

Health Partners Plans, Inc. – Individual Plans

Rate request filing ID # HEAL-134081943 – This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <https://www.insurance.pa.gov/Consumers/HealthInsuranceFilings/Pages/ACA-Health-Rate-Filings.aspx>

Overview

Initial request average rate change:	2.85%
Revised requested average rate change: ¹	2.85%
Range of requested:	-7.53% to 14.71%
Effective date:	January 1, 2025
Mapped members:	9,160
Available in:	Rating Areas 6 and 8

Key Information

Jan. 2023 – Dec. 2023 financial experience

Premiums	\$
Claims	\$
Administrative Expenses	\$
Taxes & Fees	\$
<hr/>	
Insurer made (after taxes)	\$

How insurer plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2025

Claims:	85%
Administrative:	12%
Taxes & Fees:	3%
Profit:	0%

The insurer expects its annual medical costs to increase 0%.

Explanation of Requested Rate Change:

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

**RE: Jefferson Health Plans
NAIC Company ID#: 95066
Rate Filing for Individual Health Plans Effective 1/1/2025
HEAL-134081943**

Dear Ms. Swartz,

This rate filing contains the requested premium rate information for Jefferson Health Plans' (JHP) ACA-compliant individual health plans. The proposed rates are effective January 1, 2025. This filing has been submitted in SERFF under the tracking number HEAL-134081943.

Attached are the 2025 rate filing documents, per Federal and Pennsylvania guidelines. Included within this filing are the United Rate Review Submissions Parts I and III (Part II is not applicable), Rate Tables, Department Plan Design Summary and Rate Tables, Unique Plan Design Justification and Supporting Documentation, Department Standard Questions, PAAM Exhibits, and public rate filing redaction justification and checklist. JHP has elected to submit a single consolidated actuarial memorandum, which fully meets all the standards of both the Federal URRT instructions and the state instructions laid out in the PA 2025 ACA Final Rate Filing Guidance. We have included a crosswalk in the memorandum appendix that outlines in which sections the Federal requirements are satisfied.

Per guidance from the Pennsylvania Insurance Department (PID), this filing reflects a CSR defunding adjustment factor of 1.30 on all silver on-exchange plans, the prescribed induced demand formula, and an adjustment for reinsurance under the 2024 parameters, as prescribed. JHP intends to resubmit these documents on with updated plan year 2025 reinsurance parameters once received from PID.

As plan year 2025 is JHP's second year in the Pennsylvania Individual Market, we are requesting an overall average rate change of 2.91%.

Information for the Pennsylvania Bulletin:

1. Company Name and NAIC Number

Jefferson Health Plans
95066

2. Market	Individual
3. On/Off or Off Exchange	On and Off
4. Effective Date of Coverage	January 1, 2025 to December 31, 2025
5. Average Rate Change Requested	2.96%
6. Range of Rate Changes Requested	-7.53% to 14.72%
7. Total Additional Annual Revenue Generated from Proposed Rate Change	\$1,697,828
8. Products	HMO
9. Rating Areas and Any Changes from 2024	Rating Areas 6 and 8, Adding Rating Area 6 from 2024
10. Metal Levels and Catastrophic Plans	Gold, Silver, Bronze
11. Current Covered Lives and Policyholders as of February 1, 2024	9,171
12. Number of Plans Offered in 2025 and Change from 2024	18 Plans in 2025 10 Plans in 2024
13. Corresponding Contract Form Number, SERFF and Binder ID Numbers	Form #: HEAL-134051465 SERFF Filing #: HEAL-134081943 Binder ID #: HEAL-PA25-125118373
14. HIOS Issuer ID Number and Submission Tracking Number	HIOS Issuer ID: 93909 State Tracking #: HEAL-134051465

Sincerely,

Executive Summary

This actuarial memorandum and the accompanying appendices represent documentation to support the filing of premium rates for Jefferson Health Plans (JHP) individual ACA products effective January 1, 2025. **This actuarial memorandum fulfills the requirements for both the United Rate Review Part III Actuarial Memorandum and the Pennsylvania Actuarial Memorandum.** As such, only one actuarial memorandum has been submitted with this filing. In Appendix A, we provided a crosswalk from the Pennsylvania Actuarial Memorandum to the United Rate Review Part III Actuarial Memorandum to ensure compliance with both sets of instructions and assist with review.

Per Pennsylvania Insurance Department (PID) guidance, the premium rates contained in this memorandum include the impact of the state-based reinsurance program, as defined within the 1332 waiver approved in 2021. Per PID guidance, the 2025 reinsurance parameters to be included in this filing reflect an attachment point of \$60,000, a cap of \$100,000, and a coinsurance percentage of 50%.

This version of the actuarial memorandum is considered **CONFIDENTIAL** as it contains proprietary information related to JHP and Wakely Consulting Group, LLC, an HMA Company (Wakely). A separate actuarial memorandum was submitted and deemed PUBLIC which excluded all information determined to be confidential, according to PID guidance. Per PID instruction, we have submitted a redaction justification form along with this filing.

We believe the premium rates filed are reasonable in relation to the benefits provided and are not excessive, inadequate, or unfairly discriminatory based on the provisions of the ACA as currently implemented; however, future modifications in legislation, regulation, and/or court decisions may affect the extent to which the premium rates are neither excessive nor deficient. Wakely and JHP would like to reserve the right to change assumptions that were materially impacted due to a change in the regulatory environment or up until filings are approved, in order to ensure our rates are as accurate as possible, to the extent state and federal rules allow.

[REDACTED]

This filing presents premium rates for renewing and new products. To be compliant with the ACA single risk pool regulation, on- and off-Exchange premium rates were developed together. The JHP products include gold, silver, and bronze plans. In total, JHP is filing 18 plans, plus CSR variants for all silver plans. Plans will be offered in Rating Areas 6 and 8. All plans will be offered on- and off-Exchange, as shown in Table 1 below.

Plan designs include 2025 EHBs. Plans do not include pediatric dental as there are standalone pediatric dental plans available in JHP's service area. There are no additional non-EHBs included

in any plan designs. All plans are HMO, with only emergency services to be covered when incurred out of network.

Table 1: 2025 Proposed Plans

Plan ID	Plan Name	Exchange	Rating Areas
93909PA0010005	Jefferson Health Plans + Total + Silver + HMO	On and Off	6, 8

SERFF Rate Review Detail

Projected Earned Premium: \$71,883,360.

Projected Incurred Claims: \$61,181,872.

Proposed Rate Premium PMPM: Min: \$150.21. Max: \$1,673.55. Weighted Average: \$469.83.

Please note that the premium PMPMs are indicative of age-specific rates and include a blend of tobacco-rate and non-tobacco rate plans.

Other General Information

Type of Filing: Renewal

Type of Plan: HMO On and Off-Exchange; Renewal and New Plans

Months of Rate Guarantee: These rates will be guaranteed until December 31, 2025.

B. RATE HISTORY AND PROPOSED VARIATIONS IN RATE CHANGES

JHP’s proposed rate change in 2025 is include in Table 2 below. As JHP was new to the Pennsylvania market in 2024, there are no historical rate increases to report.

Table 2: JHP Rate History

Filing Year	SERFF Filing #	Rate Change (Age 21 non-tobacco)
2025	HEAL-134081943	2.9%

As shown in PAAM Table 10, the proposed rate change varies by plan. The variation in rate change across plans does not reflect variation in plan-specific morbidity. Changes in population morbidity were applied uniformly to the index rate, in accordance with single-risk-pool ACA rating rules. Rather, the variation in rate change by plan is due to changes in plan-level pricing factors such as modifications to the CSR load, administrative expense PMPM, and actuarial values. Variation in plan-level pricing factors can be seen in Table 10.

Quantification of the premium rate drivers are shown in Table 8 and listed below. Per Table 8 there are six main components of the rate change. This breakdown is intended only for explanatory purposes and is distinct from the development of rates.

- A. Change in base period allowed claims (before normalization) = 10.1%
- B. Change in normalization factors = 6.5%
- C. Change in allowed claim adjustment components (trend, morbidity, other, etc.) = 1.1%
- D. Change in plan level adjustment components (pricing AV, network, etc.) = 4.2%
- E. Change in retention = 2.3%
- F. Change in miscellaneous (mix differences) = -3.8%

C. AVERAGE RATE CHANGE

The average rate change in 21-year-old-non-tobacco premium PMPM is 2.9%, as shown in PAAM Table 11. The average rate change, accounting for differences in average age and tobacco usage, is 3.8%, as shown in PAAM Table 10.

D. MEMBERSHIP COUNT

JHP was a new plan in 2024 and, therefore, does not have any experience period membership to report. Current 2024 and projected 2025 membership by age, as well as the average age, is included in Table 1 of the PAAM Exhibits. Actual enrollment is highly dependent on consumer decisions and the competitiveness of rates in the market.

Table 3 shows projected 2025 JHP individual enrollment by plan.

Table 3: Estimated JHP Enrollment by Plan (in Member Months)

Plan ID	Plan Name	2025 Projected Member Months
93909PA0010005	Jefferson Health Plans + Total + Silver + HMO	6,443
93909PA0010004	Jefferson Health Plans + Balanced + Silver + HMO	186
93909PA0010003	Jefferson Health Plans + \$0 Deductible + Silver + HMO	276
93909PA0010001	Jefferson Health Plans + \$0 Deductible + Bronze + HMO	848
93909PA0010002	Jefferson Health Plans + Total + Bronze + HMO	947
93909PA0010006	Jefferson Health Plans + \$0 Deductible + Gold + HMO	896
93909PA0010007	Jefferson Health Plans + Total + Gold + HMO	1,173
93909PA0010011	Jefferson Health Plans + Value + Bronze + HMO	812
93909PA0010012	Jefferson Health Plans + Value + Gold + HMO	918
93909PA0010018	Jefferson Health Plans + Total + Silver + HMO	54
93909PA0010017	Jefferson Health Plans + Balanced + Silver + HMO	54
93909PA0010016	Jefferson Health Plans + \$0 Deductible + Silver + HMO	54
93909PA0010013	Jefferson Health Plans + \$0 Deductible + Bronze + HMO	14
93909PA0010014	Jefferson Health Plans + Total + Bronze + HMO	14
93909PA0010019	Jefferson Health Plans + \$0 Deductible + Gold + HMO	16
93909PA0010020	Jefferson Health Plans + Total + Gold + HMO	16
93909PA0010021	Jefferson Health Plans + Value + Gold + HMO	16
93909PA0010015	Jefferson Health Plans + Value + Bronze + HMO	14

E. BENEFIT CHANGES

JHP's 2025 rates assume no change in covered EHB or non-EHBs relative to those offered in 2024. There were, however, updates to cost sharing that are reflected in the 2025 actuarial values for each plan.

A list of key benefit changes by plan are included in Appendix B.

F. EXPERIENCE PERIOD CLAIMS AND PREMIUM

JHP began offering products effective January 1, 2024; therefore, there is no JHP experience to report. For this reason, Tables 2-4 of the PAAM Exhibits and Worksheet I of the URRT have been left blank. The 2024 rates are based entirely on a manual rate as discussed in the next section of this memorandum, and as shown in Tables 2b-4b of the PAAM Exhibits.

Projection Factors

As mentioned in the prior section, because JHP's premiums are manually rated due to lack of experience, projection factors for purposes of moving the experience forward to the projection period are not applicable. In the Rate Development & Change section of this report, we discuss the development of claim costs used within the base periods and factors applied from the base period to the projection period as a basis for the development of the index rate and base rate.

G. CREDIBILITY OF DATA

Given JHP began offering products in 2024 and there is no JHP experience to report, 100% credibility is assigned to the manual rate. The manual rate source is described below.

Base Period Claims

Allowed PMPM medical and pharmacy claim costs were developed using 2022 PA ACA individual statewide incurred claims from 2024 URRTs. This represents the most recent year of Pennsylvania ACA data available publicly. Pharmacy payments are assumed to be reduced for rebates. Claims have been adjusted to exclude non-EHBs. This data is assumed to be complete.

Wakely believes this data is reasonable and actuarially sound for purposes of the rate development. The data presented in Table 2b of the PAAM exhibits represents the 2022 statewide base period data, as used for the rate development, before the adjustments discussed below were applied.

Adjustments Made to the Base Data

The base period allowed PMPMs were adjusted for items including differences in membership mix by metal, risk, average age, geographic service area, utilization and unit cost trends, provider contracts, and COVID-19 impact. Factors to account for these adjustments were applied to the base period total allowed EHB claims to develop the projected index rate in Table 5 of the PAAM Exhibits. Development of these adjustment factors is detailed in the “Rate Development and Change” section of this memorandum.

H. TREND IDENTIFICATION

As JHP does not have experience to calculate trends from, the trends were developed using public data sources and PA insights from JHP; no experience trends were analyzed. Thus, Table 3 has been intentionally left blank.

An explanation of the trend development for values provided in Table 3b of the PAAM exhibits is provided in section 2, Rate Development & Change.

I. HISTORICAL EXPERIENCE

As 2024 was JHP's first year in the market, there is no historical experience. Table 4 has been intentionally left blank.

The historical experience used to fill out Table 4b is from Pennsylvania Individual URRT data from 2022, as described in section 1G. Please note that the data in the URRT is provided on an annual basis only. The monthly splits shown in Table 4b are for illustrative purposes only. The 2023 section is not able to be filled in as that data is not available yet.

2. Rate Development and Change

A. PROJECTED INDEX RATE, MARKET-ADJUSTED INDEX RATE & TOTAL ALLOWED CLAIMS

Please see Table 5 of the PAAM exhibits for the development of the projected index rate. The development of the single risk pool adjustment factors is provided in Appendix C.

Total Allowed Claims

Section 1G describes the source for the base period total allowed EHB claims in cell D11 of Table 5. The adjustment factors described below are used to calculate the projected index rate of \$485.10 in cell C27 of Table 5.

TREND FACTORS

Trend estimates used in the JHP 2025 rate development were based on a review of prospective claim cost trend information published in the 2024 Pennsylvania URRT individual rate filings. A range of reasonable trend assumptions was identified before selecting the used trends.

While the trend factor displayed in cell D12 of Table 5 is excluding the impact of COVID-19, when developing trend estimates, results were reviewed in tandem with the effect of COVID-19 from the base period to the projection period for reasonability. The value in D12 represents a weighted average trend factor for two years assuming the base period is on a 2022 basis.

CHANGES IN MORBIDITY

The impact of morbidity due to the reinsurance program is 0%, as shown in cell D15 of Table 5.

JHP is not applying any changes in morbidity to the risk pool from the base prior to the projection periods that aren't already accounted for in JHP's projected age, metal, and risk mixes. There is no explicit adjustment applied to account for the influx of Medicaid re-determination members transitioning into the ACA merged market. While assumptions have been modeled regarding demographic shifts, there is significant uncertainty regarding the morbidity of this population and how it will impact both JHP and other carriers within the state, which influences both claims costs and risk adjustment. Given this uncertainty, we are not adjusting the morbidity of the base period to the projection period, and the adjustment factor in cell D16 of Table 5 is 1.0.

CHANGES IN DEMOGRAPHICS (MEMBERSHIP MIX AND GEOGRAPHY)

A two-step approach was taken to account for changes in membership mix by age band, metal tier, and geographic location between the base period Pennsylvania Individual market statewide experience and the 2025 JHP estimated membership. Allowed claims were decreased based on changes in membership mix by age band and metal tier between the base period URRT experience and the 2025 JHP estimated membership in Pennsylvania. We took the following steps using relativities based on allowed claims:

- 1) Adjusted from the base year (2022) statewide Pennsylvania enrollment mix by rating area to JHP's projected rating area mix in their 2025 service area.
- 2) Adjusted from the base year statewide Pennsylvania enrollment mix by age band and metal to JHP's projected age band and metal mix in their 2025 service area.

- 3) Adjusted to reflect JHP having less members with an HCC diagnosis compared to the market, at the same age band and metal mix i.e., healthier population resulting in a claim cost reduction.

Adjustment 1) uses the 2023 Interim Risk Adjustment Report (RAR) relativities released by CMS on March 14th to calculate an average statewide geographic cost factor. The corresponding relativities were then weighted by the estimated membership mix in JHP's service area. The ratio of the average cost factor for JHP's distribution within its service area to that of the statewide distribution represents the geographic adjustments.

Adjustment 2) represents utilization differences based on variance between the starting age and metal distribution and the ending age and metal distribution. Utilization differences by age band and metal tier were derived using Wakely's proprietary database which consists of a nationally-representative sample of approximately 53.7 million member months comprised of individual data for ACA-compliant plans. This data set is considered fully credible at each metal level. The database is subsequently referred to as the "Wakely ACA Database" throughout this memorandum.

These adjustments are illustrated in Appendix C. For Adjustments (2) and (3), we are unable to share the actual data underlying the proprietary database, however the exhibit illustrates our methodology for this adjustment using arbitrary numbers.

The factor shown in D18 of Table 5 within the PAAM exhibits represents the product of the adjustments 1), 2), and 3).

CHANGE IN NETWORK (PROVIDER CONTRACTING)

[REDACTED]

CHANGE IN BENEFITS

A multiplicative factor was applied to reduce the base period claims by the average amount of non-EHB claims in the base periods, as defined in the 2024 URRT submissions. The same methodology was used to remove non-EHB claims from our manual base period. A reduction of \$1.78 PMPM is already accounted for in cell D11 of Table 5, so it is not included as an adjustment factor in cells D15:D21.

No other adjustments were made as there have been no changes in EHBs or state mandated benefits in Pennsylvania since before the base period year. JHP is not offering benefits in addition to the EHBs in 2024, so cell C38 of Table 5 is \$0.

CHANGE IN OTHER

There are two components built into the “Change in Other” factor in cell D21 of Table 5.

[REDACTED]

PEDIATRIC DENTAL COSTS

No adjustments were made to account for pediatric dental costs.

INCLUSION OF CAPITATION PAYMENT

There are no capitated payments in the projection period to consider for the development of the index rate.

Paid to Allowed Ratio

Plan designs were modeled within the Wakely Pricing Valuation Model (WPVM), based on detailed claim data from the Wakely ACA database (described above), to develop paid-to-allowed pricing estimates (as opposed to the actuarial values from the federal AV calculator). The model uses actuarially sound pricing methods to value the impact of deductibles, copays, coinsurance and maximum out-of-pocket cost sharing parameters. We calibrated the utilization and unit cost assumptions in the model to the plan’s prospective allowed costs, adjusting for induced demand by metal tier. The purpose of this is to calculate variation of actuarial values for pricing based on plan-specific cost-sharing.

The mandated CSR load of 30% for individuals enrolled within silver cost-share reduction variant plans was applied to all silver on-Exchange plan pricing AVs. While PID allows for a range between 22% to 30%, we believe that a load of 30% best aligns with JHP’s projected silver enrollment distributions.

We then applied the pricing actuarial value for each plan to the JHP 2025 index rate for premium rate development.

Wakely used an override in cell C28 of Table 5 to better reflect our pricing methodology. The value in C28 can be calculated by weighting the pricing AVs, Non-Funding of CSR Adjustment, and Benefit Richness (Induced Demand) factors on tab “III Plan Rates”.

Projected Risk Adjustment PMPM

The risk adjustment transfer amount was calculated to arrive at an estimated transfer amount for JHP's population. Various adjustments such as risk adjustment model methodology changes, age and metal mix distribution shifts, geographic differences, and statewide average premium increases from the base period to 2025 were incorporated to obtain an estimated 2025 risk adjustment transfer.

We took the following steps to arrive at a projected risk adjustment transfer:

- At the metal level, each factor of the risk transfer formula was calculated separately for JHP's expected population and the statewide Pennsylvania 2025 estimates.
- **ARF** - Age Rating Factors for JHP and Pennsylvania statewide were calculated based on the same enrollment mix by age band as was assumed in the claims buildup.
- **AV** - Actuarial Value for Pennsylvania statewide was based on the same statewide Pennsylvania metal mix as was assumed in the claims buildup.
- **PLRS** - Plan Liability Risk Score for statewide Pennsylvania and JHP started from the average PLRS in the Wakely ACA database data, specifically for members with the same age and metal mix as either statewide Pennsylvania or JHP's expected population in 2025. **[REDACTED]**
- **GCF** – Geographic Cost Factors for JHP reflect their proposed service area.
- Using the above factors and an estimated statewide average premium, an estimated risk transfer for JHP was calculated at the metal level. This transfer amount was then weighted by JHP's expected metal mix in Pennsylvania in 2025.
- Then, a load was added to the risk adjustment transfer to account for the estimated high-cost risk pooling charge in 2025, calculated as a percent of premium.
- Finally, the risk adjustment transfer PMPM was converted from a paid to an allowed amount (dividing by expected actuarial value) necessary to capture sufficient premiums to cover anticipated transfer payments.

[REDACTED]

The 2025 risk adjustment user fee of \$0.18 PMPM was included in the taxes and fees section of the rate development.

Projected Exchange User Fees PMPM

The projected exchange user fees were calculated using a 3.0% exchange fee, per PID guidance. JHP is projecting that 99.3% of their 2025 membership will be on the exchange, so the effective exchange user fee is 2.98%. The on-exchange enrollment projection is based on 2024 JHP open enrollment distributions.

Projected ACA Reinsurance Recoveries Net of Reinsurance Premium

Per state guidance, this filing includes an adjustment for the state-based reinsurance program with an attachment point of \$60,000, a cap of \$100,000, and a coinsurance rate of 50%. Below describes our methodology for quantifying the impact of the state-based reimbursement.

The claims portion of the index rate was reduced to reflect the estimated impact of the state-based reinsurance reimbursement amounts. Because the reinsurance parameters are not projected to vary by region, the geographic factor is not impacted by reinsurance.

The information in Tab IIb was developed using Wakely's ACA database. First, members were assigned to allowed claim buckets based on their total annual allowed spend. Allowed spend from the proprietary database was projected to JHP's projected allowed claims. Paid PMPMs were determined using plan-level cost sharing parameters consistent with the pricing AV development. An effective reinsurance recovery was then calculated for each claim bucket, using the calculated paid PMPMs and the reinsurance program attachment points and coinsurance.

We have intentionally left Tab IIa blank as JHP does not have experience to report.

Market-Adjusted Projected Allowed Total Claims PMPM

As described above, the product of the components above calculates an allowed claims cost estimate for the average age, metal, and risk of JHP's population in the Pennsylvania market. Then, the JHP's risk adjustment transfer estimate is added to the blended allowed claims cost to arrive at a total allowed cost (claims and risk adjustment).

The projected allowed claim costs net of reinsurance was added to the projected risk adjustment transfer and exchange user fees to arrive at the total market-adjusted projected allowed cost PMPM (claims and risk adjustment) equal to \$533.81 PMPM. The MAIR presented between the PAAME, URRT, and Appendix of this memorandum should vary by no more than a penny due to rounding.

Please see Appendix E and Table 5 of the PAAM exhibits for more details.

B. RETENTION ITEMS

The retention items described below are illustrated in Table 6 of the PAAM exhibits. Please note that values in Table 6 vary slightly from those mentioned in this memorandum, as the values used in Table 6 represent the straight average of the retention components across all plans, whereas we report total retention on a projected membership weighted average basis.

Administrative Expense Load

We incorporated a retention load for general administrative expenses, commissions, and quality improvement initiatives. These costs in total are equal to \$55.00 PMPM in the 2025 rate development, which corresponds to 11.7% of premium in aggregate. It was confirmed with JHP that the assumptions for 2025 administrative costs are reasonable estimates based on the estimation of covered members, although per PID guidance, the flat PMPM does not reflect the allocation methodology by plan in which JHP anticipates administrative costs to be spent.

The administrative expense load is split into three components:

- General and claims: 7.7%
- Agent/Broker Fees and Commissions: 3.2%
- Quality Improvement Initiatives: 0.8%

[REDACTED]

Profit / Contribution to Surplus & Risk Margin

Overall, the profit margin is equal to 0.1% of proposed 2025 premium, prior to federal income taxes. This amount was confirmed with JHP to align with the overall company strategy. After accounting for federal income taxes, this amount decreases to 0.08%.

Taxes and Fees

Taxes and regulatory fees included in the development of 2025 rates include the following:

1. Federal Income Tax = 21.0% of taxable income.
2. Risk Adjustment User Fee = \$0.18 PMPM
3. Health Insurance Marketplace User Fee = 3%. We have included this amount in our pricing of premium for all policies sold within the Marketplace. This fee was

spread across all plans in the risk pool. We assumed that 99.3% of JHP's individual policies would be sold within the Marketplace, consistent with JHP's 2024 open enrollment. This resulted in a Marketplace User Fee of 2.98% of premiums, applied to policies sold in and outside the Marketplace.

4. Premium tax = 0% of premiums
5. PCORI Fee = \$0.28 PMPM

Table 4 below summarizes the non-benefit expenses, regulatory fees, and taxes.

Table 4: Non-Benefit Expenses and Profit & Risk

Component	% of Premium
Commissions	3.2%
Administration	8.5%
Risk Adjustment Fee	0.04%
Exchange User Fee	3.0%
PCORI Fee	0.06%
Profit/Risk Margin	0.10%
Total Retention	14.9%
Target Loss Ratio	85.1%
Federal Loss Ratio	88.7%

Projected Loss Ratio

The Anticipated Loss Ratio (ALR) is defined as being the present value of expected benefits over the present value of expected premiums for the time period that the premiums are effective. Wakely estimates the ALR to be 85.1%. This calculation does not exclude any regulatory fees or taxes from premiums, which is why it is lower than the federal MLR calculation.

Based on the federal MLR methodology, the loss ratio is estimated to be 88.7%; therefore, JHP does not anticipate paying consumer rebates for the 2025 plan year. Regulatory fees and taxes were excluded from premiums in the calculation of this value.

C. NORMALIZED MARKET-ADJUSTED PROJECTED ALLOWED TOTAL CLAIMS

Age, geographic, tobacco, and network calibration factors are applied uniformly to all plans and illustrated in Table 7 of the PAAM exhibits. The factors described below also match those in the “Calibration” section of Table 10.

The development of the 2025 normalization factors is included within Appendix F.

Age Calibration

Per the instructions, plan adjusted index rates were next calibrated to age 21. To bring the experience to age 21 rate, we divided the plan adjusted index rate by the weighted average age factor. The age factor was calculated using the Federal ACA age factors, as adopted by Pennsylvania, weighted by the estimated enrollment by age for JHP’s Pennsylvania population in 2025. The age associated with this factor is between 48 and 49 years. Once calibrated, the standard federal age factors can be applied on a multiplicative basis to get to the rates for other ages.

Tobacco Rating

The plan adjusted index rate must be on a non-tobacco user basis. Wakely looked at the proportion of JHP 2024 open enrollees who admitted to smoking and are paying a tobacco loaded premium rate in 2024. This is 2.6% of total membership. The final factor is intended to convert the rates to a non-tobacco basis. To bring the experience to an age 21 rate, we divided the plan adjusted index rate by the weighted average tobacco usage factor of 1.002.

The tobacco rate-up factor is 1.002. We applied the same factor for all ages (21+) that are allowed to have a smoking factor.

Geographic Factors

Geographic rating area factors are required in the CY2025 premium rates given plans are now offered in Rating Areas 8 and 6. The cost differentials by region, not accounting for morbidity differences, are included in the geographic factors. The 2023 Interim Risk Adjustment Report GCF factors by rating area were used as the basis for the geographic factors. The development of the geographic factors by region are shown in Appendix F.

The geographic factors normalize to a 1.0 in total, so the values in cells K50 of Table 7 and T5 of Table 10 are both 1.0.

Network Factor

A network factor is required in the CY2025 premium rates given Rating Area 8 has a separate network in Delaware compared to the CY2024 Rating Area 8 existing county rates. The differences in provider reimbursement are reflected in the network differences. An exhibit demonstrating this development is shown in Appendix F.

The network factors normalize to a 1.0 in total, so the value in cell K53 of Table 7 is 1.0.

D. COMPONENTS OF RATE CHANGE

Please see Tables 8 and 9 of the PAAM Exhibits for the buildup of the components of rate change.

In Table 9, all values in the “2024” column match what was provided in the corresponding 2024 column in the plan year 2024 filing except the Pricing AV value. The pricing AV value in the 2024 filing of 0.740 represented the straight average of the pricing AVs with the CSR load calculated in cell K15 of Table 10. However, the value calculated in K16 of Table 10, 0.752, was more in-line with our 2024 pricing methodology. Therefore, the value in cell J83 of Table 9 shows 0.752 instead of 0.740.

In Table 8, there is a “Change in Miscellaneous Items” for 2024 in cell C97. The “Change in Miscellaneous Items” accounts for the difference in projected 2024 membership mix and current 2024 membership mix by plan that the calculation is derived from. The table below demonstrates the calculation of the reconciling item that leads row H to approximate row 8 of Table 8. The amounts shown in the 2024 column of Table 9 match those provided in the plan year 2024 rate filing.

Component	Value
Average CPAIR from 2024 Rate Filing, Weighted by 2024 Projected Membership	\$264.15
Average CPAIR from 2024 Rate Filing, Weighted by 2024 Current Membership (Cell Z15 of Table 10)	\$274.68
Impact of Membership Mix Changes (Cell C97 of Table 8)	\$10.53

Additional detail on the drivers of the rate change are included in section 1B.

3. Plan Rate Development

Single Risk Pool

JHP has established a single risk pool for all individual market business. All of JHP's individual business is non-grandfathered, non-transitional, and ACA-compliant.

Of the 21 plans listed on Table 10, 7 are existing, 11 are new, and 3 are discontinued and not being mapped.

Index Rate for Experience Period

JHP has no experience in Pennsylvania in 2023. Therefore, there is no experience period index rate.

Index Rate for Projection Period

The projection period claims portion of the index rate is estimated to be \$485.10 PMPM. This was calculated based on projected allowed claims for essential health benefits for the single risk pool population during the projection period.

Market-Adjusted Index Rate for Projection Period

We then included the impact of risk adjustment, converted to an allowed basis, and the equivalent Marketplace User Fee (as described above), to calculate the 2025 market adjusted index rate. The market adjusted index rate is \$533.81 PMPM.

Plan-Adjusted Index Rate for Projection Period

Plan adjusted index rates were developed by applying allowable plan level adjustments to the market adjusted index rate. The section below describes the components included in Table 10 of the PAAM exhibit which build up to the plan adjusted index rate.

AV Metal Levels

The 2025 Federal Actuarial Value Calculator (AVC) was used to generate the AV metal tiers (URRT, Worksheet 2). We have incorporated the 2025 de minimus range to the allowed plans.

The final AV is calculated in the Federal AV Calculator by inputting the cost-sharing components for each plan (deductible, MOOP, coinsurance, etc.). To accommodate certain benefit designs, we made the following adjustments:

1. Tiers of Generic Drugs
 - a. On a subset of plans, JHP will offer two generic drug tiers with varying copays. As a result, a blended effective generic copay was input into the

AV calculator to reflect the expected utilization between the two generic tiers.

2. \$0 Medical Deductible Plans

- a. A subset of JHP's two-tier plans have a \$0 medical deductible and exclusively copays for medical cost sharing on the first tier only. Per CMS guidance provided in the 2025 Federal AV Calculator FAQ page, all plans of this structure may be run using the combined continuance tables. For these plans, we ran tiers one and two separately in the federal AV calculator, and then blended the resulting AVs using a projected utilization split to arrive at our effective federal AV for these plans.

The federal AVs for the plans are shown in Appendix G and in column H of Table 10 of the PAAM exhibits. In the event where both Approach 1 and Approach 2 were made to the Federal AVC inputs for the same plan to accommodate our benefit designs, we input Approach 2 in column I. More information regarding the adjustments have been included in unique plan design justification and documentation.

AV Pricing Values

The methodology for development of the AV Pricing Values is included in the Projected Index Rate, Market-Adjusted Index Rate & Total Allowed Claims section above. Only allowable modifiers were used in the development of these values.

Differences in morbidity across metal tiers were not included in the pricing development for each metal tier plan.

The pricing AVs differ from the Federal AVC outputs primarily because the estimated allowed PMPMs used in developing pricing AVs are different than those underlying the Federal AV calculator. This is due to a leveraging effect for fixed cost sharing elements (e.g. copays, deductibles and MOOPs). The other variance is differences in the methodology of the pricing models and underlying data of the modeling. AV pricing values, prior to the addition of the CSR defunding adjustments for on exchange silver plans, are presented in column K of Table 10 of the PAAM exhibits.

We have included an adjustment to the filed plans to reflect the impact of cost share reduction subsidies (CSRs) no longer being funded by the federal government. The regulation still requires CSR variant plans to be offered to low-income members, under the same Federal AV requirements (keeping similar plan design and cost sharing structures as the current regulations), but the subsidy amounts will instead be a liability to the insurers and not the government. To reflect the additional cost of the CSRs for all JHP silver plans, we have increased the pricing AVs.

This translates to the mandated increase of 30% (multiplicative) to silver plan pricing AVs offered on the Exchange. The CSR defunding adjustments are shown in column P of Table 10.

Benefit Richness Factors

Per PID guidance, the benefit richness factors in column L of Table 10 of the PAAM exhibits were calculated using the IU formula of $(\text{Plan AV})^2 - \text{Plan AV} + 1.24$. The benefit richness factors shown here are normalized to a 1.0 using projected membership. These values are also shown in Appendix H. The benefit richness factors are calculated using the product of both the pricing AV and the non-funding of the CSR adjustment.

Together, the product of the pricing AV, non-funding of CSR adjustment, and benefit richness factors are equivalent to the “AV and Cost Sharing” line within Worksheet 2 of the URRT. Any minor deviations from URRT Worksheet 2 are due to rounding.

Adjustments for Benefits in Addition to EHB

JHP is not offering any benefits in addition to EHBs, so all factors in column M of Table 10 are 1.0.

Adjustments for Provider Network

[REDACTED]

Adjustments for Catastrophic Eligibility

JHP is not offering catastrophic plans, so all factors in column O of Table 10 are 1.0.

Adjustment for Administrative Costs, Taxes and Fees, and Profit or Contingency

Administrative costs vary by plan as discussed in section 2B above. The retention components are shown in columns R:T in Table 10 and in rows 2.6-2.8 of Worksheet 2 of the URRT. These components are reported as a percent of gross premium, per instructions.

Calibrated Plan Adjusted Index Rate

The calibrated plan adjusted index rates PMPM calculated in row AA use the calibration factors described in section 2C. The values calculated in Table 10 match the values calculated in row 3.14 of Worksheet 2 of the URRT.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

Consumer Adjusted Index Rate

The consumer adjusted index rates were calculated by multiplying the calibrated plan adjusted index rates by the consumer's specific age factor (subject to maximum allowable rating of 3 dependents under age 21), area factor, and tobacco load as applicable.

We used the Federal ACA age factors, as adopted by Pennsylvania, for all members and geographic factors that were discussed previously. For tobacco factors, we used a level rating factor of 1.100 for all adult ages.

The rating factors are shown in Appendix I and the consumer adjusted index rates are provided in Table 11 of the PAAM Exhibits.

Plans 10-18 in Table 11 (Excel rows 24:32) are offered in Rating Area 8 only, yet rates for these plans are pre-populating in Rating Area 6. Please note that these plan IDs will not be available to Rating Area 6 consumers. With the exception of the plans listed above, the values in column AA of Table 11 match the age 21 non-tobacco rates provided in the federal and state rate tables.

5. Plan Factors

A. AGE AND TOBACCO FACTORS

A description of these factors is included in section 2C. See table 12 of the PAAM exhibits for the age and tobacco factors used in the rate development process.

B. GEOGRAPHIC FACTORS

A description of these factors is included in section 2C. See table 13 of the PAAM exhibits for the geographic factors used in the rate development process.

C. NETWORK FACTORS

A description of these factors is included in section 2C. See table 14 of the PAAM exhibits for the network factors used in the rate development process.

D. RATE CHANGE SUMMARY

See the “Overview” and “Key Information” sections of tab “VI Rate Change Summary” of the PAAM exhibits for a summary of the requested rate change. The requested average rate change is 2.9%, with variation by plan ranging from -7.5% to 14.7%.

We confirm that the information in the “How It Plans to Spend Your Premium” section matches the retention and claims components in Tables 5 and 6, with the exception of the exchange user fees. As mentioned in section 2B above, the retention values shown in these tables are not necessarily reflective of our average projected retention due to enrollment weighting differences.

E. SERVICE AREA COMPOSITION

In addition to their existing service area of Philadelphia, Montgomery, and Bucks counties, JHP will be entering Delaware, Lehigh, and Northampton counties in 2025. This is reflected in the service area map.

F. COMPOSITE RATING

JHP is not using composite rating in 2025.

G. CONNECTIVITY FACTORS

JHP’s 2025 products do not include connectivity features, and as such no connectivity factors are included in this rate filing.

6. Terminated Plans and Products

JHP has 3 terminated plans in 2025. The plan IDs of the terminated plans are 93909PA0010008, 93909PA0010009, and 93909PA0010010. These plans are reflected in URRT Worksheet 2 and Table 10 of the PAAM exhibits.

7. URRT Warnings

There are two warnings appearing in the URRT:

WARNING - Wksh 2 - Plan Product Info - Cell W34 - Section II - Experience Period and Current Plan Level Information - Current Enrollment is typically a whole number greater than 0 for Terminated Plans. Please double check your entry.

WARNING - Wksh 2 - Plan Product Info - Cell W35 - Section II - Experience Period and Current Plan Level Information - Current Premium PMPM is typically a dollar amount greater than 0 for Terminated Plans. Please double check your entry.

These warnings are due to terminated plan 93909PA0010009 having no current experience. We included this plan in Worksheet 2 to be comprehensive and consistent with Table 10. This warning does not affect finalization of the URRT.

8. Effective Rate Review Information

Additional information available upon request.

9. Reliance

Jefferson Partner Plans (JHP) has provided Wakely Consulting Group, LLC, an HMA Company, 8000 South Chester Street, Suite 650, Centennial, CO 80112 (Wakely) with information used to develop the 2025 Pennsylvania individual commercial product premium rates. This information includes, but is not limited to, the following:

- Estimated 2025 enrollment figures by rating area, metal, variant, network, and exchange status; and
- Geographic region to be covered in 2025; and
- Benefit designs illustrating Federal metal level compliance and compliance with Pennsylvania specific regulations; and
- Federal actuarial value calculator (AVC) inputs; and
- General administrative expenses, broker commission schedules and utilization, profit margin, and other retention components, resulting in an estimated federal MLR equal to 88.7%; and
- Quality initiatives (QI) allowed to be treated as QI under regulatory rules; and
- Product design information including a statement that 2025 coverage will only include EHBs, and will not cover pediatric dental, and
- Estimated contract reimbursements for tiers 1 and 2 providers; and
- PBM contracts and assumptions for items not yet determined; and
- Out-of-network (OON) utilization and unit cost assumptions; and

- Proportion of CSR members estimated to be enrolled in JHP plans in 2025; and
- Plan design documentation and the method of plan adjudication; and
- Annual utilization trends for 2022-2025 by category of service.

10. Actuarial Certification

[REDACTED]

We both meet the Qualification Standards of Actuarial Opinion as adopted by the American Academy of Actuaries for preparing premium rate filings for insurers. This actuarial certification applies to the Jefferson Health Plans Individual products.

1. The premium rates filed are in compliance with applicable laws, rules and guidelines of the State of Pennsylvania.
2. The premium rates filed are reasonable in relation to the benefits provided and are not excessive, inadequate, or unfairly discriminatory based on the provisions of the ACA as currently implemented. The actuarial soundness of the block of business is dependent on projected membership distribution by plan, which we received from JHP.
3. The premium rates are calculated on the basis of sound actuarial principles.
4. The premium rates are reasonable when related to the applicable coverage and characteristics of the applicable class of enrollees.
5. The projected index rates are developed in accordance with all applicable State and federal statutes and regulations (45 CFR 156.80 and 147.102) and with allowable modifiers used in the development of plan specific premium rates.
6. The premium rates filed are in compliance with the Actuarial Standards of Practice (ASOPs) promulgated by the Actuarial Standards Board that are listed below:

ASOP No. 5, Incurred Health and Disability Claims

ASOP No. 8, Regulatory Filings for Health Plan Entities

ASOP No. 12, Risk Classification

ASOP No. 23, Data Quality

ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages

ASOP No. 41, Actuarial Communication

ASOP No. 42, Determining Health and Disability Liabilities Other Than Liabilities for Incurred Claims

ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act

ASOP No. 56, Modeling

In our opinion, the premiums are reasonable in relation to the benefits provided and the population anticipated to be covered. Further, the premiums are not estimated to be either excessive or deficient based on the provisions of the ACA as currently implemented. Actual experience will vary from the estimates given the inherent uncertainty in developing premium rates under the ACA.

The index rate, allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2), and Pennsylvania's mandated CSR load and HHS induced utilization formula were used to generate plan level rates.

The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with ASOPs.

The Federal AV Calculator (with some modification) was used to determine the AV Metal Values shown in Worksheet 2 of the Unified Rate Review Template for all plans.

The Part I Unified Rate Review Template does not demonstrate the process used to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

Sincerely,

[REDACTED]

Appendix C

Development of Single Risk Pool Adjustment Factors

CHANGES IN DEMOGRAPHICS (MEMBERSHIP MIX)

The allowed claim cost adjustment for demographic shift was calculated using allowed PMPM relativities between the base period and projection periods. We used average allowed PMPM claims by metal and age band from Wakely's proprietary individual ACA database and calculated an effective total allowed PMPM for the base and the projection periods using the corresponding metal and age distributions.

While we are unable to share the actual data underlying the proprietary database, we created an exhibit that illustrates our methodology for this adjustment using arbitrary PMPMs.

Change in Demographic Factor

Allowed PMPM from Wakely Proprietary ACA Data										
	Catastrophic	Bronze	Bronze Zero	Bronze Limited	Silver 70%	Silver 73%	Silver 87%	Silver 94%	Gold	Platinum

Appendix H

Induced Utilization Factors

Per PID guidance, the induced demand factors were calculated based on the HHS induced demand formula using the following formula: $(\text{Plan AV})^2 - (\text{Plan AV}) + 1.24$.

The induced demand factors shown below are normalized to JHP's 2025 estimated membership mix by metal, averaging a 1.0 in total, and are applied to the base rate in order to develop member premiums.

Plan ID	Induced Demand Factor	Induced Demand Factor (Normalized)
93909PA0010001	1.001	0.932
93909PA0010002	0.998	0.929

		64+	3.000	1.100		

Appendix I

Rate Manual and Rate Formula

RATE Formula:

CPAIR * Age Factor * Area Factor * Tobacco Factor

Example: 21 year old with plan 93909PA0010001 in Rating Area 8, non-smoker = 212.2060610 * 1.000 * 0.990737 * 1.00 = \$210.2405

Family Structure – Family rates can be determined by adding up the rates for an individual. However, when calculating the total family rate, the charge is limited to the first three children under the plan.

Appendix J

Projected Reinsurance Impact

Per PID guidance, this filing should reflect rates with the proposed 2025 reinsurance parameters. The final parameters and our calculated impact are below.

Rating Area	Attachment Point	Cap	Coinsurance	Impact to Market Adjusted Index Rate
All	\$60,000	\$100,000	50%	-4.0%

Standard Questions

1. Membership:

- a. If the projected membership for plan year 2025 significantly differs from the current 2/1/2024 membership, please explain why.

Projected membership for plan year 2025 does not significantly differ from current 2/1/2024 membership, aside from the continued growth due to Medicaid unwinding and the inclusion of expansion regions, Rating Area 6 and Delaware County.

2. Experience Period Claims:

- a. Please confirm that all claims which are capitated have been removed from the experience period claims.

JHP entered the market in plan year 2024 and does not have a full year of experience period claims. Since the manual claims are based on statewide costs across all ACA individual products, we do not know the proportion of costs that were capitated vs fee for service in the base period. We believe that our base period allowed claims should capture all claims data, as reported on Worksheet 1 of the URRT. Excluding these claims would result in an artificially low allowed base rate. This methodology relies on accurate carrier reporting in the URRTs.

JHP does not have any capitation contracts in 2025, so we are not adjusting further for capitation payments in the projection period.

- b. Please confirm that all non-EHB claims have been removed from the experience period claims.

JHP entered the market in plan year 2024 and does not have a full year of experience period claims. We confirm that all non-EHB claims have been removed from the manual claims, based on reported data within the URRT.

- c. How are drug rebates projected to change from the base period to the rating period? How has this change been reflected in the rate development?

JHP entered the market in plan year 2024 and does not have a full year of experience period claims. We are assuming that JHP's drug rebates will be equivalent to market levels in 2025. For that reason, no adjustment has been applied to the rate development to account for projected drug rebates.

3. COVID:

- a. Please confirm that Tables 2-4 of the PAAM Exhibits do not have any COVID adjustment. Additionally, please confirm that any COVID adjustment factor in the filing is reflected in Table 5 of the PAAM Exhibits.

We confirm there are no COVID adjustments in Tables 2-4 of the PAAM Exhibits. We confirm that the COVID adjustment factor is reflected in Table 5 of the PAAM Exhibits.

- b. If there is a COVID adjustment factor other than 1.0, please provide a quantitative exhibit supporting the factor.

[REDACTED]

Please see Appendix C of the Actuarial Memorandum for the COVID-19 adjustment. The factor shown in D21 of Table 5 represents the COVID-19 adjustment factors applied to the base period data.

- c. Please provide commentary on how the Company believes services such as COVID vaccinations and COVID testing will be handled in PY25. Within your response, please clarify if these services will be considered preventative and covered at 100%.

JHP will be covering 100% of COVID vaccinations and testing.

4. Trend:

- a. [SG. Only] If the Total Annual Trend in Table 3 (weighted by credibility) and the Annual Trend used to calculate quarterly rates in Table 5A differ, please provide an explanation and exhibit in support of the variation.
- b. [SG. Only] In Table 5A, if cells K32:M32 are left to equal J32, please explain why that is a reasonable assumption.

This question is not applicable as JHP is only filing in the individual market.

5. Table 6 – Retention:

- a. Please confirm that the federal income tax is calculated using a Federal Income Tax Rate of 21%. If other adjustments were made in Table 6, cell C57, please provide a demonstration of how this number was calculated and an explanation of the other adjustments included in the calculation.

[REDACTED]

- b. Please confirm that the Risk Adjustment User Fee PMPM is consistent with HHS Final Notice of Benefit and Payment Parameters for plan year 2025.

[REDACTED]

- c. Please provide an exhibit showing the commission PMPM amount to be paid to brokers in the following situations: Open-Enrollment Enrollee – Renewing, Open Enrollment Enrollee – New, Special Enrollment Period Enrollee – New, Special Enrollment Enrollee – Renewing. If the commission PMPM is not consistent between the four options above, please provide a detailed explanation as to the reason for the difference.

[REDACTED]

6. Pricing AVs:

- a. Please confirm that the Pricing AVs were calculated using a single risk pool (i.e., claims/utilization experience is not separated by metal level).

We confirm that the Pricing AVs were calculated using a single risk pool.

- b. Please identify and support any differences between the company's metallic AV calculator results and the corresponding Pricing AVs.

The pricing AVs differ from the Federal AVC outputs primarily because the estimated allowed PMPMs used in developing pricing AVs are different than those underlying the Federal AV calculator. This is due to a leveraging effect for fixed cost sharing elements (e.g. copays, deductibles and MOOPs). The other variance is differences in the methodology of the pricing models and underlying data of the modeling, which ultimately results in varying service category distributions and continuance tables. The pricing AV model also includes more detail in cost-sharing inputs compared to the Federal AVC. Finally, due to mandated factors, we have included a 30% load to silver on exchange plans.

7. Expanded Bronze Plans:

- a. Please provide an exhibit which demonstrates that the criteria for expanded bronze plans have been met.

Per our understanding, to qualify as an expanded bronze, a plan must pay for at least one major service before the deductible is met. All three bronze plans that JHP is offering in 2025 offer one free PCP visit before cost sharing begins and cover PCP visits, specialist visits, generic drugs, and preferred brand drugs pre-deductible. Please see the Federal AV screenshots incorporated with this filing for an exhibit of this benefit coverage.

8. PAAM Exhibits – Consumer Factors:

- a. Please provide quantitative and qualitative support for the proposed geographic rating area factors, if different from the previous year.

The CY2024 rates had a 1.0 geographic factor given JHP only filed rates in one region. Geographic rating area factors are required in the CY2025 premium rates given plans are now offered in Rating Areas 8 and 6. The cost differentials by region, not accounting for morbidity differences, are included in the geographic factors. The 2023 Interim Risk Adjustment Report GCF factors by rating area were used as the basis for the geographic factors.

- b. Please provide quantitative and qualitative support for the proposed network factors, if different from the previous year.

[REDACTED]

9. MLR Exhibit:

- a. Please complete table below which summarizes the most recent three years of complete MLR information.
 - i. Actual is the final information which was filed for the specified calendar year
 - ii. Projected is the information which was projected in the final annual filing for the given year (i.e., 2021 projected information is from the plan year 2021 annual filing submitted in 2020) MLR Member Months Calendar Year Actual Projected Actual Projected 21 2020 2021 2022

Calendar Year	MLR		Member Months	
	Actual	Projected	Actual	Projected
2020	N/A	N/A	N/A	N/A
2021	N/A	N/A	N/A	N/A
2022	N/A	N/A	N/A	N/A

- b. Are the MLRs and Member Months between Actual and Pricing comparable? If not, explain.
- c. Does the insurer expect to pay MLR rebates for the 3-year period above?

These questions are not applicable as JHP entered the market in 2024.

10. Plan of Withdrawal:

- a. Please confirm that a Plan of Withdrawal has been submitted if any plans are being discontinued.
- b. For further information regarding the Plan of Withdrawal process, click here. Please send all Plan of Withdrawals to Jeff Rohaly, wrohaly@pa.gov.

JHP is not submitting a Plan of Withdrawal as no plans are being withdrawn midway through the filing period.

11. Transitional Plans:

- a. Starting in October 2024, the PID will discontinue the non-enforcement policy for individual transitional plans (the non-enforcement policy for small group transitional plans will continue until further notice, or until the federal government discontinues its non-enforcement policy). If applicable, please discuss the migration of individual transitional members into ACA-compliant plans effective January 1, 2025.

This question is not applicable as JHP has no transitional plans.

12. Copay Adjustment Programs

- a. Does the company use a copay adjustment program (also known as a copay accumulator program)?
- b. How does the company handle copay assistance coupons? For example, does the coupon apply to the MOOP?
- c. If any change to such a program has resulted in a pricing impact, please include a detailed quantitative exhibit supporting the pricing impact.

JHP does not use a copay adjustment program. Assistance coupons do not apply to the MOOP and there is no pricing impact of this program.

Jefferson Health Plans Redaction Justification – May 15th, 2024 filing

Cover Letter

- Redacted names and contact information (page 2)

URRT Part III – Federal Actuarial Memorandum / PA Actuarial Memorandum

- Redacted Name of opining actuary (page 7, 27, 28)
- Redated COVID-19 impact (page 14, 35, 37) – confidential and proprietary information
- Redacted Company Contact Information (page 7) – name, telephone number, email address
- Redacted Projected Risk Adjustment Transfers – confidential and proprietary information specifying a company’s anticipated risk level in relation to the state average risk level (page 15, 35, 36, 37)
- Specific provider contracting information (page 5, 13, 23, 35, 37, 40) – confidential and proprietary information
- Commission schedules (page 17) – confidential and proprietary information

PA Actuarial Memo Rate Exhibits

- Redacted column C through E in Tabs “II.a. Reins Table – Exp” and “II.a. Reins Table – Prof” – confidential and proprietary information
- Redacted Network Factors in tabs “II Rate Development & Change” and “V Consumer Factors” – confidential and proprietary information
- Redacted Other Factor in tab “II Rate Development & Change” – confidential and proprietary information
- Redacted Projected Risk Adjustment Transfers and PLRS on tabs “II Rate Development & Change” and “VII Risk Adjustment” – confidential and proprietary information specifying a company’s anticipated risk level in relation to the state average risk level

Standard Questions

- Redated question 3b of standard questions, COVID-19 impact (page 47) – confidential and proprietary information
- Redacted question 5 of standard questions, commission schedules (page 47) – confidential and proprietary information
- Redacted question 8b pf standard questions, specific provider contracting information (page 48) – confidential and proprietary information

Unique Plan Design Supporting Documentation and Justification

- Federal AV screenshots (page 86)

FEDERAL AV CALCULATOR SCREENSHOTS

Unique Plan Design Supporting Documentation and Justification

HIOS Issuer ID: 93909

HIOS Product IDs: 93909PA001

Applicable HIOS Plan IDs (standard Component): 93909PA0010001, 93909PA0010003, 93909PA0010004, 93909PA0010005, 93909PA0010006, 93909PA0010007, 93909PA0010012, 93909PA0010013, 93909PA0010016, 93909PA0010017, 93909PA0010018, 93909PA0010019, 93909PA0010020, 93909PA0010021

Reasons the plan design is unique, that is, the reason benefits are incompatible with the parameters of the Actuarial Value Calculator (AVC) and their materiality:

1. JHP is offering two generic drug tiers across select plans, a preferred generic and a non-preferred generic. In the Federal AVC, an effective copay was input to reflect these two tiers. Given JHP does not have experience data, an assumed utilization split was calculated using Wakely's proprietary database of nationally-representative ACA data. This was then applied to the corresponding copays to develop the effective generic copay.
2. Per the CMS 2025 Federal AVC instructions, when a medical deductible is equal to zero dollars and has all copays for medical services, a combined deductible may be applied. This applies to several of JHP's plan designs. Although, we are not considering this adjustment a unique plan design when both Tiers are run under a combined deductibles instead of separate deductibles. We are considering this a unique plan design if there is an inconsistency in how we run each Tier due to varying deductibles and not all cost-sharing being copays.

The Federal AVC does not allow for functionality in situations where Tier 1 is run as a combined deductible, but separate deductibles on Tier 2. For these plans, we ran Tiers 1 and 2 separately in the Federal AVC, and then blended the resulting AVs outside of the calculator using a projected tier split to arrive at our effective Federal AV for these plans.

Acceptable alternate method used per 156.135(b)(2) or 156.135(b)(3):

156.135(b)(2) was used for the generic drug copay adjustment.

156.135(b)(3) was used for the \$0 medical deductible two-tier adjustment.

FEDERAL AV CALCULATOR SCREENSHOTS

Confirmation that only in-network cost sharing, including multitier networks, was considered:

We confirm that only in-network cost sharing, including multitier networks, was considered.

Description of the standardized plan population data used:

Wakely’s proprietary database of nationally-representative Individual ACA data was used to calculate the utilization split between the two generic tiers. JHP’s emerging experience on tier utilization as well as market intel was used to estimate an appropriate tier split for the \$0 medical deductible plans. We did not adjust the backing continuance tables.

If the method described in 156.135(b)(2) was used, a description of how the benefits were modified to fit the parameters of the AV calculator:

Generic Drug Copay Differential

On the following plans, JHP intends to offer two generic drug tiers with different copay amounts. For purposes of fitting this plan design into the Federal AVC, the two copay amounts were weighted by a projected utilization split to arrive at an effective copay for the AV input. Wakely’s proprietary ACA data indicates that the Tier 1/Tier 2 generic utilization split based on an analysis using JHP’s proposed formulary was 35%/65%. Results were rounded to the nearest dollar.

Any plans not included in the exhibit below only have one generic drug Tier.

Plan ID	Member Cost Sharing		
	Preferred Generic (Tier 1)	Generic (Tier 2)	AV Input
93909PA0010003	\$5	\$20	\$14.75
93909PA0010003-04	\$5	\$20	\$14.75

If the method described in 156.135(b)(3) was used, a description of the data and method used to develop the adjustments:

\$0 Medical Deductible tiered plan design

We are blending the tier 1 and tier 2 AVs after the AVs are calculated within the Federal AVC in order to calculate the combined effective AV. The projected utilization split of 90% on tier 1 and 10% on tier 2 is from JHP's emerging experience as well as market intel. The effective AV is the only AV that should be tested for de minimis compliance, not the tier 1 and tier 2 AVs in isolation. The below table represents the plans for which this applies.

Plan ID	Federal AV		
	Tier 1	Tier 2	Blended
93909PA0010001	65.5%	59.1%	64.9%

FEDERAL AV CALCULATOR SCREENSHOTS

Below is a summary of the adjustment methodology used for each plan. On/off-exchange variants are not detailed because the methodology is identical for the on/off-exchange variants of the same plan ID. The far-right column is reflective of the input in column I of Table 10 of the PAAM exhibits for the non-CSR variant plans. In the event where both approach 1 and approach 2 are applicable to a plan, we input approach 2.

Plan ID	Approach 1?	Approach 2?	AV Input for Table 10
93909PA0010001	N	Y	Approach 2
93909PA0010002	N	N	Standard AV
93909PA0010003	Y	N	Approach 1
93909PA0010003-04	Y	Y	Approach 2
93909PA0010003-05	Y	Y	Approach 2
93909PA0010003-06	N	Y	Approach 2
93909PA0010004	Y	N	Approach 1
93909PA0010004-04	Y	N	Approach 1
93909PA0010004-05	Y	N	Approach 1
93909PA0010004-06	N	Y	Approach 2
93909PA0010005	Y	N	Approach 1
93909PA0010005-04	Y	N	Approach 1
93909PA0010005-05	Y	N	Approach 1

FEDERAL AV CALCULATOR SCREENSHOTS

Certification Language:

The development of the actuarial value is based on one of the acceptable alternative methods outlined in CFR 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.

The analysis was:

- (i) conducted by a member of the American Academy of Actuaries and
- (ii) performed in accordance with generally accepted actuarial principles and methods.

The following pages show the screenshots from the Federal AV calculator of the plan designs. We have only included one screenshot for each respective plan design, with the applicable PLAN IDs listed.

[REDACTED]

Jefferson Health Plans Redaction Justification – May 15th, 2024 filing

Cover Letter

- Redacted names and contact information (page 2)

URRT Part III – Federal Actuarial Memorandum / PA Actuarial Memorandum

- Redacted Name of opining actuary (page 7, 27, 28)
- Redated COVID-19 impact (page 14, 35, 37) – confidential and proprietary information
- Redacted Company Contact Information (page 7) – name, telephone number, email address
- Redacted Projected Risk Adjustment Transfers – confidential and proprietary information specifying a company’s anticipated risk level in relation to the state average risk level (page 15, 35, 36, 37)
- Specific provider contracting information (page 5, 13, 23, 35, 37, 40) – confidential and proprietary information
- Commission schedules (page 17) – confidential and proprietary information

PA Actuarial Memo Rate Exhibits

- Redacted column C through E in Tabs “II.a. Reins Table – Exp” and “II.a. Reins Table – Prof” – confidential and proprietary information
- Redacted Network Factors in tabs “II Rate Development & Change” and “V Consumer Factors” – confidential and proprietary information
- Redacted Other Factor in tab “II Rate Development & Change” – confidential and proprietary information
- Redacted Projected Risk Adjustment Transfers and PLRS on tabs “II Rate Development & Change” and “VII Risk Adjustment” – confidential and proprietary information specifying a company’s anticipated risk level in relation to the state average risk level

Standard Questions

- Redated question 3b of standard questions, COVID-19 impact (page 47) – confidential and proprietary information
- Redacted question 5 of standard questions, commission schedules (page 47) – confidential and proprietary information
- Redacted question 8b pf standard questions, specific provider contracting information (page 48) – confidential and proprietary information

Unique Plan Design Supporting Documentation and Justification

- Federal AV screenshots (page 86)
