is shown in Table 2b of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 6.38% annual trend to the Index Rate of Experience Period.

For 2025, the Pennsylvania Insurance Department has mandated that an adjustment factor of 1.0 is applied to the index rate to reflect the morbidity impact of the state-based reinsurance program in the Individual market. In line with that guidance, no adjustment for changes in morbidity as a result of the state-based reinsurance program has been applied.

An adjustment factor of 0.993 has been applied to the index rate to account for differences in expected allowed claims costs between the manual data and that of the captioned company. This adjustment factor brings the captioned company index rate in line with the current characteristics of the provider networks. Please see Exhibit 7 of the Supporting Exhibits for the derivation of this factor.

An adjustment factor of 0.985 has been applied to the index rate in the Change in Other category. This adjustment accounts for itemized differences between the 2023 experience period and the 2025 projection period, such as the impact of medical and pharmacy cost savings initiatives that UPMC has engaged in. Please see Exhibit 8 of the Supporting Exhibits for the derivation of the Change in Other factor applied in Table 5.

No other adjustments have been applied to the index rate. The average age for our experience period Individual risk pool was 44.8 with an average premium factor of 1.87. This is nearly identical to our 2024 experience so far with age 44.6 and premium factor 1.86. Due to the stability of the population, no demographic adjustment has been made to the rates. Please note that the Index Rate of Projection Period of \$645.30 shown in Table 5 matches the corresponding value shown in section II, worksheet 1 of the URRT.

Market-Adjusted Index Rate:

The Projected Index Rate is adjusted by adding estimates for risk adjustment and marketplace fees (with impacts and costs spread across the whole risk pool) to obtain the Projected Market Adjusted Index Rate.

Projection period Risk Adjustment PMPM has been estimated to be a payment of \$6.59, which is displayed in Table 5. First, UPMC considered the expected transfer for 2023, relying on projections by Wakely Consulting using the most recently available data.

[REDACTED]

[REDACTED]

[REDACTED]

The projection period Risk Adjustment transfer PMPM also accounts for the impact of known changes to HHS model weights for the 2025 Benefit Period. The transfer amount is not adjusted to reflect the estimated impact of the Risk Adjustment Data Validation (RADV) program, as there have been fluctuations in the program's impact directionally in recent years. UPMC relies on analysis by Wakely Consulting in estimating the impacts of both the 2025 model changes and the RADV program.

The projected transfer assumes a \$0 High Cost Risk Pool (HCRP) recovery net of the program's surcharge.

Please see Exhibit 9 of the Supporting Exhibits for the derivation of this estimate.

The value entered in Section II, Worksheet 1 of the URRT was \$8.35 since the calculation of the Market Adjusted Index Rate is done on an allowed claims basis in the URRT. The updated PMPM was derived by taking the original paid PMPM divided by the Paid to Allowed Average Factor. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a negative number because the calculation subtracts this value. The effect is an increase in premium as additional revenue will be required to cover the anticipated payment.

The member-weighted average of a 3.0% Marketplace User Fee for Marketplace enrollees combined with 0% for non-Marketplace enrollees calculates to 2.4%. This load is developed based on fees from on-exchange policies, but is spread over all policies uniformly. This translates to a PMPM of \$13.98, which was entered as a positive value in Table 5 since the calculation adds this value. The effect for this adjustment is an increase in premium as additional revenue will be required to cover the anticipated payment. Since the URRT requires the exchange user fee to be listed on an "allowed" basis, the final value included in the URRT was calculated by first taking exchange user fee PMPM of \$13.98 divided by the paid-to-allowed ratio to derive the "allowed" exchange user fee PMPM. This value was then divided by the market adjusted index rate to arrive at the final value of 2.8%.

The index rate was further adjusted by accounting for estimated recoveries from the state-based reinsurance program. Estimated recoveries applied in Table 5 and Section II, Worksheet 1 of the URRT were \$26.29 PMPM and \$33.29 PMPM, respectively. The value entered in the URRT was derived by taking the Table 5 recovery PMPM and dividing by the Paid to Allowed Average Factor, as the calculation of the Market Adjusted Index Rate is done on an allowed claims basis. These values were entered as positive values in Table 5 and the URRT since both calculations subtract these values. The result of this adjustment is a decrease in projected period premium as less revenue will be required due to the anticipated recovery.

The estimated recovery of \$26.29 PMPM was derived using data entered into worksheets I.b, II.a, and II.b of the PA Actuarial Memorandum exhibits. Data entered into worksheet II.a matches the experience period data described in the sections above, and worksheet II.b was populated by referencing the same source of experience captured in worksheet II.a, but with member-level incurred claims trended forward two years to the projection period before allocating the data to each range within the continuance table. An annualized claims trend of 6.38% was applied to estimate the projected member-level claims used to populate worksheet II.b. The projected recovery as a percent of claims is calculated using a per-member attachment of \$60,000, a cap of \$100,000, and a coinsurance rate of 50%, as communicated by the Pennsylvania Insurance Department on April 3, 2024 via the 2025 ACA-compliant rate filing guidance. The formula in Table 5 (cell C33) calculates the a percent of projected paid claims, before pharmacy rebates, that the reinsurance recovery reflects, to align with the data in the continuance table in worksheet II.b.

#### Total Allowed Claims:

The Market-Adjusted Index Rate is further modified to develop the projected total allowed claims PMPM by adding the projected allowed non-EHB claims PMPM. Benefits that were offered outside EHB include routine foot care, acupuncture, dental anesthesia, diabetes care management, and inherited metabolic disorder. The projected allowed claims for these benefits is \$1.06 PMPM.

## **2B. Retention Items**

Retention items related to this filing are shown in Table 6 of the PA Actuarial Memorandum Exhibits. Detailed discussions on each item are provided below.

#### Administrative Expenses:

Administrative costs of 12.6% of premium have been displayed in Table 6 and the URRT. This value has been derived from projected administrative costs for the projection period. These expenses are assumed to be uniform for all plan designs.

[REDACTED]

Taxes and Fees:

Taxes and Fees are expected to be 0.5% of premium in 2025. This accounts for the projected Federal Income Tax in 2025. Please note that the Risk Adjustment User Fee of \$0.18 PMPM and the projected PCORI Fee of \$0.27 PMPM were included in the Taxes and Fees field in Table 6 and the URRRT.

Profit/Contingency:

The projected surplus and risk margin for this company is 2.0% for 2025. This value is listed in both Table 6 and the URRRT. The same level of margin is expected for each plan included in this filing.

Projected Loss Ratio

The projected period loss ratio, using the federally-prescribed MLR methodology without the credibility adjustment, is 85.2%, as shown in Exhibit 1 of the Supporting Exhibits.

An exhibit displaying historical MLR information is provided in Exhibit 2 of the Supporting Exhibits. Loss ratios in the 'Actual' column have been calculated from data submitted in the most recent three-year MLR filing using the federally-prescribed MLR methodology without the credibility adjustment. Enrollment data in the 'Actual' column ties directly to the historical data included in Table 4 of the PA Actuarial Memorandum Exhibits. Loss ratios and enrollment data in the 'Pricing' columns are projected values taken from each calendar year's approved ACA rate filing.

**2C. Normalized Market-Adjusted Projected Allowed Total Claims**

Normalization factors for 2024 and 2025 are provided in Table 7 of the PA Actuarial Memorandum Exhibits. 2024 factors have been taken from the prior annual rate filing of the captioned company and market. Detailed discussion on each of the 2025 factors are provided below as well as in Section 5 of this memorandum.

Average Age Factor:

The average age factor was calculated using our projected ACA-related Individual population with the prescribed HHS Age Factors for 2025. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. For UPMC's entire block of ACA-compliant Individual business, the average age factor is 1.858 and average age was 44.8 during the experience period. This preliminary age factor is then multiplied by an adjustment factor of 0.997, which accounts for the regulation that prohibits charging for more than three children per family, resulting in a final age calibration factor of 1.852. Please see Exhibit 3 in the Supporting Exhibits for the calculation of this factor.

Average Geographic Factor:

The calibration factor of 0.994 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 4 of the Supporting Exhibits. Please see the Geographic Factors section below for a discussion on the development of factors applied for each rating area.

Average Tobacco Factor:

The average tobacco factor was calculated using projected membership, which is assumed to have the same split for tobacco status as current membership. The member-weighted average of a 2.5% load applied for enrollees who qualify as tobacco users combined with a 0% load for non-tobacco users yields an average tobacco factor of 1.002. The derivation of this factor is shown below.

<b>Tobacco Status</b>	<b>Feb 2024 Enrollment Split</b>	<b>Tobacco Factor</b>	<b>Calibration Factor</b>
Non-User	92.7%	1.000	0.927
User	7.3%	1.025	0.074
<b>Total</b>	<b>100.0%</b>		<b>1.002</b>

Average Benefit Richness:

Benefit richness factors were calculated so that the average value is 1.0 when weighted with projected membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits.

Average Network Factor:

Network factors were calculated so that the average value is 1.0 when weighted with projected membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits. Please see the Network Factors section below for a discussion on the factors applied for each network.

**2D. Components of Rate Change**

Data to support the calculation of the components of the rate change is presented in Tables 8 and 9 of the PA Actuarial Memorandum Exhibits. Values presented in the 2024 columns have been taken from this company's 2024 annual rate filing.

**Section 3 - Plan Rate Development**

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2025 Plan Adjusted Index Rates. The allowable modifiers that are used in rate development are described below.

Plan Actuarial Value:

The AV for each plan was determined by the issuer's own pricing model based on experience from UPMC's fully-insured commercial block of business. This model calculates an AV for a given plan by first trending 2023

allowed claims data forward two years to the projection period, calculating paid amounts for each benefit category based on the benefit design of a given plan and projected allowed claims data, and taking the ratio of the total projected paid claims to projected allowed claims. Since the same tool was used for all plans, this eliminates any impact from morbidity at the plan level, and differing rate increases by product type are purely based on differences in benefit design for all plans within a given product.

#### Benefit Richness (Induced Demand)

Benefit richness factors were calculated using the formula  $(\text{Plan AV})^2 - (\text{Plan AV}) + 1.24$ , where (Plan AV) is equal to the product of the Plan AV described above and, when applicable, the Non-Funding of CSR Adjustment described below on a plan-by-plan basis. This formula was prescribed by the Pennsylvania Insurance Department and has been developed to produce induced demand factors that mimic those determined by HHS. The initial factors calculated using this formula were then normalized against projected membership by plan.

#### Benefits in addition to EHBs

Benefits that will be offered outside EHB include routine foot care, acupuncture, dental anesthesia, diabetes care management, and inherited metabolic disorder. The projected allowed claims for these benefits is \$1.06 PMPM. The adjustment factor of 1.002 included in Table 10 has been derived by adding the aforementioned PMPM to the projected index rate for 2025 and dividing this total by the same index rate, causing the adjustment to be applied uniformly to all plans.

#### Provider Network

Please see the Network Factors section below for a discussion on the development of the provider network factors applied in Table 10.

#### Catastrophic Eligibility

No adjustments were made for catastrophic plans. Current enrollment is minimal and not credible.

#### Non-Funding of CSR Adjustment

To account for the elimination of funding for cost-share reduction subsidies, the Pennsylvania Insurance Department has mandated the rates for all silver plans offered both on and off the exchange be increased via the CSR Defunding Adjustment in Table 10 of the Actuarial Memorandum Rate Exhibits. The captioned company will apply a factor of 1.22 as the CSR Defunding Adjustment for 2025. Several off-exchange only silver plans continue to be included for 2025 to minimize disruption to non-subsidized members enrolled in silver plans.

## **Section 4 - Plan Premium Development for 21-Year-Old Non-Tobacco User**

Table 11 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance. 2025 rates calculated in this tables were tested to ensure that they match those included in the PA Plan Design Summary and Rate Tables, Federal Rates Template, and the binder.

## Section 5 - Plan Factors

### 5A. Age and Tobacco Factors

As indicated in Table 12 of the PA Actuarial Memorandum Exhibits, the default federal standard age curve for 2025 is used in the development of the Consumer Adjusted Premium Rates. A tobacco load of 2.5% will be used for all 21-and-over age bands in the Individual market in 2025. This load has not changed from 2024.

### 5B. Geographic Factors

The geographic rating areas used within this filing are the same as those defined by the state. For 2025, the proposed geographic factors are identical to the 2024 filing for this company with the exception of Rating Area 5. The table below displays the current and proposed factors:

Region	2024	2025
1	0.966	0.966
2	1.165	1.165
3	1.280	1.280
4	0.966	0.966
5	0.993	1.011
6	1.431	1.431
7	1.455	1.455
9	1.274	1.274

The proposed factor for Rating Area 5 acknowledges the elevated costs observed in that region relative to other regions after accounting for age, benefit level, and morbidity. Please see Exhibit 12 of the Supporting Exhibits for an illustration of this change.

### 5C. Network Factors

Network factors for 2025 were calculated to reflect cost differentials between networks and to ensure normalization using projected membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits. No major changes in cost differentials between networks are expected for 2025, so the relativities between network factors have been kept the same when comparing to 2024, and the factors have simply been re-normalized such that they average to 1.0. The current and proposed network factors are also shown in Table 14 of the PA Actuarial Memorandum Exhibits.

### 5D. Rate Change Summary

Table 15 of the PA Actuarial Memorandum Exhibits has been populated as described in state guidance.

## **5E. Service Area Composition**

Table 13 of the PA Actuarial Memorandum Exhibits shows the areas in which plans will be offered in 2025. Service area maps for 2024 and 2025 have been uploaded in the Supporting Documentation section in SERFF.

## **5F. Composite Rating**

No composite rating is used with these plans.

## **5G. Connectivity Factors**

Connectivity features are not available under these plans.

## **Section 6 - Reference Information and Certification**

### **URRT Warning Alerts**

Several warning messages appear after clicking the validate button in the URRT. These messages highlight the fact that several terminated or renewing plans have entries of zero in the current enrollment and premium PMPM fields on worksheet 2 of the URRT. Similar messages have appeared in the URRT in prior years across UPMC companies for similar reasons.

### **SERFF Rate / Rule Schedule Tables**

In accordance with PID guidance, the SERFF Rate/Rule Schedule Tab of this rate filing contains the proposed premium rates for all proposed plans, and Excel versions of the Federal Rates Template and the PA Plan Design Summary and Rate Tables.

The Company Rate Information and Rate Review Detail is complete and accurate. Current premiums are consistent with our enrollment as of February 15, 2024. The rate change data presented is consistent with Table 11 and the number of policyholders affected is populated using the total covered lives shown in Table 10 cell V15. The total requested rate change entered is consistent with Cell AN13 of Table 11.

### **Standard Questions**

Per PID ACA Rate Filing Final Guidance issued on April 3, 2024, the Standard Questions to be included with the initial filing are enclosed with this rate filing in a separate document under the Supporting Documentation tab in SERFF.

## Reliance

Below is a summary of the information that we have relied on as part of rate development.

Source	Type of Information	Comments
Jeffrey A. Bees, CFO, Commercial Products and WorkPartners	Projected administrative expenses, impact of discontinuation of SaveOnSP Program	I have not performed any independent audit or otherwise verified the accuracy of this data/information.
Rachel Oaks, Sr. Director, Medical Economics	Anticipated savings from medical savings initiatives	I have not performed any independent audit or otherwise verified the accuracy of this data/information.

## List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Derivation of Projection Period MLR
- Exhibit 2: Actual vs Pricing MLR & Member Months
- Exhibit 3: Derivation of Age Calibration Factor
- Exhibit 4: Derivation of Geographical Calibration Factor
- Exhibit 5: Current/Projected Commissions by OEP and SEP
- Exhibit 6: Derivation of 3-Child Cap Adjustment Factor
- Exhibit 7: Derivation of Change in Network Factor
- Exhibit 8: Derivation of Change in Other Factor
- Exhibit 9: Derivation of Projected Risk Adjustment PMPM
- Exhibit 10: Projected Administrative Expense Load Development
- Exhibit 11: Derivation of Projected Taxes and Fees
- Exhibit 12: Derivation of Change in Geographic Rating Factors
- Exhibit 13: Exchange User Fee Development

**Actuarial Certification**

I, [REDACTED], am a Member of the American Academy of Actuaries in good standing. I am currently Manager for ACA products in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR § 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2025 Rate Filing Justification.
- The projected Index Rate is:
  - a. In compliance with all applicable state and Federal statutes and regulations (45 CFR § 156.80 and § 147.102)
  - b. Developed in compliance with the applicable Actuarial Standards of Practice
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered
  - d. Neither excessive nor deficient
- The Index Rate and only the allowable modifiers as described in 45 CFR § 156.80(d)(1) and § 156.80(d)(2) were used to generate plan level rates.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

**PA Rate Template Part VI - Rate Change Summary**

**Table 15. Rate Change Summary Information**

**Overview**

Initial Requested Average Rate Change:	0.048319112
Revised Requested Average Rate Change:	4.83%
Minimum Requested Rate Change:	2.02%
Maximum Requested Rate Change:	9.76%
Mapped Members:	105,426
Available in Rating Areas:	Rating Areas 1, 2, 3, 4, 5, 6, 7, and 9

**Key Information**

Jan. 2023 - Dec. 2023 Financial Experience	
Premium	\$ 597,357,532.40
Claims	\$ 498,862,884.13
Administrative Expenses	\$ 73,269,002.49
Taxes & Fees	\$ 542,417.60
Company Made After Taxes	\$ 24,683,228.17

The company expects its annual medical costs to increase: **6.38%**

Explanation of requested rate change: **Increases in medical and pharmacy cost and utilization.**

Carrier Name:	UPMC HEALTH OPTIONS INC.
Product(s):	PPO, EPO
Market Segment:	Individual
Rate Effective Date:	1/1/2025

**How It Plans to Spend Your Premium**

This is how the company plans to spend the premium it collects in 2025:

Claims:	85%
Administrative Expenses:	13%
Taxes & Fees:	0%
Profit:	2%

Rating Area	Active Rating Areas	Count of Remaining Active Rating Areas	Text
1	1		8 1,
2	2		7 2,
3	3		6 3,
4	4		5 4,
5	5		4 5,
6	6		3 6,
7	7		2 7,
8			1
9	9		1 and 9

**Table 16. Risk Adjustment Calculation**

Component	Statewide	Insurer Specific
State Average Monthly Premium Before Adjustment	612.58	
Administrative Cost Adjustment	0.86	
State Average Monthly Premium	526.82	
Actuarial Value (AV)	0.72	
Plan Liability Risk Score (PLRS)	1.46	
Allowable Rating Factor (ARF)	1.79	
Induced Demand Factor (IDF)	1.04	
Geographic Cost Factor (GCF)	1.04	
Factors Including Risk Score	1.58	
Factors Excluding Risk Score	1.39	
Risk Adjustment Transfer PMPM		(19.02)
Insurer Specific Manual Adjustment PMPM		12.42593208
High Cost Risk Pool Adjustment PMPM		0
Total Risk Adjustment Transfer		(6.59)

<-- Negative implies payer of RA

# RFJ Part III: Actuarial Memorandum

## General Information

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

### Company Identifying Information:

Company Legal Name: UPMC Health Options, Inc.

NAIC #: 15345

State: PA

HIOS Issuer ID: 16322

Market: Individual

Exchange: On and Off Exchange

Products: PPO, EPO

Effective Date: 1/1/2025

### Company Contact Information:

[REDACTED]

### Filing Information:

Rate Filing SERFF Tracking #: UPMC-134082071

Form Filing SERFF Tracking #: UPMC-134083460, UPMC-134083929, UPMC-134083953, UPMC-134083987

Binder SERFF Tracking #: UPMC-PA25-125118381

### Rate History:

Historical and proposed rate changes vary by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The values listed below and overall proposed rate change for 2025 are weighted averages of the increase for each plan based on projected enrollment. Please see Table 10 of the PA Actuarial Memorandum Exhibits for a breakdown of plan-by-plan rate increases.

SERFF Tracking #	Year	Rate Change*
UPMC-129389350	2014	0.0%
UPMC-129640677	2015	0.0%
UPMC-130071357	2016	9.7%
UPMC-130536844	2017	26.5%
UPMC-131034732	2018	41.2%
UPMC-131495924	2019	2.0%

UPMC-131924266	2020	3.2%
UPMC-132364637	2021	1.3%
UPMC-132801412	2022	-1.2%
UPMC-133257270	2023	4.2%
UPMC-133641878	2024	5.9%

*\* Historical increases in this table are from PAAM Exhibits Table 10*

## Proposed Rate Increase(s)

### Reasons for Rate Increase(s):

The proposed rate increase calculated for PPO products in section I, worksheet 2 of the URRT is 4.9%

The proposed rate increase calculated for EPO products in section I, worksheet 2 of the URRT is 4.8%

The largest drivers of the rate increase include the following:

- Increases in medical and pharmacy cost and utilization
- Changes to the state reinsurance program for the Individual health insurance market.

Increases may vary by product due to annual changes in cost sharing, the impact of which may vary from plan to plan.

## Market Experience

### Single Risk Pool

The single risk pool consists of members that are anticipated to enroll in ACA-compliant policies offered under the captioned market.

### Experience Period Premium and Claims

#### Paid Through Date:

The reported claims during the experience period have a paid through date of February 2024.

#### Current Date:

Current enrollment and premium data is reported as of February 15, 2024.

#### Premiums (net of MLR Rebate) in Experience Period:

Section I, worksheet 1 of the URRT contains calendar year 2023 premium for all non-grandfathered policies in the single risk pool for the captioned company and market. No adjustments were made for MLR rebates as we do not anticipate owing them. HHS cost-sharing is not included in the premium data. Please note that the earned premium is also listed in Table 2 of the PA Actuarial Memorandum Exhibits.

#### Allowed and Incurred Claims Incurred During the Experience Period:

Section I, worksheet 1 of the URRT contains calendar year 2023 claims experience for all non-grandfathered policies in the single risk pool for the captioned company and market, paid through February 2024. Allowed

medical, pharmacy, pediatric dental, and pediatric vision claims are pulled directly from our data warehouse. We used the standard Development/Completion Factor Method to calculate IBNR. Factors were calculated using our entire block of ACA-related Individual business and no unexpected factors were observed.

Month	Completion Factor
1/1/2023	0.9990
2/1/2023	0.9989
3/1/2023	0.9987
4/1/2023	0.9978
5/1/2023	0.9972
6/1/2023	0.9966
7/1/2023	0.9802
8/1/2023	0.9932
9/1/2023	0.9907
10/1/2023	0.9743
11/1/2023	0.9785
12/1/2023	0.9630

The following table shows the ultimate paid claims for the experience period distinguished between claims paid and fully adjudicated and claims estimated by IBNR:

Incurred Claims Processed by Claim System:	\$ 598,047,262
Claims Processed Outside Claim System:	\$ -
Claims Estimated by IBNR:	\$ 7,031,358
<b>Ultimate Incurred Claims:</b>	<b>\$ 605,078,620</b>

### Benefit Categories

Medical claims are split into nine categories in our data warehouse. They, along with pediatric dental & vision claims, are mapped into the categories in the URRT as follows:

UPMC Benefit Category	URRT Benefit Category
Inpatient	Inpatient Hospital
Catastrophic	Inpatient Hospital
Outpatient	Outpatient Hospital
Behavioral	Outpatient Hospital
PCP	Professional
Specialist	Professional
Diagnostic	Other Medical
ER	Other Medical
Other	Other Medical
Pediatric Dental	Other Medical
Pediatric Vision	Other Medical

Drug claims are in separate tables and directly mapped into the Prescription Drugs category. Note that services are the unit of measurement used for the Other Medical category.

## **Projection Factors**

### Trend Factors (cost/utilization):

The overall annual trend used in rate development is 6.38%. Historical allowed claims from our Individual block of ACA-compliant business across all of UPMC's subsidiary companies were used to develop trend factors for use in the projected rates, and the basis for this trend is a least squares regression analysis on 12-month rolling cost and utilization claims experience between 2019 and 2023. The selected trends fall within the 95% confidence interval of regression analysis for each service category (Inpatient Hospital, Outpatient Hospital, Professional, Other Medical, and Prescription Drug), and the selected aggregate trend is the weighted average aggregation of the component trends.

The large enrollment count and consistent makeup of this population make it appropriate for use in trend development for this filing. Service categories were defined to be consistent with the URRT instructions. Please see Tables 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development calculations. No changes in provider contracting are expected between the experience and projection periods, and therefore, no adjustments have been applied.

## **Adjustments to Trended EHB Allowed Claims PMPM**

### Changes in the Morbidity of the Population Insured:

For 2025, the Pennsylvania Insurance Department has mandated that an adjustment factor of 1.0 is applied to the index rate to reflect the morbidity impact of the state-based reinsurance program in the Individual market. In line with that guidance, no adjustment for changes in morbidity as a result of the state-based reinsurance program has been applied.

### Changes in Benefits:

No changes were made to the PA EHB Benchmark plan for 2025, so no adjustments were necessary.

### Changes in Demographics:

No other adjustments have been applied to the index rate. The average age for our experience period Individual risk pool was 44.8 with an average premium factor of 1.87. This is nearly identical to our 2024 experience so far with age 44.6 and premium factor 1.86. Due to the stability of the population, no demographic adjustment has been made to the rates.

### Other Adjustments:

An adjustment factor of 0.993 has been applied to the index rate to account for differences in expected allowed claims costs between the manual data and that of the captioned company. This adjustment factor brings the captioned company index rate in line with the current characteristics of the provider networks. Please see Exhibit 7 of the Supporting Exhibits for the derivation of this factor.

An adjustment factor of 0.985 has been applied to the index rate in the Change in Other category. This adjustment accounts for itemized differences between the 2023 experience period and the 2025 projection period, such as the impact of medical and pharmacy cost savings initiatives that UPMC has engaged in. Please see Exhibit 8 of the Supporting Exhibits for the derivation of the Change in Other factor applied in Table 5.

### **Credibility Manual Rate Development**

#### Source and Appropriateness of Manual Rate Used:

The manual data for this filing was developed using the entirety of ACA-compliant experience period data from each of UPMC's subsidiary companies in the Individual market, which is displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits. The manual data consists of 1,179,314 member months of experience.

#### Adjustments Made to the Data:

Adjustments made to the manual data are discussed in the "Projection Factors" section above.

#### Inclusion of Capitation Payments:

No benefits are projected to be paid for via capitation.

### **Credibility of Experience**

The experience period data for this company consists of 1,154,080 member months from ACA-compliant policies. Because the manual data encompasses the single risk pool of all UPMC Individual market companies, we believe it most appropriately represents the claim experience for use in calculating projected rates. Therefore, we assign 100% credibility to the manual data and 0% credibility is used for each company-specific single risk pool.

### **Establishing the Index Rate**

For this filing, the Index Rate of the Experience Period is set equal to the manual rate due to align with the single risk pool Index Rate. The calculation of the manual rate is shown in Table 2b of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 6.38% annual trend to the Index Rate of Experience Period. The adjustments described in the Projection Factors section above were then applied to the trended manual rate to generate the Index Rate of the Projection Period. Please note that the Index Rate of Projection Period of \$645.30 shown in Table 5 matches the corresponding value shown in section II, worksheet 1 of the URRT. Please also note that claims corresponding to non-EHBs were not included in the calculation of the index rates despite being covered during the experience period.

### **Paid to Allowed Ratio**

The Paid to Allowed Average Factor was calculated by taking the weighted average of the company-determined Actuarial Values for all plans using projected membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits.

## Development of the Market Adjusted Index Rate

The Projected Index Rate is adjusted by adding estimates for Risk Adjustment and Marketplace Fees (with impacts and costs spread across the whole risk pool) to obtain the projected Market Adjusted Index Rate. Derivation of the PMPM values used for the Risk Adjustment, Marketplace Fees adjustments, and projected Reinsurance recoveries are described in the following sections.

### Experience Period Risk Adjustment and Reinsurance Adjustments PMPM:

Experience period Risk Adjustment for the captioned company is estimated to be a payment of \$29,473,894. This estimate is based on information provided by Wakely Consulting using UPMC and other participating carriers' CY 2023 data as of December 31, 2023 with zero months of runout. The payment translates to a PMPM of \$25.54.

Experience period recoveries from the state-based reinsurance program for the captioned company are estimated to be a receivable of \$27,053,581, which translates to a PMPM of \$23.44. This estimate uses UPMC Individual market member-level data, calculating reinsurance recoveries for CY 2023 with parameters of 53% coinsurance between the \$60,000 attachment point and the ceiling of \$100,000, per member.

### Projected Risk Adjustments PMPM:

Projection period Risk Adjustment PMPM has been estimated to be a payment of \$6.59, which is displayed in Table 5. First, UPMC considered the expected transfer for 2023, relying on projections by Wakely Consulting using the most recently available data.

[REDACTED]

[REDACTED]

[REDACTED]

The projection period Risk Adjustment transfer PMPM also accounts for the impact of known changes to HHS model weights for the 2025 Benefit Period. The transfer amount is not adjusted to reflect the estimated impact of the Risk Adjustment Data Validation (RADV) program, as there have been fluctuations in the program's impact directionally in recent years. UPMC relies on analysis by Wakely Consulting in estimating the impacts of both the 2025 model changes and the RADV program.

The projected transfer assumes a \$0 High Cost Risk Pool (HCRP) recovery net of the program's surcharge.

Please see Exhibit 9 of the Supporting Exhibits for the derivation of this estimate.

The value entered in Section II, Worksheet 1 of the URRT was \$8.35 since the calculation of the Market Adjusted Index Rate is done on an allowed claims basis in the URRT. The updated PMPM was derived by taking the original paid PMPM divided by the Paid to Allowed Average Factor. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a negative number because the calculation subtracts this value. The effect is an increase in premium as additional revenue will be required to cover the anticipated payment.

Exchange User Fees:

The member-weighted average of a 3.0% Marketplace User Fee for Marketplace enrollees combined with 0% for non-Marketplace enrollees calculates to 2.4%. This load is developed based on fees from on-exchange policies, but is spread over all policies uniformly. This translates to a PMPM of \$13.98, which was entered as a positive value in Table 5 since the calculation adds this value. The effect for this adjustment is an increase in premium as additional revenue will be required to cover the anticipated payment. Since the URRT requires the exchange user fee to be listed on an "allowed" basis, the final value included in the URRT was calculated by first taking exchange user fee PMPM of \$13.98 divided by the paid-to-allowed ratio to derive the "allowed" exchange user fee PMPM. This value was then divided by the market adjusted index rate to arrive at the final value of 2.8%.

Estimated Reinsurance Recoveries PMPM:

The index rate was further adjusted by accounting for estimated recoveries from the state-based reinsurance program. Estimated recoveries applied in Table 5 and Section II, Worksheet 1 of the URRT were \$26.29 PMPM and \$33.29 PMPM, respectively. The value entered in the URRT was derived by taking the Table 5 recovery PMPM and dividing by the Paid to Allowed Average Factor, as the calculation of the Market Adjusted Index Rate is done on an allowed claims basis. These values were entered as positive values in Table 5 and the URRT since both calculations subtract these values. The result of this adjustment is a decrease in projected period premium as less revenue will be required due to the anticipated recovery.

The estimated recovery of \$26.29 PMPM was derived using data entered into worksheets I.b, II.a, and II.b of the PA Actuarial Memorandum exhibits. Data entered into worksheet II.a matches the experience period data described in the sections above, and worksheet II.b was populated by referencing the same source of experience captured in worksheet II.a, but with member-level incurred claims trended forward two years to the projection period before allocating the data to each range within the continuance table. An annualized claims trend of 6.38% was applied to estimate the projected member-level claims used to populate worksheet II.b. The projected recovery as a percent of claims is calculated using a per-member attachment of \$60,000, a cap of \$100,000, and a coinsurance rate of 50%, as communicated by the Pennsylvania Insurance Department on April 3, 2024 via the 2025 ACA-compliant rate filing guidance. The formula in Table 5 (cell C33) calculates the a percent of projected paid claims, before pharmacy rebates, that the reinsurance recovery reflects, to align with the data in the continuance table in worksheet II.b.

**Non-Benefit Expenses and Profit & Risk**

Administrative Expense Load:

Administrative costs of 12.6% of premium have been displayed in Table 6 and the URRT. This value has been derived from projected administrative costs for the projection period. These expenses are assumed to be uniform for all plan designs.

[REDACTED]

Profit & Risk Margin:

The projected surplus and risk margin for this company is 2.0% for 2025. This value is listed in both Table 6 and the URRT. The same level of margin is expected for each plan included in this filing.

Taxes and Fees:

Taxes and Fees are expected to be 0.5% of premium in 2025. This accounts for the projected Federal Income Tax in 2025. Please note that the Risk Adjustment User Fee of \$0.18 PMPM and the projected PCORI Fee of \$0.27 PMPM were included in the Taxes and Fees field in Table 6 and the URRT.

## **Plan Adjusted Index Rates**

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2025 Plan Adjusted Index Rates. The allowable modifiers that are used in rate development are described below.

Plan Actuarial Value:

The AV for each plan was determined by the issuer's own pricing model based on experience from UPMC's fully-insured commercial block of business. This model calculates an AV for a given plan by first trending 2023 allowed claims data forward two years to the projection period, calculating paid amounts for each benefit category based on the benefit design of a given plan and projected allowed claims data, and taking the ratio of the total projected paid claims to projected allowed claims. Since the same tool was used for all plans, this eliminates any impact from morbidity at the plan level, and differing rate increases by product type are purely based on differences in benefit design for all plans within a given product.

Benefit Richness (induced demand)

Benefit richness factors were calculated using the formula  $(\text{Plan AV})^2 - (\text{Plan AV}) + 1.24$ , where (Plan AV) is equal to the product of the Plan AV described above and, when applicable, the Non-Funding of CSR Adjustment described below on a plan-by-plan basis. This formula was prescribed by the Pennsylvania Insurance Department and has been developed to produce induced demand factors that mimic those determined by HHS. The initial factors calculated using this formula were then normalized against projected membership by plan.

Benefits in addition to EHBs

Benefits that will be offered outside EHB include routine foot care, acupuncture, dental anesthesia, diabetes care management, and inherited metabolic disorder. The projected allowed claims for these benefits is \$1.06 PMPM. The adjustment factor of 1.002 included in Table 10 has been derived by adding the aforementioned PMPM to the projected index rate for 2025 and dividing this total by the same index rate, causing the adjustment to be applied uniformly to all plans.

### Provider Network

Network factors for 2025 were calculated to reflect cost differentials between networks and to ensure normalization using projected membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits. No major changes in cost differentials between networks are expected for 2025, so the relativities between network factors have been kept the same when comparing to 2024, and the factors have simply been re-normalized such that they average to 1.0. The current and proposed network factors are also shown in Table 14 of the PA Actuarial Memorandum Exhibits.

### Catastrophic Eligibility

No adjustments were made for catastrophic plans. Current enrollment is minimal and not credible.

### Non-Funding of CSR Adjustment

To account for the elimination of funding for cost-share reduction subsidies, the Pennsylvania Insurance Department has mandated the rates for all silver plans offered both on and off the exchange be increased via the CSR Defunding Adjustment in Table 10 of the Actuarial Memorandum Rate Exhibits. The captioned company will apply a factor of 1.22 as the CSR Defunding Adjustment for 2025. Several off-exchange only silver plans continue to be included for 2025 to minimize disruption to non-subsidized members enrolled in silver plans.

## **Calibration**

### Age Curve Calibration:

The average age factor was calculated using our projected ACA-related Individual population with the prescribed HHS Age Factors for 2025. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. For UPMC's entire block of ACA-compliant Individual business, the average age factor is 1.858 and average age was 44.8 during the experience period. This preliminary age factor is then multiplied by an adjustment factor of 0.997, which accounts for the regulation that prohibits charging for more than three children per family, resulting in a final age calibration factor of 1.852. Please see Exhibit 3 in the Supporting Exhibits for the calculation of this factor.

### Geographic Factor Calibration:

The geographic rating areas used within this filing are the same as those defined by the state. For 2025, the proposed geographic factors are identical to the 2024 filing for this company with the exception of Rating Area 5. The table below displays the current and proposed factors:

<b>Region</b>	<b>2024</b>	<b>2025</b>
1	0.966	0.966
2	1.165	1.165
3	1.280	1.280
4	0.966	0.966
5	0.993	1.011
6	1.431	1.431
7	1.455	1.455
9	1.274	1.274

The proposed factor for Rating Area 5 acknowledges the elevated costs observed in that region relative to other regions after accounting for age, benefit level, and morbidity. Please see Exhibit 12 of the Supporting Exhibits for an illustration of this change.

The calibration factor of 0.994 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 4 of the Supporting Exhibits.

Tobacco Use Rating Factor Calibration:

The average tobacco factor was calculated using projected membership, which is assumed to have the same split for tobacco status as current membership. The member-weighted average of a 2.5% load applied for enrollees who qualify as tobacco users combined with a 0% load for non-tobacco users yields an average tobacco factor of 1.002. The derivation of this factor is shown below.

<b>Tobacco Status</b>	<b>Feb 2024 Enrollment Split</b>	<b>Tobacco Factor</b>	<b>Calibration Factor</b>
Non-User	92.7%	1.000	0.927
User	7.3%	1.025	0.074
<b>Total</b>	100.0%		<b>1.002</b>

**Consumer Adjusted Premium Rate Development**

Table 11 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance. 2025 rates calculated in this tables were tested to ensure that they match those included in the PA Plan Design Summary and Rate Tables, Federal Rates Template, and the binder. The Plan Adjusted Index Rates are divided by the age calibration factor then multiplied by the specific age, geographic, and tobacco factors shown in Tables 12, 13, and 14 of the PA Actuarial Memorandum Exhibits, respectively, to develop the Consumer Adjusted Premium Rates.

**Projected Loss Ratio**

The projected period loss ratio, using the federally-prescribed MLR methodology without the credibility adjustment, is 85.2%, as shown in Exhibit 1 of the Supporting Exhibits.

An exhibit displaying historical MLR information is provided in Exhibit 2 of the Supporting Exhibits. Loss ratios in the 'Actual' column have been calculated from data submitted in the most recent three-year MLR filing using the federally-prescribed MLR methodology without the credibility adjustment. Enrollment data in the 'Actual' column ties directly to the historical data included in Table 4 of the PA Actuarial Memorandum Exhibits. Loss ratios and enrollment data in the 'Pricing' columns are projected values taken from each calendar year's approved ACA rate filing.

## Plan Product Info

### AV Metal Values

Metal values were determined using the final 2025 HHS AV Calculator. For plans with designs that were incompatible with the AV Calculator, a Supporting Documentation and Justification narrative has been included with the AV Screenshots.

### Membership Projections

Projected membership for plan year 2025 does not vary significantly from the February 2024 enrollment. Membership projections for renewing plans are assumed equal to the February 2024 enrollment, and a small number of members is assumed to enroll in new plans.

### Terminated Plans and Products

Please see Table 10 of the PA Actuarial Memorandum Exhibits for a mapping of all terminated SCIDs to a 2025 plan, where applicable.

### Warning Alerts

Several warning messages appear after clicking the validate button in the URRT. These messages highlight the fact that several terminated or renewing plans have entries of zero in the current enrollment and premium PMPM fields on worksheet 2 of the URRT. Similar messages have appeared in the URRT in prior years across UPMC companies for similar reasons.

### Effective Rate Review Information

The Pennsylvania Insurance Department is responsible for conducting effective rate review for all submitted rates.

### Reliance

Below is a summary of the information that we have relied on as part of rate development.

Source	Type of Information	Comments
Jeffrey A. Bees, CFO, Commercial Products and WorkPartners	Projected administrative expenses, impact of discontinuation of SaveOnSP Program	I have not performed any independent audit or otherwise verified the accuracy of this data/information.
Rachel Oaks, Sr. Director, Medical Economics	Anticipated savings from medical savings initiatives	I have not performed any independent audit or otherwise verified the accuracy of this data/information.

## List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Derivation of Projection Period MLR
- Exhibit 2: Actual vs Pricing MLR & Member Months
- Exhibit 3: Derivation of Age Calibration Factor
- Exhibit 4: Derivation of Geographical Calibration Factor
- Exhibit 5: Current/Projected Commissions by OEP and SEP
- Exhibit 6: Derivation of 3-Child Cap Adjustment Factor
- Exhibit 7: Derivation of Change in Network Factor
- Exhibit 8: Derivation of Change in Other Factor
- Exhibit 9: Derivation of Projected Risk Adjustment PMPM
- Exhibit 10: Projected Administrative Expense Load Development
- Exhibit 11: Derivation of Projected Taxes and Fees
- Exhibit 12: Derivation of Change in Geographic Rating Factors
- Exhibit 13: Exchange User Fee Development

## Actuarial Certification

I, [REDACTED] am a Member of the American Academy of Actuaries in good standing. I am currently Manager for ACA products in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR § 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2025 Rate Filing Justification.
- The projected Index Rate is:
  - a. In compliance with all applicable state and Federal statutes and regulations (45 CFR § 156.80 and § 147.102)
  - b. Developed in compliance with the applicable Actuarial Standards of Practice
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered
  - d. Neither excessive nor deficient
- The Index Rate and only the allowable modifiers as described in 45 CFR § 156.80(d)(1) and § 156.80(d)(2) were used to generate plan level rates.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

# Standard Questions – IND Health Options

## 1. Membership

- a. If the projected membership for plan year 2025 significantly differs from the current 2/1/2024 membership, please explain why.

**Projected membership for plan year 2025 does not vary significantly from the February 2024 enrollment. Membership projections for renewing plans are assumed equal to the February 2024 enrollment.**

## 2. Experience Period Claims:

- a. Please confirm that all claims which are capitated have been removed from the experience period claims.

**Our ACA markets do not have any capitation agreements, thus there are no capitated claims to be removed from the experience period.**

- b. Please confirm that all non-EHB claims have been removed from the experience period claims.

**We can confirm that all non-EHB claims have been removed from the experience period claims.**

- c. How are drug rebates projected to change from the base period to the rating period? How has this change been reflected in the rate development?

**We do not anticipate material changes in drug rebates from the 2023 base period to the 2025 rating period, thus no change has been reflected in the rate development.**

## 3. COVID:

- a. Please confirm that Tables 2-4 of the PAAM Exhibits do not have any COVID adjustment. Additionally, please confirm that any COVID adjustment factor in the filing is reflected in Table 5 of the PAAM Exhibits.

**We can confirm that Tables 2-4 of the PAAM Exhibits are not adjusting for COVID. We are not including a COVID adjustment factor in our filing, thus no associated factor is reflected in Table 5 of the PAAM Exhibits.**

- b. If there is a COVID adjustment factor other than 1.0, please provide a quantitative exhibit supporting the factor.

**The COVID adjustment factor in the filing is 1.0 (no adjustment).**

- c. Please confirm that Tables 2-4 of the PAAM Exhibits do not have any COVID adjustment. Additionally, please confirm that any COVID adjustment factor in the filing is reflected in Table 5 of the PAAM Exhibits.

**For Plan Year 2025, UPMC Health Plan will apply cost share for COVID-19 diagnostic and antibody testing and prescription antiviral and monoclonal antibody treatment in accordance with the cost share set forth in a member's plan documents. COVID-19 vaccines will continue to be covered at no-cost to members as a preventive service. Over-the-counter COVID-19 tests will not be eligible for reimbursement under a member's medical benefit.**

4. Trend:

- a. [SG. Only] If the Total Annual Trend in Table 3 (weighted by credibility) and the Annual Trend used to calculate quarterly rates in Table 5A differ, please provide an explanation and exhibit in support of the variation.

**N/A**

- b. [SG. Only] In Table 5A, if cells K32:M32 are left to equal J32, please explain why that is a reasonable assumption.

**N/A**

5. Table 6 - Retention:

- a. Please confirm that the federal income tax is calculated using a Federal Income Tax Rate of 21%. If other adjustments were made in Table 6, cell C57, please provide a demonstration of how this number was calculated and an explanation of the other adjustments included in the calculation.

**UPMC is filing a 2% surplus and risk load for the 2025 rating period, including consideration of the 21% federal income tax rate. The surplus and tax are both reflected in Table 6, and cell C57 does not reflect any additional adjustments.**

- b. Please confirm that the Risk Adjustment User Fee PMPM is consistent with HHS Final Notice of Benefit and Payment Parameters for plan year 2025.

**We can confirm that the Risk Adjustment User Fee of \$0.18 PMPM is consistent with HHS Final Notice of Benefit and Payment Parameters for plan year 2025.**

- c. Please provide an exhibit showing the commission PMPM amount to be paid to brokers in the following situations: Open-Enrollment Enrollee – Renewing, Open Enrollment Enrollee – New, Special Enrollment Period Enrollee – New, Special Enrollment Enrollee – Renewing. If the commission PMPM is not consistent between the four options above, please provide a detailed explanation as to the reason for the difference.

As mentioned in the actuarial memoranda, there is no difference between the OEP and SEP commissions. Please see Exhibit 5 of the Supporting Exhibits for the requested illustration.

6. Pricing AVs:

- a. Please confirm that the Pricing AVs were calculated using a single risk pool (i.e., claims experience is **not** separated by metal level).

**We can confirm that the Pricing AVs were calculated using a single risk pool (i.e. claims experience is not separated by metal level).**

- b. Please identify and support any differences between the company's metallic AV calculator results and the corresponding Pricing AVs.

**Unlike the AV Calculator (AVC), which relies on a national data set, UPMC models actuarial value of benefit based on its own allowed claims experience. The UPMC benefit valuation calculator is updated annually and is used to determine the actuarial value of a plan design by readjudicating an experience period claim by claim to calculate the plan liability for each policyholder. The ratio of the total plan liability to the total allowed claims is the plan AV. This simulation ensures that UPMC has the ability to calculate factors that account for embedded versus aggregate deductibles or out-of-pocket maximums, and that claim types align with our schedule of benefits.**

**Table 10 of the PAAM Exhibits illustrates the AV results from both the AVC and our pricing process for each plan.**

7. Expanded Bronze Plans:

- a. Please provide an exhibit which demonstrates that the criteria for expanded bronze plans have been met.

**The plans corresponding to the following Standard Component IDs have Expanded Bronze Actuarial Values:**

**16322PA0050138  
16322PA0050139**

**Each of these plans fit the criteria for Expanded Bronze allowance under 45 CFR § 156.140 (c) (2). Namely:**

- **The Plan covers at least one major service, other than preventative services, before the deductible.**

**In this instance, the major service(s) covered before deductible are PCP office visits and Generic prescription drugs. The screenshots of the AV Calculator for these plans demonstrate this, as well as the corresponding Plan and Benefits Templates.**

8. PAAM Exhibits – Consumer Factors:

- a. Please provide quantitative and qualitative support for the proposed geographic rating area factors, if different from the previous year.

**Please see Exhibit 4 of the enclosed Supporting Exhibits for support for the proposed change to 2025 geographic rating area factors relative to 2024.**

- b. Please provide quantitative and qualitative support for the proposed network factors, if different from the previous year.

**Proposed 2025 network factors did not change relative to one another when compared to 2024 network factors. However, the factors are normalized each year in order to average to 1.000 based on current (February) enrollment.**

9. MLR Exhibit:

- a. Please complete table below which summarizes the most recent three years of complete MLR information.
- i. Actual is the final information which was filed for the specified calendar year
  - ii. Projected is the information which was projected in the final annual filing for the given year (i.e., 2021 projected information is from the plan year 2021 annual filing submitted in 2020)

Calendar Year	MLR		Member Months	
	Actual	Projected	Actual	Projected
2020	92.7%	82.0%	1,441,026	1,650,684
2021	96.2%	83.2%	1,307,861	1,462,632
2022	91.7%	81.2%	1,218,359	1,324,200

- b. Are the MLRs and Member Months between Actual and Pricing comparable? If not, explain.

**Because the policies issued in the Individual market align with the calendar year, these MLRs are fairly comparable. MLR differences observed by plan year can be attributed to claims experience emerging differently than expected as well as Risk Adjustment transfers generally materializing less favorable than projected at the time of pricing.**

**The actual and pricing member months are comparable. Variances are generally driven by relative rate position among other carriers, which are not known at the time of rating, as well as any holistic changes to the market.**

- c. Does the insurer expect to pay MLR rebates for the 3-year period above?

**UPMC does not expect to pay MLR rebates for the 3-year period above.**

10. Plan of Withdrawal:

- a. Please confirm that a Plan of Withdrawal has been submitted if any plans are being discontinued.

**UPMC does not intend to discontinue the issuance of any plan, product, or book of business at the end of the policy term for current policyholders without offering alternative coverage.**

11. Transitional Plans:

- a. Starting in October 2024, the PID will discontinue the non-enforcement policy for individual transitional plans (the non-enforcement policy for small group transitional plans will continue until further notice, or until the federal government discontinues its non-enforcement policy). If applicable, please discuss the migration of individual transitional members into ACA-compliant plans effective January 1, 2025.

**Not applicable**

12. Copay Adjustment Programs:

- a. Does the company use a copay adjustment program (also known as a copay accumulator program)?

**UPMC intends to operate a copay adjustment program for policies covered by this rate filing.**

- b. How does the company handle copay assistance coupons? For example, does the coupon apply to the MOOP?

**The program in effect for PY 2025 will not apply copay assistance coupons to the MOOP.**

- c. If any change to such a program has resulted in a pricing impact, please include a detailed quantitative exhibit supporting the pricing impact.

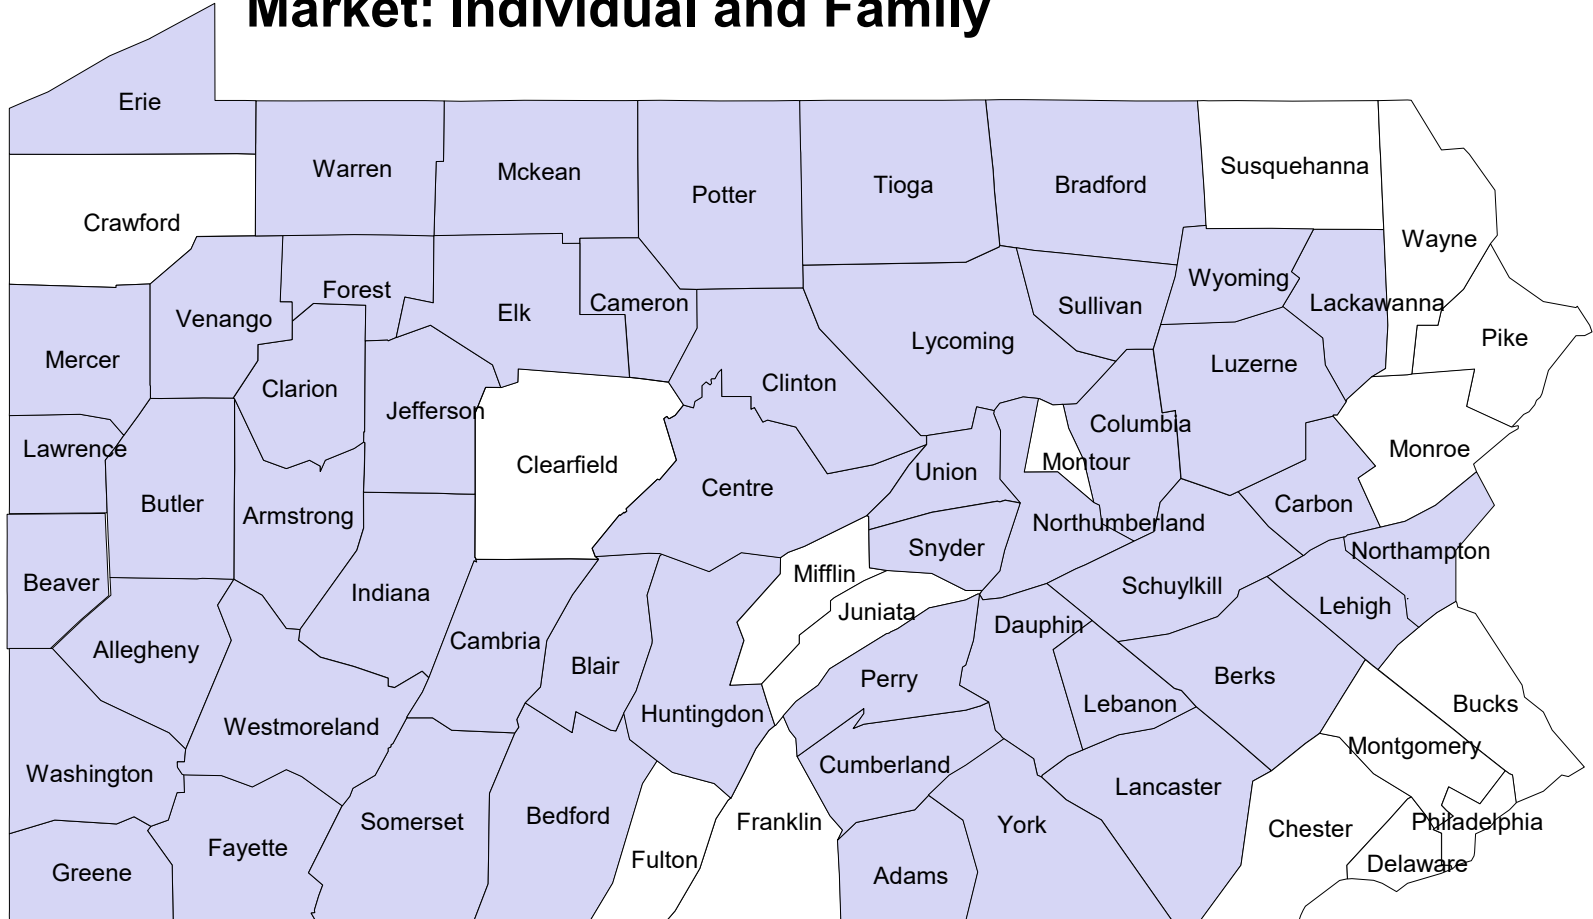

**Exhibit 8 in the enclosed Supporting Exhibits quantifies the impact on the projected period relative to the experience period of the discontinuation of the SaveOnSP program. The expected savings for the forthcoming copay adjustment program in PY 2025 is reflected separately from the impact of the former program and is included in Exhibit 8 of the Supporting Exhibits.**

# 2024 Service Area

## Issuer: UPMC Health Options, Inc.

### Market: Individual and Family

Key (modify as needed)

-  : On-exchange service area
-  : Off-exchange service area
