

Oscar Health Plan of Pennsylvania, Inc. - Individual Plans

Rate request filing ID # OHIN-134107350 – This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at https://www.insurance.pa.gov/Consumers/HealthInsuranceFilings/Pages/ACA-Health-Rate-Filings.aspx

Overview

Initial request average rate change: 4.40% Revised requested average rate change: 4.00%

Range of requested: -15.34% to 16.96% Effective date: January 1, 2025

Mapped members: 2,791

Available in: Rating Areas 3, 6, 7, and 8

Key Information

Jan. 2023 - Dec. 2023 financial experience

Premiums	\$17,251,769
Claims	\$12,035,490
Administrative Expenses	\$2,734,424
Taxes & Fees	\$583,467
Insurer made (after taxes)	\$1,898,388

How insurer plans to spend your premium

This is how the insurance company plans to spend

the premium it collects in 2025

Claims: 89%
Administrative: 9%
Taxes & Fees: 1%

Profit: 2%

The insurer expects its annual medical costs to increase 5.1%.

Explanation of Requested Rate Change:

- Trends in medical and prescription drug cost and utilization
- Changes in taxes, fees, administrative expenses, and profit
- Changes in the benefits and cost-sharing offered
- Changes in the factors used to model

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

Cover Letter

May 15, 2024

Ms. Tracie Gray, Director
Bureau of Accident and Health Insurance
Pennsylvania Insurance Department
1311 Strawberry Square
Harrisburg, PA 17120

Re: Cover Letter for Oscar Health Plan of Pennsylvania, Inc.'s (Oscar's) Rate Filing Effective January 1, 2025 SERFF OHIN-134107350

Dear Ms. Gray:

This cover letter is in support of Oscar's Affordable Care Act (ACA) products in the individual market, to be offered with an effective date of January 1, 2025. The information requested in the Pennsylvania Insurance Department's (PID's) 2024 ACA Compliant Health Insurance Rate Filing Guidance dated April 4, 2024 is provided below.

- 1. Company Name and NAIC Number
 - Oscar Health Plan of Pennsylvania, Inc.
 - NAIC Number 16590
- 2. Market (Individual or Small Group): Individual
- 3. On/Off or Off Exchange: On/Off
- 4. Effective Date of Coverage: January 1, 2025
- 5. Average Rate Change Requested: 4.0%
- 6. Range of Rate Change Requested: -1.0% to 10.6%
- 7. Total Additional Annual Revenue Generated from the Proposed Rate Change: \$861,917
- 8. Products: HMO
- 9. Rating Areas and Any Changes from 2023:
 - Current Rating Areas:3, 6, 7, and 8
- 10. Metal Levels and Catastrophic Plans: Catastrophic, Bronze, Silver, Gold
- 11. Current Number of Covered Lives and of Policyholders as of February 1, 2024:
 - 0 2,791
 - 0 2,244
- 12. Number of Plans Offered in 2025 and the Change this Represents from 2024:
 - o 14 plans offered in 2025

o 15 plans offered in 2024

13. Corresponding Contract Form Number, SERFF, and Binder ID Numbers:

• Forms: OSC-PA-IVL-EOC-2025-HIX

Form Filing: OHIN-134083083
 Rate Filing: OHIN-134107350

o Binder: OHIN-PA25-125118135

14. HIOS Issuer ID Number and Submission Tracking Number:

• HIOS Issuer ID Number: 98517

Alicia Bartick-Ozmucur, ASA, MAAA

Rate Increase Justification

1. Scope and Range of Rate Increase

The purpose of this document is to present rate change justification for Oscar Health Plan of Pennsylvania, Inc (Oscar's) Individual Affordable Care Act (ACA) products, with an effective date of January 1, 2025, and to comply with the requirements of Section 2794 of the Public Health Service Act as added by Section 1003 of the Patient Protection and Affordable Care Act (ACA).

Using in-force business as of March 2024, the proposed average rate increase for renewing plans is 4.4%. Rate increases vary by plan due to a combination of factors including shifts in benefit leveraging and cost-sharing modifications. This rate increase is absent of rate changes due to attained age.

The rate increase impacts an estimated 2,380 members.

2. Reason for Rate Increase(s)

The significant factors driving the proposed rate change include the following:

Medical and Prescription Drug Inflation and Utilization Trends

The projected premium rates reflect the most recent emerging experience which was trended for anticipated changes due to medical and prescription drug inflation and utilization.

Administrative Expenses, Taxes and Fees, and Risk Margin

Changes to the overall premium level are needed because of required changes in federal and state taxes and fees. In addition, there are anticipated changes in both administrative expenses and targeted risk margin.

Prospective Benefit Changes

Plan benefits have been revised as a result of changes in the Center for Medicare and Medicaid Services (CMS) Actuarial Value Calculator and state requirements, as well as for strategic product considerations.

Anticipated Changes in the Average Morbidity of the Covered Population

Changes to the overall premium level are needed because of anticipated changes in the underlying morbidity of the projected marketplace.

Anticipated Changes in the Network Configuration

Changes to the overall premium level are needed because of anticipated changes in the underlying network configuration and associated unit costs.

COVID-19 Pandemic

Changes to the overall premium level are needed to reflect the anticipated impact of the change in Covid-19 vaccines and pharmaceutical treatment costs.

1. Introduction and Purpose

The purpose of this document, which is submitted in conjunction with the Part I Unified Rate Review Template (URRT) and Pennsylvania Actuarial Memorandum Rate Exhibits (Rate Exhibits), is to comply with the requirements of the Part III Actuarial Memorandum and to support the premium rates developed for Oscar Health Plan of Pennsylvania, Inc. (Oscar's) Affordable Care Act (ACA) products in the individual market, with an effective date of January 1, 2025.

This actuarial memorandum provides certain information related to the rate filing submission including support for the values entered into the URRT, which demonstrates compliance with the market rating rules and reasonableness of applicable rate increases. This information may not be appropriate for other purposes.

This information is intended for use by the Pennsylvania Insurance Department (PID), the Center for Consumer Information and Insurance Oversight (CCIIO), and their subcontractors to assist in the review of Oscar's individual market rate filing.

Future regulatory changes may affect the extent to which the rates presented herein are neither excessive nor deficient.

2. General Information

Company Identifying Information

Company Legal Name: Oscar Health Plan of Pennsylvania, Inc.

State: Pennsylvania

NAIC: 16590
HIOS Issuer ID: 98517
Market: Individual
Effective Date: January 1, 2025

Policy Forms: OSC-PA-IVL-EOC-2025-HIX

Company Contact Information

3. Proposed Rate Increases

Reason for Rate Increase(s)

Exhibit A summarizes the proposed rate increases by plan effective January 1, 2025. Rate increases vary by plan due to a combination of factors including shifts in benefit leveraging, cost-sharing modifications, and geographic rating factors. Using in-force business as of March 2024, the proposed average rate change for renewing plans is 4.4%. This rate change is absent of rate changes due to attained age.

The significant factors driving the proposed rate change include the following:

Medical and Prescription Drug Inflation and Utilization Trends

The projected premium rates reflect the most recent emerging experience which was trended for anticipated changes due to medical and prescription drug inflation and utilization.

Administrative Expenses, Taxes and Fees, and Risk Margin

Changes to the overall premium level are needed because of required changes in federal and state taxes and fees. In addition, there are anticipated changes in both administrative expenses and targeted risk margin.

Prospective Benefit Changes

Plan benefits have been revised as a result of changes in the Center for Medicare and Medicaid Services (CMS) Actuarial Value Calculator and state requirements, as well as for strategic product considerations.

Anticipated Changes in the Average Morbidity of the Covered Population

Changes to the overall premium level are needed because of anticipated changes in the underlying morbidity of the projected marketplace.

Anticipated Changes in the Network Configuration

Changes to the overall premium level are needed because of anticipated changes in the underlying network configuration and associated unit costs.

COVID-19 Pandemic

Changes to the overall premium level are needed to reflect the anticipated impact of the change in Covid-19 vaccines and pharmaceutical treatment costs.

Rate Development Overview

The plans included in this rate filing are to be offered for sale effective January 1, 2025. Oscar's rate development, including the methodology described below, is based on generally accepted actuarial principles for community rated individual blocks of business.

Underlying Claim Experience

Oscar started with Pennsylvania's individual claim experience from January 1, 2023 through December 31, 2023, with runout through March 31, 2024, as the experience basis in the projection. The claim amount includes an estimate for Incurred But Not Reported (IBNR) claims.

In the absence of fully credible base experience claim data, Oscar also utilized Florida individual claim experience from Oscar's legal entity (Oscar Insurance Company of Florida; NAIC code 16374) as the manual rate basis in the projection. The base experience used for the manual projection reflects claims from January 1, 2023 through December 31, 2023, with runout through March 31, 2024, and includes an estimate for (IBNR) claims.

Trend

Oscar applied utilization and unit cost trends to the underlying medical and prescription drug claims to reflect the expected claim levels in the projection period.

Benefit Adjustment

The projected claims were adjusted to reflect the benefits for each of the products to be offered on and off the exchange.

Demographics and Morbidity

The starting claim experience was adjusted to reflect changes in the anticipated morbidity and demographics corresponding to Oscar's projected 2025 membership distribution.

Market Morbidity

The starting claim experience was additionally adjusted to reflect changes in the anticipated market morbidity from the base period to the projection period in response to the uncertainty inherent in the marketplace.

Network Adjustment

The projected claims were adjusted to reflect changes in the anticipated provider reimbursement levels.

COVID-19 Pandemic

The starting claim experience was adjusted from the base period to the projection period to reflect the anticipated impact of the change in Covid-19 vaccines and pharmaceutical treatment costs. Future outbreaks, regulatory, legislative, or economic changes may affect the extent to which the rates presented herein are neither excessive nor deficient.

State-Based Reinsurance Program

The claim experience was adjusted to reflect the removal of the projected reinsurance recoveries. At PID's request, recoveries were developed on a percent of net claims approach using the initial parameters for the 2025 plan year — \$60,000 attachment point, coinsurance of 50%, up to a reinsurance cap of \$100,000.

Risk Adjustment

The projected claims were adjusted to reflect payments to the individual (catastrophic and non-catastrophic) risk pool as a result of the risk adjustment program.

Administrative Expenses and Risk Margin

The premium incorporates an average 10.0% administrative charge, which is inclusive of general administrative expenses, commission, and risk margin.

Taxes and Fees

The premium rates reflect applicable state and federal taxes and fees for the 2025 plan year.

4. Market Experience

4.1. Experience and Current Period Premium, Claims, and Enrollment

Oscar's rates are developed using a single risk pool, established according to the requirements in 45 CFR Part 156, §156.80(d). The experience period data is based on all Oscar individual market policies in Pennsylvania and the projection period reflects all projected covered lives for every non-grandfathered product/plan combination for Oscar in the Pennsylvania individual market.

The premium earned during the experience period and as reported on Worksheet 1, Section I of the URRT and Table 2 — Experience Period Claims and Premiums of the Rate Exhibits are from Oscar's data warehouse for calendar year 2023. The premiums do not reflect an adjustment for MLR rebates as Oscar does not anticipate paying rebates for the base period.

Experience Period Loss Ratio

The loss ratio, expressed as incurred claims over revenue (defined as gross premium +/- risk adjustment) for the experience period data is 69.76%, as shown in Table 2 — Experience Period Claims and Premiums of the Rate Exhibits.

Paid Through Date

The experience period in Worksheet 1, Section I of the URRT and Table 2 — Experience Period Claims and Premiums of the Rate Exhibits shows Oscar's earned premium and incurred claims for the experience period of January 1, 2023 through December 31, 2023, with claims paid through March 31, 2024.

Current Date

The current period in Worksheet 2, Section II of the URRT and Table 1 — Number of Members of the Rate Exhibits shows Oscar's premium and enrollment using in-force business as of March 2024.

Allowed and Incurred Claims Incurred During the Experience Period

Oscar's calendar year 2023 medical and pharmacy claim data was used for developing the single risk pool claims. Worksheet 1, Section I of the URRT outlines Oscar's best estimate of claims incurred during the experience period. The estimate includes:

- Claims processed through Oscar's claim system,
- Claims processed outside of the claim system (e.g. pediatric dental and vision services), and
- Oscar's best estimate of IBNR.

Oscar's claim reserves consists of liabilities for both claims incurred but not reported ("IBNR") and reported but not yet processed through our systems that are determined by employing actuarial methods that are commonly used by health insurance actuaries. The completion factor development method is utilized for non-catastrophic claims (under \$250,000), supplemented by a projected per-member per-month (PMPM) claims methodology for generally the most recent two months. Projected PMPMs are developed from the Company's historical experience and adjusted for emerging experience data in the preceding months, which may include adjustments for known changes in estimates of recent hospital and drug utilization data, provider contracting changes, changes in benefit levels, changes in member cost sharing, changes in medical management processes, claim inventory levels, product mix, and workday seasonality. A seriatim methodology is utilized for single catastrophic claims (over \$250,000), supplemented by known open cases that are in various stages of review by Oscar's medical management team, or under bill audit review. A separate accrual process is also employed to develop reserves for exposure related to out-of-network and other provider disputed claims.

4.2. Benefit Categories

The benefit categories described below are based on the algorithm used by Milliman's *Health Cost Guidelines*[™] (HCGs). The HCG grouper uses a combination of Diagnosis Related Groups (DRGs), Current Procedural Terminology Codes – Fourth Edition (CPT-4 Codes), Healthcare Common Procedural Coding System codes (HCPCS), and revenue codes to allocate detailed claims into roughly 60 benefit categories.

The utilization and unit cost data for rate development were assigned to benefit categories as shown in Worksheet 1, Section I of the URRT based on place and type of service using a detailed claim mapping algorithm, which can be summarized as follows:

Inpatient Hospital

Includes non-capitated facility services for medical, surgical, maternity, mental health and substance abuse, skilled nursing, and other services provided in an inpatient facility setting and billed by the facility.

Outpatient Hospital

Includes non-capitated facility services for surgical, emergency room, ancillary, observation and other services provided in an outpatient facility setting and billed by the facility.

Professional

Includes non-capitated primary care, specialty care, therapy, the professional component of laboratory and radiology, and other professional services, except for hospital based professionals whose payments are included in facility fees.

Other Medical

Includes non-capitated ambulance, home health care, durable medical equipment, prosthetics, supplies, vision exams, dental services and other services. The measurement units for utilization used in this category are a mix of visits, cases, and procedures.

Capitation

Includes the amount for any services that are provided on a capitated basis.

Prescription Drug

Includes drugs dispensed by a pharmacy. This amount is net of rebates received from drug manufacturers.

4.3. Projection Factors

This section includes a description of each factor used to project the experience period allowed claims to the projection period, supporting information related to the development of those factors is also included.

Trend Factors - Cost and Utilization

Average cost trends were developed based on Oscar's anticipated reimbursement levels. Utilization trends were developed at the broad service category level: inpatient facility, outpatient facility, professional, other, and prescription drugs. Utilization trend assumptions were generally estimated using Milliman's HCG secular utilization trend levels, which are based on large data sets and are widely used by insurers and others to estimate expected claim costs and model healthcare utilization.

Table 1 provides the annualized trend assumptions that were used to adjust the allowed claims from the experience period to the projection period. The overall trend used to get from the experience period to the projection period is based on an unleveraged prospective annual trend of 5.1%.

Table 1							
Anı	Annual Trend Assumptions						
Benefit		Trend					
Category	Utilization	Unit Cost	Total				
Inpatient	0.5%	3.6%	4.2%				
Outpatient	0.5%	5.7%	6.3%				
Physician	0.5%	0.8%	1.3%				
Other	0.5%	0.8%	1.3%				
Capitation	0.0%	0.0%	0.0%				
Prescription Drug	4.9%	3.0%	8.1%				
Grand Total	1.5%	3.6%	5.1%				

The trend factors by benefit category are included in the "Year 1 Trend" and "Year 2 Trend" entries on Worksheet 1, Section II of the URRT and "Cost" and "Utilization" entries in Table 3 — Trend Components of the Rate Exhibits.

Adjustments to Trended EHB Allowed Claims PMPM

Morbidity Adjustment

The starting allowed claim experience was adjusted to reflect changes in the anticipated morbidity corresponding to Oscar's projected demographic mix and membership distributions.

A second adjustment was included to reflect changes in the anticipated market morbidity in response to the uncertainty inherent in the marketplace. Specifically, Oscar anticipated changes to the market morbidity associated with the change in Pennsylvania's enrollment for the projection period relative to the experience period, as well as the anticipated impact due to a proportion of Medicaid members enrolling in the ACA marketplace throughout 2023 and 2024.

These adjustments reflect the projected change in claim costs outside of the underlying demographics of the covered population and were also assumed when estimating the risk adjustment transfer for the projection period.

A combined factor of 1.134 is included in the "Morbidity Adjustment" entry on Worksheet 1, Section II of the URRT and in the "Change in Morbidity - All Other" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Demographic Shift

An adjustment was included to account for the anticipated changes in demographic mix — in both age/gender and geography — between the experience period and the projection period.

A factor of 1.079 is included in the "Demographic Shift" entry on Worksheet 1, Section II of the URRT and the "Change in Demographics" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Plan Design Changes

Oscar applied an adjustment to account for the anticipated changes in the average utilization of services due to differences in average cost sharing requirements between the experience period and projection period. Plan behavior change factors were applied at the plan level using factors developed from Oscar's risk adjusted individual claim experience. The resulting allowed and net claim costs for each plan reflect differences due to cost sharing and the impact of plan behavior change only, and not due to health status.

A factor of 1.025 is included in the "Plan Design Changes" entry on Worksheet 1, Section II of the URRT and the "Change in Benefits" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Other Adjustments - Changes in Network

Oscar applied an adjustment to account for anticipated changes in provider reimbursement levels between the experience period and projection period. The reimbursement changes are in response to modifications to Oscar's underlying contracts with its providers.

A factor of 1.000 is included in the "Change in Network" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Other Adjustments – Prescription Drug Rebates

An adjustment of 0.981 was included to account for the anticipated changes in the level of prescription drug rebates between the experience period and projection period.

Other Adjustments – Pooling Charge

An adjustment of 1.006 was included to account for Oscar experiencing lower than expected shock claims during the experience period. In this context, a shock claim is defined as annual costs in excess of \$750,000 per individual claimant.

Other Adjustments – Impact of the COVID-19 Pandemic

Oscar included an adjustment of 1.000 to account for the changes in expected COVID-19 healthcare costs for Vaccines and Pharmaceutical treatment from the experience period to the projection period.

Other Adjustments - Combined

A combined factor of 0.972 is included in the "Other" entry on Worksheet 1, Section II of the URRT and the "Change in Other" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Manual Rate Adjustments

Since Oscar's base experience in Pennsylvania is partially credible, a manual rate methodology was additionally developed for rating purposes as described in this section. The adjustments described below were used to develop the Manual EHB Allowed Claims PMPM entry on Worksheet 1, Section II of the URRT and Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Source and Appropriateness of Experience Data Used

Oscar started with individual claim experience from January 1, 2023 through December 31, 2023, with runout through March 31, 2024, as the manual rate basis in the projection. The starting claim experience is from Oscar's legal entity (Oscar Insurance Company of Florida; NAIC code 16374) offering in the Florida individual market. The premium earned and incurred claims during the manual period and as reported on Worksheet 1, Section I of the URRT and Table 2 — Manual Period Claims and Premiums of the Rate Exhibits are from Oscar's data warehouse for calendar year 2023.

In accordance with Actuarial Standards of Practice (ASOP) #25 — Credibility Procedures, Oscar's internal credibility manual, determined from statistical relationships inherent in nationwide experience in the individual market, assigns full credibility at 85,000 member months. Oscar's manual includes 6,803,690 member months and is considered fully credible for purposes of developing claim projections.

Adjustments Made to the Data

Exhibit B summarizes the adjustment factors, as described in this section, used to project the manual rate claims on an allowed basis to the projection period.

Incurred But Not Reported

The starting claim experience represents Oscar's best estimate of claims incurred during the manual period. The estimate includes:

- Claims processed through Oscar's claim system,
- Claims processed outside of the claim system (e.g. pediatric dental and vision services), and
- Oscar's best estimate of IBNR.

Oscar's claim reserves consists of liabilities for both claims incurred but not reported ("IBNR") and reported but not yet processed through our systems that are determined by employing actuarial methods that are commonly used by health insurance actuaries. The completion factor development method is utilized for non-catastrophic claims (under \$250,000), supplemented by a projected per-member per-month (PMPM) claims methodology for generally the most recent two months. Projected PMPMs are developed from the Company's historical experience and adjusted for emerging experience data in the preceding months, which may include adjustments for known changes in estimates of recent hospital and drug utilization data, provider contracting changes, changes in benefit levels, changes in member cost sharing, changes in medical management processes, claim inventory levels, product mix, and workday seasonality. A seriatim methodology is utilized for single catastrophic claims (over \$250,000), supplemented by known open cases that are in various stages of review by Oscar's medical management team, or under bill audit review. A separate accrual process is also employed to develop reserves for exposure related to out-of-network and other provider disputed claims.

Trend Factors – Cost and Utilization

Average cost trends were developed based on Oscar's anticipated reimbursement levels. Utilization trends were developed at the broad service category level: inpatient facility, outpatient facility, professional, other, and prescription drugs. Utilization trend assumptions were generally estimated using Milliman's HCG secular utilization trend levels, which are based on large data sets and are widely used by insurers and others to estimate expected claim costs and model healthcare utilization.

Table 2 provides the annualized trend assumptions that were used to adjust the allowed claims from the manual period to the projection period. The overall trend used to get from the manual period to the projection period is based on an unleveraged prospective annual trend of 4.6%.

Table 2					
Ar	nnual Trend Assu	umptions			
Benefit		Trend			
Category	Utilization	Unit Cost	Total		
Inpatient	0.7%	3.5%	4.2%		
Outpatient	0.7%	4.2%	5.0%		
Physician	0.7%	2.1%	2.8%		
Other	0.7%	2.1%	2.8%		
Capitation	0.0%	0.0%	0.0%		
Prescription Drug	5.2%	3.6%	9.0%		
Grand Total	1.2%	3.3%	4.6%		

A factor of 1.094 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT and the "Total Applied Trend Projected Factor" entry of Table 3b — Manual Trend Components of the Rate Exhibits.

• Plan Design Changes

Oscar applied an adjustment to account for the anticipated changes in the average utilization of services due to differences in average cost sharing requirements between the manual period and projection period. Plan behavior change factors were applied at the plan level using factors developed from Oscar's nationwide risk adjusted individual claim experience. The resulting allowed and net claim costs for each plan reflect differences due to cost sharing and the impact of plan behavior change only, and not due to health status.

A second adjustment was included to account for anticipated changes in underlying benefit coverage between the manual period and the projection period capturing inherent differences in EHBs, state mandated benefits, and eliminated benefits.

A combined factor of 1.050 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT and the "Change in Benefits" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

• <u>Demographic Shift</u>

An adjustment was included to account for the anticipated changes in demographic mix — in age and gender — between the manual base period and the projection period.

A factor of 1.315 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT and the "Change in Demographics" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

• Changes in the Morbidity of the Covered Population

The starting claim experience was adjusted to reflect changes in the anticipated morbidity corresponding to Oscar's projected demographic mix and membership distributions.

A second adjustment was included to reflect changes in the anticipated market morbidity in response to the uncertainty inherent in the marketplace. Specifically, Oscar anticipated changes to the market morbidity associated with the change in Pennsylvania's enrollment for the projection period relative to the experience period, as well as the anticipated impact due to a proportion of Medicaid members enrolling in the ACA marketplace throughout 2023 and 2024.

Lastly, an adjustment was made to account for the anticipated changes in market morbidity between the Florida and Pennsylvania individual markets. To estimate the market morbidity impact, Oscar relied upon the completed regression results in The Wakely National Risk Adjustment Reporting Project (WNRAR) provided to Oscar to estimate the market wide plan liability risk score, allowable rating factor, actuarial value, and induced demand factor for the Florida and Pennsylvania individual markets.

These adjustments reflect the projected change in claim costs outside of the underlying demographics of the covered population and were also utilized when estimating the risk adjustment transfer for the projection period.

A combined factor of 1.064 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT. and in the "Change in Morbidity - All Other" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

• Other Adjustments — Change in Network

Oscar applied an adjustment to account for anticipated changes in provider reimbursement levels between the manual period and projection period. The reimbursement changes are in response to modifications to Oscar's underlying contracts with its providers.

A factor of .994 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT and the "Change in Network" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

• Other Adjustments — Prescription Drug Rebates

An adjustment was included to account for the anticipated changes in the level of prescription drug rebates between the manual period and projection period.

A factor of 0.979 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT.

• Other Adjustments —Pooling Charge

An adjustment was included to account for Oscar experiencing lower than expected shock claims during the manual period. In this context, a shock claim is defined as annual costs in excess of \$750,000 per individual claimant.

A factor of 1.000 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the LIRRT

• Other Adjustments — Impact of the COVID-19 Pandemic

Oscar included an adjustment of 0.991 to account for the changes in expected COVID-19 healthcare costs for Vaccines and Pharmaceutical treatment from the experience period to the projection period.

• Other Adjustments — Combined

A combined factor of .995 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT.

Separately, a combined factor of 0.989 is included in the "Change in Other" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits. The factor excludes the Changes in Network impact as that is accounted for in the "Change in Network" entry.

Inclusion of Capitation Payments

Not applicable.

Credibility of Experience

In accordance with Actuarial Standards of Practice (ASOP) #25 — Credibility Procedures, Oscar's internal credibility manual, determined from statistical relationships inherent in nationwide experience in the individual market, assigns full credibility at 85,000 member months. Oscar's experience includes 35,852 member months and is considered 64.9% credible for purposes of developing claim projections. Furthermore, the base period experience was not used to develop the manual rate, so there is no double counting of base period experience.

Experience Period

As shown in Worksheet 1, Section II of the URRT, the experience period index rate is \$444.96. The experience period index rate reflects the estimated total combined allowed essential health benefit (EHB) claim experience in the single risk pool, and is not adjusted for payments and charges under the risk adjustment program or for marketplace user fees.

Projection Period

The index rate is defined as the EHB portion of projected allowed claims with respect to trend, benefit, and demographics and divided by all projected single risk pool lives. Oscar's projection period index rate for the 2025 plan year as shown in Worksheet 1, Section II of the URRT is \$645.60.

Development of the Market-Wide Adjusted Index Rate

The market-adjusted index rate is calculated as the sum of the projection period index rate, the impact of the risk adjustment program, and the projected exchange user fees. Table 3 details the projection period index rate, allowable market-wide modifiers as defined in 45 CFR Part 156, §156.80(d), and the resulting market-adjusted index rate.

Table 3	
Market-Adjusted Index Rate	
Description	Value
Projection Period Index Rate	\$645.60
Net Impact of Risk Adjustment Program	\$47.18
Net Impact of State Reinsurance Program	(\$26.21)
Exchange User Fees	\$22.72
Market-Adjusted Index Rate	\$689.29

The adjustments in the table above reflect all of the market-wide modifiers allowed in federal regulation and the average demographic characteristics of the single risk pool. Please note the allowable market-wide modifiers were adjusted to an allowed basis in the development of the market-adjusted index rate which is consistent with the basis of the projected index rate. The market-adjusted modifiers on a net basis are summarized in Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Reinsurance

The starting claim experience was adjusted to reflect the removal of the projected reinsurance recoveries due to the anticipated impact of the state-based reinsurance program proposed in the Pennsylvania 1332 waiver application that was approved by CMS on July 24, 2020. The reinsurance recoveries were developed on a percent of net claims approach using the initial parameters for the 2025 plan year — \$60,000 attachment point, coinsurance of 50%, up to a reinsurance cap of \$100,000.

Oscar started with a subset of its nationwide claim experience in the individual market as the basis for estimating the impact of reinsurance recoveries on net claims. The claim experience was both trended to the 2025 plan year at similar trend rates to that of what were included in the premium rate projections and additionally calibrated to align with the projected index rate. Oscar then bootstrapped the projected population with membership samples in line with Oscar's population in the Pennsylvania market.

The expected impact of the state reinsurance program was estimated to be a recovery of approximately 4.1% of net claims (i.e. the mean of the bootstrapped samples), which was then applied evenly across all plans in Oscar's individual market single risk pool.

Additionally, Oscar adjusted the risk adjustment transfer to account for the estimated impact of the state-based reinsurance program to the statewide average premium, which was then applied to the rate projection to bring the

medical expense (i.e. net claims +/- risk adjustment) levels to market-wide levels, which form the basis of the market-adjusted index rate.

The projected reinsurance recovery amount, expressed on an allowed basis, is estimated as a recovery of \$26.21 and is reflected on Worksheet 1, Section II of the URRT.

Risk Adjustment Payment/Charge

To estimate the risk adjustment PMPM, Oscar relied upon the results of the The Wakley National Risk Adjustment Reporting Project supplied to Oscar by Wakely to estimate the market wide plan liability risk score, allowable rating factor, actuarial value, and induced demand factor for the individual market. The statewide average premium estimates relied on results from the Interim Summary Report on Risk Adjustment for the 2023 Benefit Year published by CMS on March 17, 2024. Oscar's geographic cost factor was also adjusted based on the anticipated geographic mix for the 2025 plan year.

Oscar modeled two independent risk adjustment transfers to appropriately correspond with the risk profile of the members in the underlying experience and manual projections. For the risk adjustment transfer that corresponds to the experience projection, Oscar relied upon projected risk and rating factors that are specific to the experience period in the Pennsylvania market. For the risk adjustment transfer that corresponds to the manual projection, Oscar crosswalked the market metrics — plan liability risk score, statewide average premium, and geographic cost factors — from the manual period (i.e. Florida market) to the projection period (i.e. Pennsylvania market) while maintaining similar relative risk profiles by metal level. The two risk adjustment transfers were then blended by the same credibility weighting used to project allowed claims

Additional adjustments were made to account for the anticipated changes in the Health and Human Services Hierarchical Condition Categories (HHS-HCC) risk adjustment coefficient changes from the 2023 plan year to the 2025 plan year, for both Oscar and the market. These adjustments were determined from the HHS Risk Weight Conversion Tool that was supplied to Oscar by Wakely.

Oscar also included an adjustment to account for the anticipated impact of the Risk Adjustment Data Validation (RADV) audit on the 2025 plan year. To estimate the RADV impact, Oscar relied on historical experience in the individual market, measured anticipated risk adjustment coding error rates inherent in the 2021 and 2022 plan years, and forecasted those error rates to the projection period. The RADV impact is estimated as a payment of \$11.09 PMPM and is included in the "Insurer Specific Manual Adjustment PMPM" entry of Table 16 — Risk Adjustment Calculation.

Lastly, Oscar considered the impact to the projected risk adjustment transfer for the addition of the high-cost risk pooling mechanism that was implemented starting with the 2018 plan year.

The projected risk adjustment transfer, net of the risk adjustment user fee and expressed on an allowed basis, is estimated as a payment of approximately \$47.18 and is reflected in Worksheet 1, Section II of the URRT.

Any resulting risk adjustment transfer payments would be allocated proportionally across all plans in Oscar's individual market single risk pool.

Detailed quantitative support of the risk adjustment transfer projection is provided in Exhibit C and Table 16 - Rate Adjustment Calculation.

Exchange User Fees

The impact of the exchange user fee was based on an overall assessment of 3.30%, weighted on the projected premium associated with the distribution of membership expected to enroll on the exchange.

The projected exchange user fee, expressed on an allowed basis, is estimated as a payment of approximately \$22.72 and is reflected in Worksheet 1, Section II of the URRT.

4.4. Plan-Adjusted Index Rate

Projected Plan-Adjusted Index Rates

Exhibit D summarizes the plan-adjusted index rates, which are determined by applying the allowable plan-level modifiers to the market-adjusted index rate.

The allowable modifiers as described in 45 CFR Part 156, §156.80(d)(2) are the following:

Actuarial Value and Cost-Sharing

Each plan's actuarial value and cost-sharing factor includes a benefit relativity adjustment and the expected impact of the plan's cost sharing amounts on the member's utilization of services. Oscar's internal benefit pricing model, which uses a single claim distribution for all plans, was used to estimate how members purchase services differently based on the level of plan-specific cost sharing. By utilizing a static claim distribution, the pricing model's adjustments assume the same demographic and risk characteristics for each plan priced and therefore exclude expected differences in the health status of members assumed to select each plan.

Plan's Provider Network and Delivery System Characteristics

There are no anticipated plan-specific differences in the provider network or utilization management practices in Oscar's projected product suite.

Plan Benefits in Addition to the EHBs

Oscar's proposed product suite does not cover any benefits above and beyond the EHB services detailed in the Pennsylvania state benchmark plan.

Administrative Costs, Excluding Exchange User Fees

The net claims costs are adjusted to account for expected non-benefit expenses. The resulting administrative cost factors inherent in the plan-adjusted index rate development are not static due to the application of fixed cost allocation on a PMPM basis as opposed to a percent of premium basis. As documented in the market rating rules, 45 CFR 156.80(d)(2), administrative costs are permitted plan-level adjustments to the index rate. Administrative costs in this context include administrative expenses, taxes and fees (excluding exchange user fees), and profit/risk loads.

Oscar modeled the plan-adjusted index rate development to allocate the fixed cost portion of total administrative expense on a PMPM basis to more appropriately align with the economics of the business.

Exhibit E summarizes the components of the administrative cost factor as shown in Worksheet 2, Section III of the URRT.

Expected Impact of the Specific Eligibility Categories for the Catastrophic Plan

A specific eligibility adjustment reflects the difference in expected demographics between the catastrophic plan and the non-catastrophic plans due to the unique eligibility requirements of the catastrophic plan (i.e. that only individuals under the age of 30 or eligible by reason of financial hardship can enroll). This adjustment reflects that costs vary by age and the cost of the population expected to enroll in the catastrophic plan is anticipated to be lower than non-catastrophic plans.

Oscar is proposing no change to the currently approved catastrophic eligibility adjustment.

4.5. Calibration

A composite calibration adjustment is applied uniformly to all plans. Detailed support of the calibration factor is provided in Exhibit F. The market-wide calibration factor is 1.778.

Age Curve Calibration

The average age factor used in the calibration process is 1.751 and was determined by applying the standard age curve established by HHS to the projected member distribution by age, with an adjustment for non-billable members who exceed the maximum of three child dependents under the age of 21 rule.

Under this methodology, the approximate average age, rounded to the nearest whole number, associated with the single risk pool is 49.

Geographic Factor Calibration

The average geographic rating factor is 1.007. In order to determine the geographic calibration factor the projected distribution of members by area was determined. The weighted average of the area factors was then calculated using this distribution.

Oscar intends to sell individual market products in Bucks, Carbon, Chester, Delaware, Lackawanna, Lancaster, Lehigh, Luzerne, Monroe, Montgomery, Northampton, Philadelphia, and Wyoming counties, which are within Rating Areas 3, 6, 7, and 8.

Exhibit G provides a summary of the proposed geographic rating factors applied to the plan-adjusted index rates.

Tobacco Factor Calibration

The average tobacco rating factor used in the calibration process is 1.009.

The tobacco factors by age were developed using a Milliman research report titled *Impact of Height, Weight, and Smoking on Medical Claim Costs*, which tabulates the medical claim costs by age for smokers and non-smokers using a government data source, the Medical Expenditure Panel Survey (MEPS). Smoker prevalence rates, which were utilized above to develop the tobacco calibration factor, were based on Oscar's empirical data, and are not anticipated to be substantially different in the projection period.

Oscar is proposing no change to the currently approved tobacco rating factors.

4.6. Consumer-Adjusted Premium Rate Development

Oscar derives consumer-adjusted premium rates by calibrating the plan-adjusted index rate and applying the rating factors specified by 45 CFR Part 147, §147.102. Exhibit H includes the proposed rate manual and a sample rate calculation.

5. Projected Loss Ratio

Oscar's projected loss ratio based on the federally-prescribed MLR methodology is 90.5%. The numerator of the projected loss ratio contains claim costs and HCQI expenses net of receipts from the risk adjustment program and the denominator consists of total premiums net of premium taxes and regulatory fees. Note the MLR in this context does not capture all adjustments, including multi-year averaging, credibility, and deductible averaging.

A summary of each component included in the loss ratio projection is provided in Exhibit I.

6. Plan Product Information

6.1. AV Metal Values

The AV metal values included in Worksheet 2, Section I of the URRT were based solely on the HHS actuarial value calculator. Copies of the results from the actuarial value calculator including screenshots for each plan are provided as a supplemental supporting document titled "ACA AV Screenshots" accompanying the rate filing submission.

6.2. Membership Projections

Oscar projected membership as displayed in Worksheet 2, Section IV of the URRT by considering the size of the projected Pennsylvania individual market in 2025 as well as our historical enrollment patterns of the Pennsylvania individual market, to estimate our assumed market penetration rate and member months projection. For silver level plans in the individual market, an estimate was made for the portion of projected enrollment that will be eligible for CSR subsidies at each subsidy level. When allocating membership within a metal level, Oscar distributed membership uniformly by plan within each metal level for both new and renewing plans.

Exhibit J summarizes the membership projection by metal level, including the alternative variant silver plans which CSR eligibles can purchase, and exchange status.

6.3. Plan Type

The plan types listed in Worksheet 2, Section I of the URRT appropriately describe Oscar's plans.

7. Miscellaneous Information

7.1. Effective Rate Review Information

CSR Subsidies

Oscar assumed that CSR subsidies will not be funded by the federal government for the 2025 plan year. If CSR funds are not appropriated and CSR plans continue to be offered, Oscar will then be solely responsible for covering cost sharing for these members. The proposed rates contained herein assume that CSR subsidies remain unfunded by the federal government and that the resulting shortfall will be accounted for with a factor of 1.220 applied exclusively to Oscar's on-exchange silver plans.

Terminated Products

Exhibit L summarizes both the discontinued plans that were included in the single risk pool during the experience period or made available thereafter and the corresponding mapped plans.

Oscar confirms that all discontinued plans are being mapped in accordance with the hierarchy established in 45 CFR 155.355(j). Discontinued plans are mapped at the plan ID level and will be renewed to a different plan within the existing product. Members who do not actively select a different plan during open enrollment will be re-enrolled in a plan at the same metal level as their current QHP.

Renewability

The products offered within this filing are all guaranteed issue (i.e., no medical underwriting) and guaranteed renewable as required under the ACA. This rate filing applies to non-grandfathered plans only that are open to new sales. Premiums will be charged on a monthly basis and are guaranteed for the duration of the 2025 plan year.

Pennsylvania Actuarial Memorandum and Rate Exhibits

The following information was added to comply with Section D of the 2025 ACA Compliant Health Insurance Rate Filing Guidance and a crosswalk of the various requirements is summarized in Exhibit K.

1A — Company Information

Refer to Table 0 — Identifying Information of the Rate Exhibits for general company information.

1B — Rate History and Proposed Variations in Rate Changes

Table 4 provides Oscar's most recent three years of historical rate changes in Pennsylvania, including the proposed rate change for 2025. Historical filed and approved rate changes varied by plan due to a combination of factors including shifts in benefit leveraging, cost-sharing modifications, and geographic rating factors.

	Table 4	
	Rate Change Histo	ry
Plan Year	Average Rate Change	SERFF ID
2025	4.4%	OHIN-134107350
2024	8.2%	OHIN-133678196
2023	8.4%	OHIN-133283238
2022	-9.4%	OHIN-132808338

1C — Average Rate Change

The average rate change over all plans from 2024 to 2025 using the calibrated adjusted index rate is 2.3%. The average rate change for a 21-year-old non-tobacco premium over all plans and rating areas from 2024 to 2025 is 4.0%. Rates are weighted on Oscar's Pennsylvania individual membership as of March 31, 2024. Refer to Table 10 — Plan Rates and Table 11 — Plan Premium Development for 21-Year-Old Non-Tobacco User of the Rate Exhibits for additional details.

1D — Membership Count

Refer to Table 1 — Number of Members of the Rate Exhibits for the projected and current (as of February 2024) average age and member months by age group in the rating period.

1E — Benefit Changes

Refer to the Cost Sharing Changes tab in the attached supplemental supporting document titled "ACA Supporting Rate Exhibits" accompanying the rate filing submission.

Refer to Section 4.4 — Plan-Adjusted Index Rate for a description of the pricing assumptions used in development of the proposed premium rates.

11 — Historical Experience

Refer to Table 4 — Historical Experience and Table 4b — Manual Historical Experience of the Rate Exhibits for historical experience estimates for both the experience period and manual period sources.

Refer to Section 4.3 — Projection Factors for a description of the unit cost and utilization trends by service category that were assumed in both the experience period and manual period rate development.

2A — Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims

Table 5 provides support for the average projected paid-to-allowed ratio. The average projected allowed and incurred PMPM reflect the member month weighted average from Worksheet 2, Section IV of the URRT.

Table 5
Projected Paid-to-Allowed Ratio

Description	Value
Allowed Claim PMPM	\$645.60
Net Claim PMPM	\$536.47
Paid-to-Allowed Ratio	0.831

Refer to Section 4.3 — Projection Factors and Section 4.4 — Plan-Adjusted Index Rate for a detailed explanation of the development of the projected index rate, projected market-adjusted index rate, and projected allowed claims.

2B — Retention Items

Refer to Table 6 — Retention of the Rate Exhibits for an illustration of the non-benefit expenses, profit, and risk reflected in the projected premium rates.

The proposed commission schedule for the 2025 plan year that Oscar applies to policies in the individual market is \$20 PMPM for both new business and renewal business. This commission schedule shall remain in effect until terminated or replaced by Oscar in writing and within the company's sole discretion. For purposes of this commission schedule, "Initial Term" shall include the months of the first calendar year that the applicable coverage is in effect, up to and including December 31 of the first calendar year. "Renewal Term" shall refer to any months after the "Initial Term" for which the applicable coverage is in effect.

The percentage of members estimated to come through Oscar's broker channel is 36%. Using the proposed commission schedule of \$20.00 PMPM, along with override and bonus compensation, this results in a broker commission assumption of \$7.47 PMPM (or 1.17% of premium) at the total book level.

In addition, the net claims costs are adjusted to account for expected non-benefit expenses. The resulting administrative cost factors inherent in the plan-adjusted index rate development are not static due to the application of fixed cost allocation on a PMPM basis as opposed to a percent of premium basis. As documented in the market rating rules, 45 CFR 156.80(d)(2), administrative costs are permitted plan-level adjustments to the index rate. Administrative costs in this context include administrative expenses, taxes and fees (excluding exchange user fees), and profit/risk loads.

Oscar modeled the plan-adjusted index rate development to allocate the fixed cost portion of total administrative expense on a PMPM basis to more appropriately align with the economics of the business.

2D — Components of Rate Change

Refer to Table 8 — Components of Rate Change and Table 9 — Year-Over-Year Data to Support Table 8 of the Rate Exhibits for the components of the rate change.

Note that Line H does not match Line A in Table 8 — Components of Rate Change of the Rate Exhibits for a number of reasons, including the following:

- The Calibrated Plan Adjusted Index Rate shown in Line A is weighted on current membership, but many of the factors applied to the base period allowed claims before normalization in Line B, including those in Table 7 Normalized Market-Adjusted Projected Allowed Total Claims and Table 9 Year-Over-Year Data to Support Table 8 of the Rate Exhibits, are weighted on projected membership.
- The retention components shown in Lines F1 to F3 are calculated as a percentage of the Plan Adjusted Index Rate in Table 10 Plan Rates of the Rate Exhibits, but are applied as a percentage of the Calibrated Plan

Adjusted Index Rate in Table 8 — Components of Rate Change. This leads to discrepancies when there are fixed PMPM administrative expenses as is the case for the 2025 plan year.

4 — Plan Premium Development for 21-Year-Old Non-Tobacco User

Refer to Table 11 — Plan Premium Development for 21-Year-Old Non-Tobacco User of the Rate Exhibits for an illustration of the development of the premium rate offered to a 21-year-old non-tobacco user in the Pennsylvania individual market for the 2025 plan year.

5E — Composite Rating

Not applicable.

7.2. Reliance

In developing this rate filing, several internal departments were relied upon for information and assumption setting. This information includes, but is not limited to: Actuarial providing pandemic modeling, rating factors, and claim trend projections; Insurance Financial Management providing membership projections, non-benefit expenses, and taxes and fees; and the Insurance Business providing product changes and contractual terms for healthcare providers and vendors. I have performed a limited review of this information and have deemed it to be reasonable.

7.3. Actuarial Certification

I, am an Actuary for Oscar. I am a member of the American Academy of Actuaries and I meet the qualification standards of the Academy to render the actuarial opinion contained herein.

I hereby certify that the projected index rate is to the best of my knowledge and understanding:

- In compliance with all applicable state and federal statutes and regulations (45 CFR Part 156, §156.80(d)(2) and 45 CFR Part 147, §147.102),
- Developed in compliance with the applicable Actuarial Standards of Practice, including but not limited to:
 - o ASOP No. 5, Incurred Health and Disability Claims,
 - ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health Benefits,
 - o ASOP No. 12, Risk Classification,
 - o ASOP No. 23, Data Quality,
 - o ASOP No. 25, Credibility Procedures,
 - ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans,
 - ASOP No. 41, Actuarial Communications,
 - ASOP No. 42, Determining Health and Disability Liabilities Other than Liabilities for Incurred Claims,
 - ASOP No. 45, The Use of Health Status Based Risk Adjustment Methodologies, and
 - ASOP No. 50, Determining Minimum Value and Actuarial Value Under the ACA.

- Reasonable in relation to the benefits provided and the population anticipated to be covered, and
- Neither excessive nor deficient.

I further certify that:

- The index rate and only the allowable modifiers as described in 45 CFR Part 156, §156.80(d)(1) and 45 CFR Part 156, §156.80(d)(2) were used to generate plan level rates,
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area,
- The AV calculator was used to determine the AV metal values shown on Worksheet 2 of the Part I URRT for all plans,
- All factor, benefit, and other changes from the prior approved filing have been discussed in the actuarial memorandum,
- The proposed new plans are not modifications of an existing plan, and
- The information presented in the Pennsylvania Actuarial Memorandum and Pennsylvania Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2025 Rate Filing Justification.

URRT and Rate Exhibit Methodology

The Part I URRT and the Rate Exhibits do not demonstrate the process used by Oscar to develop proposed premium rates. It is representative of information required by federal and state regulation to be provided in support of the review of rate increases, for certification of qualified health plans and for certification that the index rate is developed in accordance with federal regulations and used consistently and only adjusted by the allowable modifiers.

COVID-19 Pandemic

The starting claim experience was adjusted from the experience period to the projection period to reflect the anticipated impact of items such as the change in the cost of vaccines and pharmaceutical treatment. Unforeseen strains, causing severe outbreaks or changes to legislation, may affect the extent to which the rates presented herein are neither excessive nor deficient.

Medicaid Redetermination and the Public Health Emergency

Rates were developed in line with the current law, which at the time of this rate filing includes the end of Medicaid continuous coverage, followed by redetermination of Medicaid members, as well as the end of the Public Health Emergency. Future regulatory, legislative, and economic changes may affect the extent to which the rates presented herein are neither excessive nor deficient.

Member, American Academy of Actuaries May 15, 2024

Standard Questions

1. Membership:

a. If the projected membership for plan year 2025 significantly differs from the current 2/1/2024 membership, please explain why.

Oscar's projected membership metal mix does not significantly differ from our current period membership. Oscar projects a reduction in membership for 2025 driven by internal projections on competitor rate action and Oscar's resulting price positioning in our current markets.

2. Experience Period Claims:

a. Please confirm that all claims which are capitated have been removed from the experience period claims.

Oscar confirms all capitation claims have been removed from both our experience period claims and manual base claims.

b. Please confirm that all non-EHB claims have been removed from the experience period claims.

Oscar confirms that all non-EHB claims have been removed from experience period claims and manual base claims.

c. How are drug rebates projected to change from the base period to the rating period? How has this change been reflected in the rate development?

Drug rebates are expected to change due to an updated contract with our pharmacy benefits manager, CVS, resulting in increased rebate guarantees for 2025.

Quantitative support of Oscar's Prescription drug rebates impact is displayed below for both our experience rate and manual rate. This impact is included in the Change in Other line item of Table 5 of the PAAM Exhibits.

Development of Experience Prescription Drug Rebate Factor

Description		Definition
Prescription Drug Rebates in the Experience Period	\$39.96	А
Prescription Drug Rebates in the Projection Period	\$50.83	В
Change in Prescription Drug Rebates	-\$10.87	C = A - B

Development of Manual Prescription Drug Rebate Factor

Description		Definition
Prescription Drug Rebates in the Manual Period	\$23.50	А
Prescription Drug Rebates in the Projection Period	\$38.83	В
Change in Prescription Drug Rebates	-\$15.33	C = A - B

3. COVID:

a. Please confirm that Tables 2-4 of the PAAM Exhibits do not have any COVID adjustment. Additionally, please confirm that any COVID adjustment factor in the filing is reflected in Table 5 of the PAAM Exhibits.

Oscar confirms Tables 2-4 do not have COVID adjustments. Oscar confirms that our COVID adjustment factor is included in the Change in Other line item of Table 5 of the PAAM Exhibits.

b. If there is a COVID adjustment factor other than 1.0, please provide a quantitative exhibit supporting the factor.

Not applicable. Oscar applied a COVID adjustment factor of 1.0.

c. Please provide commentary on how the Company believes services such as COVID vaccinations and COVID testing will be handled in PY25. Within your response, please clarify if these services will be considered preventative and covered at 100%.

Oscar confirms that it will continue to consider COVID vaccinations as preventative and cover at 100%. COVID testing will be covered at regular cost-sharing under lab benefit, as the Public Health Emergency has ended. Oscar expects PY25 COVID vaccinations and testing utilization rates to be similar to PY23 experience.

4. Trend:

a. n/a - SG Only

5. Table 6 – Retention:

a. Please confirm that the federal income tax is calculated using a Federal Income Tax Rate of 21%. If other adjustments were made in Table 6, cell C57, please provide a demonstration of how this number was calculated and an explanation of the other adjustments included in the calculation.

Oscar confirms that the federal income tax as a percent of premium included in Table 6 is calculated using a Federal Income Tax Rate or 21%.

b. Please confirm that the Risk Adjustment User Fee PMPM is consistent with HHS Final Notice of Benefit and Payment Parameters for plan year 2025.

Oscar confirms that our Risk Adjustment User Fee is consistent HHS's final parameters.

c. Please provide an exhibit showing the commission PMPM amount to be paid to brokers in the following situations: Open-Enrollment Enrollee – Renewing, Open Enrollment Enrollee – New, Special Enrollment Period Enrollee – New, Special Enrollment Enrollee – Renewing. If the commission PMPM is not consistent between the four options above, please provide a detailed explanation as to the reason for the difference.

Situation	Commission Payment
Open-Enrollment Enrollee – Renewing	\$20 PMPM
Open-Enrollment Enrollee – New	\$20 PMPM
Special Enrollment Period Enrollee – Renewing	\$20 PMPM
Special Enrollment Period Enrollee – New	\$20 PMPM

6. Pricing AVs:

a. Please confirm that the Pricing AVs were calculated using a single risk pool (i.e., claims experience is not separated by metal level).

Oscar confirms that our Pricing AVs were calculated using a single risk pool. Further detail is available in section 4.4 of our actuarial memorandum

b. Please identify and support any differences between the company's metallic AV calculator results and the corresponding Pricing AVs.

The Pricing AV is developed from Oscar's internal model which re-adjudicates Oscar's claims, assuming a single claims distribution, based on new benefit designs. This enables Oscar to model detailed plan designs and their impact on benefit relativities. By using a static claim distribution, the pricing model's adjustments assume the same demographic and morbidity characteristics for each plan priced and therefore excludes expected differences in the health status of members assumed to select into each plan.

As an example, the Bronze Elite PCP Saver (HIOS ID 98517PA0010005) plan design meets bronze de-minimis within the Federal AV Calculator with a Federal actuarial value of 0.635. Oscar internal pricing model suggests an actuarial value of 0.817, which is more inline with a gold plan. Our understanding is the Federal AV Calculator undervalues certain plan designs, relative to our internal model. The Bronze Elite PCP Saver has a \$100 deductible for medical services (i.e., except for pharmacy), which is mostly contributing to a higher AV in our pricing model. The varied pricing results between the Federal AV Calculator and Oscar's internal pricing model for the Bronze Elite plan design is present in Oscar's pricing nationwide, as opposed to being specific in the Pennsylvania marketplace.

7. Expanded Bronze Plans:

a. Please provide an exhibit which demonstrates that the criteria for expanded bronze plans have been met.

Please find our responses in the tab labeled "Expanded Bronze Plans" of 2025_Standard Questions_Exhibits_20240515.xls

8. PAAM Exhibits - Consumer Factors:

a. Please provide quantitative and qualitative support for the proposed geographic rating area factors, if different from the previous year.

The rating area factors are based on Milliman's Commercial Health Cost Guidelines (HCGs) and Oscar's anticipated 2025 provider contracts. The geographic factors used incorporate differences in unit cost and utilization (i.e., provider practice pattern) differences only. Morbidity differences between regions were removed by normalizing claims experience using risk scores from the Milliman Advanced Risk Adjuster (MARA) model.

Moderate smoothing was considered in the development of the final area factors included in the 2025 rate filing. Oscar applies smoothing factors in an effort to aid in managing the level of volatility inherent in the geographic cohorts, which prevents the area factor model from potentially overcorrecting over time. Actuarial judgment was applied in making the smoothing adjustments.

Exhibits with formulas are provided in in the tab labeled "PAAM Exhibits - Consumer Factors" of 2025_StandardQuestions_Exhibits_20240515.xls

Rating Area	2024 Membership Distribution	2023 Experience Credibility	2023 Normalized Allowed Experience ¹	2023 Experience Relativity	Manual Relativity	Area Factor [2025, Indicated]	Area Factor [2025, Calibrated]
3	30%	33%	\$353.03	1.085	1.036	0.955	0.949
6	19%	27%	\$392.19	1.205	1.617	1.347	1.339
7	17%	23%	\$292.66	0.899	1.167	0.984	0.978
8	34%	44%	\$294.79	0.906	0.981	0.870	0.864
Total	100%		\$325.50	1.015	1.151	1.006	1.000

¹Adjusted for 2025 unit cost and utilization trend

Rating Area	Area Factor [2024 filed]	Area Factor [2024 filed, Calibrated]	Smoothing Adjustment	Area Factor [2025, Smoothed]	Area Factor [2025, Smoothed, Calibrated]
3	0.911	0.926	33%	0.933	0.934
6	1.093	1.110	20%	1.152	1.153
7	0.998	1.014	33%	1.002	1.003
8	0.980	0.996	20%	0.968	0.969
Total	0.985	1.000		0.999	1.000

b. Please provide quantitative and qualitative support for the proposed network factors, if different from the previous year.

Oscar does not apply network factors to our Individual Pennsylvania product.

9. MLR Exhibit:

- a. Please complete the table below which summarizes the most recent three years of complete MLR information.
 - i. Actual is the final information which was filed for the specified calendar year
 - ii. Projected is the information which was projected in the final annual filing for the given year (i.e., 2021 projected information is from the plan year 2021 annual filing submitted in 2020)

MLR Exhibit					
Calendar year	1	MLR	Member	Member Months	
,	Actual	Pricing	Actual	Pricing	
2020	78.3%	93.2%	41,428	136,716	
2021	89.3%	93.0%	50,778	81,888	
2022	72.7%	91.8%	47,877	70,899	

b. Are the MLRs and Member Months between Actual and Pricing comparable? If not, explain.

Actual Member Months were lower than Pricing due to our worse-than-expected price positioning in our markets. 2021 Actual MLR was comparable to Pricing, while 2020 Actual MLR was lower than Pricing due to depressed utilization and deferred care as a result of COVID. 2022 Actual MLR was lower than Pricing due to lower than expected unit costs and utilization.

c. Does the insurer expect to pay MLR rebates for the 3-year period above?

Oscar does not expect to pay MLR rebates for the 3-year period above

10. Plan of Withdrawal:

a. Please confirm that a Plan of Withdrawal has been submitted if any plans are being discontinued.

Oscar confirms that a Plan of Withdrawal has been submitted.

11. Transitional Plans:

a. Starting in October 2024, the PID will discontinue the non-enforcement policy for individual transitional plans (the non-enforcement policy for small group transitional plans will continue until further notice, or until the federal government discontinues its non-enforcement policy). If applicable, please discuss the migration of individual transitional members into ACA-compliant plans effective January 1, 2025.

Not applicable as Oscar does not offer any individual transitional plans in Pennsylvania.

12. Copay Adjustment Programs:

a. Does the company use a copay adjustment program (also known as a copay accumulator program)?

Medications that qualify for third party assistance programs which could lower member out of pocket costs for those products, may be allowed, but are subject to prior approval.

b. How does the company handle copay assistance coupons? For example, does the coupon apply to the MOOP?

For any medication where third party assistance is used, members do not receive credit toward their MOOP or deductible, if applicable, for any out-of-pocket that are covered by a manufacturer coupon or rebate.

c. If any change to such a program has resulted in a pricing impact, please include a detailed quantitative exhibit supporting the pricing impact.

There is no change to Oscar's policy for 2025 and therefore no impact to pricing.

Please feel free to reach out to me if you have any additional questions. Thank you.
